## CHAPTER 11

# Operational Response Tag Elements Common to EX Series, M, MX, and T Series, and QFX Series

This chapter lists the Extensible Markup Language (XML) tag elements in the Junos XML application programming interface (API) that contain operational information. The Junos XML protocol and NETCONF servers return them in response to requests from client applications.

The tags listed in this chapter are common to devices belonging to the following platforms:

- EX Series
- M Series
- MX Series
- T Series
- QFX Series

The tags are divided into the following sections and listed in alphabetical order within each section.

## CHAPTER 12

# Operational Response Tag Elements Common to J Series, M, MX, and T Series, and SRX Series

This chapter lists the Extensible Markup Language (XML) tag elements in the Junos XML application programming interface (API) that contain operational information. The Junos XML protocol and NETCONF servers return them in response to requests from client applications.

The tags listed in this chapter are common to devices belonging to the following platforms:

- J Series
- M Series
- MX Series
- T Series
- SRX Series

The tags are divided into the following sections and listed in alphabetical order within each section.

- [Summary of Connectivity Fault Management Response Tags on page 6587](#)
- [Summary of Chassis Response Tags on page 6831](#)
- [Summary of Layer 2 Control Protocol Response Tags on page 7061](#)

## CHAPTER 13

# Operational Response Tag Elements Common to EX Series, J Series, QFX Series, and SRX Series

This chapter lists the Extensible Markup Language (XML) tag elements in the Junos XML application programming interface (API) that contain operational information. The Junos XML protocol and NETCONF servers return them in response to requests from client applications.

The tags listed in this chapter are common to devices belonging to the following platforms:

- EX Series
- J Series
- QFX Series
- SRX Series

The tags are divided into the following sections and listed in alphabetical order within each section.

- [Summary of Autoinstallation Response Tags on page 7124](#)
- [Summary of DHCP Response Tags on page 7125](#)
- [Summary of IGMP Snooping Response Tags on page 7141](#)

# Operational Response Tag Elements Specific to M, MX, and T Series

This chapter lists the Extensible Markup Language (XML) tag elements in the Junos XML application programming interface (API) that contain operational information. The Junos XML protocol and NETCONF servers return them in response to requests from client applications.

The tags listed in this chapter are specific to devices belonging to the following platforms:

- M Series
- MX Series
- T Series

The tags are divided into the following sections and listed in alphabetical order within each section.

- [Summary of DHCP Response Tags on page 7251](#)
- [Summary of Multicast and IGMP Snooping Response Tags on page 7263](#)
