This product includes the Envoy SNMP Engine, developed by Epilogue Technology, an Integrated Systems Company. Copyright © 1986-1997, Epilogue Technology Corporation. All rights reserved. This program and its documentation were developed at private expense, and no part of them is in the public domain.

This product includes memory allocation software developed by Mark Moraes, copyright © 1988, 1989, 1993, University of Toronto.

This product includes FreeBSD software developed by the University of California, Berkeley, and its contributors. All of the documentation and software included in the 4.4BSD and 4.4BSD-Lite Releases is copyrighted by the Regents of the University of California. Copyright © 1979, 1980, 1983, 1986, 1988, 1989, 1991, 1992, 1993, 1994. The Regents of the University of California. All rights reserved.

GateD software copyright © 1995, the Regents of the University. All rights reserved. Gate Daemon was originated and developed through release 3.0 by Cornell University and its collaborators. Gated is based on Kirton's EGP, UC Berkeley's routing daemon (routed), and DCN's HELLO routing protocol. Development of Gated has been supported in part by the National Science Foundation. Portions of the GateD software copyright © 1988, Regents of the University of California. All rights reserved. Portions of the GateD software copyright © 1991, D. L. S. Associates.

This product includes software developed by Maker Communications, Inc., copyright © 1996, 1997, Maker Communications, Inc.

Juniper Networks, Junos, Steel-Belted Radius, NetScreen, and ScreenOS are registered trademarks of Juniper Networks, Inc. in the United States and other countries. The Juniper Networks Logo, the Junos logo, and JunosE are trademarks of Juniper Networks, Inc. Revision History  
August 2011—R1 Junos 11.3

The information in this document is current as of the date listed in the revision history.

#### YEAR 2000 NOTICE

Juniper Networks hardware and software products are Year 2000 compliant. The Junos OS has no known time-related limitations through the year 2038. However, the NTP application is known to have some difficulty in the year 2036.

## END USER LICENSE AGREEMENT

**READ THIS END USER LICENSE AGREEMENT ("AGREEMENT") BEFORE DOWNLOADING, INSTALLING, OR USING THE SOFTWARE.** BY DOWNLOADING, INSTALLING, OR USING THE SOFTWARE OR OTHERWISE EXPRESSING YOUR AGREEMENT TO THE TERMS CONTAINED HEREIN, YOU (AS CUSTOMER OR IF YOU ARE NOT THE CUSTOMER, AS A REPRESENTATIVE/AGENT AUTHORIZED TO BIND THE CUSTOMER) CONSENT TO BE BOUND BY THIS AGREEMENT. IF YOU DO NOT OR CANNOT AGREE TO THE TERMS CONTAINED HEREIN, THEN (A) DO NOT DOWNLOAD, INSTALL, OR USE THE SOFTWARE, AND (B) YOU MAY CONTACT JUNIPER NETWORKS REGARDING LICENSE TERMS.

1. **The Parties.** The parties to this Agreement are (i) Juniper Networks, Inc. (if the Customer's principal office is located in the Americas) or Juniper Networks (Cayman) Limited (if the Customer's principal office is located outside the Americas) (such applicable entity being referred to herein as "Juniper"), and (ii) the person or organization that originally purchased from Juniper or an authorized Juniper reseller the applicable license(s) for use of the Software ("Customer") (collectively, the "Parties").

2. **The Software.** In this Agreement, "Software" means the program modules and features of the Juniper or Juniper-supplied software, for which Customer has paid the applicable license or support fees to Juniper or an authorized Juniper reseller, or which was embedded by Juniper in equipment which Customer purchased from Juniper or an authorized Juniper reseller. "Software" also includes updates, upgrades and new releases of such software. "Embedded Software" means Software which Juniper has embedded in or loaded onto the Juniper equipment and any updates, upgrades, additions or replacements which are subsequently embedded in or loaded onto the equipment.

3. **License Grant.** Subject to payment of the applicable fees and the limitations and restrictions set forth herein, Juniper grants to Customer a non-exclusive and non-transferable license, without right to sublicense, to use the Software, in executable form only, subject to the following use restrictions:

- a. Customer shall use Embedded Software solely as embedded in, and for execution on, Juniper equipment originally purchased by Customer from Juniper or an authorized Juniper reseller.
- b. Customer shall use the Software on a single hardware chassis having a single processing unit, or as many chassis or processing units for which Customer has paid the applicable license fees; provided, however, with respect to the Steel-Belted Radius or Odyssey Access Client software only, Customer shall use such Software on a single computer containing a single physical random access memory space and containing any number of processors. Use of the Steel-Belted Radius or IMS AAA software on multiple computers or virtual machines (e.g., Solaris zones) requires multiple licenses, regardless of whether such computers or virtualizations are physically contained on a single chassis.
- c. Product purchase documents, paper or electronic user documentation, and/or the particular licenses purchased by Customer may specify limits to Customer's use of the Software. Such limits may restrict use to a maximum number of seats, registered endpoints, concurrent users, sessions, calls, connections, subscribers, clusters, nodes, realms, devices, links, ports or transactions, or require the purchase of separate licenses to use particular features, functionalities, services, applications, operations, or capabilities, or provide throughput, performance, configuration, bandwidth, interface, processing, temporal, or geographical limits. In addition, such limits may restrict the use of the Software to managing certain kinds of networks or require the Software to be used only in conjunction with other specific Software. Customer's use of the Software shall be subject to all such limitations and purchase of all applicable licenses.
- d. For any trial copy of the Software, Customer's right to use the Software expires 30 days after download, installation or use of the Software. Customer may operate the Software after the 30-day trial period only if Customer pays for a license to do so. Customer may not extend or create an additional trial period by re-installing the Software after the 30-day trial period.
- e. The Global Enterprise Edition of the Steel-Belted Radius software may be used by Customer only to manage access to Customer's enterprise network. Specifically, service provider customers are expressly prohibited from using the Global Enterprise Edition of the Steel-Belted Radius software to support any commercial network access services.

The foregoing license is not transferable or assignable by Customer. No license is granted herein to any user who did not originally purchase the applicable license(s) for the Software from Juniper or an authorized Juniper reseller.

4. **Use Prohibitions.** Notwithstanding the foregoing, the license provided herein does not permit the Customer to, and Customer agrees not to and shall not: (a) modify, unbundle, reverse engineer, or create derivative works based on the Software; (b) make unauthorized copies of the Software (except as necessary for backup purposes); (c) rent, sell, transfer, or grant any rights in and to any copy of the Software, in any form, to any third party; (d) remove any proprietary notices, labels, or marks on or in any copy of the Software or any product in which the Software is embedded; (e) distribute any copy of the Software to any third party, including as may be embedded in Juniper equipment sold in the secondhand market; (f) use any 'locked' or key-restricted feature, function, service, application, operation, or capability without first purchasing the applicable license(s) and obtaining a valid key from Juniper, even if such feature, function, service, application, operation, or capability is enabled without a key; (g) distribute any key for the Software provided by Juniper to any third party; (h) use the

Software in any manner that extends or is broader than the uses purchased by Customer from Juniper or an authorized Juniper reseller; (i) use Embedded Software on non-Juniper equipment; (j) use Embedded Software (or make it available for use) on Juniper equipment that the Customer did not originally purchase from Juniper or an authorized Juniper reseller; (k) disclose the results of testing or benchmarking of the Software to any third party without the prior written consent of Juniper; or (l) use the Software in any manner other than as expressly provided herein.

5. **Audit.** Customer shall maintain accurate records as necessary to verify compliance with this Agreement. Upon request by Juniper, Customer shall furnish such records to Juniper and certify its compliance with this Agreement.

6. **Confidentiality.** The Parties agree that aspects of the Software and associated documentation are the confidential property of Juniper. As such, Customer shall exercise all reasonable commercial efforts to maintain the Software and associated documentation in confidence, which at a minimum includes restricting access to the Software to Customer employees and contractors having a need to use the Software for Customer's internal business purposes.

7. **Ownership.** Juniper and Juniper's licensors, respectively, retain ownership of all right, title, and interest (including copyright) in and to the Software, associated documentation, and all copies of the Software. Nothing in this Agreement constitutes a transfer or conveyance of any right, title, or interest in the Software or associated documentation, or a sale of the Software, associated documentation, or copies of the Software.

8. **Warranty, Limitation of Liability, Disclaimer of Warranty.** The warranty applicable to the Software shall be as set forth in the warranty statement that accompanies the Software (the "Warranty Statement"). Nothing in this Agreement shall give rise to any obligation to support the Software. Support services may be purchased separately. Any such support shall be governed by a separate, written support services agreement. TO THE MAXIMUM EXTENT PERMITTED BY LAW, JUNIPER SHALL NOT BE LIABLE FOR ANY LOST PROFITS, LOSS OF DATA, OR COSTS OR PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES, OR FOR ANY SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THIS AGREEMENT, THE SOFTWARE, OR ANY JUNIPER OR JUNIPER-SUPPLIED SOFTWARE. IN NO EVENT SHALL JUNIPER BE LIABLE FOR DAMAGES ARISING FROM UNAUTHORIZED OR IMPROPER USE OF ANY JUNIPER OR JUNIPER-SUPPLIED SOFTWARE. EXCEPT AS EXPRESSLY PROVIDED IN THE WARRANTY STATEMENT TO THE EXTENT PERMITTED BY LAW, JUNIPER DISCLAIMS ANY AND ALL WARRANTIES IN AND TO THE SOFTWARE (WHETHER EXPRESS, IMPLIED, STATUTORY, OR OTHERWISE), INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NONINFRINGEMENT. IN NO EVENT DOES JUNIPER WARRANT THAT THE SOFTWARE, OR ANY EQUIPMENT OR NETWORK RUNNING THE SOFTWARE, WILL OPERATE WITHOUT ERROR OR INTERRUPTION, OR WILL BE FREE OF VULNERABILITY TO INTRUSION OR ATTACK. In no event shall Juniper's or its suppliers' or licensors' liability to Customer, whether in contract, tort (including negligence), breach of warranty, or otherwise, exceed the price paid by Customer for the Software that gave rise to the claim, or if the Software is embedded in another Juniper product, the price paid by Customer for such other product. Customer acknowledges and agrees that Juniper has set its prices and entered into this Agreement in reliance upon the disclaimers of warranty and the limitations of liability set forth herein, that the same reflect an allocation of risk between the Parties (including the risk that a contract remedy may fail of its essential purpose and cause consequential loss), and that the same form an essential basis of the bargain between the Parties.

9. **Termination.** Any breach of this Agreement or failure by Customer to pay any applicable fees due shall result in automatic termination of the license granted herein. Upon such termination, Customer shall destroy or return to Juniper all copies of the Software and related documentation in Customer's possession or control.

10. **Taxes.** All license fees payable under this agreement are exclusive of tax. Customer shall be responsible for paying Taxes arising from the purchase of the license, or importation or use of the Software. If applicable, valid exemption documentation for each taxing jurisdiction shall be provided to Juniper prior to invoicing, and Customer shall promptly notify Juniper if their exemption is revoked or modified. All payments made by Customer shall be net of any applicable withholding tax. Customer will provide reasonable assistance to Juniper in connection with such withholding taxes by promptly: providing Juniper with valid tax receipts and other required documentation showing Customer's payment of any withholding taxes; completing appropriate applications that would reduce the amount of withholding tax to be paid; and notifying and assisting Juniper in any audit or tax proceeding related to transactions hereunder. Customer shall comply with all applicable tax laws and regulations, and Customer will promptly pay or reimburse Juniper for all costs and damages related to any liability incurred by Juniper as a result of Customer's non-compliance or delay with its responsibilities herein. Customer's obligations under this Section shall survive termination or expiration of this Agreement.

11. **Export.** Customer agrees to comply with all applicable export laws and restrictions and regulations of any United States and any applicable foreign agency or authority, and not to export or re-export the Software or any direct product thereof in violation of any such restrictions, laws or regulations, or without all necessary approvals. Customer shall be liable for any such violations. The version of the Software supplied to Customer may contain encryption or other capabilities restricting Customer's ability to export the Software without an export license.

12. **Commercial Computer Software.** The Software is "commercial computer software" and is provided with restricted rights. Use, duplication, or disclosure by the United States government is subject to restrictions set forth in this Agreement and as provided in DFARS 227.7201 through 227.7202-4, FAR 12.212, FAR 27.405(b)(2), FAR 52.227-19, or FAR 52.227-14 (ALT III) as applicable.

13. **Interface Information.** To the extent required by applicable law, and at Customer's written request, Juniper shall provide Customer with the interface information needed to achieve interoperability between the Software and another independently created program, on payment of applicable fee, if any. Customer shall observe strict obligations of confidentiality with respect to such information and shall use such information in compliance with any applicable terms and conditions upon which Juniper makes such information available.

14. **Third Party Software.** Any licensor of Juniper whose software is embedded in the Software and any supplier of Juniper whose products or technology are embedded in (or services are accessed by) the Software shall be a third party beneficiary with respect to this Agreement, and such licensor or vendor shall have the right to enforce this Agreement in its own name as if it were Juniper. In addition, certain third party software may be provided with the Software and is subject to the accompanying license(s), if any, of its respective owner(s). To the extent portions of the Software are distributed under and subject to open source licenses obligating Juniper to make the source code for such portions publicly available (such as the GNU General Public License ("GPL") or the GNU Library General Public License ("LGPL")), Juniper will make such source code portions (including Juniper modifications, as appropriate) available upon request for a period of up to three years from the date of distribution. Such request can be made in writing to Juniper Networks, Inc., 1194 N. Mathilda Ave., Sunnyvale, CA 94089, ATTN: General Counsel. You may obtain a copy of the GPL at <http://www.gnu.org/licenses/gpl.html>, and a copy of the LGPL at <http://www.gnu.org/licenses/lgpl.html>.

15. **Miscellaneous.** This Agreement shall be governed by the laws of the State of California without reference to its conflicts of laws principles. The provisions of the U.N. Convention for the International Sale of Goods shall not apply to this Agreement. For any disputes arising under this Agreement, the Parties hereby consent to the personal and exclusive jurisdiction of, and venue in, the state and federal courts within Santa Clara County, California. This Agreement constitutes the entire and sole agreement between Juniper and the Customer with respect to the Software, and supersedes all prior and contemporaneous agreements relating to the Software, whether oral or written (including any inconsistent terms contained in a purchase order), except that the terms of a separate written agreement executed by an authorized Juniper representative and Customer shall govern to the extent such terms are inconsistent or conflict with terms contained herein. No modification to this Agreement nor any waiver of any rights hereunder shall be effective unless expressly assented to in writing by the party to be charged. If any portion of this Agreement is held invalid, the Parties agree that such invalidity shall not affect the validity of the remainder of this Agreement. This Agreement and associated documentation has been written in the English language, and the Parties agree that the English version will govern. (For Canada: Les parties aux présentes confirment leur volonté que cette convention de même que tous les documents y compris tout avis qui s'y rattache, soient rédigés en langue anglaise. (Translation: The parties confirm that this Agreement and all related documentation is and will be in the English language)).

# About This Guide

This preface provides the following guidelines for using the *Junos<sup>®</sup> OS XML API Operational Reference*:

- [Junos OS Documentation and Release Notes on page cccxxxv](#)
- [Objectives on page cccxxxv](#)
- [Audience on page cccxxxvi](#)
- [Supported Platforms on page cccxxxvii](#)
- [Using the Examples in This Manual on page cccxxxvii](#)
- [Documentation Conventions on page cccxxxviii](#)
- [Documentation Feedback on page cccxl](#)
- [Requesting Technical Support on page cccxl](#)

## Junos OS Documentation and Release Notes

---

For a list of related Junos OS documentation, see <http://www.juniper.net/techpubs/software/junos/>.

If the information in the latest release notes differs from the information in the documentation, follow the *Junos OS Release Notes*.

To obtain the most current version of all Juniper Networks<sup>®</sup> technical documentation, see the product documentation page on the Juniper Networks website at <http://www.juniper.net/techpubs/>.

Juniper Networks supports a technical book program to publish books by Juniper Networks engineers and subject matter experts with book publishers around the world. These books go beyond the technical documentation to explore the nuances of network architecture, deployment, and administration using the Junos operating system (Junos OS) and Juniper Networks devices. In addition, the Juniper Networks Technical Library, published in conjunction with O'Reilly Media, explores improving network security, reliability, and availability using Junos OS configuration techniques. All the books are for sale at technical bookstores and book outlets around the world. The current list can be viewed at <http://www.juniper.net/books>.

## Objectives

---

This reference provides complete information about the tag elements in the Junos Extensible Markup Language (XML) application programming interface (API) that the

Junos XML management protocol and NETCONF XML Management protocol client applications can use to request information about the operational status of a router. The tag elements are equivalent to operational mode commands in the Junos OS command-line interface (CLI).

**NOTE:** For additional information about the Junos XML API software—either corrections to or information that might have been omitted from this guide—see the software release notes at <http://www.juniper.net/>.

---

## Audience

This reference is designed for Juniper Networks customers who want to write custom applications for monitoring routing platforms that run the Junos OS. It assumes that you are familiar with basic terminology and concepts of XML, with XML-parsing utilities such as the Document Object Model (DOM) or Simple API for XML (SAX), and with the Junos OS command-line interface (CLI).

In addition, you need a broad understanding of networks in general, the Internet in particular, networking principles, and network configuration. You must also be familiar with one or more of the following Internet routing protocols:

- Border Gateway Protocol (BGP)
- Distance Vector Multicast Routing Protocol (DVMRP)
- Intermediate System-to-Intermediate System (IS-IS)
- Internet Control Message Protocol (ICMP) router discovery
- Internet Group Management Protocol (IGMP)
- Multiprotocol Label Switching (MPLS)
- Open Shortest Path First (OSPF)
- Protocol-Independent Multicast (PIM)
- Resource Reservation Protocol (RSVP)
- Routing Information Protocol (RIP)
- Simple Network Management Protocol (SNMP)

Personnel operating the equipment must be trained and competent; must not conduct themselves in a careless, willfully negligent, or hostile manner; and must abide by the instructions provided by the documentation.

## Supported Platforms

---

For the features described in this reference, the Junos OS currently supports the following devices:

- J Series
- M Series
- MX Series
- T Series
- EX Series
- QFX Series
- SRX Series

## Using the Examples in This Manual

---

If you want to use the examples in this manual, you can use the **load merge** or the **load merge relative** command. These commands cause the software to merge the incoming configuration into the current candidate configuration. If the example configuration contains the top level of the hierarchy (or multiple hierarchies), the example is a *full example*. In this case, use the **load merge** command.

If the example configuration does not start at the top level of the hierarchy, the example is a *snippet*. In this case, use the **load merge relative** command. These procedures are described in the following sections.

### Merging a Full Example

To merge a full example, follow these steps:

1. From the HTML or PDF version of the manual, copy a configuration example into a text file, save the file with a name, and copy the file to a directory on your routing platform.

For example, copy the following configuration to a file and name the file **ex-script.conf**. Copy the **ex-script.conf** file to the **/var/tmp** directory on your routing platform.

```
system {
  scripts {
    commit {
      file ex-script.xml;
    }
  }
}
interfaces {
  fxp0 {
    disable;
    unit 0 {
      family inet {
        address 10.0.0.1/24;
      }
    }
  }
}
```

```
    }  
  }  
}
```

2. Merge the contents of the file into your routing platform configuration by issuing the **load merge** configuration mode command:

```
[edit]  
user@host# load merge /var/tmp/ex-script.conf  
load complete
```

## Merging a Snippet

To merge a snippet, follow these steps:

1. From the HTML or PDF version of the manual, copy a configuration snippet into a text file, save the file with a name, and copy the file to a directory on your routing platform.

For example, copy the following snippet to a file and name the file **ex-script-snippet.conf**. Copy the **ex-script-snippet.conf** file to the **/var/tmp** directory on your routing platform.

```
commit {  
  file ex-script-snippet.xml; }
```

2. Move to the hierarchy level that is relevant for this snippet by issuing the following configuration mode command:

```
[edit]  
user@host# edit system scripts  
[edit system scripts]
```

3. Merge the contents of the file into your routing platform configuration by issuing the **load merge relative** configuration mode command:

```
[edit system scripts]  
user@host# load merge relative /var/tmp/ex-script-snippet.conf  
load complete
```

For more information about the **load** command, see the [Junos OS CLI User Guide](#).

---

## Documentation Conventions

Table 1 on page [cccxxxix](#) defines notice icons used in this guide.

Table 1: Notice Icons

Icon	Meaning	Description
	Informational note	Indicates important features or instructions.
	Caution	Indicates a situation that might result in loss of data or hardware damage.
	Warning	Alerts you to the risk of personal injury or death.
	Laser warning	Alerts you to the risk of personal injury from a laser.

Table 2 on page [cccxxxix](#) defines the text and syntax conventions used in this guide.

Table 2: Text and Syntax Conventions

Convention	Description	Examples
<b>Bold text like this</b>	Represents text that you type.	To enter configuration mode, type the <b>configure</b> command:  <code>user@host&gt; configure</code>
Fixed-width text like this	Represents output that appears on the terminal screen.	<code>user@host&gt; show chassis alarms</code> <code>No alarms currently active</code>
<i>Italic text like this</i>	<ul style="list-style-type: none"> <li>Introduces important new terms.</li> <li>Identifies book names.</li> <li>Identifies RFC and Internet draft titles.</li> </ul>	<ul style="list-style-type: none"> <li>A policy <i>term</i> is a named structure that defines match conditions and actions.</li> <li><i>Junos OS System Basics Configuration Guide</i></li> <li>RFC 1997, <i>BGP Communities Attribute</i></li> </ul>
<i>Italic text like this</i>	Represents variables (options for which you substitute a value) in commands or configuration statements.	Configure the machine's domain name:  [edit] root@# <b>set system domain-name</b> <i>domain-name</i>
Text like this	Represents names of configuration statements, commands, files, and directories; interface names; configuration hierarchy levels; or labels on routing platform components.	<ul style="list-style-type: none"> <li>To configure a stub area, include the <b>stub</b> statement at the [edit protocols <b>ospf area area-id</b>] hierarchy level.</li> <li>The console port is labeled <b>CONSOLE</b>.</li> </ul>
< > (angle brackets)	Enclose optional keywords or variables.	<code>stub &lt;default-metric metric&gt;;</code>

Table 2: Text and Syntax Conventions (*continued*)

Convention	Description	Examples
(pipe symbol)	Indicates a choice between the mutually exclusive keywords or variables on either side of the symbol. The set of choices is often enclosed in parentheses for clarity.	<b>broadcast   multicast</b>  <i>(string1   string2   string3)</i>
# (pound sign)	Indicates a comment specified on the same line as the configuration statement to which it applies.	<b>rsvp { # Required for dynamic MPLS only</b>
[ ] (square brackets)	Enclose a variable for which you can substitute one or more values.	<b>community name members [ community-ids ]</b>
Indentation and braces ( { } )	Identify a level in the configuration hierarchy.	<b>[edit]</b> routing-options { static { route default { nexthop <i>address</i> ; retain; } } }
;(semicolon)	Identifies a leaf statement at a configuration hierarchy level.	
<b>J-Web GUI Conventions</b>		
<b>Bold text like this</b>	Represents J-Web graphical user interface (GUI) items you click or select.	<ul style="list-style-type: none"> <li>In the Logical Interfaces box, select <b>All Interfaces</b>.</li> <li>To cancel the configuration, click <b>Cancel</b>.</li> </ul>
> (bold right angle bracket)	Separates levels in a hierarchy of J-Web selections.	In the configuration editor hierarchy, select <b>Protocols&gt;Ospf</b> .

## Documentation Feedback

We encourage you to provide feedback, comments, and suggestions so that we can improve the documentation. You can send your comments to [techpubs-comments@juniper.net](mailto:techpubs-comments@juniper.net), or fill out the documentation feedback form at <https://www.juniper.net/cgi-bin/docbugreport/>. If you are using e-mail, be sure to include the following information with your comments:

- Document or topic name
- URL or page number
- Software release version (if applicable)

## Requesting Technical Support

Technical product support is available through the Juniper Networks Technical Assistance Center (JTAC). If you are a customer with an active J-Care or JNASC support contract,

or are covered under warranty, and need postsales technical support, you can access our tools and resources online or open a case with JTAC.

- JTAC policies—For a complete understanding of our JTAC procedures and policies, review the JTAC User Guide located at <http://www.juniper.net/us/en/local/pdf/resource-guides/7100059-en.pdf> .
- Product warranties—For product warranty information, visit <http://www.juniper.net/support/warranty/> .
- JTAC Hours of Operation —The JTAC centers have resources available 24 hours a day, 7 days a week, 365 days a year.

## Self-Help Online Tools and Resources

For quick and easy problem resolution, Juniper Networks has designed an online self-service portal called the Customer Support Center (CSC) that provides you with the following features:

- Find CSC offerings: <http://www.juniper.net/customers/support/>
- Find product documentation: <http://www.juniper.net/techpubs/>
- Find solutions and answer questions using our Knowledge Base: <http://kb.juniper.net/>
- Download the latest versions of software and review release notes: <http://www.juniper.net/customers/csc/software/>
- Search technical bulletins for relevant hardware and software notifications: <https://www.juniper.net/alerts/>
- Join and participate in the Juniper Networks Community Forum: <http://www.juniper.net/company/communities/>
- Open a case online in the CSC Case Management tool: <http://www.juniper.net/cm/>

To verify service entitlement by product serial number, use our Serial Number Entitlement (SNE) Tool: <https://tools.juniper.net/SerialNumberEntitlementSearch/>

## Opening a Case with JTAC

You can open a case with JTAC on the Web or by telephone.

- Use the Case Management tool in the CSC at <http://www.juniper.net/cm/> .
- Call 1-888-314-JTAC (1-888-314-5822 toll-free in the USA, Canada, and Mexico).

For international or direct-dial options in countries without toll-free numbers, visit us at <http://www.juniper.net/support/requesting-support.html>

## CHAPTER 1

# Mapping Between Operational Tag Elements, Perl Methods, and CLI Commands for M, MX, and T Series

**Table 3: Mapping of CLI Commands to Junos XML Operational Tag Elements and Perl Methods (M, MX, and T Series) (Part 1)**

CLI Command	Request Tag Element and Perl Method	Response Tag Element
clear ancp neighbor	<clear-ancp-neighbor-connection>	<ancp-neighbor-information>
clear ancp subscriber identifier	<clear-ancp-subscriber-identifier-information>	<ancp-subscriber-identifier-information>
clear arp	<clear-arp-table>	<clear-arp-table-results>
clear auto-configuration interfaces	<clear-auto-configuration-interfaces>	<none>
clear bgp damping	<clear-bgp-damping>	<NONE>
clear bgp neighbor	<clear-bgp-neighbor>	<NONE>
clear bgp table	<clear-bgp-table>	<NONE>
clear bridge mac-table	<clear-bridge-mac-table>	<NONE>
clear bridge mac-table interface	<clear-bridge-interface-mac-table>	<NONE>
clear database-replication statistics	<clear-database-replication-statistics-information>	<NONE>
clear ddos-protection protocols ancp aggregate states	<clear-ddos-ancp-aggregate-states>	<none>

**Table 3: Mapping of CLI Commands to Junos XML Operational Tag Elements and Perl Methods (M, MX, and T Series) (Part 1) (continued)**

CLI Command	Request Tag Element and Perl Method	Response Tag Element
clear ddos-protection protocols ancp aggregate states	<clear-ddos-ancp-aggregate-states>	<none>
clear ddos-protection protocols ancp aggregate statistics	<clear-ddos-ancp-aggregate-statistics>	<none>
clear ddos-protection protocols ancp aggregate statistics	<clear-ddos-ancp-aggregate-statistics>	<none>
clear ddos-protection protocols ancp states	<clear-ddos-ancp-states>	<none>
clear ddos-protection protocols ancp states	<clear-ddos-ancp-states>	<none>
clear ddos-protection protocols ancp statistics	<clear-ddos-ancp-statistics>	<none>
clear ddos-protection protocols ancp statistics	<clear-ddos-ancp-statistics>	<none>
clear ddos-protection protocols ancpv6 aggregate states	<clear-ddos-ancpv6-aggregate-states>	<none>
clear ddos-protection protocols ancpv6 aggregate states	<clear-ddos-ancpv6-aggregate-states>	<none>
clear ddos-protection protocols ancpv6 aggregate statistics	<clear-ddos-ancpv6-aggregate-statistics>	<none>
clear ddos-protection protocols ancpv6 aggregate statistics	<clear-ddos-ancpv6-aggregate-statistics>	<none>
clear ddos-protection protocols ancpv6 states	<clear-ddos-ancpv6-states>	<none>
clear ddos-protection protocols ancpv6 states	<clear-ddos-ancpv6-states>	<none>
clear ddos-protection protocols ancpv6 statistics	<clear-ddos-ancpv6-statistics>	<none>

**Table 3: Mapping of CLI Commands to Junos XML Operational Tag Elements and Perl Methods (M, MX, and T Series) (Part 1) (continued)**

CLI Command	Request Tag Element and Perl Method	Response Tag Element
clear ddos-protection protocols ancpv6 statistics	<clear-ddos-ancpv6-statistics>	<none>
clear ddos-protection protocols arp aggregate states	<clear-ddos-arp-aggregate-states>	<none>
clear ddos-protection protocols arp aggregate states	<clear-ddos-arp-aggregate-states>	<none>
clear ddos-protection protocols arp aggregate statistics	<clear-ddos-arp-aggregate-statistics>	<none>
clear ddos-protection protocols arp aggregate statistics	<clear-ddos-arp-aggregate-statistics>	<none>
clear ddos-protection protocols arp states	<clear-ddos-arp-states>	<none>
clear ddos-protection protocols arp states	<clear-ddos-arp-states>	<none>
clear ddos-protection protocols arp statistics	<clear-ddos-arp-statistics>	<none>
clear ddos-protection protocols arp statistics	<clear-ddos-arp-statistics>	<none>
clear ddos-protection protocols atm aggregate states	<clear-ddos-atm-aggregate-states>	<none>
clear ddos-protection protocols atm aggregate states	<clear-ddos-atm-aggregate-states>	<none>
clear ddos-protection protocols atm aggregate statistics	<clear-ddos-atm-aggregate-statistics>	<none>
clear ddos-protection protocols atm aggregate statistics	<clear-ddos-atm-aggregate-statistics>	<none>
clear ddos-protection protocols atm states	<clear-ddos-atm-states>	<none>

**Table 3: Mapping of CLI Commands to Junos XML Operational Tag Elements and Perl Methods (M, MX, and T Series) (Part 1) (continued)**

CLI Command	Request Tag Element and Perl Method	Response Tag Element
clear ddos-protection protocols atm states	<clear-ddos-atm-states>	<none>
clear ddos-protection protocols atm statistics	<clear-ddos-atm-statistics>	<none>
clear ddos-protection protocols atm statistics	<clear-ddos-atm-statistics>	<none>
clear ddos-protection protocols bfd aggregate states	<clear-ddos-bfd-aggregate-states>	<none>
clear ddos-protection protocols bfd aggregate states	<clear-ddos-bfd-aggregate-states>	<none>
clear ddos-protection protocols bfd aggregate statistics	<clear-ddos-bfd-aggregate-statistics>	<none>
clear ddos-protection protocols bfd aggregate statistics	<clear-ddos-bfd-aggregate-statistics>	<none>
clear ddos-protection protocols bfd states	<clear-ddos-bfd-states>	<none>
clear ddos-protection protocols bfd states	<clear-ddos-bfd-states>	<none>
clear ddos-protection protocols bfd statistics	<clear-ddos-bfd-statistics>	<none>
clear ddos-protection protocols bfd statistics	<clear-ddos-bfd-statistics>	<none>
clear ddos-protection protocols bfdv6 aggregate states	<clear-ddos-bfdv6-aggregate-states>	<none>
clear ddos-protection protocols bfdv6 aggregate states	<clear-ddos-bfdv6-aggregate-states>	<none>
clear ddos-protection protocols bfdv6 aggregate statistics	<clear-ddos-bfdv6-aggregate-statistics>	<none>

**Table 3: Mapping of CLI Commands to Junos XML Operational Tag Elements and Perl Methods (M, MX, and T Series) (Part 1) (continued)**

CLI Command	Request Tag Element and Perl Method	Response Tag Element
clear ddos-protection protocols bfdv6 aggregate statistics	<clear-ddos-bfdv6-aggregate-statistics>	<none>
clear ddos-protection protocols bfdv6 states	<clear-ddos-bfdv6-states>	<none>
clear ddos-protection protocols bfdv6 states	<clear-ddos-bfdv6-states>	<none>
clear ddos-protection protocols bfdv6 statistics	<clear-ddos-bfdv6-statistics>	<none>
clear ddos-protection protocols bfdv6 statistics	<clear-ddos-bfdv6-statistics>	<none>
clear ddos-protection protocols bgp aggregate states	<clear-ddos-bgp-aggregate-states>	<none>
clear ddos-protection protocols bgp aggregate states	<clear-ddos-bgp-aggregate-states>	<none>
clear ddos-protection protocols bgp aggregate statistics	<clear-ddos-bgp-aggregate-statistics>	<none>
clear ddos-protection protocols bgp aggregate statistics	<clear-ddos-bgp-aggregate-statistics>	<none>
clear ddos-protection protocols bgp states	<clear-ddos-bgp-states>	<none>
clear ddos-protection protocols bgp states	<clear-ddos-bgp-states>	<none>
clear ddos-protection protocols bgp statistics	<clear-ddos-bgp-statistics>	<none>
clear ddos-protection protocols bgp statistics	<clear-ddos-bgp-statistics>	<none>
clear ddos-protection protocols bgpv6 aggregate states	<clear-ddos-bgpv6-aggregate-states>	<none>

**Table 3: Mapping of CLI Commands to Junos XML Operational Tag Elements and Perl Methods (M, MX, and T Series) (Part 1) (*continued*)**

CLI Command	Request Tag Element and Perl Method	Response Tag Element
clear ddos-protection protocols bgpv6 aggregate states	<clear-ddos-bgpv6-aggregate-states>	<none>
clear ddos-protection protocols bgpv6 aggregate statistics	<clear-ddos-bgpv6-aggregate-statistics>	<none>
clear ddos-protection protocols bgpv6 aggregate statistics	<clear-ddos-bgpv6-aggregate-statistics>	<none>

## PART 2

# Summary of Operational Request Tag Elements

- [Operational Request Tag Elements Applicable to All Platforms on page 237](#)
- [Operational Request Tag Elements Common to EX Series, M, MX, and T Series, and QFX Series on page 243](#)
- [Operational Request Tag Elements Common to J Series, EX Series, QFX Series, and SRX Series on page 251](#)
- [Operational Request Tag Elements Specific to M, MX, and T Series on page 283](#)
- [Operational Request Tag Elements Specific to EX Series and QFX Series on page 1347](#)
- [Operational Request Tag Elements Specific to J Series and SRX Series on page 1369](#)

## CHAPTER 4

# Operational Request Tag Elements Applicable to All Platforms

This chapter lists the Junos Extensible Markup Language (XML) tag elements that a client of the Junos XML protocol or NETCONF server uses to request operational information. The tag names are in alphabetical order. For information about the notation used in this chapter, see [Table 2 on page cccxxxix](#).

The tags listed in this chapter are applicable to devices belonging to:

- EX Series
- J Series
- M Series
- MX Series
- T Series
- QFX Series
- SRX Series

### <clear-dhcp-binding-information>

---

#### Usage

```
<rpc>
  <clear-dhcp-binding-information>
    <address>address</address>
  </clear-dhcp-binding-information>
</rpc>
```

**Description** Clear DHCP client binding information

**Contents** <address>—Address of DHCP client binding

## <clear-dhcp-conflict-information>

---

**Usage**

```
<rpc>
  <clear-dhcp-conflict-information>
    <address>address</address>
  </clear-dhcp-conflict-information>
</rpc>
```

**Description** Clear DHCP address conflict

**Contents** <address>—DHCP conflict address

## <clear-dhcp-statistics-information>

---

**Usage**

```
<rpc>
  <clear-dhcp-statistics-information/>
</rpc>
```

**Description** Clear DHCP statistics

## <clear-dot1x-mac-session>

---

**Usage**

```
<rpc>
  <clear-dot1x-mac-session>
    <static-mac-addr>static-mac-addr</static-mac-addr>
  </clear-dot1x-mac-session>
</rpc>
```

**Description** Clear 802.1X session on a MAC address

**Contents** <static-mac-addr>—MAC address to clear

## <get-dhcp-binding-information>

---

**Usage**

```
<rpc>
  <get-dhcp-binding-information>
    <detail/>
    <address>address</address>
  </get-dhcp-binding-information>
</rpc>
```

**Description** Show DHCP client binding information

**Contents** <detail>—Display detailed information  
<address>—Address of DHCP client binding

---

### <get-dhcp-conflict-information>

---

**Usage**

```
<rpc>  
  <get-dhcp-conflict-information/>  
</rpc>
```

**Description** Show DHCP address conflict

---

### <get-dhcp-global-information>

---

**Usage**

```
<rpc>  
  <get-dhcp-global-information/>  
</rpc>
```

**Description** Show DHCP global scope information

---

### <get-dhcp-pool-information>

---

**Usage**

```
<rpc>  
  <get-dhcp-pool-information>  
    <detail/>  
    <subnet-address>subnet-address</subnet-address>  
  </get-dhcp-pool-information>  
</rpc>
```

**Description** Show DHCP address pool information

**Contents** <detail>—Display detailed information  
<subnet-address>—Logical subnet of address pool

---

### <get-dhcp-statistics-information>

---

**Usage**

```
<rpc>  
  <get-dhcp-statistics-information/>
```

```
</rpc>
```

**Description** Show DHCP statistics

---

### <get-dot1x-authentication-failed-users>

---

**Usage**

```
<rpc>  
  <get-dot1x-authentication-failed-users/>  
</rpc>
```

**Description** List users who have failed 802.1X authentication

---

### <get-dot1x-interface-information>

---

**Usage**

```
<rpc>  
  <get-dot1x-interface-information>  
    <brief/>  
    <detail/>  
    <interface-name>interface-name</interface-name>  
  </get-dot1x-interface-information>  
</rpc>
```

**Description** Show 802.1X interface information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

---

### <get-dot1x-interface-mac-addresses>

---

**Usage**

```
<rpc>  
  <get-dot1x-interface-mac-addresses>  
    <interface-name>interface-name</interface-name>  
  </get-dot1x-interface-mac-addresses>  
</rpc>
```

**Description** Show 802.1X static MAC addresses on this interface

**Contents** <interface-name>—Show static MAC addresses of interface

## <get-dot1x-static-mac-addresses>

---

**Usage**

```
<rpc>  
  <get-dot1x-static-mac-addresses>  
  </get-dot1x-static-mac-addresses>  
</rpc>
```

**Description** Show 802.1X static MAC addresses

**Contents** <get-dot1x-interface-mac-addresses>—Show 802.1X static MAC addresses on this interface

## <get-lldp-information>

---

**Usage**

```
<rpc>  
  <get-lldp-information>  
  </get-lldp-information>  
</rpc>
```

**Description** Show Link Layer Discovery Protocol information

**Contents** <get-lldp-information-detail>—Show detailed LLDP information

<get-lldp-neighbors-information>—Show LLDP neighbor information

<get-lldp-statistics-information>—Show LLDP statistics

<get-lldp-local-info>—Show LLDP information of local device

<get-lldp-remote-global-statistics>—Show LLDP remote global statistics information

## <get-lldp-information-detail>

---

**Usage**

```
<rpc>  
  <get-lldp-information-detail/>  
</rpc>
```

**Description** Show detailed LLDP information

## <get-lldp-local-info>

---

**Usage**

```
<rpc>  
  <get-lldp-local-info/>
```

</rpc>

**Description** Show LLDP information of local device

## <get-lldp-remote-global-statistics>

---

### Usage

```
<rpc>
  <get-lldp-remote-global-statistics/>
</rpc>
```

**Description** Show LLDP remote global statistics information

## <get-lldp-statistics-information>

---

### Usage

```
<rpc>
  <get-lldp-statistics-information>
  </get-lldp-statistics-information>
</rpc>
```

**Description** Show LLDP statistics

**Contents** <interface>—Show LLDP statistics for this interface

## CHAPTER 5

# Operational Request Tag Elements Common to EX Series, M, MX, and T Series, and QFX Series

This chapter lists the Junos Extensible Markup Language (XML) tag elements that a client of the Junos XML protocol or NETCONF server uses to request operational information. The tag names are in alphabetical order. For information about the notation used in this chapter, see [Table 2 on page cccxxxix](#).

The tags listed in this chapter are common to devices belonging to:

- EX Series
- M Series
- MX Series
- T Series
- QFX Series

### <get-certificates-information>

---

#### Usage

```
<rpc>
  <get-certificates-information>
    <brief/>
    <detail/>
    <serial-number>serial-number</serial-number>
  </get-certificates-information>
</rpc>
```

**Description** Show IPSec digital certificate information

**Contents** <brief>—Display brief output

<detail>—Display detailed output

<serial-number>—Serial number of certificate

<get-crl-information>—Show IPSec digital certificate revocation lists

---

## <get-crl-information>

### Usage

```
<rpc>
  <get-crl-information>
    <brief/>
    <detail/>
    <crl-name>crl-name</crl-name>
  </get-crl-information>
</rpc>
```

**Description** Show IPSec digital certificate revocation lists

**Contents** <brief>—Display brief output  
<detail>—Display detailed output  
<crl-name>—Name of CRL

---

## <get-filter-version>

### Usage

```
<rpc>
  <get-filter-version>
    <filtername>filtername</filtername>
  </get-filter-version>
</rpc>
```

**Description** Show filter version installed

**Contents** <filtername>—Filter name

---

## <get-fips-pic-status-information>

### Usage

```
<rpc>
  <get-fips-pic-status-information/>
</rpc>
```

**Description** Show FIPS PIC authorization status

## <get-firewall-counter-information>

### Usage

```

<rpc>
  <get-firewall-counter-information>
    <countername>countername</countername> <!-- mandatory -->
    <filter>filter</filter> <!-- mandatory -->
    <application>application</application>
    <logical-system>logical-system</logical-system>
  </get-firewall-counter-information>
</rpc>

```

**Description** Counter name

**Contents** <countername>—Counter name

- cfm - Statistics for implicit filters for CFM

<filter>—Filter name

- cfm - Statistics for implicit filters for CFM

<application>—Owner application

- cfm - Statistics for implicit filters for CFM

<logical-system>—Name of logical system, or 'all'

## <get-firewall-filter-information>

### Usage

```

<rpc>
  <get-firewall-filter-information>
    <filtername>filtername</filtername> <!-- mandatory -->
    <counter>counter</counter>
    <application>application</application>
    <logical-system>logical-system</logical-system>
  </get-firewall-filter-information>
</rpc>

```

**Description** Filter name

**Contents** <get-filter-version>—Show filter version installed

- cfm - Statistics for implicit filters for CFM

<filtername>—Filter name

- cfm - Statistics for implicit filters for CFM

<counter>—Counter name

- cfm - Statistics for implicit filters for CFM

<application>—Owner application

- cfm - Statistics for implicit filters for CFM

<logical-system>—Name of logical system, or 'all'

---

## <get-firewall-information>

---

### Usage

```
<rpc>
  <get-firewall-information>
    <application>application</application>
    <logical-system>logical-system</logical-system>
    <terse/>
  </get-firewall-information>
</rpc>
```

**Description** Show firewall information

**Contents** <application>—Owner application

- cfm - Statistics for implicit filters for CFM

<logical-system>—Name of logical system, or 'all'

<get-firewall-counter-information>—Counter name

<get-firewall-filter-information>—Filter name

<get-firewall-log-information>—Show log entries for firewall activity

<get-firewall-prefix-action-information>—Show prefix-action statistics for a filter

<terse>—Show filter names only

---

## <get-firewall-log-information>

---

### Usage

```
<rpc>
  <get-firewall-log-information>
    <get-firewall-log-detailed-information/>
    <interface>interface</interface>
    <logical-system>logical-system</logical-system>
  </get-firewall-log-information>
```

</rpc>

**Description** Show log entries for firewall activity

**Contents** <get-firewall-log-detailed-information>—Display detailed output  
  
<interface>—Interface name  
  
<logical-system>—Name of logical system, or 'all'

---

### <get-firewall-prefix-action-information>

---

**Usage**

```
<rpc>
  <get-firewall-prefix-action-information>
    <filter>filter</filter> <!-- mandatory -->
    <prefix-action>prefix-action</prefix-action> <!-- mandatory -->
    <from>from</from>
    <to>to</to>
    <logical-system>logical-system</logical-system>
  </get-firewall-prefix-action-information>
</rpc>
```

**Description** Show prefix-action statistics for a filter

**Contents** <filter>—Filter name  
  
<prefix-action>—Prefix-action name  
  
<from>—Starting counter or policer  
  
<to>—Ending counter or policer  
  
<logical-system>—Name of logical system, or 'all'

---

### <get-ike-security-associations-information>

---

**Usage**

```
<rpc>
  <get-ike-security-associations-information>
    <brief/>
    <detail/>
    <peer-address>peer-address</peer-address>
  </get-ike-security-associations-information>
</rpc>
```

**Description** Show IKE security association information

**Contents**    <brief>—Show brief output (default)  
                 <detail>—Show detailed output  
                 <peer-address>—Name of security association

---

## <get-ike-services-security-associations-information>

---

### Usage

```
<rpc>
  <get-ike-services-security-associations-information>
    <brief/>
    <detail/>
    <peer-address>peer-address</peer-address>
  </get-ike-services-security-associations-information>
</rpc>
```

**Description**    Show services IKE security association information

**Contents**    <brief>—Show brief output (default)  
                 <detail>—Show detailed output  
                 <peer-address>—Name of security association

---

## <get-ipsec-pic-redundancy-information>

---

### Usage

```
<rpc>
  <get-ipsec-pic-redundancy-information>
    <interface-name>interface-name</interface-name>
  </get-ipsec-pic-redundancy-information>
</rpc>
```

**Description**    Show ES PIC redundancy information

**Contents**    <interface-name>—Name of ES interface

---

## <get-ipsec-tunnel-redundancy-information>

---

### Usage

```
<rpc>
  <get-ipsec-tunnel-redundancy-information>

  <security-association-name>security-association-name</security-association-name>

  </get-ipsec-tunnel-redundancy-information>
</rpc>
```

**Description** Show remote tunnel redundancy information

**Contents** <security-association-name>—Name of security association

### <get-security-associations-information>

---

**Usage**

```
<rpc>
  <get-security-associations-information>
    <brief/>
    <detail/>
    <sa-name>sa-name</sa-name>
  </get-security-associations-information>
</rpc>
```

**Description** Show IPSec security association information

**Contents** <brief>—Display brief output

<detail>—Display detailed output

<sa-name>—Name of security association

### <get-services-ipsec-statistics-information>

---

**Usage**

```
<rpc>
  <get-services-ipsec-statistics-information>
    <remote-gw>remote-gw</remote-gw>
    <detail/>
    <brief/>
    <service-set>service-set</service-set>
  </get-services-ipsec-statistics-information>
</rpc>
```

**Description** Show IPSec statistics

**Contents** <remote-gw>—Peer address to use as filter

<detail>—Display all tunnels

<brief>—Display accumulated statistics (default)

<service-set>—Name of service set

## **<get-services-security-associations-information>**

---

### **Usage**

```
<rpc>
  <get-services-security-associations-information>
    <brief/>
    <detail/>
    <extensive/>
    <service-set>service-set</service-set>
  </get-services-security-associations-information>
</rpc>
```

**Description** Show IPSec security association information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<service-set>—Restrict output to one service set

## CHAPTER 6

# Operational Request Tag Elements Common to J Series, EX Series, QFX Series, and SRX Series

This chapter lists the Junos Extensible Markup Language (XML) tag elements that a client of the Junos XML protocol or NETCONF server uses to request operational information. The tag names are in alphabetical order. For information about the notation used in this chapter, see [Table 2 on page cccxxxix](#).

The tags listed in this chapter are common to devices belonging to:

- J Series
- EX Series
- QFX Series
- SRX Series

### <clear-arp-inspection-statistics>

---

#### Usage

```
<rpc>
  <clear-arp-inspection-statistics>
    <interface>interface</interface>
  </clear-arp-inspection-statistics>
</rpc>
```

**Description** Clear ARP inspection statistics

**Contents** <interface>—Interface for which statistics are to be cleared

### <clear-dhcp-snooping>

---

#### Usage

```
<rpc>
  <clear-dhcp-snooping>
    <vlan>vlan</vlan>
  </clear-dhcp-snooping>
</rpc>
```

```
<mac>mac</mac>
</clear-dhcp-snooping>
</rpc>
```

**Description** Clear DHCP snooping database

**Contents** <vlan>—Name of VLAN  
            <mac>—MAC address

---

### <clear-dhcp-snooping-statistics>

---

**Usage**

```
<rpc>
<clear-dhcp-snooping-statistics/>
</rpc>
```

**Description** Clear DHCP snooping statistics

---

### <clear-dot1x-firewall>

---

**Usage**

```
<rpc>
<clear-dot1x-firewall>
  <counter-name>counter-name</counter-name>
</clear-dot1x-firewall>
</rpc>
```

**Description** Clear dot1x firewall statistics for a counter

**Contents** <clear-dot1x-firewall-interface>—Clear firewall statistics on this interface  
            <counter-name>—Clear firewall statistics for this counter

---

### <clear-dot1x-firewall-interface>

---

**Usage**

```
<rpc>
<clear-dot1x-firewall-interface>
  <interface-name>interface-name</interface-name>
</clear-dot1x-firewall-interface>
</rpc>
```

**Description** Clear firewall statistics on this interface

**Contents** <interface-name>—Name of interface

### <clear-dot1x-interface-session>

---

**Usage**

```
<rpc>
  <clear-dot1x-interface-session>
    <interface-name>interface-name</interface-name>
  </clear-dot1x-interface-session>
</rpc>
```

**Description** Clear 802.1X session on an interface

**Contents** <interface-name>—Name of interface

### <clear-dot1x-statistics>

---

**Usage**

```
<rpc>
  <clear-dot1x-statistics>
  </clear-dot1x-statistics>
</rpc>
```

**Description** Clear 802.1X statistics on an interface

**Contents** <clear-dot1x-statistics-interface>—Clear 802.1X statistics on this interface

### <clear-dot1x-statistics-interface>

---

**Usage**

```
<rpc>
  <clear-dot1x-statistics-interface>
    <interface-name>interface-name</interface-name>
  </clear-dot1x-statistics-interface>
</rpc>
```

**Description** Clear 802.1X statistics on this interface

**Contents** <interface-name>—Name of interface

### <clear-ethernet-switching-bpdu-error>

---

**Usage**

```
<rpc>
  <clear-ethernet-switching-bpdu-error>
    <interface>interface</interface>
  </clear-ethernet-switching-bpdu-error>
```

```
</rpc>
```

**Description** Clear BPDU error (BPDU Protect)

**Contents** <interface>—Clear BPDU error on an interface (BPDU Protect)

---

### <clear-ethernet-switching-mac-learning-log>

---

**Usage**

```
<rpc>  
  <clear-ethernet-switching-mac-learning-log/>  
</rpc>
```

**Description** Clear all MAC address learning log

---

### <clear-ethernet-switching-mac-learning-statistics>

---

**Usage**

```
<rpc>  
  <clear-ethernet-switching-mac-learning-statistics>  
    <interface>interface</interface>  
  </clear-ethernet-switching-mac-learning-statistics>  
</rpc>
```

**Description** Clear media access control learning statistics

**Contents** <interface>—Clear MAC learning statistics for a specified interface

---

### <clear-ethernet-switching-port-error>

---

**Usage**

```
<rpc>  
  <clear-ethernet-switching-port-error>  
    <interface>interface</interface>  
  </clear-ethernet-switching-port-error>  
</rpc>
```

**Description** Clear port errors

**Contents** <interface>—Clear port errors on an interface

---

### <clear-ethernet-switching-statistics-aging>

---

**Usage**

```
<rpc>
```

```
<clear-ethernet-switching-statistics-aging/>
</rpc>
```

**Description** Clear media access control aging statistics

---

## <clear-ethernet-switching-table>

---

### Usage

```
<rpc>
<clear-ethernet-switching-table>
  <interface>interface</interface>
  <vlan>vlan</vlan>
  <mac>mac</mac>
</clear-ethernet-switching-table>
</rpc>
```

**Description** Clear all learned MAC addresses

**Contents** <interface>—Name of interface

<vlan>—Name of VLAN

<mac>—MAC address

<clear-ethernet-switching-table-management-vlan>—Management VLAN

---

## <clear-ethernet-switching-table-management-vlan>

---

### Usage

```
<rpc>
<clear-ethernet-switching-table-management-vlan/>
</rpc>
```

**Description** Management VLAN

---

## <clear-fip-snooping-enode>

---

### Usage

```
<rpc>
<clear-fip-snooping-enode>
  <mac>mac</mac> <!-- mandatory -->
  <vlan>vlan</vlan>
</clear-fip-snooping-enode>
</rpc>
```

**Description** Clear all FIP snooping session for this Enode

**Contents**    <mac>—Enode MAC address  
                 <vlan>—Name of VLAN

---

### <clear-fip-snooping-statistics>

---

**Usage**

```
<rpc>  
  <clear-fip-snooping-statistics>  
    <vlan>vlan</vlan>  
  </clear-fip-snooping-statistics>  
</rpc>
```

**Description**    Clear FIP snooping statistics

**Contents**    <vlan>—Name of VLAN

---

### <clear-fip-snooping-vlan>

---

**Usage**

```
<rpc>  
  <clear-fip-snooping-vlan>  
    <vlan>vlan</vlan> <!-- mandatory -->  
  </clear-fip-snooping-vlan>  
</rpc>
```

**Description**    Clear FIP snooping database for this VLAN

**Contents**    <vlan>—Name of VLAN

---

### <clear-igmp-snooping>

---

**Usage**

```
<rpc>  
  <clear-igmp-snooping>  
  </clear-igmp-snooping>  
</rpc>
```

**Description**    Clear IGMP snooping information

**Contents**    <clear-igmp-snooping-membership>—Clear IGMP snooping database  
                 <clear-igmp-snooping-statistics>—Clear IGMP snooping statistics

## <clear-igmp-snooping-membership>

---

**Usage**

```
<rpc>
  <clear-igmp-snooping-membership>
    <vlan>vlan</vlan>
  </clear-igmp-snooping-membership>
</rpc>
```

**Description** Clear IGMP snooping database

**Contents** <vlan>—Name of VLAN

## <clear-igmp-snooping-statistics>

---

**Usage**

```
<rpc>
  <clear-igmp-snooping-statistics/>
</rpc>
```

**Description** Clear IGMP snooping statistics

## <clear-l2pt-error>

---

**Usage**

```
<rpc>
  <clear-l2pt-error>
    <interface>interface</interface>
  </clear-l2pt-error>
</rpc>
```

**Description** Clear layer2 protocol tunneling errors

**Contents** <interface>—Name of interface

## <clear-l2pt-interface-statistics>

---

**Usage**

```
<rpc>
  <clear-l2pt-interface-statistics>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-l2pt-interface-statistics>
</rpc>
```

**Description** Clear Layer2 protocol tunneling statistics for interface

**Contents** <interface-name>—Name of interface

---

## <clear-l2pt-statistics>

### Usage

```
<rpc>
  <clear-l2pt-statistics>
</clear-l2pt-statistics>
</rpc>
```

**Description** Clear layer2 protocol tunneling statistics

**Contents** <clear-l2pt-interface-statistics>—Clear Layer2 protocol tunneling statistics for interface  
<clear-l2pt-vlan-statistics>—Clear Layer2 protocol tunneling statistics for vlans

---

## <clear-l2pt-vlan-statistics>

### Usage

```
<rpc>
  <clear-l2pt-vlan-statistics>
    <vlan-name>vlan-name</vlan-name> <!-- mandatory -->
  </clear-l2pt-vlan-statistics>
</rpc>
```

**Description** Clear Layer2 protocol tunneling statistics for vlans

**Contents** <vlan-name>—Name of VLAN

---

## <clear-multicast-route-counter>

### Usage

```
<rpc>
  <clear-multicast-route-counter/>
</rpc>
```

**Description** Unbind route from counter

---

## <clear-mvrp-statistics>

### Usage

```
<rpc>
  <clear-mvrp-statistics>
</clear-mvrp-statistics>
</rpc>
```

**Description** Clear MVRP statistics on an interface

**Contents** <clear-mvrp-statistics-interface>—Clear MVRP statistics on this interface

---

### <clear-mvrp-statistics-interface>

---

**Usage**

```
<rpc>
  <clear-mvrp-statistics-interface>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-mvrp-statistics-interface>
</rpc>
```

**Description** Clear MVRP statistics on this interface

**Contents** <interface-name>—Name of interface

---

### <clear-stp-statistics-interface>

---

**Usage**

```
<rpc>
  <clear-stp-statistics-interface>
    <interface-name>interface-name</interface-name>
  </clear-stp-statistics-interface>
</rpc>
```

**Description** Clear STP interface statistics

**Contents** <interface-name>—Name of interface

---

### <get-analyzer-information>

---

**Usage**

```
<rpc>
  <get-analyzer-information>
    <analyzer-name>analyzer-name</analyzer-name>
  </get-analyzer-information>
</rpc>
```

**Description** Show analyzer information

**Contents** <analyzer-name>—Name of analyzer

## <get-arp-inspection-statistics>

---

**Usage**

```
<rpc>
  <get-arp-inspection-statistics/>
</rpc>
```

**Description** Show ARP inspection statistics

## <get-authentication-whitelist-mac-bypassed-users>

---

**Usage**

```
<rpc>
  <get-authentication-whitelist-mac-bypassed-users/>
</rpc>
```

**Description** List users who have bypassed 802.1X authentication

## <get-autoinstallation-status-information>

---

**Usage**

```
<rpc>
  <get-autoinstallation-status-information/>
</rpc>
```

**Description** Show autoinstallation status

## <get-dcbx-neighbor-information>

---

**Usage**

```
<rpc>
  <get-dcbx-neighbor-information>
</get-dcbx-neighbor-information>
</rpc>
```

**Description** Show DCBX neighbor information

**Contents** <get-dcbx-neighbor-interface-information>—Show DCBX information for this interface

## <get-dcbx-neighbor-interface-information>

---

**Usage**

```
<rpc>
  <get-dcbx-neighbor-interface-information>
```

```
<interface-name>interface-name</interface-name>
</get-dcbx-neighbor-interface-information>
</rpc>
```

**Description** Show DCBX information for this interface

**Contents** <interface-name>—Show DCBX information for this interface

---

### <get-dhcp-client-information>

---

**Usage**

```
<rpc>
<get-dhcp-client-information>
<statistics/>
<interface-name>interface-name</interface-name>
</get-dhcp-client-information>
</rpc>
```

**Description** Show DHCP client information

**Contents** <statistics>—Show DHCP client statistics

<interface-name>—Interface name of DHCP client

---

### <get-dhcp-helper-statistics>

---

**Usage**

```
<rpc>
<get-dhcp-helper-statistics/>
</rpc>
```

**Description** Show DHCP relay statistics information

---

### <get-dhcp-snoop-binding>

---

**Usage**

```
<rpc>
<get-dhcp-snoop-binding>
<interface>interface</interface>
<vlan>vlan</vlan>
</get-dhcp-snoop-binding>
</rpc>
```

**Description** Show DHCP snooping database

**Contents** <interface>—Name of interface for which to display the entries

<vlan>—Name of VLAN for which to display the entries

### <get-dhcp-snooping-statistics>

---

**Usage**

```
<rpc>
  <get-dhcp-snooping-statistics/>
</rpc>
```

**Description** Show DHCP snooping statistics

### <get-dot1x-firewall-interface>

---

**Usage**

```
<rpc>
  <get-dot1x-firewall-interface>
    <interface-name>interface-name</interface-name>
  </get-dot1x-firewall-interface>
</rpc>
```

**Description** Show dot1x firewall statistics for an interface

**Contents** <interface-name>—Show firewall statistics for this interface

### <get-dot1x-statistics>

---

**Usage**

```
<rpc>
  <get-dot1x-statistics>
</get-dot1x-statistics>
</rpc>
```

**Description** Show 802.1X statistics

**Contents** <get-dot1x-statistics-interface>—Show 802.1X statistics on this interface

### <get-dot1x-statistics-interface>

---

**Usage**

```
<rpc>
  <get-dot1x-statistics-interface>
    <interface-name>interface-name</interface-name>
  </get-dot1x-statistics-interface>
</rpc>
```

**Description** Show 802.1X statistics on this interface

**Contents** <interface-name>—Show statistics for this interface

---

### <get-ethernet-switching-aging-statistics>

---

**Usage**

```
<rpc>
  <get-ethernet-switching-aging-statistics>
  <brief/>
  <detail/>
</get-ethernet-switching-aging-statistics>
</rpc>
```

**Description** Show media access control aging statistics

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

---

### <get-ethernet-switching-authentication-whitelist-mac>

---

**Usage**

```
<rpc>
  <get-ethernet-switching-authentication-whitelist-mac>
  </get-ethernet-switching-authentication-whitelist-mac>
</rpc>
```

**Description** Show 802.1X White List MAC addresses

**Contents** <get-ethernet-switching-interface-mac-addresses>—Show 802.1X White List MAC addresses on this interface

<get-authentication-whitelist-mac-bypassed-users>—List users who have bypassed 802.1X authentication

---

### <get-ethernet-switching-interface-information>

---

**Usage**

```
<rpc>
  <get-ethernet-switching-interface-information>
  <summary/>
  <brief/>
  <detail/>
  <interface-name>interface-name</interface-name>
</get-ethernet-switching-interface-information>
</rpc>
```

**Description** Display Ethernet-switching interface information

**Contents** <summary>—Display summary output  
<brief>—Display brief output (default)  
<detail>—Display detailed output  
<interface-name>—Name of interface

---

## <get-ethernet-switching-interface-mac-addresses>

---

### Usage

```
<rpc>  
  <get-ethernet-switching-interface-mac-addresses>  
    <interface-name>interface-name</interface-name>  
  </get-ethernet-switching-interface-mac-addresses>  
</rpc>
```

**Description** Show 802.1X White List MAC addresses on this interface

**Contents** <interface-name>—Show White List MAC addresses of interface

---

## <get-ethernet-switching-log-information>

---

### Usage

```
<rpc>  
  <get-ethernet-switching-log-information/>  
</rpc>
```

**Description** Show MAC address learning log

---

## <get-ethernet-switching-mac-learning-statistics>

---

### Usage

```
<rpc>  
  <get-ethernet-switching-mac-learning-statistics>  
    <brief/>  
    <detail/>  
    <interface>interface</interface>  
  </get-ethernet-switching-mac-learning-statistics>  
</rpc>
```

**Description** Show media access control learning statistics

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<interface>—Display MAC learning statistics for a specified interface

---

### <get-ethernet-switching-mac-notification-information>

---

#### Usage

```
<rpc>
  <get-ethernet-switching-mac-notification-information/>
</rpc>
```

**Description** Display MAC notification information

---

### <get-ethernet-switching-next-hop-information>

---

#### Usage

```
<rpc>
  <get-ethernet-switching-next-hop-information>
    <summary/>
    <brief/>
    <detail/>
    <interface-index>interface-index</interface-index>
  </get-ethernet-switching-next-hop-information>
</rpc>
```

**Description** Show next hop information

**Contents** <summary>—Display summary output

<brief>—Display brief output (default)

<detail>—Display detailed output

<interface-index>—Interface index

---

### <get-ethernet-switching-table-information>

---

#### Usage

```
<rpc>
  <get-ethernet-switching-table-information>
    <summary/>
    <brief/>
    <detail/>
    <extensive/>
    <sort-by>sort-by</sort-by>
  </get-ethernet-switching-table-information>
</rpc>
```

**Description** Show media access control table

**Contents** <summary>—Display summary output

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<brief>—Display brief output (default)

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<detail>—Display detailed output

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<extensive>—Display extensive output

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<sort-by>—Specify display order

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<get-interface-ethernet-switching-table>—Display MAC table for a specified interface

<get-vlan-ethernet-switching-table>—Display MAC table for a specified VLAN

<get-management-vlan-ethernet-switching-table>—Display MAC table for a Management VLAN

---

## <get-fip-snooping>

---

### Usage

```
<rpc>
  <get-fip-snooping>
    <brief/>
    <detail/>
  </get-fip-snooping>
</rpc>
```

**Description** Show FIP snooping information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<get-fip-snooping-vlan>—Show per VLAN information

<get-fip-snooping-fcf>—Show fibre-channel forwarder information

<get-fip-snooping-enode>—Show per enode information

<get-fip-snooping-statistics>—Show FIP snooping statistics

---

## <get-fip-snooping-enode>

### Usage

```
<rpc>
  <get-fip-snooping-enode>
    <brief/>
    <detail/>
    <mac>mac</mac> <!-- mandatory -->
    <vlan>vlan</vlan>
  </get-fip-snooping-enode>
</rpc>
```

**Description** Show per enode information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<mac>—MAC address of Enode

<vlan>—Name of VLAN

---

## <get-fip-snooping-fcf>

### Usage

```
<rpc>
  <get-fip-snooping-fcf>
    <brief/>
    <detail/>
    <mac>mac</mac> <!-- mandatory -->
    <vlan>vlan</vlan>
  </get-fip-snooping-fcf>
</rpc>
```

**Description** Show fibre-channel forwarder information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<mac>—MAC address of FCF

<vlan>—Name of VLAN

---

### <get-fip-snooping-statistics>

---

**Usage**

```
<rpc>
  <get-fip-snooping-statistics>
    <vlan>vlan</vlan>
  </get-fip-snooping-statistics>
</rpc>
```

**Description** Show FIP snooping statistics

**Contents** <vlan>—Name of VLAN

---

### <get-fip-snooping-vlan>

---

**Usage**

```
<rpc>
  <get-fip-snooping-vlan>
    <brief/>
    <detail/>
    <vlan-name>vlan-name</vlan-name> <!-- mandatory -->
  </get-fip-snooping-vlan>
</rpc>
```

**Description** Show per VLAN information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<vlan-name>—Name of VLAN

---

### <get-igmp-snooping-flow-information>

---

**Usage**

```
<rpc>
  <get-igmp-snooping-flow-information>
    <brief/>
    <detail/>
  </get-igmp-snooping-flow-information>
</rpc>
```

**Description** Show igmp-snooping flows

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

## <get-igmp-snooping-membership-information>

---

### Usage

```
<rpc>
  <get-igmp-snooping-membership-information>
  <brief/>
  <detail/>
  <vlan>vlan</vlan>
  <interface>interface</interface>
</get-igmp-snooping-membership-information>
</rpc>
```

**Description** Show igmp-snooping membership

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<vlan>—Groups on specified VLAN

<interface>—Groups with membership on interface

## <get-igmp-snooping-routing-information>

---

### Usage

```
<rpc>
  <get-igmp-snooping-routing-information>
  <ethernet-switching/>
  <inet/>
  <brief/>
  <detail/>
  <vlan>vlan</vlan>
</get-igmp-snooping-routing-information>
</rpc>
```

**Description** Show routing information

**Contents** <ethernet-switching>—Ethernet-switching multicast routes

<inet>—Family inet multicast routes

<brief>—Display brief output (default)

<detail>—Display detailed output

<vlan>—Show entries for a specific VLAN

## <get-igmp-snooping-statistics-information>

---

**Usage**

```
<rpc>
  <get-igmp-snooping-statistics-information/>
</rpc>
```

**Description** Show igmp-snooping statistics

## <get-igmp-snooping-task-accounting>

---

**Usage**

```
<rpc>
  <get-igmp-snooping-task-accounting>
    <brief/>
    <detail/>
  </get-igmp-snooping-task-accounting>
</rpc>
```

**Description** Per-task CPU accounting

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

## <get-igmp-snooping-task-information>

---

**Usage**

```
<rpc>
  <get-igmp-snooping-task-information>
    <summary/>
  </get-igmp-snooping-task-information>
</rpc>
```

**Description** Show IGMP snooping task information

**Contents** <get-igmp-snooping-task-accounting>—Per-task CPU accounting

<get-igmp-snooping-task-io>—Show task I/O statistics

<get-igmp-snooping-task-jobs>—Show scheduled jobs

<get-igmp-snooping-task-timers>—Task timers

<get-igmp-snooping-task-statistics>—Task statistics

<get-igmp-snooping-task-memory>—Show memory utilization of IGMP snooping tasks

<summary>—Display summary output (default)

---

### <get-igmp-snooping-task-io>

---

#### Usage

```
<rpc>
  <get-igmp-snooping-task-io/>
</rpc>
```

**Description** Show task I/O statistics

---

### <get-igmp-snooping-task-jobs>

---

#### Usage

```
<rpc>
  <get-igmp-snooping-task-jobs/>
</rpc>
```

**Description** Show scheduled jobs

---

### <get-igmp-snooping-task-memory>

---

#### Usage

```
<rpc>
  <get-igmp-snooping-task-memory>
    <summary/>
    <brief/>
    <detail/>
    <history/>
    <fragmentation/>
  </get-igmp-snooping-task-memory>
</rpc>
```

**Description** Show memory utilization of IGMP snooping tasks

**Contents** <summary>—Display current and maximum memory usage

<brief>—Display current/maximum/available memory

<detail>—Display memory usage by individual users

<history>—Display memory usage in the recent past

<fragmentation>—Display memory allocator fragmentation

## <get-igmp-snooping-task-statistics>

---

**Usage**

```
<rpc>
  <get-igmp-snooping-task-statistics/>
</rpc>
```

**Description** Task statistics

## <get-igmp-snooping-task-timers>

---

**Usage**

```
<rpc>
  <get-igmp-snooping-task-timers>
    <brief/>
    <expired/>
    <detail/>
  </get-igmp-snooping-task-timers>
</rpc>
```

**Description** Task timers

**Contents** <brief>—Display brief output (default)

<expired>—Display expired timers

<detail>—Display timer detail

## <get-igmp-snooping-vlan-information>

---

**Usage**

```
<rpc>
  <get-igmp-snooping-vlan-information>
    <brief/>
    <detail/>
    <vlan>vlan</vlan>
  </get-igmp-snooping-vlan-information>
</rpc>
```

**Description** VLAN information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<vlan>—VLAN name

## <get-interface-ethernet-switching-table>

---

**Usage**

```
<rpc>
  <get-interface-ethernet-switching-table>
    <interface-name>interface-name</interface-name>
  </get-interface-ethernet-switching-table>
</rpc>
```

**Description** Display MAC table for a specified interface

**Contents** <interface-name>—Name of interface for which to display the table

## <get-ip-source-guard-information>

---

**Usage**

```
<rpc>
  <get-ip-source-guard-information/>
</rpc>
```

**Description** Show IP source guard information

## <get-l2pt-interface-information>

---

**Usage**

```
<rpc>
  <get-l2pt-interface-information>
    <interface-name>interface-name</interface-name>
  </get-l2pt-interface-information>
</rpc>
```

**Description** Show Layer2 protocol tunneling state for interfaces

**Contents** <interface-name>—Name of interface

## <get-l2pt-interface-statistics>

---

**Usage**

```
<rpc>
  <get-l2pt-interface-statistics>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-l2pt-interface-statistics>
</rpc>
```

**Description** Show Layer2 protocol tunneling statistics for interfaces

**Contents** <interface-name>—Name of interface

---

## <get-l2pt-statistics>

### Usage

```
<rpc>
  <get-l2pt-statistics>
</get-l2pt-statistics>
</rpc>
```

**Description** Show Layer2 protocol tunneling statistics

**Contents** <get-l2pt-interface-statistics>—Show Layer2 protocol tunneling statistics for interfaces  
<get-l2pt-vlan-statistics>—Show Layer2 protocol tunneling statistics for vlans

---

## <get-l2pt-vlan-information>

### Usage

```
<rpc>
  <get-l2pt-vlan-information>
    <vlan-name>vlan-name</vlan-name>
  </get-l2pt-vlan-information>
</rpc>
```

**Description** Show Layer2 protocol tunneling state for vlans

**Contents** <vlan-name>—Name of VLAN

---

## <get-l2pt-vlan-statistics>

### Usage

```
<rpc>
  <get-l2pt-vlan-statistics>
    <vlan-name>vlan-name</vlan-name> <!-- mandatory -->
  </get-l2pt-vlan-statistics>
</rpc>
```

**Description** Show Layer2 protocol tunneling statistics for vlans

**Contents** <vlan-name>—Name of VLAN

---

## <get-lldp-neighbors-information>

### Usage

```
<rpc>
```

```
<get-lldp-neighbors-information>  
</get-lldp-neighbors-information>  
</rpc>
```

**Description** Show LLDP neighbor information

**Contents** <interface>—Show LLDP neighbors on this interface

---

### <get-management-vlan-ethernet-switching-table>

---

**Usage**

```
<rpc>  
<get-management-vlan-ethernet-switching-table/>  
</rpc>
```

**Description** Display MAC table for a Management VLAN

---

### <get-mstp-bridge-configuration-information>

---

**Usage**

```
<rpc>  
<get-mstp-bridge-configuration-information>  
<brief/>  
<detail/>  
</get-mstp-bridge-configuration-information>  
</rpc>
```

**Description** Show MSTP configuration

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

---

### <get-mvrp-dynamic-vlan-memberships>

---

**Usage**

```
<rpc>  
<get-mvrp-dynamic-vlan-memberships/>  
</rpc>
```

**Description** Show MVRP dynamic VLAN memberships

## <get-mvrp-information>

---

**Usage**

```
<rpc>
  <get-mvrp-information>
</get-mvrp-information>
</rpc>
```

**Description** Show Multiple VLAN Registration Protocol information

**Contents** <get-mvrp-stats>—Show MVRP statistics  
<get-mvrp-dynamic-vlan-memberships>—Show MVRP dynamic VLAN memberships

## <get-mvrp-stats>

---

**Usage**

```
<rpc>
  <get-mvrp-stats>
</get-mvrp-stats>
</rpc>
```

**Description** Show MVRP statistics

**Contents** <get-mvrp-stats-intf>—Show MVRP statistics on this interface

## <get-mvrp-stats-intf>

---

**Usage**

```
<rpc>
  <get-mvrp-stats-intf>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-mvrp-stats-intf>
</rpc>
```

**Description** Show MVRP statistics on this interface

**Contents** <interface-name>—Show statistics for this interface

## <get-rtg-information>

---

**Usage**

```
<rpc>
  <get-rtg-information>
</get-rtg-information>
```

</rpc>

**Description** Show redundant trunk group information

**Contents** <get-rtg-information-pergrp>—Show information for a particular redundant trunk group

---

### <get-rtg-information-pergrp>

---

**Usage**

```
<rpc>
  <get-rtg-information-pergrp>
    <rtg-name>rtg-name</rtg-name> <!-- mandatory -->
  </get-rtg-information-pergrp>
</rpc>
```

**Description** Show information for a particular redundant trunk group

**Contents** <rtg-name>—Name of group

---

### <get-static-mac-bypassed-users>

---

**Usage**

```
<rpc>
  <get-static-mac-bypassed-users/>
</rpc>
```

**Description** List users who have bypassed 802.1X authentication

---

### <get-stp-bridge-information>

---

**Usage**

```
<rpc>
  <get-stp-bridge-information>
    <brief/>
    <detail/>
    <msti-vlan>msti-vlan</msti-vlan>
    <msti>msti</msti>
    <vlan-id>vlan-id</vlan-id>
  </get-stp-bridge-information>
</rpc>
```

**Description** Show STP bridge parameters

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<msti>—MSTP instance ID (0 for CIST; 1..4094 for MSTIs)

<vlan-id>—VLAN ID

---

## <get-stp-bridge-interface-information>

### Usage

```
<rpc>
  <get-stp-bridge-interface-information>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
    <msti-vlan>msti-vlan</msti-vlan>
    <msti>msti</msti>
    <vlan-id>vlan-id</vlan-id>
  </get-stp-bridge-interface-information>
</rpc>
```

**Description** Show STP interface parameters

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

<msti>—MSTP instance ID (0 for CIST; 1..4094 for MSTIs)

<vlan-id>—VLAN ID

---

## <get-stp-statistics-interface-information>

### Usage

```
<rpc>
  <get-stp-statistics-interface-information>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
  </get-stp-statistics-interface-information>
</rpc>
```

**Description** Show STP interface statistics

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

## <get-stp-vlan-interface-statistics>

---

**Usage**

```
<rpc>
  <get-stp-vlan-interface-statistics>
    <brief/>
    <detail/>
    <vlan-id>vlan-id</vlan-id> <!-- mandatory -->
  </get-stp-vlan-interface-statistics>
</rpc>
```

**Description** Show STP VLAN interface statistics

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<vlan-id>—VLAN ID

## <get-vlan-ethernet-switching-table>

---

**Usage**

```
<rpc>
  <get-vlan-ethernet-switching-table>
    <summary/>
    <brief/>
    <detail/>
    <vlan-name>vlan-name</vlan-name>
  </get-vlan-ethernet-switching-table>
</rpc>
```

**Description** Display MAC table for a specified VLAN

**Contents** <summary>—Display summary output

<brief>—Display brief output (default)

<detail>—Display detailed output

<vlan-name>—Name of VLAN for which to display the table

## <get-vlan-information>

---

**Usage**

```
<rpc>
  <get-vlan-information>
    <brief/>
    <detail/>
    <extensive/>
```

```
<summary/>
<sort-by>sort-by</sort-by>
<vlan-name>vlan-name</vlan-name>
</get-vlan-information>
</rpc>
```

**Description** Show VLAN information

**Contents** <brief>—Display brief output

- name - Sort display by name
- tag - Sort display by tag

<detail>—Display detailed output

- name - Sort display by name
- tag - Sort display by tag

<extensive>—Display extensive output

- name - Sort display by name
- tag - Sort display by tag

<summary>—Display summary output

- name - Sort display by name
- tag - Sort display by tag

<management-vlan>—Show management vlan information

- name - Sort display by name
- tag - Sort display by tag

<dot1q-tunneling>—Show dot1q-tunneling vlan information

- name - Sort display by name
- tag - Sort display by tag

<sort-by>—Specify display order

- name - Sort display by name
- tag - Sort display by tag

<vlan-name>—Show information for a particular VLAN

## <load-dhcp-snooping>

---

**Usage**

```
<rpc>
  <load-dhcp-snooping>
    <filename>filename</filename> <!-- mandatory -->
  </load-dhcp-snooping>
</rpc>
```

**Description** Load DHCP snooping entries

**Contents** <filename>—Filename (URL, local, remote)

## <release-dhcp-client>

---

**Usage**

```
<rpc>
  <release-dhcp-client>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </release-dhcp-client>
</rpc>
```

**Description** Request DHCP client release

**Contents** <interface-name>—Interface name of DHCP client

## <renew-dhcp-client>

---

**Usage**

```
<rpc>
  <renew-dhcp-client>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </renew-dhcp-client>
</rpc>
```

**Description** Request DHCP client renew

**Contents** <interface-name>—Interface name of DHCP client

## <request-multicast-route-counter>

---

**Usage**

```
<rpc>
  <request-multicast-route-counter>
    <source>source</source>
    <group>group</group>
```

```
<instance>instance</instance>
</request-multicast-route-counter>
</rpc>
```

**Description** Bind route to counter

**Contents** <source>—IP address of source  
 <group>—IP address of group  
 <instance>—Name of instance

## <save-dhcp-snooping>

---

### Usage

```
<rpc>
  <save-dhcp-snooping>
    <filename>filename</filename> <!-- mandatory -->
  </save-dhcp-snooping>
</rpc>
```

**Description** Save DHCP snooping entries

**Contents** <filename>—Filename (URL, local, remote)

## CHAPTER 7

# Operational Request Tag Elements Specific to M, MX, and T Series

This chapter lists the Junos Extensible Markup Language (XML) tag elements that a client of the Junos XML protocol or NETCONF server uses to request operational information. The tag names are in alphabetical order. For information about the notation used in this chapter, see [Table 2 on page cccxxxix](#).

The tags listed in this chapter are specific to devices belonging to:

- M Series
- MX Series
- T Series

### <abort-in-service-upgrade>

---

#### Usage

```
<rpc>
  <abort-in-service-upgrade/>
</rpc>
```

**Description** Abort in-service software upgrade

### <all-routing-engines>

---

#### Usage

```
<rpc>
  <all-routing-engines/>
</rpc>
```

**Description** Execute command on all routing-engines

## <check-in-service-upgrade>

---

### Usage

```
<rpc>
  <check-in-service-upgrade>
    <package-name>package-name</package-name> <!-- mandatory -->
  </check-in-service-upgrade>
</rpc>
```

**Description** Check in-service software upgrade

**Contents** <package-name>—URL or path of package

## <clear-aaa-statistics-table>

---

### Usage

```
<rpc>
  <clear-aaa-statistics-table>
    <authentication/>
    <accounting/>
    <dynamic-requests/>
    <re-authentication/>
    <terminate-code/>
  </clear-aaa-statistics-table>
</rpc>
```

**Description** Statistics on subscriber events

**Contents** <authentication>—Authentication statistics

<accounting>—Accounting statistics

<dynamic-requests>—Dynamic requests statistics

<re-authentication>—Re-authentication statistics

<terminate-code>—Terminate-code usage statistics

<address-assignment>—Statistics for address assignments

## <clear-aaa-subscriber-table>

---

### Usage

```
<rpc>
  <clear-aaa-subscriber-table>
    <username>username</username> <!-- mandatory -->
  </clear-aaa-subscriber-table>
</rpc>
```

**Description** Logout the subscriber and clear the session entry

**Contents** <username>—Subscriber session identifier  
 <clear-aaa-subscriber-table-specific-statistics>—Clear subscriber statistics

### <clear-aaa-subscriber-table-specific-statistics>

---

**Usage**

```
<rpc>
  <clear-aaa-subscriber-table-specific-statistics>
    <username>username</username> <!-- mandatory -->
  </clear-aaa-subscriber-table-specific-statistics>
</rpc>
```

**Description** Clear subscriber statistics

**Contents** <username>—Subscriber session identifier

### <clear-ancp-neighbor-connection>

---

**Usage**

```
<rpc>
  <clear-ancp-neighbor-connection>
    <ip-address>ip-address</ip-address>
    <system-name>system-name</system-name>
  </clear-ancp-neighbor-connection>
</rpc>
```

**Description** Clear neighbor connection

**Contents** <ip-address>—IP address of the neighbor  
 <system-name>—MAC address of the neighbor

### <clear-ancp-subscriber-identifier-information>

---

**Usage**

```
<rpc>
  <clear-ancp-subscriber-identifier-information>
    <identifier-name>identifier-name</identifier-name> <!-- mandatory -->
    <neighbor>neighbor</neighbor>
  </clear-ancp-subscriber-identifier-information>
</rpc>
```

**Description** Access loop identifier

**Contents**    <identifier-name>—Identifier  
                 <neighbor>—Subscriber information from a neighbor

---

## <clear-appid-application-statistics>

---

### Usage

```
<rpc>  
  <clear-appid-application-statistics>  
  </clear-appid-application-statistics>  
</rpc>
```

**Description**    Clear the application statistics

**Contents**    <clear-appid-application-statistics-cumulative>—Clear the cumulative application statistics  
                 <clear-appid-application-statistics-interval>—Clear the application interval statistics

---

## <clear-appid-application-statistics-cumulative>

---

### Usage

```
<rpc>  
  <clear-appid-application-statistics-cumulative/>  
</rpc>
```

**Description**    Clear the cumulative application statistics

---

## <clear-appid-application-statistics-interval>

---

### Usage

```
<rpc>  
  <clear-appid-application-statistics-interval/>  
</rpc>
```

**Description**    Clear the application interval statistics

---

## <clear-appid-application-system-cache>

---

### Usage

```
<rpc>  
  <clear-appid-application-system-cache>  
    <logical-system>logical-system</logical-system>  
  </clear-appid-application-system-cache>  
</rpc>
```

**Description** Clear application system cache

**Contents** <logical-system>—Logical-system name

- all - All logical-systems (Default)
- root-logical-system - Root logical-system only
- logical-system-name - Individual logical-system

---

### <clear-appid-counter>

---

**Usage**

```
<rpc>  
  <clear-appid-counter/>  
</rpc>
```

**Description** Clear the application identification counters

---

### <clear-application-aware-access-list-statistics-interface>

---

**Usage**

```
<rpc>  
  <clear-application-aware-access-list-statistics-interface>  
    <interface-name>interface-name</interface-name>  
  </clear-application-aware-access-list-statistics-interface>  
</rpc>
```

**Description** Clear application aware access list statistics by interface name

**Contents** <interface-name>—

---

### <clear-application-aware-access-list-statistics-subscriber>

---

**Usage**

```
<rpc>  
  <clear-application-aware-access-list-statistics-subscriber>  
    <subscriber>subscriber</subscriber>  
  </clear-application-aware-access-list-statistics-subscriber>  
</rpc>
```

**Description** Clear application aware access list statistics by subscriber name

**Contents** <subscriber>—

## <clear-arp-table>

---

**Usage**

```
<rpc>
  <clear-arp-table>
    <hostname>hostname</hostname>
    <interface>interface</interface>
    <vpn>vpn</vpn>
    <logical-system>logical-system</logical-system>
  </clear-arp-table>
</rpc>
```

**Description** Clear address resolution information

**Contents** <hostname>—Name of host

<interface>—Name of the interface

<vpn>—Name of VPN routing table

<logical-system>—Name of logical system

## <clear-authentication-pending-table>

---

**Usage**

```
<rpc>
  <clear-authentication-pending-table>

  <clear-authentication-pending-table-specific>clear-authentication-pending-table-specific</clear-authentication-pending-table-specific>

  </clear-authentication-pending-table>
</rpc>
```

**Description** Clear pending authentication requests

**Contents** <clear-authentication-pending-table-specific>—Clear information for a specific request

## <clear-authentication-statistics>

---

**Usage**

```
<rpc>
  <clear-authentication-statistics/>
</rpc>
```

**Description** Clear general authentication statistics

## <clear-auto-configuration-interfaces>

---

**Usage**

```

<rpc>
  <clear-auto-configuration-interfaces>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-auto-configuration-interfaces>
</rpc>

```

**Description** Clear interfaces

**Contents** <interface-name>—Name of interface

## <clear-bgp-damping>

---

**Usage**

```

<rpc>
  <clear-bgp-damping>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <prefix>prefix</prefix>
  </clear-bgp-damping>
</rpc>

```

**Description** Clear damping information

**Contents** <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<prefix>—Destination prefix and prefix length

## <clear-bgp-neighbor>

---

**Usage**

```

<rpc>
  <clear-bgp-neighbor>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <soft/>
    <soft-minimum-igp/>
    <soft-inbound/>
    <instance>instance</instance>
    <as>as</as>
    <neighbor>neighbor</neighbor>
  </clear-bgp-neighbor>

```

</rpc>

**Description** Clear BGP neighbors

**Contents** <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<soft>—Soft reset outbound state

<soft-minimum-igp>—Soft reset outbound state with refresh of minimum igp MED

<soft-inbound>—Soft reset inbound state by issuing Refresh

<instance>—Name of BGP instance

<as>— Autonomous system number in plain number or 'higher 16bits'. 'Lower 16 bits' (asdot notation) format

<neighbor>—Particular BGP neighbor to clear

---

## <clear-bgp-table>

### Usage

```
<rpc>
  <clear-bgp-table>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <table>table</table> <!-- mandatory -->
  </clear-bgp-table>
</rpc>
```

**Description** Refresh routes in a routing table

**Contents** <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<table>—Name of table to clear

---

## <clear-binding-all>

### Usage

```
<rpc>
  <clear-binding-all>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-binding-all>
```

</rpc>

**Description** Clear all bindings

**Contents** <routing-instance>—Name of routing instance  
<logical-system>—Name of logical system

---

### <clear-binding-ip>

---

**Usage**

```
<rpc>
  <clear-binding-ip>
    <ip-address>ip-address</ip-address> <!-- mandatory -->
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-binding-ip>
</rpc>
```

**Description** Clear binding entry based on IP address

**Contents** <ip-address>—Enter IP Address  
<routing-instance>—Name of routing instance  
<logical-system>—Name of logical system

---

### <clear-binding-nai>

---

**Usage**

```
<rpc>
  <clear-binding-nai>
    <nai>nai</nai> <!-- mandatory -->
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-binding-nai>
</rpc>
```

**Description** Clear binding entry based on nai

**Contents** <nai>—Enter nai  
<routing-instance>—Name of routing instance  
<logical-system>—Name of logical system

## <clear-bpdu-error>

---

### Usage

```
<rpc>
  <clear-bpdu-error>
    <interface-name>interface-name</interface-name>
  </clear-bpdu-error>
</rpc>
```

**Description** Clear BPDU error on an interface (BPDU Protect)

**Contents** <interface-name>—Name of interface

## <clear-bridge-interface-mac-table>

---

### Usage

```
<rpc>
  <clear-bridge-interface-mac-table>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <remote-beb-mac-address>remote-beb-mac-address</remote-beb-mac-address>

    <vlan-id>vlan-id</vlan-id>
    <isid>isid</isid>
  </clear-bridge-interface-mac-table>
</rpc>
```

**Description** Clear media access control table for specified interface

**Contents** <interface-name>—Name of interface for which to clear table

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<remote-beb-mac-address>—Remote backbone edge bridge MAC address

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<vlan-id>—Clear MAC address learned on a specified VLAN

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<isid>—Clear MAC address learned on a specified ISID

- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

## <clear-bridge-mac-table>

### Usage

```
<rpc>
  <clear-bridge-mac-table>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
    <vlan-id>vlan-id</vlan-id>
    <isid>isid</isid>
    <address>address</address>
  </clear-bridge-mac-table>
</rpc>
```

**Description** Clear all learned media access control addresses

**Contents** <clear-bridge-interface-mac-table>—Clear media access control table for specified interface

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<instance>—Display information for a specified instance

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<bridge-domain>—Name of bridging domain, or 'all'

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN

- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<logical-system>—Name of logical system, or 'all'

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<vlan-id>—Clear MAC address learned on a specified VLAN

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<isid>—Clear MAC address learned on a specified ISID

- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<address>—MAC address

---

## <clear-cfm-continuity-measurement>

---

### Usage

```
<rpc>
  <clear-cfm-continuity-measurement>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <local-mep>local-mep</local-mep>
    <remote-mep>remote-mep</remote-mep>
  </clear-cfm-continuity-measurement>
</rpc>
```

**Description** Clear continuity-measurement information

**Contents** <maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

<local-mep>—Identifier for local maintenance endpoint

<remote-mep>—Identifier for remote maintenance endpoint

## <clear-cfm-delay-statistics>

### Usage

```

<rpc>
  <clear-cfm-delay-statistics>
    <one-way/>
    <two-way/>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
<!-- mandatory -->
    <logical-system>logical-system</logical-system>
  </clear-cfm-delay-statistics>
</rpc>

```

**Description** Clear Ethernet OAM delay statistics

**Contents**

- <one-way>—One-way delay measurement
- <two-way>—Two-way delay measurement
- <maintenance-domain>—Name of maintenance domain
- <maintenance-association>—Name of maintenance association
- <logical-system>—Name of logical system

## <clear-cfm-iterator-statistics>

### Usage

```

<rpc>
  <clear-cfm-iterator-statistics>
    <sla-iterator>sla-iterator</sla-iterator> <!-- mandatory -->
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
<!-- mandatory -->
    <local-mep>local-mep</local-mep> <!-- mandatory -->
    <remote-mep>remote-mep</remote-mep> <!-- mandatory -->
    <logical-system>logical-system</logical-system>
  </clear-cfm-iterator-statistics>
</rpc>

```

**Description** Clear Ethernet OAM SLA iterator statistics information

**Contents**

- <sla-iterator>—Name of the iterator profile
- <maintenance-domain>—Name of maintenance domain
- <maintenance-association>—Name of maintenance association

<local-mep>—Identifier for local maintenance endpoint

<remote-mep>—MEP identifier of remote host

<logical-system>—Name of logical system

---

## <clear-cfm-linktrace-path-database>

---

### Usage

```
<rpc>
  <clear-cfm-linktrace-path-database>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <host>host</host> <!-- mandatory -->
    <logical-system>logical-system</logical-system>
  </clear-cfm-linktrace-path-database>
</rpc>
```

**Description** Clear linktrace path-database entries of a remote host

**Contents** <maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

<host>—MAC address of remote host in xx:xx:xx:xx:xx:xx format

<logical-system>—Name of logical system

---

## <clear-cfm-loss-statistics>

---

### Usage

```
<rpc>
  <clear-cfm-loss-statistics>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
  </clear-cfm-loss-statistics>
</rpc>
```

**Description** Clear Ethernet OAM loss statistics

**Contents** <maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

## <clear-cfm-statistics>

---

**Usage**

```
<rpc>
  <clear-cfm-statistics>
    <interface>interface</interface>
    <level>level</level>
    <logical-system>logical-system</logical-system>
  </clear-cfm-statistics>
</rpc>
```

**Description** Clear connectivity-fault-management statistics

**Contents** <interface>—Clear the statistics on an interface

<level>—The maintenance-domain level

<logical-system>—Name of logical system

## <clear-cpcdd-interface-statistics>

---

**Usage**

```
<rpc>
  <clear-cpcdd-interface-statistics>
    <pic-name>pic-name</pic-name> <!-- mandatory -->
  </clear-cpcdd-interface-statistics>
</rpc>
```

**Description** Clear statistics by PIC

**Contents** <pic-name>—

## <clear-database-replication-statistics-information>

---

**Usage**

```
<rpc>
  <clear-database-replication-statistics-information/>
</rpc>
```

**Description** Clear database replication statistics

## <clear-ddos-ancp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ancp-aggregate-states/>
```

```
</rpc>
```

**Description**    Reset aggregate states

---

### <clear-ddos-ancp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ancp-aggregate-statistics/>  
</rpc>
```

**Description**    Clear aggregate statistics

---

### <clear-ddos-ancp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ancp-states/>  
</rpc>
```

**Description**    Reset ANCP states

---

### <clear-ddos-ancp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ancp-statistics/>  
</rpc>
```

**Description**    Clear ANCP statistics

---

### <clear-ddos-ancpv6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ancpv6-aggregate-states/>  
</rpc>
```

**Description**    Reset aggregate states

---

### <clear-ddos-ancpv6-aggregate-statistics>

---

**Usage**

```
<rpc>
```

```
<clear-ddos-ancpv6-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

---

### <clear-ddos-ancpv6-states>

---

**Usage**

```
<rpc>
<clear-ddos-ancpv6-states/>
</rpc>
```

**Description** Reset ANCPv6 states

---

### <clear-ddos-ancpv6-statistics>

---

**Usage**

```
<rpc>
<clear-ddos-ancpv6-statistics/>
</rpc>
```

**Description** Clear ANCPv6 statistics

---

### <clear-ddos-arp-aggregate-states>

---

**Usage**

```
<rpc>
<clear-ddos-arp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

---

### <clear-ddos-arp-aggregate-statistics>

---

**Usage**

```
<rpc>
<clear-ddos-arp-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-arp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-arp-states/>  
</rpc>
```

**Description**    Reset ARP states

## <clear-ddos-arp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-arp-statistics/>  
</rpc>
```

**Description**    Clear ARP statistics

## <clear-ddos-atm-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-atm-aggregate-states/>  
</rpc>
```

**Description**    Reset aggregate states

## <clear-ddos-atm-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-atm-aggregate-statistics/>  
</rpc>
```

**Description**    Clear aggregate statistics

## <clear-ddos-atm-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-atm-states/>  
</rpc>
```

**Description**    Reset ATM states

### <clear-ddos-atm-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-atm-statistics/>  
</rpc>
```

**Description** Clear ATM statistics

### <clear-ddos-bfd-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-bfd-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-bfd-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-bfd-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-bfd-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-bfd-states/>  
</rpc>
```

**Description** Reset BFD states

### <clear-ddos-bfd-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-bfd-statistics/>  
</rpc>
```

**Description** Clear BFD statistics

## <clear-ddos-bfdv6-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-bfdv6-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-bfdv6-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-bfdv6-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-bfdv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-bfdv6-states/>
</rpc>
```

**Description** Reset BFDv6 states

## <clear-ddos-bfdv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-bfdv6-statistics/>
</rpc>
```

**Description** Clear BFDv6 statistics

## <clear-ddos-bgp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-bgp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-bgp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-bgp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-bgp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-bgp-states/>  
</rpc>
```

**Description** Reset BGP states

### <clear-ddos-bgp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-bgp-statistics/>  
</rpc>
```

**Description** Clear BGP statistics

### <clear-ddos-bgpv6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-bgpv6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-bgpv6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-bgpv6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-bgpv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-bgpv6-states/>
</rpc>
```

**Description** Reset BGPv6 states

## <clear-ddos-bgpv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-bgpv6-statistics/>
</rpc>
```

**Description** Clear BGPv6 statistics

## <clear-ddos-demuxauto-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-demuxauto-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-demuxauto-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-demuxauto-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-demuxauto-states>

---

**Usage**

```
<rpc>
  <clear-ddos-demuxauto-states/>
</rpc>
```

**Description** Reset Demux-Autosense states

### <clear-ddos-demuxauto-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-demuxauto-statistics/>  
</rpc>
```

**Description** Clear Demux-Autosense statistics

### <clear-ddos-dhcpv4-ack-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-ack-states/>  
</rpc>
```

**Description** Reset ack states

### <clear-ddos-dhcpv4-ack-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-ack-statistics/>  
</rpc>
```

**Description** Clear ack statistics

### <clear-ddos-dhcpv4-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-dhcpv4-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-dhcpv4-bad-pack-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-bad-pack-states/>  
</rpc>
```

**Description** Reset bad-packets states

## <clear-ddos-dhcpv4-bad-pack-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-bad-pack-statistics/>  
</rpc>
```

**Description** Clear bad-packets statistics

## <clear-ddos-dhcpv4-bootp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-bootp-states/>  
</rpc>
```

**Description** Reset bootp states

## <clear-ddos-dhcpv4-bootp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-bootp-statistics/>  
</rpc>
```

**Description** Clear bootp statistics

## <clear-ddos-dhcpv4-decline-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-decline-states/>  
</rpc>
```

**Description** Reset decline states

### <clear-ddos-dhcpv4-decline-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-decline-statistics/>  
</rpc>
```

**Description** Clear decline statistics

### <clear-ddos-dhcpv4-discover-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-discover-states/>  
</rpc>
```

**Description** Reset discover states

### <clear-ddos-dhcpv4-discover-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-discover-statistics/>  
</rpc>
```

**Description** Clear discover statistics

### <clear-ddos-dhcpv4-forcerenew-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-forcerenew-states/>  
</rpc>
```

**Description** Reset force-renew states

### <clear-ddos-dhcpv4-forcerenew-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-forcerenew-statistics/>  
</rpc>
```

**Description** Clear force-renew statistics

### <clear-ddos-dhcpv4-inform-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-inform-states/>
</rpc>
```

**Description**    Reset inform states

### <clear-ddos-dhcpv4-inform-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-inform-statistics/>
</rpc>
```

**Description**    Clear inform statistics

### <clear-ddos-dhcpv4-leaseact-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-leaseact-states/>
</rpc>
```

**Description**    Reset lease-active states

### <clear-ddos-dhcpv4-leaseact-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-leaseact-statistics/>
</rpc>
```

**Description**    Clear lease-active statistics

### <clear-ddos-dhcpv4-leasequery-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-leasequery-states/>
</rpc>
```

**Description**    Reset lease-query states

### <clear-ddos-dhcpv4-leasequery-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-leasequery-statistics/>  
</rpc>
```

**Description** Clear lease-query statistics

### <clear-ddos-dhcpv4-leaseuna-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-leaseuna-states/>  
</rpc>
```

**Description** Reset lease-unassigned states

### <clear-ddos-dhcpv4-leaseuna-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-leaseuna-statistics/>  
</rpc>
```

**Description** Clear lease-unassigned statistics

### <clear-ddos-dhcpv4-leaseunk-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-leaseunk-states/>  
</rpc>
```

**Description** Reset lease-unknown states

### <clear-ddos-dhcpv4-leaseunk-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-leaseunk-statistics/>  
</rpc>
```

**Description** Clear lease-unknown statistics

## <clear-ddos-dhcpv4-nak-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-nak-states/>
</rpc>
```

**Description** Reset nak states

## <clear-ddos-dhcpv4-nak-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-nak-statistics/>
</rpc>
```

**Description** Clear nak statistics

## <clear-ddos-dhcpv4-no-msgtype-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-no-msgtype-states/>
</rpc>
```

**Description** Reset no-message-type states

## <clear-ddos-dhcpv4-no-msgtype-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-no-msgtype-statistics/>
</rpc>
```

**Description** Clear no-message-type statistics

## <clear-ddos-dhcpv4-offer-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-offer-states/>
</rpc>
```

**Description** Reset offer states

### <clear-ddos-dhcpv4-offer-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-offer-statistics/>  
</rpc>
```

**Description** Clear offer statistics

### <clear-ddos-dhcpv4-release-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-release-states/>  
</rpc>
```

**Description** Reset release states

### <clear-ddos-dhcpv4-release-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-release-statistics/>  
</rpc>
```

**Description** Clear release statistics

### <clear-ddos-dhcpv4-renew-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-renew-states/>  
</rpc>
```

**Description** Reset renew states

### <clear-ddos-dhcpv4-renew-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-renew-statistics/>  
</rpc>
```

**Description** Clear renew statistics

### <clear-ddos-dhcpv4-request-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-request-states/>
</rpc>
```

**Description** Reset request states

### <clear-ddos-dhcpv4-request-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-request-statistics/>
</rpc>
```

**Description** Clear request statistics

### <clear-ddos-dhcpv4-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-states/>
</rpc>
```

**Description** Reset DHCPv4 states

### <clear-ddos-dhcpv4-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-statistics/>
</rpc>
```

**Description** Clear DHCPv4 statistics

### <clear-ddos-dhcpv4-unclass-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv4-unclass-states/>
</rpc>
```

**Description** Reset unclassified states

### <clear-ddos-dhcpv4-unclass-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv4-unclass-statistics/>  
</rpc>
```

**Description** Clear unclassified statistics

### <clear-ddos-dhcpv6-advertise-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-advertise-states/>  
</rpc>
```

**Description** Reset advertise states

### <clear-ddos-dhcpv6-advertise-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-advertise-statistics/>  
</rpc>
```

**Description** Clear advertise statistics

### <clear-ddos-dhcpv6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-dhcpv6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-dhcpv6-confirm-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-confirm-states/>
</rpc>
```

**Description**    Reset confirm states

## <clear-ddos-dhcpv6-confirm-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-confirm-statistics/>
</rpc>
```

**Description**    Clear confirm statistics

## <clear-ddos-dhcpv6-decline-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-decline-states/>
</rpc>
```

**Description**    Reset decline states

## <clear-ddos-dhcpv6-decline-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-decline-statistics/>
</rpc>
```

**Description**    Clear decline statistics

## <clear-ddos-dhcpv6-info-req-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-info-req-states/>
</rpc>
```

**Description**    Reset information-request states

### <clear-ddos-dhcpv6-info-req-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-info-req-statistics/>  
</rpc>
```

**Description** Clear information-request statistics

### <clear-ddos-dhcpv6-leaseq-da-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-leaseq-da-states/>  
</rpc>
```

**Description** Reset leasequery-data states

### <clear-ddos-dhcpv6-leaseq-da-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-leaseq-da-statistics/>  
</rpc>
```

**Description** Clear leasequery-data statistics

### <clear-ddos-dhcpv6-leaseq-do-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-leaseq-do-states/>  
</rpc>
```

**Description** Reset leasequery-done states

### <clear-ddos-dhcpv6-leaseq-do-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-leaseq-do-statistics/>  
</rpc>
```

**Description** Clear leasequery-done statistics

## <clear-ddos-dhcpv6-leaseq-re-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-leaseq-re-states/>  
</rpc>
```

**Description** Reset leasequery-reply states

## <clear-ddos-dhcpv6-leaseq-re-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-leaseq-re-statistics/>  
</rpc>
```

**Description** Clear leasequery-reply statistics

## <clear-ddos-dhcpv6-leasequery-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-leasequery-states/>  
</rpc>
```

**Description** Reset leasequery states

## <clear-ddos-dhcpv6-leasequery-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-leasequery-statistics/>  
</rpc>
```

**Description** Clear leasequery statistics

## <clear-ddos-dhcpv6-rebind-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-rebind-states/>  
</rpc>
```

**Description** Reset rebind states

### <clear-ddos-dhcpv6-rebind-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-rebind-statistics/>  
</rpc>
```

**Description** Clear rebind statistics

### <clear-ddos-dhcpv6-reconfig-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-reconfig-states/>  
</rpc>
```

**Description** Reset reconfigure states

### <clear-ddos-dhcpv6-reconfig-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-reconfig-statistics/>  
</rpc>
```

**Description** Clear reconfigure statistics

### <clear-ddos-dhcpv6-relay-for-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-relay-for-states/>  
</rpc>
```

**Description** Reset relay-forward states

### <clear-ddos-dhcpv6-relay-for-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-relay-for-statistics/>  
</rpc>
```

**Description** Clear relay-forward statistics

## <clear-ddos-dhcpv6-relay-rep-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-relay-rep-states/>
</rpc>
```

**Description** Reset relay-reply states

## <clear-ddos-dhcpv6-relay-rep-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-relay-rep-statistics/>
</rpc>
```

**Description** Clear relay-reply statistics

## <clear-ddos-dhcpv6-release-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-release-states/>
</rpc>
```

**Description** Reset release states

## <clear-ddos-dhcpv6-release-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-release-statistics/>
</rpc>
```

**Description** Clear release statistics

## <clear-ddos-dhcpv6-renew-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-renew-states/>
</rpc>
```

**Description** Reset renew states

### <clear-ddos-dhcpv6-renew-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-renew-statistics/>  
</rpc>
```

**Description** Clear renew statistics

### <clear-ddos-dhcpv6-reply-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-reply-states/>  
</rpc>
```

**Description** Reset reply states

### <clear-ddos-dhcpv6-reply-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-reply-statistics/>  
</rpc>
```

**Description** Clear reply statistics

### <clear-ddos-dhcpv6-request-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-request-states/>  
</rpc>
```

**Description** Reset request states

### <clear-ddos-dhcpv6-request-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-request-statistics/>  
</rpc>
```

**Description** Clear request statistics

## <clear-ddos-dhcpv6-solicit-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-solicit-states/>
</rpc>
```

**Description** Reset solicit states

## <clear-ddos-dhcpv6-solicit-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-solicit-statistics/>
</rpc>
```

**Description** Clear solicit statistics

## <clear-ddos-dhcpv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-states/>
</rpc>
```

**Description** Reset DHCPv6 states

## <clear-ddos-dhcpv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-statistics/>
</rpc>
```

**Description** Clear DHCPv6 statistics

## <clear-ddos-dhcpv6-unclass-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dhcpv6-unclass-states/>
</rpc>
```

**Description** Reset unclassified states

### <clear-ddos-dhcpv6-unclass-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dhcpv6-unclass-statistics/>  
</rpc>
```

**Description** Clear unclassified statistics

### <clear-ddos-diameter-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-diameter-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-diameter-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-diameter-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-diameter-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-diameter-states/>  
</rpc>
```

**Description** Reset Diameter states

### <clear-ddos-diameter-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-diameter-statistics/>  
</rpc>
```

**Description** Clear Diameter statistics

## <clear-ddos-dns-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dns-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-dns-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dns-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-dns-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dns-states/>
</rpc>
```

**Description** Reset DNS states

## <clear-ddos-dns-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dns-statistics/>
</rpc>
```

**Description** Clear DNS statistics

## <clear-ddos-dtcp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dtcp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-dtcp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dtcp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-dtcp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dtcp-states/>  
</rpc>
```

**Description** Reset dtcp states

### <clear-ddos-dtcp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dtcp-statistics/>  
</rpc>
```

**Description** Clear dtcp statistics

### <clear-ddos-dynvlan-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-dynvlan-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-dynvlan-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-dynvlan-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-dynvlan-states>

---

**Usage**

```
<rpc>
  <clear-ddos-dynvlan-states/>
</rpc>
```

**Description** Reset Dynamic-Vlan states

### <clear-ddos-dynvlan-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-dynvlan-statistics/>
</rpc>
```

**Description** Clear Dynamic-Vlan statistics

### <clear-ddos-egpv6-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-egpv6-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-egpv6-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-egpv6-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-egpv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-egpv6-states/>
</rpc>
```

**Description** Reset EGPv6 states

### <clear-ddos-egpv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-egpv6-statistics/>
</rpc>
```

**Description** Clear EGPv6 statistics

### <clear-ddos-eoam-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-eoam-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-eoam-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-eoam-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-eoam-states>

---

**Usage**

```
<rpc>
  <clear-ddos-eoam-states/>
</rpc>
```

**Description** Reset EOAM states

### <clear-ddos-eoam-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-eoam-statistics/>
</rpc>
```

**Description** Clear EOAM statistics

## <clear-ddos-esmc-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-esmc-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-esmc-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-esmc-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-esmc-states>

---

**Usage**

```
<rpc>
  <clear-ddos-esmc-states/>
</rpc>
```

**Description** Reset ESMC states

## <clear-ddos-esmc-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-esmc-statistics/>
</rpc>
```

**Description** Clear ESMC statistics

## <clear-ddos-ftp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ftp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ftp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ftp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ftp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ftp-states/>  
</rpc>
```

**Description** Reset FTP states

### <clear-ddos-ftp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ftp-statistics/>  
</rpc>
```

**Description** Clear FTP statistics

### <clear-ddos-ftp6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ftp6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ftp6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ftp6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-ftp6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ftp6-states/>
</rpc>
```

**Description** Reset FTPv6 states

## <clear-ddos-ftp6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ftp6-statistics/>
</rpc>
```

**Description** Clear FTPv6 statistics

## <clear-ddos-fw-host-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-fw-host-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-fw-host-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-fw-host-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-fw-host-states>

---

**Usage**

```
<rpc>
  <clear-ddos-fw-host-states/>
</rpc>
```

**Description** Reset Firewall-Host states

### <clear-ddos-fw-host-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-fw-host-statistics/>  
</rpc>
```

**Description** Clear Firewall-Host statistics

### <clear-ddos-fw-reject-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-fw-reject-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-fw-reject-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-fw-reject-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-fw-reject-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-fw-reject-states/>  
</rpc>
```

**Description** Reset Firewall-Reject states

### <clear-ddos-fw-reject-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-fw-reject-statistics/>  
</rpc>
```

**Description** Clear Firewall-Reject statistics

## <clear-ddos-gre-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-gre-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-gre-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-gre-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-gre-states>

---

**Usage**

```
<rpc>
  <clear-ddos-gre-states/>
</rpc>
```

**Description** Reset GRE states

## <clear-ddos-gre-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-gre-statistics/>
</rpc>
```

**Description** Clear GRE statistics

## <clear-ddos-icmp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-icmp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-icmp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-icmp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-icmp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-icmp-states/>  
</rpc>
```

**Description** Reset ICMP states

### <clear-ddos-icmp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-icmp-statistics/>  
</rpc>
```

**Description** Clear ICMP statistics

### <clear-ddos-igmp-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmp-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-igmp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-igmp-snoop-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmp-snoop-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-igmp-snoop-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmp-snoop-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-igmp-snoop-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmp-snoop-states/>  
</rpc>
```

**Description** Reset IGMP-Snoop states

### <clear-ddos-igmp-snoop-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmp-snoop-statistics/>  
</rpc>
```

**Description** Clear IGMP-Snoop statistics

### <clear-ddos-igmp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmp-states/>  
</rpc>
```

**Description** Reset IGMP states

### <clear-ddos-igmp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmp-statistics/>  
</rpc>
```

**Description** Clear IGMP statistics

### <clear-ddos-igmpv4v6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmpv4v6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-igmpv4v6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmpv4v6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-igmpv4v6-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmpv4v6-states/>  
</rpc>
```

**Description** Reset IGMPv4v6 states

### <clear-ddos-igmpv4v6-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmpv4v6-statistics/>  
</rpc>
```

**Description** Clear IGMPv4v6 statistics

## <clear-ddos-igmpv6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmpv6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-igmpv6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmpv6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-igmpv6-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmpv6-states/>  
</rpc>
```

**Description** Reset IGMPv6 states

## <clear-ddos-igmpv6-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-igmpv6-statistics/>  
</rpc>
```

**Description** Clear IGMPv6 statistics

## <clear-ddos-ip-frag-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-frag-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ip-frag-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-frag-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ip-frag-first-frag-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-frag-first-frag-states/>  
</rpc>
```

**Description** Reset first-fragment states

### <clear-ddos-ip-frag-first-frag-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-frag-first-frag-statistics/>  
</rpc>
```

**Description** Clear first-fragment statistics

### <clear-ddos-ip-frag-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-frag-states/>  
</rpc>
```

**Description** Reset IP-Fragments states

### <clear-ddos-ip-frag-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-frag-statistics/>  
</rpc>
```

**Description** Clear IP-Fragments statistics

### <clear-ddos-ip-frag-trail-frag-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ip-frag-trail-frag-states/>
</rpc>
```

**Description** Reset trail-fragment states

### <clear-ddos-ip-frag-trail-frag-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ip-frag-trail-frag-statistics/>
</rpc>
```

**Description** Clear trail-fragment statistics

### <clear-ddos-ip-opt-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ip-opt-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ip-opt-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ip-opt-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ip-opt-rt-alert-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ip-opt-rt-alert-states/>
</rpc>
```

**Description** Reset router-alert states

### <clear-ddos-ip-opt-rt-alert-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-opt-rt-alert-statistics/>  
</rpc>
```

**Description** Clear router-alert statistics

### <clear-ddos-ip-opt-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-opt-states/>  
</rpc>
```

**Description** Reset IP-Options states

### <clear-ddos-ip-opt-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-opt-statistics/>  
</rpc>
```

**Description** Clear IP-Options statistics

### <clear-ddos-ip-opt-unclass-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-opt-unclass-states/>  
</rpc>
```

**Description** Reset unclassified states

### <clear-ddos-ip-opt-unclass-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ip-opt-unclass-statistics/>  
</rpc>
```

**Description** Clear unclassified statistics

### <clear-ddos-ipv4-uncls-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ipv4-uncls-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ipv4-uncls-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ipv4-uncls-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ipv4-uncls-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ipv4-uncls-states/>  
</rpc>
```

**Description** Reset IPv4-Unclassified states

### <clear-ddos-ipv4-uncls-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ipv4-uncls-statistics/>  
</rpc>
```

**Description** Clear IPv4-Unclassified statistics

### <clear-ddos-ipv6-uncls-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ipv6-uncls-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ipv6-uncls-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ipv6-uncls-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ipv6-uncls-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ipv6-uncls-states/>  
</rpc>
```

**Description** Reset IPv6-Unclassified states

### <clear-ddos-ipv6-uncls-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ipv6-uncls-statistics/>  
</rpc>
```

**Description** Clear IPv6-Unclassified statistics

### <clear-ddos-isis-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-isis-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-isis-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-isis-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-isis-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-isis-states/>  
</rpc>
```

**Description**    Reset ISIS states

## <clear-ddos-isis-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-isis-statistics/>  
</rpc>
```

**Description**    Clear ISIS statistics

## <clear-ddos-jfm-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-jfm-aggregate-states/>  
</rpc>
```

**Description**    Reset aggregate states

## <clear-ddos-jfm-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-jfm-aggregate-statistics/>  
</rpc>
```

**Description**    Clear aggregate statistics

## <clear-ddos-jfm-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-jfm-states/>  
</rpc>
```

**Description**    Reset JFM states

### <clear-ddos-jfm-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-jfm-statistics/>  
</rpc>
```

**Description** Clear JFM statistics

### <clear-ddos-l2tp-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-l2tp-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-l2tp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-l2tp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-l2tp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-l2tp-states/>  
</rpc>
```

**Description** Reset L2TP states

### <clear-ddos-l2tp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-l2tp-statistics/>  
</rpc>
```

**Description** Clear L2TP statistics

## <clear-ddos-lacp-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-lacp-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-lacp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-lacp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-lacp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-lacp-states/>  
</rpc>
```

**Description** Reset LACP states

## <clear-ddos-lacp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-lacp-statistics/>  
</rpc>
```

**Description** Clear LACP statistics

## <clear-ddos-ldp-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ldp-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ldp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ldp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ldp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ldp-states/>  
</rpc>
```

**Description** Reset LDP states

### <clear-ddos-ldp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ldp-statistics/>  
</rpc>
```

**Description** Clear LDP statistics

### <clear-ddos-ldpv6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ldpv6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ldpv6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ldpv6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-ldpv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ldpv6-states/>
</rpc>
```

**Description** Reset LDPv6 states

## <clear-ddos-ldpv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ldpv6-statistics/>
</rpc>
```

**Description** Clear LDPv6 statistics

## <clear-ddos-lldp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-lldp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-lldp-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-lldp-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-lldp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-lldp-states/>
</rpc>
```

**Description** Reset LLDP states

### <clear-ddos-lldp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-lldp-statistics/>  
</rpc>
```

**Description** Clear LLDP statistics

### <clear-ddos-lmp-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-lmp-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-lmp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-lmp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-lmp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-lmp-states/>  
</rpc>
```

**Description** Reset LMP states

### <clear-ddos-lmp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-lmp-statistics/>  
</rpc>
```

**Description** Clear LMP statistics

## <clear-ddos-lmpv6-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-lmpv6-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-lmpv6-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-lmpv6-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-lmpv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-lmpv6-states/>
</rpc>
```

**Description** Reset LMPv6 states

## <clear-ddos-lmpv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-lmpv6-statistics/>
</rpc>
```

**Description** Clear LMPv6 statistics

## <clear-ddos-mac-host-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-mac-host-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-mac-host-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-mac-host-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-mac-host-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-mac-host-states/>  
</rpc>
```

**Description** Reset Mac-Host states

### <clear-ddos-mac-host-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-mac-host-statistics/>  
</rpc>
```

**Description** Clear Mac-Host statistics

### <clear-ddos-mcast-copy-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-mcast-copy-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-mcast-copy-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-mcast-copy-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-mcast-copy-states>

---

**Usage**

```
<rpc>
  <clear-ddos-mcast-copy-states/>
</rpc>
```

**Description** Reset Multicast-Copy states

## <clear-ddos-mcast-copy-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-mcast-copy-statistics/>
</rpc>
```

**Description** Clear Multicast-Copy statistics

## <clear-ddos-mlp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-mlp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-mlp-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-mlp-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-mlp-aging-exc-states>

---

**Usage**

```
<rpc>
  <clear-ddos-mlp-aging-exc-states/>
</rpc>
```

**Description** Reset aging-exception states

### <clear-ddos-mlp-aging-exc-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-mlp-aging-exc-statistics/>  
</rpc>
```

**Description** Clear aging-exception statistics

### <clear-ddos-mlp-packets-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-mlp-packets-states/>  
</rpc>
```

**Description** Reset packets states

### <clear-ddos-mlp-packets-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-mlp-packets-statistics/>  
</rpc>
```

**Description** Clear packets statistics

### <clear-ddos-mlp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-mlp-states/>  
</rpc>
```

**Description** Reset MLP states

### <clear-ddos-mlp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-mlp-statistics/>  
</rpc>
```

**Description** Clear MLP statistics

## <clear-ddos-mlp-unclass-states>

---

**Usage**

```
<rpc>
  <clear-ddos-mlp-unclass-states/>
</rpc>
```

**Description** Reset unclassified states

## <clear-ddos-mlp-unclass-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-mlp-unclass-statistics/>
</rpc>
```

**Description** Clear unclassified statistics

## <clear-ddos-msdp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-msdp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-msdp-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-msdp-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-msdp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-msdp-states/>
</rpc>
```

**Description** Reset MSDP states

### <clear-ddos-msdp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-msdp-statistics/>
</rpc>
```

**Description** Clear MSDP statistics

### <clear-ddos-msdpv6-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-msdpv6-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-msdpv6-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-msdpv6-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-msdpv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-msdpv6-states/>
</rpc>
```

**Description** Reset MSDPv6 states

### <clear-ddos-msdpv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-msdpv6-statistics/>
</rpc>
```

**Description** Clear MSDPv6 statistics

### <clear-ddos-mvrp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-mvrp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-mvrp-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-mvrp-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-mvrp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-mvrp-states/>
</rpc>
```

**Description** Reset MVRP states

### <clear-ddos-mvrp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-mvrp-statistics/>
</rpc>
```

**Description** Clear MVRP statistics

### <clear-ddos-ntp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ntp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ntp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ntp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ntp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ntp-states/>  
</rpc>
```

**Description** Reset NTP states

### <clear-ddos-ntp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ntp-statistics/>  
</rpc>
```

**Description** Clear NTP statistics

### <clear-ddos-oam-lfm-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-oam-lfm-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-oam-lfm-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-oam-lfm-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-oam-lfm-states>

---

**Usage**

```
<rpc>
  <clear-ddos-oam-lfm-states/>
</rpc>
```

**Description** Reset OAM-LFM states

## <clear-ddos-oam-lfm-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-oam-lfm-statistics/>
</rpc>
```

**Description** Clear OAM-LFM statistics

## <clear-ddos-ospf-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ospf-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-ospf-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ospf-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-ospf-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ospf-states/>
</rpc>
```

**Description** Reset OSPF states

### <clear-ddos-ospf-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ospf-statistics/>  
</rpc>
```

**Description** Clear OSPF statistics

### <clear-ddos-ospfv3v6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ospfv3v6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ospfv3v6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ospfv3v6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ospfv3v6-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ospfv3v6-states/>  
</rpc>
```

**Description** Reset OSPFv3v6 states

### <clear-ddos-ospfv3v6-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ospfv3v6-statistics/>  
</rpc>
```

**Description** Clear OSPFv3v6 statistics

## <clear-ddos-pfe-alive-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pfe-alive-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-pfe-alive-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pfe-alive-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-pfe-alive-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pfe-alive-states/>  
</rpc>
```

**Description** Reset Pfe-Alive states

## <clear-ddos-pfe-alive-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pfe-alive-statistics/>  
</rpc>
```

**Description** Clear Pfe-Alive statistics

## <clear-ddos-pim-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pim-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-pim-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pim-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-pim-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pim-states/>  
</rpc>
```

**Description** Reset PIM states

### <clear-ddos-pim-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pim-statistics/>  
</rpc>
```

**Description** Clear PIM statistics

### <clear-ddos-pmvrp-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pmvrp-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-pmvrp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pmvrp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-pmvrp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-pmvrp-states/>
</rpc>
```

**Description** Reset PMVRP states

## <clear-ddos-pmvrp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-pmvrp-statistics/>
</rpc>
```

**Description** Clear PMVRP statistics

## <clear-ddos-pos-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-pos-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-pos-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-pos-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-pos-states>

---

**Usage**

```
<rpc>
  <clear-ddos-pos-states/>
</rpc>
```

**Description** Reset POS states

### <clear-ddos-pos-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pos-statistics/>  
</rpc>
```

**Description** Clear POS statistics

### <clear-ddos-ppp-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ppp-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ppp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ppp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ppp-auth-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ppp-auth-states/>  
</rpc>
```

**Description** Reset authentication states

### <clear-ddos-ppp-auth-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ppp-auth-statistics/>  
</rpc>
```

**Description** Clear authentication statistics

### <clear-ddos-ppp-ipcp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ppp-ipcp-states/>
</rpc>
```

**Description** Reset ipcp states

### <clear-ddos-ppp-ipcp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ppp-ipcp-statistics/>
</rpc>
```

**Description** Clear ipcp statistics

### <clear-ddos-ppp-ipv6cp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ppp-ipv6cp-states/>
</rpc>
```

**Description** Reset ipv6cp states

### <clear-ddos-ppp-ipv6cp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ppp-ipv6cp-statistics/>
</rpc>
```

**Description** Clear ipv6cp statistics

### <clear-ddos-ppp-isis-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ppp-isis-states/>
</rpc>
```

**Description** Reset isis states

### <clear-ddos-ppp-isis-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ppp-isis-statistics/>  
</rpc>
```

**Description** Clear isis statistics

### <clear-ddos-ppp-lcp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ppp-lcp-states/>  
</rpc>
```

**Description** Reset lcp states

### <clear-ddos-ppp-lcp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ppp-lcp-statistics/>  
</rpc>
```

**Description** Clear lcp statistics

### <clear-ddos-ppp-mplscp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ppp-mplscp-states/>  
</rpc>
```

**Description** Reset mplscp states

### <clear-ddos-ppp-mplscp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ppp-mplscp-statistics/>  
</rpc>
```

**Description** Clear mplscp statistics

## <clear-ddos-ppp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ppp-states/>
</rpc>
```

**Description**    Reset PPP states

## <clear-ddos-ppp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ppp-statistics/>
</rpc>
```

**Description**    Clear PPP statistics

## <clear-ddos-pppoe-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-pppoe-aggregate-states/>
</rpc>
```

**Description**    Reset aggregate states

## <clear-ddos-pppoe-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-pppoe-aggregate-statistics/>
</rpc>
```

**Description**    Clear aggregate statistics

## <clear-ddos-pppoe-padi-states>

---

**Usage**

```
<rpc>
  <clear-ddos-pppoe-padi-states/>
</rpc>
```

**Description**    Reset padi states

### <clear-ddos-pppoe-padi-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-padi-statistics/>  
</rpc>
```

**Description** Clear padi statistics

### <clear-ddos-pppoe-padm-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-padm-states/>  
</rpc>
```

**Description** Reset padm states

### <clear-ddos-pppoe-padm-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-padm-statistics/>  
</rpc>
```

**Description** Clear padm statistics

### <clear-ddos-pppoe-padn-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-padn-states/>  
</rpc>
```

**Description** Reset padn states

### <clear-ddos-pppoe-padn-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-padn-statistics/>  
</rpc>
```

**Description** Clear padn statistics

### <clear-ddos-pppoe-pado-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-pado-states/>  
</rpc>
```

**Description**    Reset pado states

### <clear-ddos-pppoe-pado-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-pado-statistics/>  
</rpc>
```

**Description**    Clear pado statistics

### <clear-ddos-pppoe-padr-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-padr-states/>  
</rpc>
```

**Description**    Reset padr states

### <clear-ddos-pppoe-padr-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-padr-statistics/>  
</rpc>
```

**Description**    Clear padr statistics

### <clear-ddos-pppoe-pads-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-pads-states/>  
</rpc>
```

**Description**    Reset pads states

### <clear-ddos-pppoe-pads-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-pads-statistics/>  
</rpc>
```

**Description** Clear pads statistics

### <clear-ddos-pppoe-padt-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-padt-states/>  
</rpc>
```

**Description** Reset padt states

### <clear-ddos-pppoe-padt-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-padt-statistics/>  
</rpc>
```

**Description** Clear padt statistics

### <clear-ddos-pppoe-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-states/>  
</rpc>
```

**Description** Reset PPPoE states

### <clear-ddos-pppoe-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-pppoe-statistics/>  
</rpc>
```

**Description** Clear PPPoE statistics

## <clear-ddos-protocols-states>

---

**Usage**

```
<rpc>
  <clear-ddos-protocols-states/>
</rpc>
```

**Description** Reset states of all protocols

## <clear-ddos-protocols-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-protocols-statistics/>
</rpc>
```

**Description** Clear statistics of all protocols

## <clear-ddos-ntp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ntp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-ntp-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ntp-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-ntp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ntp-states/>
</rpc>
```

**Description** Reset NTP states

### <clear-ddos-ptp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ptp-statistics/>
</rpc>
```

**Description** Clear PTP statistics

### <clear-ddos-pvstp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-pvstp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-pvstp-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-pvstp-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-pvstp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-pvstp-states/>
</rpc>
```

**Description** Reset PVSTP states

### <clear-ddos-pvstp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-pvstp-statistics/>
</rpc>
```

**Description** Clear PVSTP statistics

### <clear-ddos-radius-account-states>

---

**Usage**

```
<rpc>
  <clear-ddos-radius-account-states/>
</rpc>
```

**Description**    Reset accounting states

### <clear-ddos-radius-account-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-radius-account-statistics/>
</rpc>
```

**Description**    Clear accounting statistics

### <clear-ddos-radius-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-radius-aggregate-states/>
</rpc>
```

**Description**    Reset aggregate states

### <clear-ddos-radius-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-radius-aggregate-statistics/>
</rpc>
```

**Description**    Clear aggregate statistics

### <clear-ddos-radius-auth-states>

---

**Usage**

```
<rpc>
  <clear-ddos-radius-auth-states/>
</rpc>
```

**Description**    Reset authorization states

### <clear-ddos-radius-auth-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-radius-auth-statistics/>  
</rpc>
```

**Description** Clear authorization statistics

### <clear-ddos-radius-server-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-radius-server-states/>  
</rpc>
```

**Description** Reset server states

### <clear-ddos-radius-server-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-radius-server-statistics/>  
</rpc>
```

**Description** Clear server statistics

### <clear-ddos-radius-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-radius-states/>  
</rpc>
```

**Description** Reset Radius states

### <clear-ddos-radius-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-radius-statistics/>  
</rpc>
```

**Description** Clear Radius statistics

## <clear-ddos-redirect-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-redirect-aggregate-states/>  
</rpc>
```

**Description**    Reset aggregate states

## <clear-ddos-redirect-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-redirect-aggregate-statistics/>  
</rpc>
```

**Description**    Clear aggregate statistics

## <clear-ddos-redirect-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-redirect-states/>  
</rpc>
```

**Description**    Reset Redirect states

## <clear-ddos-redirect-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-redirect-statistics/>  
</rpc>
```

**Description**    Clear Redirect statistics

## <clear-ddos-rip-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-rip-aggregate-states/>  
</rpc>
```

**Description**    Reset aggregate states

### <clear-ddos-rip-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-rip-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-rip-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-rip-states/>  
</rpc>
```

**Description** Reset RIP states

### <clear-ddos-rip-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-rip-statistics/>  
</rpc>
```

**Description** Clear RIP statistics

### <clear-ddos-ripv6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ripv6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ripv6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ripv6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-ripv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ripv6-states/>
</rpc>
```

**Description** Reset RIPv6 states

## <clear-ddos-ripv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ripv6-statistics/>
</rpc>
```

**Description** Clear RIPv6 statistics

## <clear-ddos-rsvp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-rsvp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-rsvp-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-rsvp-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-rsvp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-rsvp-states/>
</rpc>
```

**Description** Reset RSVP states

### <clear-ddos-rsvp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-rsvp-statistics/>
</rpc>
```

**Description** Clear RSVP statistics

### <clear-ddos-rsvpv6-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-rsvpv6-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-rsvpv6-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-rsvpv6-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-rsvpv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-rsvpv6-states/>
</rpc>
```

**Description** Reset RSVPv6 states

### <clear-ddos-rsvpv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-rsvpv6-statistics/>
</rpc>
```

**Description** Clear RSVPv6 statistics

## <clear-ddos-services-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-services-aggregate-states/>  
</rpc>
```

**Description**    Reset aggregate states

## <clear-ddos-services-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-services-aggregate-statistics/>  
</rpc>
```

**Description**    Clear aggregate statistics

## <clear-ddos-services-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-services-states/>  
</rpc>
```

**Description**    Reset Services states

## <clear-ddos-services-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-services-statistics/>  
</rpc>
```

**Description**    Clear Services statistics

## <clear-ddos-snmp-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-snmp-aggregate-states/>  
</rpc>
```

**Description**    Reset aggregate states

### <clear-ddos-snmp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-snmp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-snmp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-snmp-states/>  
</rpc>
```

**Description** Reset SNMP states

### <clear-ddos-snmp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-snmp-statistics/>  
</rpc>
```

**Description** Clear SNMP statistics

### <clear-ddos-snmpv6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-snmpv6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-snmpv6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-snmpv6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-snmpv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-snmpv6-states/>
</rpc>
```

**Description** Reset SNMPv6 states

### <clear-ddos-snmpv6-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-snmpv6-statistics/>
</rpc>
```

**Description** Clear SNMPv6 statistics

### <clear-ddos-ssh-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ssh-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ssh-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-ssh-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ssh-states>

---

**Usage**

```
<rpc>
  <clear-ddos-ssh-states/>
</rpc>
```

**Description** Reset SSH states

### <clear-ddos-ssh-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ssh-statistics/>  
</rpc>
```

**Description** Clear SSH statistics

### <clear-ddos-sshv6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-sshv6-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-sshv6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-sshv6-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-sshv6-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-sshv6-states/>  
</rpc>
```

**Description** Reset SSHv6 states

### <clear-ddos-sshv6-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-sshv6-statistics/>  
</rpc>
```

**Description** Clear SSHv6 statistics

## <clear-ddos-stp-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-stp-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-stp-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-stp-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-stp-states>

---

**Usage**

```
<rpc>
  <clear-ddos-stp-states/>
</rpc>
```

**Description** Reset STP states

## <clear-ddos-stp-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-stp-statistics/>
</rpc>
```

**Description** Clear STP statistics

## <clear-ddos-tacacs-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-tacacs-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-tacacs-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-tacacs-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-tacacs-states>

---

**Usage**

```
<rpc>
  <clear-ddos-tacacs-states/>
</rpc>
```

**Description** Reset TACACS states

### <clear-ddos-tacacs-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-tacacs-statistics/>
</rpc>
```

**Description** Clear TACACS statistics

### <clear-ddos-tcp-flags-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-tcp-flags-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-tcp-flags-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-tcp-flags-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-tcp-flags-establish-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-tcp-flags-establish-states/>  
</rpc>
```

**Description**    Reset established states

### <clear-ddos-tcp-flags-establish-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-tcp-flags-establish-statistics/>  
</rpc>
```

**Description**    Clear established statistics

### <clear-ddos-tcp-flags-initial-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-tcp-flags-initial-states/>  
</rpc>
```

**Description**    Reset initial states

### <clear-ddos-tcp-flags-initial-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-tcp-flags-initial-statistics/>  
</rpc>
```

**Description**    Clear initial statistics

### <clear-ddos-tcp-flags-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-tcp-flags-states/>  
</rpc>
```

**Description**    Reset TCP-Flags states

### <clear-ddos-tcp-flags-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-tcp-flags-statistics/>  
</rpc>
```

**Description** Clear TCP-Flags statistics

### <clear-ddos-tcp-flags-unclass-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-tcp-flags-unclass-states/>  
</rpc>
```

**Description** Reset unclassified states

### <clear-ddos-tcp-flags-unclass-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-tcp-flags-unclass-statistics/>  
</rpc>
```

**Description** Clear unclassified statistics

### <clear-ddos-telnet-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-telnet-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-telnet-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-telnet-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-telnet-states>

---

**Usage**

```
<rpc>
  <clear-ddos-telnet-states/>
</rpc>
```

**Description** Reset Telnet states

## <clear-ddos-telnet-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-telnet-statistics/>
</rpc>
```

**Description** Clear Telnet statistics

## <clear-ddos-telnetv6-aggregate-states>

---

**Usage**

```
<rpc>
  <clear-ddos-telnetv6-aggregate-states/>
</rpc>
```

**Description** Reset aggregate states

## <clear-ddos-telnetv6-aggregate-statistics>

---

**Usage**

```
<rpc>
  <clear-ddos-telnetv6-aggregate-statistics/>
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-telnetv6-states>

---

**Usage**

```
<rpc>
  <clear-ddos-telnetv6-states/>
</rpc>
```

**Description** Reset Telnetv6 states

### <clear-ddos-telnetv6-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-telnetv6-statistics/>  
</rpc>
```

**Description** Clear Telnetv6 statistics

### <clear-ddos-ttl-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ttl-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-ttl-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ttl-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-ttl-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-ttl-states/>  
</rpc>
```

**Description** Reset TTL states

### <clear-ddos-ttl-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-ttl-statistics/>  
</rpc>
```

**Description** Clear TTL statistics

### <clear-ddos-tun-frag-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-tun-frag-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-tun-frag-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-tun-frag-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-tun-frag-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-tun-frag-states/>  
</rpc>
```

**Description** Reset Tunnel-Fragment states

### <clear-ddos-tun-frag-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-tun-frag-statistics/>  
</rpc>
```

**Description** Clear Tunnel-Fragment statistics

### <clear-ddos-vchassis-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-vchassis-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

### <clear-ddos-vchassis-control-hi-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-control-hi-states/>  
</rpc>
```

**Description** Reset control-high states

### <clear-ddos-vchassis-control-hi-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-control-hi-statistics/>  
</rpc>
```

**Description** Clear control-high statistics

### <clear-ddos-vchassis-control-lo-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-control-lo-states/>  
</rpc>
```

**Description** Reset control-low states

### <clear-ddos-vchassis-control-lo-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-control-lo-statistics/>  
</rpc>
```

**Description** Clear control-low statistics

### <clear-ddos-vchassis-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-states/>  
</rpc>
```

**Description** Reset Virtual-Chassis states

### <clear-ddos-vchassis-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-statistics/>  
</rpc>
```

**Description** Clear Virtual-Chassis statistics

### <clear-ddos-vchassis-unclass-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-unclass-states/>  
</rpc>
```

**Description** Reset unclassified states

### <clear-ddos-vchassis-unclass-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-unclass-statistics/>  
</rpc>
```

**Description** Clear unclassified statistics

### <clear-ddos-vchassis-vc-packets-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-vc-packets-states/>  
</rpc>
```

**Description** Reset vc-packets states

### <clear-ddos-vchassis-vc-packets-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-vc-packets-statistics/>  
</rpc>
```

**Description** Clear vc-packets statistics

### <clear-ddos-vchassis-vc-ttl-err-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-vc-ttl-err-states/>  
</rpc>
```

**Description** Reset vc-ttl-errors states

### <clear-ddos-vchassis-vc-ttl-err-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vchassis-vc-ttl-err-statistics/>  
</rpc>
```

**Description** Clear vc-ttl-errors statistics

### <clear-ddos-vrrp-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vrrp-aggregate-states/>  
</rpc>
```

**Description** Reset aggregate states

### <clear-ddos-vrrp-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vrrp-aggregate-statistics/>  
</rpc>
```

**Description** Clear aggregate statistics

## <clear-ddos-vrrp-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vrrp-states/>  
</rpc>
```

**Description**    Reset VRRP states

## <clear-ddos-vrrp-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vrrp-statistics/>  
</rpc>
```

**Description**    Clear VRRP statistics

## <clear-ddos-vrrpv6-aggregate-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vrrpv6-aggregate-states/>  
</rpc>
```

**Description**    Reset aggregate states

## <clear-ddos-vrrpv6-aggregate-statistics>

---

**Usage**

```
<rpc>  
  <clear-ddos-vrrpv6-aggregate-statistics/>  
</rpc>
```

**Description**    Clear aggregate statistics

## <clear-ddos-vrrpv6-states>

---

**Usage**

```
<rpc>  
  <clear-ddos-vrrpv6-states/>  
</rpc>
```

**Description**    Reset VRRPV6 states

## <clear-ddos-vrrpv6-statistics>

### Usage

```
<rpc>
  <clear-ddos-vrrpv6-statistics/>
</rpc>
```

**Description** Clear VRRPV6 statistics

## <clear-dhcp-relay-binding-information>

### Usage

```
<rpc>
  <clear-dhcp-relay-binding-information>
    <binding-clear-choice>binding-clear-choice</binding-clear-choice> <!-- mandatory
-->
    <address>address</address>
    <all/>
    <routing-instance>routing-instance</routing-instance>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
  </clear-dhcp-relay-binding-information>
</rpc>
```

**Description** Clear DHCP client binding information

**Contents** <address>—IP address or MAC address or Session Id of DHCP client binding

<all>—Clear all bindings

<interface>—Name of interface on which to clear bindings

<routing-instance>—Name of routing instance

<bridge-domain>—Name of bridge domain

<logical-system>—Name of logical system

## <clear-dhcp-relay-statistics-information>

### Usage

```
<rpc>
  <clear-dhcp-relay-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
  </clear-dhcp-relay-statistics-information>
</rpc>
```

**Description** Clear DHCP statistics

**Contents** <routing-instance>—Name of routing instance  
<bridge-domain>—Name of bridge domain  
<logical-system>—Name of logical system

---

## <clear-dhcp-server-binding-information>

---

### Usage

```
<rpc>
  <clear-dhcp-server-binding-information>
    <binding-clear-choice>binding-clear-choice</binding-clear-choice> <!-- mandatory
-->
    <address>address</address>
    <all/>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-dhcp-server-binding-information>
</rpc>
```

**Description** Clear DHCP client binding information

**Contents** <address>—IP address or MAC address or Session Id of DHCP client binding  
<all>—Clear all bindings  
<interface>—Name of interface on which to clear bindings  
<routing-instance>—Name of routing instance  
<logical-system>—Name of logical system

---

## <clear-dhcpv6-relay-binding-information>

---

### Usage

```
<rpc>
  <clear-dhcpv6-relay-binding-information>
    <binding-clear-choice>binding-clear-choice</binding-clear-choice> <!-- mandatory
-->
    <address>address</address>
    <all/>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-dhcpv6-relay-binding-information>
</rpc>
```

**Description** Clear DHCPv6 client binding information

**Contents** <address>—IPv6 prefix, session-id, or CID <cid-len/0x.../0x...>  
 <all>—Clear all bindings  
 <interface>—Name of interface on which to clear bindings  
 <routing-instance>—Name of routing instance  
 <logical-system>—Name of logical system

## <clear-dhcpv6-relay-statistics-information>

### Usage

```
<rpc>
  <clear-dhcpv6-relay-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-dhcpv6-relay-statistics-information>
</rpc>
```

**Description** Clear DHCPv6 relay statistics

**Contents** <routing-instance>—Name of routing instance  
 <logical-system>—Name of logical system

## <clear-dhcpv6-server-binding-information>

### Usage

```
<rpc>
  <clear-dhcpv6-server-binding-information>
    <binding-clear-choice>binding-clear-choice</binding-clear-choice> <!-- mandatory
  -->
    <address>address</address>
    <all/>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-dhcpv6-server-binding-information>
</rpc>
```

**Description** Clear DHCPv6 client binding information

**Contents** <address>—IPv6 prefix, session-id, or CID <cid-len/0x.../0x...>  
 <all>—Clear all bindings  
 <interface>—Name of interface on which to clear bindings  
 <routing-instance>—Name of routing instance

<logical-system>—Name of logical system

---

## <clear-dhcpv6-server-statistics-information>

---

### Usage

```
<rpc>
  <clear-dhcpv6-server-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-dhcpv6-server-statistics-information>
</rpc>
```

**Description** Clear DHCPv6 server statistics

**Contents** <routing-instance>—Name of routing instance  
  
<logical-system>—Name of logical system

---

## <clear-dhcpv6-service-statistics-information>

---

### Usage

```
<rpc>
  <clear-dhcpv6-service-statistics-information>
    <interface>interface</interface>
  </clear-dhcpv6-service-statistics-information>
</rpc>
```

**Description** Clear DHCPv6 service statistics

**Contents** <interface>—Name of interface

---

## <clear-diameter-function>

---

### Usage

```
<rpc>
  <clear-diameter-function>
    <statistics/>
    <jsrc/>
    <charging-gw/>
    <packet-triggered-subscribers/>
    <gx-plus/>
  </clear-diameter-function>
</rpc>
```

**Description** Clear diameter function information

**Contents** <statistics>—Clear diameter function statistics

<jsrc>—Function to use SRC application

<charging-gw>—Function to use CHARGING application

<packet-triggered-subscribers>—Function to use PACKET-TRIGGERED-SUBSCRIBERS application

<gx-plus>—Function to use GX-PLUS application

## <clear-diameter-peer>

### Usage

```
<rpc>
  <clear-diameter-peer>
    <connection/>
    <statistics/>

    <clear-diameter-peer-name>clear-diameter-peer-name</clear-diameter-peer-name>
    <!-- mandatory -->
    </clear-diameter-peer>
  </rpc>
```

**Description** Clear diameter peer information

**Contents** <connection>—Clear diameter peer connection(default)

<statistics>—Clear diameter peer statistics

<clear-diameter-peer-name>—Peer name

## <clear-dot1x-interface-session>

### Usage

```
<rpc>
  <clear-dot1x-interface-session>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-dot1x-interface-session>
</rpc>
```

**Description** Clear 802.1X session on an interface

**Contents** <interface-name>—Name of interface

## <clear-elmi-statistics>

### Usage

```
<rpc>
  <clear-elmi-statistics>
    <interface>interface</interface>
```

```
</clear-elmi-statistics>
</rpc>
```

**Description** Clear ethernet local management statistics

**Contents** <interface>—Name of interface

---

## <clear-ethernet-ring-information>

### Usage

```
<rpc>
  <clear-ethernet-ring-information>
</clear-ethernet-ring-information>
</rpc>
```

**Description** Clear ethernet ring information

**Contents** <clear-ethernet-ring-statistics>—Clear ethernet ring statistics

---

## <clear-ethernet-ring-statistics>

### Usage

```
<rpc>
  <clear-ethernet-ring-statistics>
    <group-name>group-name</group-name>
  </clear-ethernet-ring-statistics>
</rpc>
```

**Description** Clear ethernet ring statistics

**Contents** <group-name>—Name of protection group

---

## <clear-external-manager-statistics>

### Usage

```
<rpc>
  <clear-external-manager-statistics>
    <clear-external-manager-name-statistics>clear-external-manager-name-statistics</clear-external-manager-name-statistics>
  </clear-external-manager-statistics>
</rpc>
```

**Description** Clear external manager statistics

**Contents**    <clear-external-manager-name-statistics>—Clear statistics for a specific external manager

---

## <clear-fabric>

---

**Usage**

```
<rpc>
  <clear-fabric>
</clear-fabric>
</rpc>
```

**Description**    Clear RPDF Internal data structures

**Contents**    <clear-fabric-statistics>—Clear RPDF statistics information

---

## <clear-fabric-statistics>

---

**Usage**

```
<rpc>
  <clear-fabric-statistics/>
</rpc>
```

**Description**    Clear RPDF statistics information

---

## <clear-gx-plus-replay-information>

---

**Usage**

```
<rpc>
  <clear-gx-plus-replay-information/>
</rpc>
```

**Description**    Clear gx-plus replay data: request discovery from remote

---

## <clear-gx-plus-statistics-information>

---

**Usage**

```
<rpc>
  <clear-gx-plus-statistics-information/>
</rpc>
```

**Description**    Clear gx-plus statistics

## <clear-hash-table-information>

---

**Usage**

```
<rpc>
  <clear-hash-table-information>

  <clear-real-server-group-name-hash>clear-real-server-group-name-hash</clear-real-server-group-name-hash>

  </clear-hash-table-information>
</rpc>
```

**Description** Clear server load balance hash table

**Contents** <clear-real-server-group-name-hash>—Clear hash table for a specific real server group

## <clear-health-monitor-statistics>

---

**Usage**

```
<rpc>
  <clear-health-monitor-statistics>

  <clear-health-monitor-name-statistics>clear-health-monitor-name-statistics</clear-health-monitor-name-statistics>

  </clear-health-monitor-statistics>
</rpc>
```

**Description** Clear health monitor statistics

**Contents** <clear-health-monitor-name-statistics>—Clear statistics for a specific health monitor

## <clear-helper-statistics-information>

---

**Usage**

```
<rpc>
  <clear-helper-statistics-information/>
</rpc>
```

**Description** Clear helper statistics

## <clear-idp-appddos-cache>

---

**Usage**

```
<rpc>
  <clear-idp-appddos-cache/>
</rpc>
```

**Description** Clear IDP Application DDoS cache

---

### <clear-idp-application-system-cache>

---

**Usage**

```
<rpc>
  <clear-idp-application-system-cache/>
</rpc>
```

**Description** Clear IDP application system cache

---

### <clear-idp-applications-information>

---

**Usage**

```
<rpc>
  <clear-idp-applications-information/>
</rpc>
```

**Description** Clear IDP application statistics

---

### <clear-idp-attack-table>

---

**Usage**

```
<rpc>
  <clear-idp-attack-table/>
</rpc>
```

**Description** Clear IDP attack table

---

### <clear-idp-counters-by-counter-class>

---

**Usage**

```
<rpc>
  <clear-idp-counters-by-counter-class>
    <counter-class>counter-class</counter-class> <!-- mandatory -->
  </clear-idp-counters-by-counter-class>
</rpc>
```

**Description** Clear IDP counters

**Contents** <counter-class>—

## <clear-idp-ssl-session-cache-information>

---

**Usage**

```
<rpc>
  <clear-idp-ssl-session-cache-information/>
</rpc>
```

**Description** Session ID cache

## <clear-idp-status-information>

---

**Usage**

```
<rpc>
  <clear-idp-status-information/>
</rpc>
```

**Description** Clear IDP status

## <clear-interface-stp-protocol-migration>

---

**Usage**

```
<rpc>
  <clear-interface-stp-protocol-migration>
    <logical-system>logical-system</logical-system>
    <interface-name>interface-name</interface-name>
    <routing-instance>routing-instance</routing-instance>
  </clear-interface-stp-protocol-migration>
</rpc>
```

**Description** Clear Protocol Migration on an interface

**Contents** <logical-system>—Name of logical system

<interface-name>—Name of interface

<routing-instance>—Name of routing instance

## <clear-interfaces-interval>

---

**Usage**

```
<rpc>
  <clear-interfaces-interval>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-interfaces-interval>
</rpc>
```

**Description** Clear interface interval table

**Contents** <interface-name>—Name of physical interface

---

### <clear-interfaces-statistics>

---

**Usage**

```
<rpc>
  <clear-interfaces-statistics>
    <switch-port>switch-port</switch-port>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-interfaces-statistics>
</rpc>
```

**Description** Clear interface statistics

**Contents** <clear-interfaces-statistics-all>—Clear statistics for all interfaces

<switch-port>—Front end port number

<interface-name>—Name of physical or logical interface

---

### <clear-interfaces-statistics-all>

---

**Usage**

```
<rpc>
  <clear-interfaces-statistics-all/>
</rpc>
```

**Description** Clear statistics for all interfaces

---

### <clear-ipv6-nd-information>

---

**Usage**

```
<rpc>
  <clear-ipv6-nd-information>
    <host>host</host>
  </clear-ipv6-nd-information>
</rpc>
```

**Description** Clear IPv6 neighbor cache information

**Contents** <host>—Name of neighbor

<all>—Clear all neighbors

## <clear-isis-adjacency-information>

---

### Usage

```
<rpc>
  <clear-isis-adjacency-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <interface>interface</interface>
    <neighbor>neighbor</neighbor>
  </clear-isis-adjacency-information>
</rpc>
```

**Description** Clear IS-IS adjacencies

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of IS-IS instance

<interface>—Name of interface

<neighbor>—Name of neighbor

## <clear-isis-database-information>

---

### Usage

```
<rpc>
  <clear-isis-database-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <purge/>
    <entries>entries</entries>
  </clear-isis-database-information>
</rpc>
```

**Description** Clear IS-IS database entries

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of IS-IS instance

<purge>—Purge database entries instead of deleting them

<entries>—Name of database entry

## <clear-isis-overload-information>

---

### Usage

```
<rpc>
  <clear-isis-overload-information>
```

```
<logical-system>logical-system</logical-system>
<instance>instance</instance>
</clear-isis-overload-information>
</rpc>
```

**Description** Clear overload bit and regenerate LSPs

**Contents** <logical-system>—Name of logical system, or 'all'  
              <instance>—Name of IS-IS instance

---

### <clear-isis-statistics-information>

---

**Usage**

```
<rpc>
<clear-isis-statistics-information>
<logical-system>logical-system</logical-system>
<instance>instance</instance>
</clear-isis-statistics-information>
</rpc>
```

**Description** Clear IS-IS statistics

**Contents** <logical-system>—Name of logical system, or 'all'  
              <instance>—Name of IS-IS instance

---

### <clear-lacp-interface-statistics>

---

**Usage**

```
<rpc>
<clear-lacp-interface-statistics>
<interface-name>interface-name</interface-name>
</clear-lacp-interface-statistics>
</rpc>
```

**Description** Clear LACP interface statistics

**Contents** <interface-name>—Name of interface

---

### <clear-lacp-statistics>

---

**Usage**

```
<rpc>
<clear-lacp-statistics>
</clear-lacp-statistics>
```

```
</rpc>
```

**Description** Clear LACP statistics

**Contents** <clear-lACP-interface-statistics>—Clear LACP interface statistics

---

## <clear-local-policy-decision-function-statistics-interface>

---

### Usage

```
<rpc>
  <clear-local-policy-decision-function-statistics-interface>
    <interface-name>interface-name</interface-name>
  </clear-local-policy-decision-function-statistics-interface>
</rpc>
```

**Description** Clear local policy decision function statistics by interface name

**Contents** <interface-name>—

---

## <clear-local-policy-decision-function-statistics-subscriber>

---

### Usage

```
<rpc>
  <clear-local-policy-decision-function-statistics-subscriber>
    <subscriber>subscriber</subscriber>
  </clear-local-policy-decision-function-statistics-subscriber>
</rpc>
```

**Description** Clear local policy decision function statistics by subscriber name

**Contents** <subscriber>—

---

## <clear-log>

---

### Usage

```
<rpc>
  <clear-log>
    <filename>filename</filename> <!-- mandatory -->
    <all/>
  </clear-log>
</rpc>
```

**Description** Clear contents of log file

**Contents** <filename>—Name of log file

<all>—Also delete all archive (.gz) files for specified file

## <clear-mac-rewrite-error>

### Usage

```
<rpc>
<clear-mac-rewrite-error>
<interface-name>interface-name</interface-name>
</clear-mac-rewrite-error>
</rpc>
```

**Description** Clear mac-rewrite error on an interface

**Contents** <interface-name>—Name of interface

## <clear-mpls-lsp-information>

### Usage

```
<rpc>
<clear-mpls-lsp-information>
<logical-system>logical-system</logical-system>
<optimize/>
<optimize-aggressive/>
<statistics/>
<autobandwidth/>
<regex>regex</regex>
<path>path</path>
</clear-mpls-lsp-information>
</rpc>
```

**Description** Reset nontransit or egress LSPs originating on this router

**Contents** <logical-system>—Name of logical system, or 'all'

<optimize>—Perform nonpreemptive optimization computation now

<optimize-aggressive>—Perform aggressive optimization computation now

<statistics>—Clear LSP statistics

<autobandwidth>—Clear LSP autobandwidth counters

<regex>—Regular expression for LSP names to match

<path>—Regular expression for LSP path to match

## <clear-mpls-static-lsp-information>

---

**Usage**

```
<rpc>
  <clear-mpls-static-lsp-information>
    <logical-system>logical-system</logical-system>
    <statistics/>
    <regex>regex</regex>
  </clear-mpls-static-lsp-information>
</rpc>
```

**Description** Reset static LSP statistics

**Contents** <logical-system>—Name of logical system, or 'all'

<statistics>—Clear LSP statistics

<regex>—Regular expression for LSP names to match

## <clear-mvrp-interface-statistics>

---

**Usage**

```
<rpc>
  <clear-mvrp-interface-statistics>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <interface>interface</interface>
  </clear-mvrp-interface-statistics>
</rpc>
```

**Description** Clear MVRP interface statistics

**Contents** <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<interface>—Name of interface

## <clear-node-secret-file>

---

**Usage**

```
<rpc>
  <clear-node-secret-file/>
</rpc>
```

**Description** Delete SecurID authentication node secret file

## <clear-ospf-database-information>

### Usage

```

<rpc>
  <clear-ospf-database-information>
    <logical-system>logical-system</logical-system>
    <purge/>
    <router/>
    <network/>
    <netsummary/>
    <asbrsummary/>
    <external/>
    <nssa/>
    <link-local/>
    <opaque-area/>
    <area>area</area>
    <lsa-id>lsa-id</lsa-id>
    <advertising-router>advertising-router</advertising-router>
    <instance>instance</instance>
  </clear-ospf-database-information>
</rpc>

```

**Description** Clear OSPF database entries

**Contents** <logical-system>—Name of logical system, or 'all'

- self - Router ID of this router
- router-id - Router ID of advertising router

<purge>—Purge database entries instead of deleting them

- self - Router ID of this router
- router-id - Router ID of advertising router

<router>—Router link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<network>—Network link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<netsummary>—Summary network link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<asbrsummary>—Summary AS boundary router link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<external>—External link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<nssa>—Not-so-stubby area link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<link-local>—Link local link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<opaque-area>—Opaque area-scope link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<area>—OSPF area ID

- self - Router ID of this router
- router-id - Router ID of advertising router

<lsa-id>—Link-state advertisement ID

- self - Router ID of this router
- router-id - Router ID of advertising router

<advertising-router>—Router ID of advertising router

- self - Router ID of this router
- router-id - Router ID of advertising router

<instance>—Name of OSPF instance

---

## <clear-ospf-io-statistics-information>

---

### Usage

```
<rpc>
  <clear-ospf-io-statistics-information>
    <logical-system>logical-system</logical-system>
  </clear-ospf-io-statistics-information>
```

```
</rpc>
```

**Description** Clear OSPF I/O statistics

**Contents** <logical-system>—Name of logical system, or 'all'

## <clear-ospf-neighbor-information>

---

### Usage

```
<rpc>
<clear-ospf-neighbor-information>
<logical-system>logical-system</logical-system>
<interface>interface</interface>
<neighbor>neighbor</neighbor>
<area>area</area>
<instance>instance</instance>
</clear-ospf-neighbor-information>
</rpc>
```

**Description** Clear OSPF neighbors

**Contents** <logical-system>—Name of logical system, or 'all'

<interface>—Name of logical interface

<neighbor>—Name of neighbor

<area>—OSPF area ID

<instance>—Name of OSPF instance

## <clear-ospf-overload-information>

---

### Usage

```
<rpc>
<clear-ospf-overload-information>
<logical-system>logical-system</logical-system>
<instance>instance</instance>
</clear-ospf-overload-information>
</rpc>
```

**Description** Clear overload bit and rebuild LSAs

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of OSPF instance

## <clear-ospf-statistics-information>

---

### Usage

```
<rpc>
  <clear-ospf-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </clear-ospf-statistics-information>
</rpc>
```

**Description** Clear OSPF statistics

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of OSPF instance

## <clear-ospf3-database-information>

---

### Usage

```
<rpc>
  <clear-ospf3-database-information>
    <logical-system>logical-system</logical-system>
    <purge/>
    <router/>
    <network/>
    <inter-area-prefix/>
    <inter-area-router/>
    <external/>
    <nssa/>
    <link/>
    <link-local/>
    <intra-area-prefix/>
    <area>area</area>
    <lsa-id>lsa-id</lsa-id>
    <advertising-router>advertising-router</advertising-router>
    <instance>instance</instance>
    <realm>realm</realm>
  </clear-ospf3-database-information>
</rpc>
```

**Description** Clear OSPFv3 database entries

**Contents** <logical-system>—Name of logical system, or 'all'

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm

- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<purge>—Purge database entries instead of deleting them

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<router>—Router LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<network>—Network LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<inter-area-prefix>—Inter-area-prefix LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<inter-area-router>—Inter-area-router LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm

- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<external>—External LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<nssa>—NSSA LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<link>—Link LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<link-local>—Link-local LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<intra-area-prefix>—Intra-area-prefix LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm

- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—Area ID of OSPFv3 area

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<lsa-id>—ID of link-state advertisement

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<advertising-router>—Router ID of advertising router

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

## <clear-ospf3-io-statistics-information>

---

**Usage**

```
<rpc>
  <clear-ospf3-io-statistics-information>
    <logical-system>logical-system</logical-system>
  </clear-ospf3-io-statistics-information>
</rpc>
```

**Description** Clear OSPFv3 I/O statistics

**Contents** <logical-system>—Name of logical system, or 'all'

## <clear-ospf3-neighbor-information>

---

**Usage**

```
<rpc>
  <clear-ospf3-neighbor-information>
    <logical-system>logical-system</logical-system>
    <interface>interface</interface>
    <neighbor>neighbor</neighbor>
    <area>area</area>
    <instance>instance</instance>
    <realm>realm</realm>
  </clear-ospf3-neighbor-information>
</rpc>
```

**Description** Clear OSPFv3 neighbors

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<interface>—Name of logical interface

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<neighbor>—Name of OSPFv3 neighbor

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—OSPF area ID

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

## <clear-ospf3-overload-information>

### Usage

```
<rpc>
<clear-ospf3-overload-information>
  <logical-system>logical-system</logical-system>
  <instance>instance</instance>
  <realm>realm</realm>
</clear-ospf3-overload-information>
</rpc>
```

**Description** Clear overload bit and rebuild LSAs

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm

- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

## <clear-ospf3-statistics-information>

---

### Usage

```
<rpc>
  <clear-ospf3-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
  </clear-ospf3-statistics-information>
</rpc>
```

**Description** Clear OSPFv3 statistics

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

## <clear-passive-monitoring>

---

### Usage

```
<rpc>
  <clear-passive-monitoring>
</clear-passive-monitoring>
</rpc>
```

**Description** Clear passive monitoring statistics

**Contents** <clear-passive-monitoring-statistics>—Clear statistics

## <clear-passive-monitoring-statistics>

---

**Usage**

```
<rpc>
  <clear-passive-monitoring-statistics>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-passive-monitoring-statistics>
</rpc>
```

**Description** Clear statistics

**Contents** <interface-name>—Name of monitoring interface, wildcard, or 'all'

## <clear-pki-ca-certificate>

---

**Usage**

```
<rpc>
  <clear-pki-ca-certificate>
    <ca-choice>ca-choice</ca-choice> <!-- mandatory -->
    <ca-profile>ca-profile</ca-profile>
    <all/>
  </clear-pki-ca-certificate>
</rpc>
```

**Description** Clear CA/RA certificate

**Contents** <ca-profile>—Certificate authority profile  
 <all>—Clear all CA certificates

## <clear-pki-certificate-request>

---

**Usage**

```
<rpc>
  <clear-pki-certificate-request>
    <certificate-request-choice>certificate-request-choice</certificate-request-choice>
  <!-- mandatory -->
    <certificate-id>certificate-id</certificate-id>
    <all/>
  </clear-pki-certificate-request>
</rpc>
```

**Description** Clear router certificate request

**Contents** <certificate-id>—Certificate identifier

<all>—Clear all certificate requests

---

## <clear-pki-crl>

---

### Usage

```
<rpc>
  <clear-pki-crl>
    <ca-choice>ca-choice</ca-choice> <!-- mandatory -->
    <ca-profile>ca-profile</ca-profile>
  </clear-pki-crl>
</rpc>
```

**Description** Clear certificate revocation list

**Contents** <ca-profile>—Certificate authority profile

<all>—Clear all CRLs

---

## <clear-pki-key-pair>

---

### Usage

```
<rpc>
  <clear-pki-key-pair>
    <certificate-choice>certificate-choice</certificate-choice> <!-- mandatory -->
    <certificate-id>certificate-id</certificate-id>
  </clear-pki-key-pair>
</rpc>
```

**Description** Clear key pair

**Contents** <certificate-id>—Certificate identifier

<all>—Clear all local certificates

---

## <clear-pki-local-certificate>

---

### Usage

```
<rpc>
  <clear-pki-local-certificate>
    <certificate-choice>certificate-choice</certificate-choice> <!-- mandatory -->
    <certificate-id>certificate-id</certificate-id>
    <system-generated/>
  </clear-pki-local-certificate>
</rpc>
```

**Description** Clear local certificate

**Contents** <certificate-id>—Certificate identifier  
<system-generated>—Clear autogenerated self-signed certificate  
<all>—Clear all local certificates

---

### <clear-ppp-statistics-information>

---

**Usage**

```
<rpc>
  <clear-ppp-statistics-information>
    <memory/>
  </clear-ppp-statistics-information>
</rpc>
```

**Description** Clear PPP statistics

**Contents** <memory>—Clear PPP process memory statistics

---

### <clear-pppoe-sessions-information>

---

**Usage**

```
<rpc>
  <clear-pppoe-sessions-information>
    <interface>interface</interface>
  </clear-pppoe-sessions-information>
</rpc>
```

**Description** Clear sessions on all interfaces

**Contents** <interface>—Name of PPPoE logical interface

---

### <clear-pppoe-statistics-information>

---

**Usage**

```
<rpc>
  <clear-pppoe-statistics-information>

    <underlying-interface-name>underlying-interface-name</underlying-interface-name>

  </clear-pppoe-statistics-information>
</rpc>
```

**Description** Clear sum of statistics of all interfaces

**Contents** <clear-pppoe-statistics-interface-information>—Clear interface information  
<underlying-interface-name>—Name of PPPoE underlying logical interface

---

## <clear-pppoe-statistics-interface-information>

---

### Usage

```
<rpc>  
  <clear-pppoe-statistics-interface-information>  
    <interface-name>interface-name</interface-name> <!-- mandatory -->  
  </clear-pppoe-statistics-interface-information>  
</rpc>
```

**Description** Clear interface information

**Contents** <interface-name>—Name of PPPoE logical interface

---

## <clear-protection-group-information>

---

### Usage

```
<rpc>  
  <clear-protection-group-information>  
  </clear-protection-group-information>  
</rpc>
```

**Description** Clear protection group information

**Contents** <clear-ethernet-ring-information>—Clear ethernet ring information

---

## <clear-r2cp-radio>

---

### Usage

```
<rpc>  
  <clear-r2cp-radio>  
    <radio-id>radio-id</radio-id> <!-- mandatory -->  
    <all/>  
    <radio-name>radio-name</radio-name>  
  </clear-r2cp-radio>  
</rpc>
```

**Description** Clear radio

**Contents** <all>—Reset all radios

<radio-name>—Radio ID

## <clear-r2cp-session>

---

**Usage**

```

<rpc>
  <clear-r2cp-session>
    <session-id>session-id</session-id> <!-- mandatory -->
    <all/>
    <session-id>session-id</session-id>
    <vlan>vlan</vlan>
  </clear-r2cp-session>
</rpc>

```

**Description** Reset R2CP session

**Contents** <all>—Reset all sessions

<session-id>—Session ID

<vlan>—Vlan identifier

## <clear-r2cp-statistics>

---

**Usage**

```

<rpc>
  <clear-r2cp-statistics>
  </clear-r2cp-statistics>
</rpc>

```

**Description** Clear statistics

**Contents** <radio>—Clear radio statistics

<session>—Clear session statistics

## <clear-real-server-group-statistics>

---

**Usage**

```

<rpc>
  <clear-real-server-group-statistics>

  <clear-real-server-group-name-statistics>clear-real-server-group-name-statistics</clear-real-server-group-name-statistics>

  </clear-real-server-group-statistics>
</rpc>

```

**Description** Clear real server group statistics

**Contents** <clear-real-server-group-name-statistics>—Clear statistics for a specific real server group

---

## <clear-real-server-statistics>

---

### Usage

```
<rpc>
  <clear-real-server-statistics>

  <clear-real-server-name-statistics>clear-real-server-name-statistics</clear-real-server-name-statistics>

  </clear-real-server-statistics>
</rpc>
```

**Description** Clear real server statistics

**Contents** <clear-real-server-name-statistics>—Clear statistics for a specific server

---

## <clear-reboot>

---

### Usage

```
<rpc>
  <clear-reboot>
    <both-routing-engines/>
  </clear-reboot>
</rpc>
```

**Description** Clear all pending halt or reboot requests

**Contents** <both-routing-engines>—Clear halt or reboot on both Routing Engines

---

## <clear-rsvp-counters-information>

---

### Usage

```
<rpc>
  <clear-rsvp-counters-information>
    <logical-system>logical-system</logical-system>
  </clear-rsvp-counters-information>
</rpc>
```

**Description** Clear RSVP counters

**Contents** <logical-system>—Name of logical system, or 'all'

## <clear-rsvp-session-information>

### Usage

```

<rpc>
  <clear-rsvp-session-information>
    <logical-system>logical-system</logical-system>
    <session-name>session-name</session-name>
    <lsp-id>lsp-id</lsp-id>
    <tunnel-id>tunnel-id</tunnel-id>
    <gracefully/>
    <connection-source>connection-source</connection-source>
    <connection-destination>connection-destination</connection-destination>
    <optimize-fast-reroute/>
  </clear-rsvp-session-information>
</rpc>

```

**Description** Preempt RSVP session

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <session-name>—Name of session
- <lsp-id>—LSP ID of the RSVP sender
- <tunnel-id>—Tunnel ID of the RSVP session
- <gracefully>—Gracefully tear down RSVP sessions
- <connection-source>—Source of the label-switched path
- <connection-destination>—Destination of the label-switched path
- <optimize-fast-reroute>—Perform fast-reroute optimization computation now

## <clear-security-alarm-information>

### Usage

```

<rpc>
  <clear-security-alarm-information>
    <alarm-id>alarm-id</alarm-id>
    <alarm-type>alarm-type</alarm-type>
    <newer-than>newer-than</newer-than>
    <older-than>older-than</older-than>
    <process>process</process>
    <severity>severity</severity>
    <all/>
  </clear-security-alarm-information>
</rpc>

```

**Description** Clear (acknowledge) security alarms

- Contents**
- `<alarm-id>`—Alarm ID filter
    - alert - Alert severity
    - crit - Critical severity
    - debug - Debug severity
    - emerg - Emergency severity
    - err - Error severity
    - info - Information severity
    - notice - Notice severity
    - warning - Warning severity
  - `<alarm-type>`—Alarm type filter
    - alert - Alert severity
    - crit - Critical severity
    - debug - Debug severity
    - emerg - Emergency severity
    - err - Error severity
    - info - Information severity
    - notice - Notice severity
    - warning - Warning severity
  - `<newer-than>`—Alarms newer than filter (YYYY-MM-DD.HH:MM:SS)
    - alert - Alert severity
    - crit - Critical severity
    - debug - Debug severity
    - emerg - Emergency severity
    - err - Error severity
    - info - Information severity
    - notice - Notice severity
    - warning - Warning severity
  - `<older-than>`—Alarms older than filter (YYYY-MM-DD.HH:MM:SS)
    - alert - Alert severity
    - crit - Critical severity
    - debug - Debug severity
    - emerg - Emergency severity

- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<process>—Process that generated the alarm filter

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<severity>—Severity of the alarm filter

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<all>—Clear (acknowledge) all security alarms

---

## <clear-security-log-information>

---

### Usage

```
<rpc>
  <clear-security-log-information>
    <destination-address>destination-address</destination-address>
    <destination-port>destination-port</destination-port>
    <event-id>event-id</event-id>
    <interface-name>interface-name</interface-name>
    <older-than>older-than</older-than>
    <process>process</process>
    <protocol>protocol</protocol>
    <newer-than>newer-than</newer-than>
```

```
<failure/>
<success/>
<severity>severity</severity>
<source-address>source-address</source-address>
<source-port>source-port</source-port>
<username>username</username>
<all/>
</clear-security-log-information>
</rpc>
```

**Description** Clear auditable security logs

**Contents** <destination-address>—Destination address and optional prefix length

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<destination-port>—Destination port

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<event-id>—Event ID filter

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity

- info - Information severity
- notice - Notice severity
- warning - Warning severity

<interface-name>—Name of interface

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<older-than>—Events older than filter (YYYY-MM-DD.HH:MM:SS)

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<process>—Process that generated the event

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<protocol>—Protocol filter

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<newer-than>—Events newer than filter (YYYY-MM-DD.HH:MM:SS)

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<failure>—Event was a failure

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<success>—Event was successful

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity

- info - Information severity
- notice - Notice severity
- warning - Warning severity

<severity>—Severity of the event

- alert - Alert severity
- crit - Critical severity
- debug - Debug severity
- emerg - Emergency severity
- err - Error severity
- info - Information severity
- notice - Notice severity
- warning - Warning severity

<source-address>—Source address and optional prefix length

<source-port>—Source port

<username>—Username filter

<all>—Clear all security log entries

---

## <clear-server-statistics-information>

---

### Usage

```
<rpc>  
  <clear-server-statistics-information>  
    <routing-instance>routing-instance</routing-instance>  
    <logical-system>logical-system</logical-system>  
  </clear-server-statistics-information>  
</rpc>
```

**Description** Clear DHCP server statistics

**Contents** <routing-instance>—Name of routing instance  
  
<logical-system>—Name of logical system

---

## <clear-service-border-signaling-gateway-name-resolution-cache>

---

### Usage

```
<rpc>  
  <clear-service-border-signaling-gateway-name-resolution-cache>  
    <gateway>gateway</gateway> <!-- mandatory -->
```

```
<master/>
<backup/>
</clear-service-border-signaling-gateway-name-resolution-cache>
</rpc>
```

**Description** Clear border signaling gateway name resolution cache content

**Contents** <by-fqdn>—Clear cash records of the Fully Qualified Domain Name

<clear-service-border-signaling-gateway-name-resolution-cache-all>—Clear contents of the cache

<gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

---

### <clear-service-border-signaling-gateway-name-resolution-cache-all>

---

**Usage**

```
<rpc>
<clear-service-border-signaling-gateway-name-resolution-cache-all>
  <gateway>gateway</gateway> <!-- mandatory -->
  <master/>
  <backup/>
</clear-service-border-signaling-gateway-name-resolution-cache-all>
</rpc>
```

**Description** Clear contents of the cache

**Contents** <gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

---

### <clear-service-border-signaling-gateway-statistics>

---

**Usage**

```
<rpc>
<clear-service-border-signaling-gateway-statistics>
  <gateway>gateway</gateway> <!-- mandatory -->
  <master/>
  <backup/>
</clear-service-border-signaling-gateway-statistics>
</rpc>
```

**Description** Clear BSG statistics counters

- Contents**    <gateway>—Name of border signaling gateway
- <master>—Query the master border signaling gateway (default)
- <backup>—Query the backup border signaling gateway

---

### <clear-service-bsg-denied-messages>

---

**Usage**

```
<rpc>
  <clear-service-bsg-denied-messages>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </clear-service-bsg-denied-messages>
</rpc>
```

**Description**    Clear BSG denied messages information

- Contents**    <gateway>—Name of border signaling gateway
- <master>—Query the master border signaling gateway (default)
- <backup>—Query the backup border signaling gateway

---

### <clear-service-bsg-registrations>

---

**Usage**

```
<rpc>
  <clear-service-bsg-registrations>
  </clear-service-bsg-registrations>
</rpc>
```

**Description**    Clear border signaling gateway registrations

- Contents**    <clear-service-bsg-registrations-statistics>—Clear border signaling gateway registrations statistics
- <clear-services-bsg-registrations-subscription>—Clear border signaling gateway registrations subscription

---

### <clear-service-bsg-registrations-statistics>

---

**Usage**

```
<rpc>
  <clear-service-bsg-registrations-statistics>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </clear-service-bsg-registrations-statistics>
</rpc>
```

```
</clear-service-bsg-registrations-statistics>
</rpc>
```

**Description** Clear border signaling gateway registrations statistics

**Contents** <gateway>—Name of border signaling gateway  
<master>—Query the master border signaling gateway (default)  
<backup>—Query the backup border signaling gateway

---

## <clear-service-flow-analysis>

---

### Usage

```
<rpc>
<clear-service-flow-analysis>
  <interface>interface</interface>
</clear-service-flow-analysis>
</rpc>
```

**Description** Clear flow analysis statistics

**Contents** <interface>—Name of adaptive services interface

---

## <clear-service-msp-flow-ipaction-table>

---

### Usage

```
<rpc>
<clear-service-msp-flow-ipaction-table>
  <filter>filter</filter> <!-- mandatory -->
</clear-service-msp-flow-ipaction-table>
</rpc>
```

**Description** Clear ip-action table

**Contents**

---

## <clear-service-msp-flow-table-information>

---

### Usage

```
<rpc>
<clear-service-msp-flow-table-information>
  <source-prefix>source-prefix</source-prefix>
  <destination-prefix>destination-prefix</destination-prefix>
  <source-port>source-port</source-port>
  <destination-port>destination-port</destination-port>
  <protocol>protocol</protocol>
  <service-set>service-set</service-set>
```

```
<interface>interface</interface>  
<application-protocol>application-protocol</application-protocol>  
</clear-service-msp-flow-table-information>  
</rpc>
```

**Description** Remove established flows from flow table

**Contents** <source-prefix>—Source prefix to use as filter

<clear-service-msp-flow-ipaction-table>—Clear ip-action table

---

## <clear-service-nat-statistics-information>

---

### Usage

```
<rpc>
<clear-service-nat-statistics-information>
  <service-set>service-set</service-set>
  <interface>interface</interface>
</clear-service-nat-statistics-information>
</rpc>
```

**Description** Clear NAT statistics

**Contents** <service-set>—Name of service set

<interface>—Name of adaptive services interface

## <clear-service-pgcp-gates>

---

**Usage**

```
<rpc>
  <clear-service-pgcp-gates>
</clear-service-pgcp-gates>
</rpc>
```

**Description** Clear gates table

**Contents** <clear-service-pgcp-gates-gateway>—Clear gate table for gateway

## <clear-service-pgcp-gates-gateway>

---

**Usage**

```
<rpc>
  <clear-service-pgcp-gates-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
  </clear-service-pgcp-gates-gateway>
</rpc>
```

**Description** Clear gate table for gateway

**Contents** <gateway-name>—Gateway name

## <clear-service-pgcp-statistics>

---

**Usage**

```
<rpc>
  <clear-service-pgcp-statistics>
</clear-service-pgcp-statistics>
</rpc>
```

**Description** Clear statistics information

**Contents** <clear-service-pgcp-statistics-gateway>—Clear gate table for gateway

## <clear-service-pgcp-statistics-gateway>

---

**Usage**

```
<rpc>
  <clear-service-pgcp-statistics-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
    <virtual-interface>virtual-interface</virtual-interface>
  </clear-service-pgcp-statistics-gateway>
```

</rpc>

**Description** Clear gate table for gateway

**Contents** <gateway-name>—Gateway name  
<virtual-interface>—Virtual interface name

---

### <clear-service-set-packet-drop-statistics>

---

**Usage**

```
<rpc>
  <clear-service-set-packet-drop-statistics>
    <interface>interface</interface>
  </clear-service-set-packet-drop-statistics>
</rpc>
```

**Description** Clear service set packet drop statistics

**Contents** <interface>—Name of adaptive services interface

---

### <clear-service-set-syslog-statistics>

---

**Usage**

```
<rpc>
  <clear-service-set-syslog-statistics>
    <service-set>service-set</service-set>
    <interface>interface</interface>
  </clear-service-set-syslog-statistics>
</rpc>
```

**Description** Clear service set syslog statistics

**Contents** <service-set>—Name of service set  
<interface>—Name of adaptive services interface

---

### <clear-service-sfw-flow-table-information>

---

**Usage**

```
<rpc>
  <clear-service-sfw-flow-table-information>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <protocol>protocol</protocol>
  </clear-service-sfw-flow-table-information>
</rpc>
```

```
<application-protocol>application-protocol</application-protocol>
<service-set>service-set</service-set>
<interface>interface</interface>
</clear-service-sfw-flow-table-information>
</rpc>
```

<service-set>—Name of service set

<interface>—Name of adaptive services interface

---

## <clear-services-bsg-registrations-subscription>

---

### Usage

```
<rpc>
  <clear-services-bsg-registrations-subscription>
    <gateway>gateway</gateway> <!-- mandatory -->
```

```

    <master/>
    <backup/>
    <address-of-record>address-of-record</address-of-record>
    <forceful/>
    <graceful/>
  </clear-services-bsg-registrations-subscription>
</rpc>

```

**Description** Clear border signaling gateway registrations subscription

**Contents**

- <gateway>—Name of border signaling gateway
- <master>—Query the master border signaling gateway (default)
- <backup>—Query the backup border signaling gateway
- <address-of-record>—Address of record
- <forceful>—Remove address-of-record
- <graceful>—Remove address-of-record gracefully

## <clear-services-dynamic-flow-capture-criteria>

### Usage

```

<rpc>
  <clear-services-dynamic-flow-capture-criteria>
    <capture-group>capture-group</capture-group> <!-- mandatory -->
    <destination-identifier>destination-identifier</destination-identifier>
    <criteria-identifier>criteria-identifier</criteria-identifier>
    <static/>
  </clear-services-dynamic-flow-capture-criteria>
</rpc>

```

**Description** Clear dynamic flow capture criteria

**Contents**

- <capture-group>—Capture group name
- <destination-identifier>—Content destination identifier
- <criteria-identifier>—Criteria identifier
- <static>—Clear static criteria also

## <clear-services-dynamic-flow-capture-sequence-number>

### Usage

```

<rpc>
  <clear-services-dynamic-flow-capture-sequence-number>
    <capture-group>capture-group</capture-group> <!-- mandatory -->

```

```
<source-identifier>source-identifier</source-identifier> <!-- mandatory -->
</clear-services-dynamic-flow-capture-sequence-number>
</rpc>
```

**Description** Clear dynamic flow capture sequence-number

**Contents** <capture-group>—Capture group name  
<source-identifier>—Control source identifier

---

## <clear-services-flow-collector-information>

---

**Usage**

```
<rpc>
<clear-services-flow-collector-information>
</clear-services-flow-collector-information>
</rpc>
```

**Description** Clear services flow collector information

**Contents** <clear-services-flow-collector-statistics>—Clear statistics

---

## <clear-services-flow-collector-statistics>

---

**Usage**

```
<rpc>
<clear-services-flow-collector-statistics>
<interface>interface</interface> <!-- mandatory -->
</clear-services-flow-collector-statistics>
</rpc>
```

**Description** Clear statistics

**Contents** <interface>—Interface name

- all - All configured Collector PICs
- interface - Physical interface

---

## <clear-snmp-history>

---

**Usage**

```
<rpc>
<clear-snmp-history>
<all/>
<index/>
</clear-snmp-history>
```

```
</rpc>
```

**Description** Clear all samples of a particular history index

**Contents** `<all>`—Clear all samples of all the configured indices  
`<index>`—Clear the samples of this particular index

## <clear-snmp-statistics>

---

### Usage

```
<rpc>
  <clear-snmp-statistics/>
</rpc>
```

**Description** Clear SNMP statistics

## <clear-sticky-table>

---

### Usage

```
<rpc>
  <clear-sticky-table>

  <clear-real-server-group-sticky>clear-real-server-group-sticky</clear-real-server-group-sticky>

  </clear-sticky-table>
</rpc>
```

**Description** Clear server load balance sticky table

**Contents** `<clear-real-server-group-sticky>`—Clear sticky table for a specific real server group

## <clear-stp-interface-statistics>

---

### Usage

```
<rpc>
  <clear-stp-interface-statistics>
    <logical-system>logical-system</logical-system>
    <interface-name>interface-name</interface-name>
    <routing-instance>routing-instance</routing-instance>
  </clear-stp-interface-statistics>
</rpc>
```

**Description** Clear STP interface statistics

**Contents** `<logical-system>`—Name of logical system

<interface-name>—Name of interface

<routing-instance>—Name of routing instance

---

## <clear-stp-routing-instance-statistics>

---

### Usage

```
<rpc>
  <clear-stp-routing-instance-statistics>
    <logical-system>logical-system</logical-system>
    <routing-instance-name>routing-instance-name</routing-instance-name>
  </clear-stp-routing-instance-statistics>
</rpc>
```

**Description** Clear STP routing instance statistics

**Contents** <logical-system>—Name of logical system  
  
<routing-instance-name>—Name of routing instance

---

## <clear-stp-topology-change-counter>

---

### Usage

```
<rpc>
  <clear-stp-topology-change-counter>
    <logical-system>logical-system</logical-system>
    <vlan-id>vlan-id</vlan-id>
    <routing-instance>routing-instance</routing-instance>
  </clear-stp-topology-change-counter>
</rpc>
```

**Description** Clear STP topology change counter

**Contents** <logical-system>—Name of logical system  
  
<vlan-id>—VLAN ID  
  
<routing-instance>—Name of routing instance

---

## <clear-synchronous-ethernet-esmc-statistics>

---

### Usage

```
<rpc>
  <clear-synchronous-ethernet-esmc-statistics>
    <interface-name>interface-name</interface-name>
  </clear-synchronous-ethernet-esmc-statistics>
</rpc>
```

**Description** Clear ESMC statistics

**Contents** <interface-name>—Name of interface

---

### <clear-system-commit>

---

**Usage**

```
<rpc>
  <clear-system-commit/>
</rpc>
```

**Description** Clear all pending commit requests

---

### <clear-system-login-lockout>

---

**Usage**

```
<rpc>
  <clear-system-login-lockout>
    <lockout-choice>lockout-choice</lockout-choice> <!-- mandatory -->
    <all/>
    <user>user</user>
  </clear-system-login-lockout>
</rpc>
```

**Description** Clear login locks on user accounts

**Contents** <all>—Clear login locks on all user accounts

<user>—Name of user

---

### <clear-system-services-reverse-information>

---

**Usage**

```
<rpc>
  <clear-system-services-reverse-information/>
</rpc>
```

**Description** Clear reverse telnet/SSH connection

---

### <clear-virtual-server-statistics>

---

**Usage**

```
<rpc>
  <clear-virtual-server-statistics>

  <clear-virtual-server-name-statistics>clear-virtual-server-name-statistics</clear-virtual-server-name-statistics>
```

```
</clear-virtual-server-statistics>
</rpc>
```

**Description** Clear virtual server statistics

**Contents** <clear-virtual-server-name-statistics>—Clear statistics for a specific server

---

## <clear-visitor-all>

### Usage

```
<rpc>
  <clear-visitor-all/>
</rpc>
```

**Description** Clear all visitors

---

## <clear-visitor-ip>

### Usage

```
<rpc>
  <clear-visitor-ip>
    <ip-address>ip-address</ip-address> <!-- mandatory -->
  </clear-visitor-ip>
</rpc>
```

**Description** Clear visitor entry based on IP address

**Contents** <ip-address>—Enter IP Address

---

## <clear-visitor-nai>

### Usage

```
<rpc>
  <clear-visitor-nai>
    <nai>nai</nai> <!-- mandatory -->
  </clear-visitor-nai>
</rpc>
```

**Description** Clear visitor entry based on nai

**Contents** <nai>—Enter nai

## <clear-vpls-interface-mac-table>

### Usage

```

<rpc>
  <clear-vpls-interface-mac-table>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <vlan-id>vlan-id</vlan-id>
  </clear-vpls-interface-mac-table>
</rpc>

```

**Description** Clear media access control table for specified interface

**Contents** <interface-name>—Name of interface for which to clear table

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN

<vlan-id>—Clear MAC address learned on a specified VLAN

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN

## <clear-vpls-mac-table>

### Usage

```

<rpc>
  <clear-vpls-mac-table>
    <instance>instance</instance>
    <logical-system>logical-system</logical-system>
    <vlan-id>vlan-id</vlan-id>
    <isid>isid</isid>
    <address>address</address>
  </clear-vpls-mac-table>
</rpc>

```

**Description** Clear all learned media access control addresses

**Contents** <clear-vpls-interface-mac-table>—Clear media access control table for specified interface

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<instance>—Display information for a specified instance

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<logical-system>—Name of logical system, or 'all'

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<vlan-id>—Clear MAC address learned on a specified VLAN

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<isid>—Clear MAC address learned on a specified ISID

- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<address>—MAC address

---

## <clear-vrrp-information>

---

### Usage

```
<rpc>  
  <clear-vrrp-information>  
    <all/>  
  </clear-vrrp-information>  
</rpc>
```

**Description** Clear Virtual Router Redundancy Protocol statistics

**Contents** <all>—Clear all statistics

<clear-vrrp-interface-statistics>—Name of interface on which to clear statistics

## <clear-vrrp-interface-statistics>

---

### Usage

```
<rpc>
  <clear-vrrp-interface-statistics>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-vrrp-interface-statistics>
</rpc>
```

**Description** Name of interface on which to clear statistics

**Contents** <interface-name>—Name of interface

## <diagnostic-tool-list-execute>

---

### Usage

```
<rpc>
  <diagnostic-tool-list-execute>
    <component>component</component>
    <provider>provider</provider>
    <toolname>toolname</toolname>
  </diagnostic-tool-list-execute>
</rpc>
```

**Description** List or execute diagnostic tools (tool args in quotes)

**Contents** <inventory>—Displays map of components

- kernel - Kernel diagnostic tool provider
- system - System diagnostic tool provider
- admin - Administrative diagnostic tool provider
- application - Application diagnostic tool provider
- hardware - Hardware diagnostic tool provider
- health-check - Health-check diagnostic tool provider

<component>—Name of the component (uuid or serial number or all)

- kernel - Kernel diagnostic tool provider
- system - System diagnostic tool provider
- admin - Administrative diagnostic tool provider
- application - Application diagnostic tool provider
- hardware - Hardware diagnostic tool provider
- health-check - Health-check diagnostic tool provider

<provider>—Name of diagnostic provider

- kernel - Kernel diagnostic tool provider
- system - System diagnostic tool provider
- admin - Administrative diagnostic tool provider
- application - Application diagnostic tool provider
- hardware - Hardware diagnostic tool provider
- health-check - Health-check diagnostic tool provider

<toolname>—Name of tool (arguments in quotes) or all or summary

<diagnostic-tool-usage>—Displays usage of diagnostic tools

---

## <diagnostic-tool-usage>

---

### Usage

```
<rpc>
  <diagnostic-tool-usage>
    <component>component</component>
    <provider>provider</provider>
    <toolname>toolname</toolname> <!-- mandatory -->
  </diagnostic-tool-usage>
</rpc>
```

**Description** Displays usage of diagnostic tools

**Contents** <component>—Name of the component (uuid or serial number or all)

- kernel - Kernel diagnostic tool provider
- system - System diagnostic tool provider
- admin - Administrative diagnostic tool provider
- application - Application diagnostic tool provider
- hardware - Hardware diagnostic tool provider
- health-check - Health-check diagnostic tool provider

<provider>—Name of diagnostic provider

- kernel - Kernel diagnostic tool provider
- system - System diagnostic tool provider
- admin - Administrative diagnostic tool provider
- application - Application diagnostic tool provider
- hardware - Hardware diagnostic tool provider
- health-check - Health-check diagnostic tool provider

<toolname>—Name of tool (arguments in quotes) or all or summary

---

## <file-compare>

---

### Usage

```
<rpc>
  <file-compare>
    <context/>
    <unified/>
    <ignore-white-space/>
    <files>files</files>
    <from-file>from-file</from-file>
    <to-file>to-file</to-file>
  </file-compare>
</rpc>
```

**Description** Compare files

**Contents** <context>—Context style output format

<unified>—Unified style output format

<ignore-white-space>—Ignore changes in amount of white space

<files>—Files to compare

<from-file>—File to compare

<to-file>—File to compare against

---

## <file-copy>

---

### Usage

```
<rpc>
  <file-copy>
    <source>source</source> <!-- mandatory -->
    <destination>destination</destination> <!-- mandatory -->
    <source-address>source-address</source-address>
  </file-copy>
</rpc>
```

**Description** Copy files (local or remote)

**Contents** <source>—URL of source file

<destination>—URL of destination file

<source-address>—Local address to use in originating the connection

## <file-delete>

---

**Usage**

```
<rpc>
  <file-delete>
    <purge/>
    <path>path</path> <!-- mandatory -->
  </file-delete>
</rpc>
```

**Description** Delete files from the system

**Contents** <purge>—Overwrite regular files before deleting them

<path>—Path to delete

## <file-get>

---

**Usage**

```
<rpc>
  <file-get>
    <filename>filename</filename> <!-- mandatory -->
    <encoding>encoding</encoding> <!-- mandatory -->
  </file-get>
</rpc>
```

**Description** Get file from device with contents inlined

**Contents** <filename>—Name of source file on device

<encoding>—Encoding type: ascii, base64, or raw

## <file-list>

---

**Usage**

```
<rpc>
  <file-list>
    <detail/>
    <recursive/>
    <path>path</path>
  </file-list>
</rpc>
```

**Description** List file information

**Contents** <detail>—Display detailed output (like 'ls -l')

<recursive>—Descend recursively through directory hierarchy

<path>—Path to list

## <file-put>

### Usage

```
<rpc>
  <file-put>
    <filename>filename</filename> <!-- mandatory -->
    <permission>permission</permission>
    <encoding>encoding</encoding> <!-- mandatory -->
    <delete-if-exist/>
    <file-contents>file-contents</file-contents> <!-- mandatory -->
  </file-put>
</rpc>
```

**Description** Put file onto device with contents inlined

**Contents** <filename>—Name of destination file on device

<permission>—Name of destination file on device

<encoding>—Encoding type: ascii or base64

<delete-if-exist>—Delete the destination file on device if it already exists

<file-contents>—File content

## <file-rename>

### Usage

```
<rpc>
  <file-rename>
    <source>source</source> <!-- mandatory -->
    <destination>destination</destination> <!-- mandatory -->
  </file-rename>
</rpc>
```

**Description** Rename files

**Contents** <source>—Source URL

<destination>—Destination URL

## <file-show>

### Usage

```
<rpc>
```

```
<file-show>
  <filename>filename</filename> <!-- mandatory -->
  <encoding>encoding</encoding>
</file-show>
</rpc>
```

**Description** Show file contents

**Contents** <filename>—Filename to show

- base64 - Encode file with base64 encoding
- raw - Show raw text from file

<encoding>—Encode file contents

- base64 - Encode file with base64 encoding
- raw - Show raw text from file

---

## <fips-selftest>

### Usage

```
<rpc>
  <fips-selftest/>
</rpc>
```

**Description** Execute FIPS known answer tests (KATs)

---

## <generate-pki-certificate-request>

### Usage

```
<rpc>
  <generate-pki-certificate-request>
    <ip-address>ip-address</ip-address>
    <filename>filename</filename>
    <subject>subject</subject> <!-- mandatory -->
    <certificate-id>certificate-id</certificate-id> <!-- mandatory -->
    <domain-name>domain-name</domain-name>
    <email>email</email>
  </generate-pki-certificate-request>
</rpc>
```

**Description** Generate the certificate request in PKCS-10 format

**Contents** <ip-address>—Static IP address of the device

<filename>—Local location for copy of certificate request

<subject>—DC=<Domain component>CN=<Common Name>OU=<Organizational Unit>O=<Organization Name>L=<Locality>ST=<State>C=<Country>  
 <certificate-id>—Certificate identifier  
 <domain-name>—Fully qualified domain name  
 <email>—Email address

## <generate-pki-key-pair>

### Usage

```

<rpc>
  <generate-pki-key-pair>
    <certificate-id>certificate-id</certificate-id> <!-- mandatory -->
    <size>size</size>
    <type>type</type>
  </generate-pki-key-pair>
</rpc>

```

**Description** Generate RSA private and public key pair

**Contents** <certificate-id>—Certificate identifier

- 512 - 512 bits
- 1024 - 1024 bits
- 2048 - 2048 bits
- rsa - RSA encryption
- dsa - DSA encryption with SHA-1 hash

<size>—Size of key

- 512 - 512 bits
- 1024 - 1024 bits
- 2048 - 2048 bits
- rsa - RSA encryption
- dsa - DSA encryption with SHA-1 hash

<type>—Algorithm for encrypting public private keys

- rsa - RSA encryption
- dsa - DSA encryption with SHA-1 hash

## <generate-pki-self-signed-local-certificate>

---

### Usage

```
<rpc>
  <generate-pki-self-signed-local-certificate>
    <certificate-id>certificate-id</certificate-id> <!-- mandatory -->
    <domain-name>domain-name</domain-name> <!-- mandatory -->
    <ip-address>ip-address</ip-address>
    <email>email</email>
    <subject>subject</subject> <!-- mandatory -->
  </generate-pki-self-signed-local-certificate>
</rpc>
```

**Description** Generate a self-signed certificate

**Contents** <certificate-id>—Certificate identifier

<domain-name>—Fully qualified domain name

<ip-address>—Static IP address of the device

<email>—Email address of the entity owning the certificate

<subject>—DC=<Domain Component>=CN=<Common Name>=O=<Organization>=OU=<Organizational Unit>=C=<Country>=ST=<State or Province>=L=<Locality>=S=<Serial Number>=E=<Email Address>=

## <get-aaa-module-statistics>

---

### Usage

```
<rpc>
  <get-aaa-module-statistics>
    <authentication/>
    <accounting/>
    <dynamic-requests/>
    <re-authentication/>
    <subscribers/>
  </get-aaa-module-statistics>
</rpc>
```

**Description** (Re)authentication, authorization and accounting (AAA) module statistics

**Contents** <authentication>—Authentication statistics

<accounting>—Accounting statistics

<dynamic-requests>—Dynamic requests statistics

<re-authentication>—Re-authentication statistics

<subscribers>—Subscriber statistics

<address-assignment>—Statistics for address assignments

## <get-aaa-subscriber-statistics>

---

### Usage

```
<rpc>
  <get-aaa-subscriber-statistics>
    <username>username</username> <!-- mandatory -->
  </get-aaa-subscriber-statistics>
</rpc>
```

**Description** Statistics on subscriber events

**Contents** <username>—Show statistics for this subscriber's session entry

## <get-aaa-subscriber-table>

---

### Usage

```
<rpc>
  <get-aaa-subscriber-table>
    <username>username</username>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-aaa-subscriber-table>
</rpc>
```

**Description** List subscriber specific command options

**Contents** <username>—Show details for this subscriber's session entry

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<session-id>—Session id

<get-aaa-subscriber-statistics>—Statistics on subscriber events

## <get-aaa-terminate-code>

---

### Usage

```
<rpc>
  <get-aaa-terminate-code>
    <summary/>
    <brief/>
    <detail/>
  </get-aaa-terminate-code>
</rpc>
```

**Description** Show terminate-code information

**Contents**

- <summary>—Display summary output(default)
- <brief>—Display brief output
- <detail>—Display detailed output
- <get-aaa-terminate-code-aaa>—Limit display to AAA terminate codes
- <get-aaa-terminate-code-dhcp>—Limit display to DHCP terminate codes
- <get-aaa-terminate-code-l2tp>—Limit display to L2TP terminate codes
- <get-aaa-terminate-code-ppp>—Limit display to PPP terminate codes
- <get-aaa-terminate-code-reverse>—Show reverse terminate-code information

---

### <get-aaa-terminate-code-aaa>

---

**Usage**

```
<rpc>
  <get-aaa-terminate-code-aaa>
    <summary/>
    <brief/>
    <detail/>
  </get-aaa-terminate-code-aaa>
</rpc>
```

**Description** Limit display to AAA terminate codes

**Contents**

- <summary>—Display summary output(default)
- <brief>—Display brief output
- <detail>—Display detailed output

---

### <get-aaa-terminate-code-dhcp>

---

**Usage**

```
<rpc>
  <get-aaa-terminate-code-dhcp>
    <summary/>
    <brief/>
    <detail/>
  </get-aaa-terminate-code-dhcp>
</rpc>
```

**Description** Limit display to DHCP terminate codes

**Contents**    <summary>—Display summary output (default)  
                  <brief>—Display brief output  
                  <detail>—Display detailed output

## <get-aaa-terminate-code-l2tp>

---

### Usage

```
<rpc>
<get-aaa-terminate-code-l2tp>
  <summary/>
  <brief/>
  <detail/>
</get-aaa-terminate-code-l2tp>
</rpc>
```

**Description**    Limit display to L2TP terminate codes

**Contents**    <summary>—Display summary output (default)  
                  <brief>—Display brief output  
                  <detail>—Display detailed output

## <get-aaa-terminate-code-ppp>

---

### Usage

```
<rpc>
<get-aaa-terminate-code-ppp>
  <summary/>
  <brief/>
  <detail/>
</get-aaa-terminate-code-ppp>
</rpc>
```

**Description**    Limit display to PPP terminate codes

**Contents**    <summary>—Display summary output (default)  
                  <brief>—Display brief output  
                  <detail>—Display detailed output

## <get-aaa-terminate-code-reverse>

---

### Usage

```
<rpc>
<get-aaa-terminate-code-reverse>
```

```
<summary/>
<brief/>
<detail/>
</get-aaa-terminate-code-reverse>
</rpc>
```

**Description** Show reverse terminate-code information

**Contents** <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<get-aaa-terminate-code-reverse-aaa>—Limit display to AAA terminate codes

<get-aaa-terminate-code-reverse-dhcp>—Limit display to DHCP terminate codes

<get-aaa-terminate-code-reverse-l2tp>—Limit display to L2TP terminate codes

<get-aaa-terminate-code-reverse-ppp>—Limit display to PPP terminate codes

---

### <get-aaa-terminate-code-reverse-aaa>

---

**Usage**

```
<rpc>
<get-aaa-terminate-code-reverse-aaa>
<summary/>
<brief/>
<detail/>
</get-aaa-terminate-code-reverse-aaa>
</rpc>
```

**Description** Limit display to AAA terminate codes

**Contents** <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

---

### <get-aaa-terminate-code-reverse-dhcp>

---

**Usage**

```
<rpc>
<get-aaa-terminate-code-reverse-dhcp>
<summary/>
<brief/>
<detail/>
</get-aaa-terminate-code-reverse-dhcp>
```

`</rpc>`

**Description** Limit display to DHCP terminate codes

**Contents** `<summary>`—Display summary output(default)  
`<brief>`—Display brief output  
`<detail>`—Display detailed output

---

### `<get-aaa-terminate-code-reverse-l2tp>`

---

**Usage**

```
<rpc>
  <get-aaa-terminate-code-reverse-l2tp>
    <summary/>
    <brief/>
    <detail/>
  </get-aaa-terminate-code-reverse-l2tp>
</rpc>
```

**Description** Limit display to L2TP terminate codes

**Contents** `<summary>`—Display summary output(default)  
`<brief>`—Display brief output  
`<detail>`—Display detailed output

---

### `<get-aaa-terminate-code-reverse-ppp>`

---

**Usage**

```
<rpc>
  <get-aaa-terminate-code-reverse-ppp>
    <summary/>
    <brief/>
    <detail/>
  </get-aaa-terminate-code-reverse-ppp>
</rpc>
```

**Description** Limit display to PPP terminate codes

**Contents** `<summary>`—Display summary output(default)  
`<brief>`—Display brief output  
`<detail>`—Display detailed output

## <get-accounting-profile-information>

---

**Usage**

```
<rpc>
  <get-accounting-profile-information>
    <profile>profile</profile>
  </get-accounting-profile-information>
</rpc>
```

**Description** Show accounting profile information

**Contents** <profile>—Profile name

## <get-accounting-record-information>

---

**Usage**

```
<rpc>
  <get-accounting-record-information>
    <profile>profile</profile> <!-- mandatory -->
    <since>since</since>
    <utc-timestamp/>
  </get-accounting-record-information>
</rpc>
```

**Description** Show accounting records

**Contents** <profile>—Name of profile

<since>—Timestamp on earliest records to show (YYYY-MM-DD.HH:MM:SS)

<utc-timestamp>—Display timestamp in UTC format

## <get-active-servers>

---

**Usage**

```
<rpc>
  <get-active-servers/>
</rpc>
```

**Description** Show configured servers

## <get-address-assignment-pool-table>

---

**Usage**

```
<rpc>
  <get-address-assignment-pool-table>
```

```

<get-address-assignment-pool-table-specific>get-address-assignment-pool-table-specific</get-address-assignment-pool-table-specific>
<!-- mandatory -->
  <routing-instance>routing-instance</routing-instance>
  <logical-system>logical-system</logical-system>
</get-address-assignment-pool-table>
</rpc>

```

**Description** Show pool information

**Contents** <get-address-assignment-pool-table-specific>—Show information for a specific pool

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

## <get-alarm-information>

### Usage

```

<rpc>
  <get-alarm-information>
    <interconnect-device>interconnect-device</interconnect-device>
    <node-device>node-device</node-device>
  </get-alarm-information>
</rpc>

```

**Description** Show alarm status

**Contents** <interconnect-device>—Interconnect device identifier

<node-device>—Node device identifier

<get-fpc-alarm-information>—Show alarm status for a FPC

## <get-amt-statistics>

### Usage

```

<rpc>
  <get-amt-statistics>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-amt-statistics>
</rpc>

```

**Description** Show AMT statistics summary

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

---

## <get-amt-summary>

---

### Usage

```
<rpc>
  <get-amt-summary>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-amt-summary>
</rpc>
```

**Description** Show AMT configuration summary

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

---

## <get-amt-tunnel-information>

---

### Usage

```
<rpc>
  <get-amt-tunnel-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <brief/>
    <detail/>
  </get-amt-tunnel-information>
</rpc>
```

**Description** Show AMT tunnel parameters

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<tunnel-interface>—AMT tunnel interface

<gateway-address>—AMT tunnel gateway address

---

## <get-ancp-cos-information>

---

### Usage

```
<rpc>
  <get-ancp-cos-information>
```

```

    <identifier>identifier</identifier>
  </get-ancp-cos-information>
</rpc>

```

**Description** Show ANCP Cos information

**Contents** <get-ancp-cos-pending-information>—Show ANCP Pending Update Cos information  
 <get-ancp-cos-last-update-information>—Show ANCP Last Update Cos information  
 <identifier>—Access loop identifier

### <get-ancp-cos-last-update-information>

---

**Usage**

```

<rpc>
  <get-ancp-cos-last-update-information/>
</rpc>

```

**Description** Show ANCP Last Update Cos information

### <get-ancp-cos-pending-information>

---

**Usage**

```

<rpc>
  <get-ancp-cos-pending-information/>
</rpc>

```

**Description** Show ANCP Pending Update Cos information

### <get-ancp-neighbor-information>

---

**Usage**

```

<rpc>
  <get-ancp-neighbor-information>
    <brief/>
    <detail/>
    <ip-address>ip-address</ip-address>
    <system-name>system-name</system-name>
  </get-ancp-neighbor-information>
</rpc>

```

**Description** Neighbor information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<ip-address>—IP address of the neighbor

<system-name>—MAC address of the neighbor

---

## <get-ancp-subscriber-identifier-information>

---

### Usage

```
<rpc>
  <get-ancp-subscriber-identifier-information>
    <identifier-name>identifier-name</identifier-name> <!-- mandatory -->
    <neighbor>neighbor</neighbor>
    <brief/>
    <detail/>
  </get-ancp-subscriber-identifier-information>
</rpc>
```

**Description** Access loop identifier

**Contents** <identifier-name>—Identifier

<neighbor>—Subscriber information from a neighbor

<brief>—Display brief output (default)

<detail>—Display detailed output

---

## <get-ancp-subscriber-information>

---

### Usage

```
<rpc>
  <get-ancp-subscriber-information>
    <brief/>
    <detail/>
  </get-ancp-subscriber-information>
</rpc>
```

**Description** Subscriber information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<get-ancp-subscriber-identifier-information>—Access loop identifier

<get-ancp-subscriber-neighbor-information>—Subscriber information from a neighbor

## <get-ancp-subscriber-neighbor-information>

---

**Usage**

```

<rpc>
  <get-ancp-subscriber-neighbor-information>
    <neighbor-ipaddress>neighbor-ipaddress</neighbor-ipaddress> <!-- mandatory
-->
    <brief/>
    <detail/>
  </get-ancp-subscriber-neighbor-information>
</rpc>

```

**Description** Subscriber information from a neighbor

**Contents** <neighbor-ipaddress>—IP address of the neighbor

<brief>—Display brief output (default)

<detail>—Display detailed output

## <get-appid-application-group-statistics>

---

**Usage**

```

<rpc>
  <get-appid-application-group-statistics>
    <interval>interval</interval>
  </get-appid-application-group-statistics>
</rpc>

```

**Description** Show the application group statistics

**Contents** <interval>—Time interval for application group statistics

## <get-appid-application-signature>

---

**Usage**

```

<rpc>
  <get-appid-application-signature>
    <detail>detail</detail>
  </get-appid-application-signature>
</rpc>

```

**Description** Show application signature

**Contents** <detail>—Show application signature details

<get-appid-application-signature-summary>—Show application signature summary

## <get-appid-application-signature-summary>

---

**Usage**

```
<rpc>
  <get-appid-application-signature-summary/>
</rpc>
```

**Description** Show application signature summary

## <get-appid-application-statistics>

---

**Usage**

```
<rpc>
  <get-appid-application-statistics>
    <interval>interval</interval>
  </get-appid-application-statistics>
</rpc>
```

**Description** Show the application statistics

**Contents** <interval>—Time interval for application statistics

## <get-appid-application-system-cache>

---

**Usage**

```
<rpc>
  <get-appid-application-system-cache>
    <logical-system>logical-system</logical-system>
    <interface>interface</interface>
  </get-appid-application-system-cache>
</rpc>
```

**Description** Show application system cache

**Contents** <logical-system>—Logical-system name

- all - All logical-systems (Default)
- root-logical-system - Root logical-system only
- logical-system-name - Individual logical-system

<interface>—Services interface to query

## <get-appid-counter>

---

**Usage**

```
<rpc>
  <get-appid-counter>
    <interface>interface</interface>
  </get-appid-counter>
</rpc>
```

**Description** Show the application identification counters

**Contents** <interface>—Services interface to query

## <get-appid-package-version>

---

**Usage**

```
<rpc>
  <get-appid-package-version/>
</rpc>
```

**Description** Show the current application package version

## <get-application-aware-access-list-flows-interface>

---

**Usage**

```
<rpc>
  <get-application-aware-access-list-flows-interface>
    <interface-name>interface-name</interface-name>
    <brief/>
  </get-application-aware-access-list-flows-interface>
</rpc>
```

**Description** Show application aware access list flows by interface name

**Contents** <interface-name>—

<brief>—Display brief output

## <get-application-aware-access-list-flows-subscriber>

---

**Usage**

```
<rpc>
  <get-application-aware-access-list-flows-subscriber>
    <subscriber>subscriber</subscriber>
    <level>level</level>
  </get-application-aware-access-list-flows-subscriber>
```

```
</rpc>
```

**Description** Show application aware access list flows by subscriber name

**Contents** <subscriber>—

- brief - Display brief output
- detail - Display detailed output

<level>—

- brief - Display brief output
- detail - Display detailed output

---

### <get-application-aware-access-list-statistics-interface>

---

**Usage**

```
<rpc>  
<get-application-aware-access-list-statistics-interface>  
  <interface-name>interface-name</interface-name>  
</get-application-aware-access-list-statistics-interface>  
</rpc>
```

**Description** Show application aware access list statistics by interface name

**Contents** <interface-name>—

---

### <get-application-aware-access-list-statistics-subscriber>

---

**Usage**

```
<rpc>  
<get-application-aware-access-list-statistics-subscriber>  
  <subscriber>subscriber</subscriber>  
</get-application-aware-access-list-statistics-subscriber>  
</rpc>
```

**Description** Show application aware access list statistics by subscriber name

**Contents** <subscriber>—

---

### <get-aps-group-information>

---

**Usage**

```
<rpc>  
<get-aps-group-information>  
  <group_name>group_name</group_name> <!-- mandatory -->
```

```

    </get-aps-group-information>
  </rpc>

```

**Description** Show an APS group

**Contents** <group\_name>—Group name

## <get-aps-information>

---

### Usage

```

<rpc>
  <get-aps-information>
    <brief/>
    <detail/>
    <extensive/>
    <summary/>
  </get-aps-information>
</rpc>

```

**Description** Show Automatic Protection Switching information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<summary>—Display summary output

<get-aps-interface-information>—Show an APS interface

<get-aps-group-information>—Show an APS group

## <get-aps-interface-information>

---

### Usage

```

<rpc>
  <get-aps-interface-information>
    <intf_name>intf_name</intf_name> <!-- mandatory -->
  </get-aps-interface-information>
</rpc>

```

**Description** Show an APS interface

**Contents** <intf\_name>—Interface name

## <get-arp-table-information>

---

### Usage

```
<rpc>
  <get-arp-table-information>
    <hostname>hostname</hostname>
    <interface>interface</interface>
    <no-resolve/>
    <expiration-time/>
    <vpn>vpn</vpn>
    <logical-system>logical-system</logical-system>
  </get-arp-table-information>
</rpc>
```

**Description** Show system Address Resolution Protocol table entries

**Contents**

- <hostname>—Name of host
- <interface>—Name of the interface
- <no-resolve>—Don't attempt to print addresses symbolically
- <expiration-time>—Show seconds remaining before expiration
- <vpn>—Name of VPN routing table
- <logical-system>—Name of logical system

## <get-authdlite-user-aaa-test-result>

---

### Usage

```
<rpc>
  <get-authdlite-user-aaa-test-result>
    <user>user</user> <!-- mandatory -->
    <password>password</password>
    <profile>profile</profile>
    <port>port</port>
    <zero-stats/>
  </get-authdlite-user-aaa-test-result>
</rpc>
```

**Description** Test the aaa servers for a authdlite user

**Contents**

- <user>—The username to test
  - username - The username to test
  - access-profile-name - Specify the access profile name which to use for user
  - nas-port - Specify NAS-port to be used for test

<password>—The password associated with username

- access-profile-name - Specify the access profile name which to use for user
- nas-port - Specify NAS-port to be used for test

<profile>—Specify the access profile name which to use for user

- access-profile-name - Specify the access profile name which to use for user
- nas-port - Specify NAS-port to be used for test

<port>—Specify NAS-port to be used for test

- nas-port - Specify NAS-port to be used for test

<zero-stats>—Specify that acct stats should be set to zero

## <get-authentication-pending-table>

### Usage

```
<rpc>
  <get-authentication-pending-table>
    <filter>filter</filter>
    <get-authentication-pending-table-detailed/>
    <get-authentication-pending-table-specific>get-authentication-pending-table-specific</get-authentication-pending-table-specific>
  </get-authentication-pending-table>
</rpc>
```

**Description** Show pending authentication requests

**Contents** <get-authentication-pending-table-detailed>—Show the detailed information

<get-authentication-pending-table-specific>—Show detail information for a specific request

## <get-authentication-statistics>

### Usage

```
<rpc>
  <get-authentication-statistics/>
</rpc>
```

**Description** Show authentication statistics

## <get-authorization-information>

---

**Usage**

```
<rpc>
  <get-authorization-information/>
</rpc>
```

**Description** Show authorization and authentication information

## <get-bfd-session-information>

---

**Usage**

```
<rpc>
  <get-bfd-session-information>
    <summary/>
    <brief/>
    <detail/>
    <extensive/>
    <logical-system>logical-system</logical-system>
  </get-bfd-session-information>
</rpc>
```

**Description** Show all BFD sessions

**Contents**

- <summary>—Display summary output
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <extensive>—Display extensive output
- <address>—Show BFD session with specific neighbor address
- <discriminator>—Show BFD session with specific local discriminator
- <logical-system>—Name of logical system, or 'all'
- <prefix>—Show all BFD sessions for this LDP FEC

## <get-bgp-group-information>

---

**Usage**

```
<rpc>
  <get-bgp-group-information>
    <logical-system>logical-system</logical-system>
    <summary/>
    <brief/>
    <detail/>
  </get-bgp-group-information>
</rpc>
```

```

    <instance>instance</instance>
    <group-name>group-name</group-name>
  </get-bgp-group-information>
</rpc>

```

**Description** Show the BGP group database

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <get-bgp-rtf-information>—Show route target filtering information
- <get-bgp-traffic-statistics-information>—Show packet statistics for labeled BGP routes
- <summary>—Display summary output
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <instance>—Show peer information for a particular instance
- <group-name>—Show group information for a particular group

## <get-bgp-neighbor-information>

### Usage

```

<rpc>
  <get-bgp-neighbor-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <instance>instance</instance>
    <neighbor-address>neighbor-address</neighbor-address>
  </get-bgp-neighbor-information>
</rpc>

```

**Description** Show the BGP neighbor database

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <fabric>—Internal fabric state
- <get-bgp-orf-information>—Show outbound route filtering information
- <instance>—Show peer information for a particular instance
- <neighbor-address>—Show the neighbor database for a particular neighbor

## <get-bgp-orf-information>

---

### Usage

```
<rpc>
  <get-bgp-orf-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <brief/>
    <detail/>
    <instance>instance</instance>
    <neighbor-address>neighbor-address</neighbor-address>
  </get-bgp-orf-information>
</rpc>
```

**Description** Show outbound route filtering information

**Contents** <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<brief>—Display brief output (default)

<detail>—Display detailed output

<instance>—Show ORF information for a particular instance

<neighbor-address>—Show ORF information for a particular neighbor

## <get-bgp-rtf-information>

---

### Usage

```
<rpc>
  <get-bgp-rtf-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-bgp-rtf-information>
</rpc>
```

**Description** Show route target filtering information

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<group-name>—Show group information for a particular group

## <get-bgp-summary-information>

### Usage

```

<rpc>
  <get-bgp-summary-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <instance>instance</instance>
  </get-bgp-summary-information>
</rpc>

```

**Description** Show overview of BGP information

**Contents** <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<instance>—Show peer information for a particular instance

## <get-bgp-traffic-statistics-information>

### Usage

```

<rpc>
  <get-bgp-traffic-statistics-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-bgp-traffic-statistics-information>
</rpc>

```

**Description** Show packet statistics for labeled BGP routes

**Contents** <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<brief>—Display brief output (default)

<detail>—Display detailed output

<group-name>—Show group information for a particular group

## <get-bios-version-information>

---

**Usage**

```
<rpc>
  <get-bios-version-information/>
</rpc>
```

**Description** Show BIOS firmware version

## <get-bridge-domain-alt-root-flood-route-information>

---

**Usage**

```
<rpc>
  <get-bridge-domain-alt-root-flood-route-information>
    <interface>interface</interface> <!-- mandatory -->
  </get-bridge-domain-alt-root-flood-route-information>
</rpc>
```

**Description** Show STP alt-root flooding route used for interface

**Contents** <interface>—Interface for which to show alternate-root flooding route

## <get-bridge-domain-bd-flood-route-information>

---

**Usage**

```
<rpc>
  <get-bridge-domain-bd-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-bridge-domain-bd-flood-route-information>
</rpc>
```

**Description** Show route for flooding traffic of a bridge domain if no-local-switching is not enabled

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

## <get-bridge-domain-event-queue-information>

---

**Usage**

```
<rpc>
  <get-bridge-domain-event-queue-information/>
```

```
</rpc>
```

**Description** Show queue of pending bridge flood events

### <get-bridge-domain-mlp-flood-route-information>

---

**Usage**

```
<rpc>
  <get-bridge-domain-mlp-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-bridge-domain-mlp-flood-route-information>
</rpc>
```

**Description** Show route for flooding traffic to MAC learning chips

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

### <get-bridge-domain-re-flood-route-information>

---

**Usage**

```
<rpc>
  <get-bridge-domain-re-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-bridge-domain-re-flood-route-information>
</rpc>
```

**Description** Show route for Routing Engine flooding to all interfaces

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

### <get-bridge-instance-information>

---

**Usage**

```
<rpc>
  <get-bridge-instance-information>
    <instance>instance</instance>
```

```
<bridge-domain-name>bridge-domain-name</bridge-domain-name>
<logical-system>logical-system</logical-system>
<interface-choice>interface-choice</interface-choice>
<interface>interface</interface>
<detail/>
<brief/>
<extensive/>
</get-bridge-instance-information>
</rpc>
```

**Description** Show bridge domain information

**Contents**

- <instance>—Display information for a specified instance
- <bridge-domain-name>—Display information for a specified bridge domain
- <logical-system>—Name of logical system, or 'all'
- <interface>—Name of interface for which to display table
- <detail>—Display detailed output
- <brief>—Display brief output
- <extensive>—Display extensive output
- <operational>—Show operational bridging instance

---

## <get-bridge-interface-mac-table>

---

### Usage

```
<rpc>
<get-bridge-interface-mac-table>
  <interface-choice>interface-choice</interface-choice> <!-- mandatory -->
  <interface-name>interface-name</interface-name>
  <all/>
  <remote-beb-mac-address>remote-beb-mac-address</remote-beb-mac-address>

  <vlan-id>vlan-id</vlan-id>
  <isid>isid</isid>
  <detail/>
  <brief/>
  <extensive/>
  <count/>
</get-bridge-interface-mac-table>
</rpc>
```

**Description** Display MAC table for a specified interface

**Contents** <interface-name>—Name of interface for which to display table

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<all>—Display MAC table for all the interfaces

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<remote-beb-mac-address>—Remote backbone edge bridge MAC address

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<vlan-id>—Display MAC address learned on a specified VLAN

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<isid>—Display Information for specified ISID or all ISID(s)

- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<detail>—Display detailed output

<brief>—Display brief output

<extensive>—Display extensive output

<count>—Display count only

---

## <get-bridge-mac-table>

### Usage

```
<rpc>  
<get-bridge-mac-table>  
<instance>instance</instance>
```

```
<bridge-domain>bridge-domain</bridge-domain>
<logical-system>logical-system</logical-system>
<vlan-id>vlan-id</vlan-id>
<isid>isid</isid>
<address>address</address>
<detail/>
<brief/>
<extensive/>
<count/>
</get-bridge-mac-table>
</rpc>
```

**Description** Show media access control table

**Contents** <get-bridge-interface-mac-table>—Display MAC table for a specified interface

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<instance>—Display information for a specified instance

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<bridge-domain>—Name of bridging domain, or 'all'

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<logical-system>—Name of logical system, or 'all'

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<vlan-id>—Display MAC address learned on a specified VLAN

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<isid>—Display Information for specified ISID or all ISID(s)

- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<address>—MAC address

<detail>—Display detailed output

<brief>—Display brief output

<extensive>—Display extensive output

<count>—Display count only

---

## <get-bridge-statistics-information>

### Usage

```
<rpc>
  <get-bridge-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-bridge-statistics-information>
</rpc>
```

**Description** Show bridge statistics information

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

---

## <get-cfeb-information>

### Usage

```
<rpc>
  <get-cfeb-information/>
</rpc>
```

**Description** Show Compact Forwarding Engine Board status

## <get-cfm-delay-statistics>

---

### Usage

```
<rpc>
  <get-cfm-delay-statistics>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <local-mep>local-mep</local-mep>
    <remote-mep>remote-mep</remote-mep>
    <count>count</count>
    <logical-system>logical-system</logical-system>
  </get-cfm-delay-statistics>
</rpc>
```

**Description** Show Ethernet OAM maintenance endpoint delay statistics information

**Contents**

- <maintenance-domain>—Name of maintenance domain
- <maintenance-association>—Name of maintenance association
- <local-mep>—Identifier for local maintenance endpoint
- <remote-mep>—Identifier for remote maintenance endpoint
- <count>—Number of delay statistics per maintenance endpoint
- <logical-system>—Name of logical system

## <get-cfm-forwarding-state-instance-information>

---

### Usage

```
<rpc>
  <get-cfm-forwarding-state-instance-information>
    <instance-name>instance-name</instance-name>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
  </get-cfm-forwarding-state-instance-information>
</rpc>
```

**Description** Show Ethernet OAM state for a forwarding instance

**Contents**

- <instance-name>—Show information for a particular routing instance
- <bridge-domain>—Show information for a particular bridge domain

<logical-system>—Name of logical system

<brief>—Display brief output

<detail>—Display detail output

<extensive>—Display extensive output

---

## <get-cfm-forwarding-state-interface-information>

---

### Usage

```
<rpc>
  <get-cfm-forwarding-state-interface-information>
    <interface-name>interface-name</interface-name>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
  </get-cfm-forwarding-state-interface-information>
</rpc>
```

**Description** Show Ethernet OAM state for an interface

**Contents** <interface-name>—Display information for this logical interface

<logical-system>—Name of logical system

<brief>—Display brief output

<detail>—Display detail output

<extensive>—Display extensive output

---

## <get-cfm-interfaces-information>

---

### Usage

```
<rpc>
  <get-cfm-interfaces-information>
    <interface-name>interface-name</interface-name>
    <vlan>vlan</vlan>
    <level>level</level>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
  </get-cfm-interfaces-information>
</rpc>
```

**Description** Show Ethernet OAM information for interface

**Contents**    <interface-name>—Name of interface

                 <vlan>—Trunk interface VLAN

                 <level>—Level value for maintenance domain

                 <logical-system>—Name of logical system, or 'all'

                 <brief>—Display brief output

                 <detail>—Display detail output

                 <extensive>—Display extensive output

---

## <get-cfm-iterator-statistics>

---

### Usage

```
<rpc>
  <get-cfm-iterator-statistics>
    <sla-iterator>sla-iterator</sla-iterator> <!-- mandatory -->
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <local-mep>local-mep</local-mep> <!-- mandatory -->
    <remote-mep>remote-mep</remote-mep> <!-- mandatory -->
    <logical-system>logical-system</logical-system>
  </get-cfm-iterator-statistics>
</rpc>
```

**Description**    Show Ethernet OAM SLA iterator statistics information

**Contents**    <sla-iterator>—Name of the iterator profile

                 <maintenance-domain>—Name of maintenance domain

                 <maintenance-association>—Name of maintenance association

                 <local-mep>—Identifier for local maintenance endpoint

                 <remote-mep>—MEP identifier of remote host

                 <logical-system>—Name of logical system

---

## <get-cfm-linktrace-path-database>

---

### Usage

```
<rpc>
  <get-cfm-linktrace-path-database>
    <logical-system>logical-system</logical-system>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
```

```

        <maintenance-association>maintenance-association</maintenance-association>
<!-- mandatory -->
        <host>host</host> <!-- mandatory -->
    </get-cfm-linktrace-path-database>
</rpc>

```

**Description** Display the linktrace path-database for a remote host

**Contents** <logical-system>—Name of logical system

<maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

<host>—MAC address of remote host in xx:xx:xx:xx:xx:xx format

## <get-cfm-loss-statistics>

### Usage

```

<rpc>
  <get-cfm-loss-statistics>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <local-mep>local-mep</local-mep>
    <remote-mep>remote-mep</remote-mep>
    <count>count</count>
    <session-id>session-id</session-id>
  </get-cfm-loss-statistics>
</rpc>

```

**Description** Show Ethernet OAM maintenance endpoint loss statistics information

**Contents** <maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

<local-mep>—Identifier for local maintenance endpoint

<remote-mep>—Identifier for remote maintenance endpoint

<count>—Number of loss statistics per maintenance endpoint

<session-id>—Ethernet loss measurement client session id

## <get-cfm-mep-database>

### Usage

```

<rpc>

```

```
<get-cfm-mep-database>
  <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
  <maintenance-association>maintenance-association</maintenance-association>
<!-- mandatory -->
  <local-mep>local-mep</local-mep>
  <remote-mep>remote-mep</remote-mep>
  <logical-system>logical-system</logical-system>
</get-cfm-mep-database>
</rpc>
```

**Description** Show Ethernet OAM maintenance endpoint database information

**Contents**

- <maintenance-domain>—Name of maintenance domain
- <maintenance-association>—Name of maintenance association
- <local-mep>—Identifier for local maintenance endpoint
- <remote-mep>—Identifier for remote maintenance endpoint
- <logical-system>—Name of logical system

---

## <get-cfm-mep-statistics>

---

### Usage

```
<rpc>
  <get-cfm-mep-statistics>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
<!-- mandatory -->
    <local-mep>local-mep</local-mep>
    <remote-mep>remote-mep</remote-mep>
    <count>count</count>
    <logical-system>logical-system</logical-system>
  </get-cfm-mep-statistics>
</rpc>
```

**Description** Show Ethernet OAM maintenance endpoint statistics information

**Contents**

- <maintenance-domain>—Name of maintenance domain
- <maintenance-association>—Name of maintenance association
- <local-mep>—Identifier for local maintenance endpoint
- <remote-mep>—Identifier for remote maintenance endpoint
- <count>—Number of statistics per maintenance endpoint

<logical-system>—Name of logical system

## <get-cfm-mip-information>

### Usage

```
<rpc>
  <get-cfm-mip-information>
    <logical-system>logical-system</logical-system>
    <instance-name>instance-name</instance-name>
    <bridge-domain>bridge-domain</bridge-domain>
    <interface-name>interface-name</interface-name>
    <vlan>vlan</vlan>
  </get-cfm-mip-information>
</rpc>
```

**Description** Display MIP information

**Contents** <logical-system>—Name of logical system

<instance-name>—Show information for a particular routing instance

<bridge-domain>—Show information for a particular bridge domain

<interface-name>—Display information for this logical interface

<vlan>—Show information for a particular VLAN within a bridge domain

## <get-chassis-beacon-information>

### Usage

```
<rpc>
  <get-chassis-beacon-information>
    <which-arg>which-arg</which-arg>
    <all>all</all>
    <fpc>fpc</fpc>
    <cb>cb</cb>
  </get-chassis-beacon-information>
</rpc>
```

**Description** Show beacon status

**Contents** <all>—Beacons in ON/OFF state

- off - Beacons in OFF state
- on - Beacons in ON state

<fpc>—Flexible PIC Controller slot number

<cb>—Control Board slot number

## <get-chassis-cb-beacon-information>

---

**Usage**

```
<rpc>
  <get-chassis-cb-beacon-information>
    <interconnect-device>interconnect-device</interconnect-device> <!-- mandatory
-->
    <slot>slot</slot> <!-- mandatory -->
  </get-chassis-cb-beacon-information>
</rpc>
```

**Description** Show Control Board beacon status

**Contents** <interconnect-device>—Interconnect device name

<slot>—CB slot number

## <get-chassis-fabric-connectivity-information>

---

**Usage**

```
<rpc>
  <get-chassis-fabric-connectivity-information>
    <device>device</device>
    <slot>slot</slot>
    <inter-chassis/>
    <intra-chassis/>
  </get-chassis-fabric-connectivity-information>
</rpc>
```

**Description** Show data-center fabric connectivity

**Contents** <device>—Device alias name or serial number

<slot>—Slot number

<inter-chassis>—Inter chassis fabric link connectivity details

<intra-chassis>—Intra chassis fabric link connectivity details

## <get-chassis-fabric-information-device>

---

**Usage**

```
<rpc>
  <get-chassis-fabric-information-device>
    <device-id>device-id</device-id>
  </get-chassis-fabric-information-device>
</rpc>
```

**Description** Show chassis fabric devices running FM component

**Contents** <device-id>—Device alias name or serial number

---

### <get-chassis-fabric-link-information>

---

**Usage**

```
<rpc>
  <get-chassis-fabric-link-information>
    <up/>
    <down/>
    <error/>
    <all/>
    <device>device</device>
    <slot>slot</slot>
  </get-chassis-fabric-link-information>
</rpc>
```

**Description** Show data-center fabric links

**Contents** <up>—Up links

<down>—Down links

<error>—Error links

<all>—All links

<device>—Device alias name or serial number

<slot>—Slot number

---

### <get-chassis-fabric-spray-weight-information>

---

**Usage**

```
<rpc>
  <get-chassis-fabric-spray-weight-information>
</get-chassis-fabric-spray-weight-information>
</rpc>
```

**Description** Show fabric spray-weights

**Contents** <from>—Spray weights on

<to>—Spray weights to

## <get-chassis-fabric-topology-information>

---

**Usage**

```
<rpc>
  <get-chassis-fabric-topology-information>
    <sib-slot>sib-slot</sib-slot>
    <device>device</device>
    <slot>slot</slot>
  </get-chassis-fabric-topology-information>
</rpc>
```

**Description** Show fabric topology information

**Contents** <sib-slot>—SIB slot number

<device>—Device alias name or serial number

<slot>—Slot number

## <get-chassis-fpc-beacon-information>

---

**Usage**

```
<rpc>
  <get-chassis-fpc-beacon-information>
    <slot>slot</slot> <!-- mandatory -->
  </get-chassis-fpc-beacon-information>
</rpc>
```

**Description** Show Flexible PIC Controller beacon status

**Contents** <slot>—FPC slot number

## <get-chassis-inventory>

---

**Usage**

```
<rpc>
  <get-chassis-inventory>
    <detail/>
    <extensive/>
    <models/>
    <clei-models/>
    <interconnect-device>interconnect-device</interconnect-device>
    <node-device>node-device</node-device>
    <fpc>fpc</fpc>
  </get-chassis-inventory>
</rpc>
```

**Description** Show installed hardware components

**Contents** <detail>—Include RAM and disk information in output  
 <extensive>—Display ID EEPROM information  
 <models>—Display serial number and model number for orderable FRUs  
 <clei-models>—Display CLEI barcode and model number for orderable FRUs  
 <interconnect-device>—Interconnect device identifier  
 <node-device>—Node device identifier  
 <fpc>—Flexible PIC Controller slot number

## <get-chassis-location>

---

**Usage**

```
<rpc>
  <get-chassis-location>
</get-chassis-location>
</rpc>
```

**Description** Show physical location of chassis

**Contents** <interface>—Show physical location of interface  
 <fpc>—Show physical location of all fpcs

## <get-chassis-zones-information>

---

**Usage**

```
<rpc>
  <get-chassis-zones-information>
    <interconnect-device>interconnect-device</interconnect-device> <!-- mandatory
-->
    <detail/>
  </get-chassis-zones-information>
</rpc>
```

**Description** Show chassis cooling zones information

**Contents** <interconnect-device>—Interconnect device identifier  
 <detail>—Display detailed output

## <get-checksum-information>

---

**Usage**

```
<rpc>
  <get-checksum-information>
    <path>path</path> <!-- mandatory -->
    <method>method</method>
  </get-checksum-information>
</rpc>
```

**Description** Calculate MD5 checksum of a file

**Contents** <path>—Path to filename

- md5 - Calculate MD5 checksum of a file
- sha1 - Calculate SHA1 checksum of a file
- sha-256 - Calculate SHA-256 checksum of a file

<method>—

- md5 - Calculate MD5 checksum of a file
- sha1 - Calculate SHA1 checksum of a file
- sha-256 - Calculate SHA-256 checksum of a file

## <get-cli-tip>

---

**Usage**

```
<rpc>
  <get-cli-tip>
    <number>number</number>
  </get-cli-tip>
</rpc>
```

**Description** Tip about using the CLI

**Contents** <number>—

## <get-clock-synchronization-information>

---

**Usage**

```
<rpc>
  <get-clock-synchronization-information>
    <interface>interface</interface>
    <extensive/>
  </get-clock-synchronization-information>
```

---

```
</rpc>
```

**Description** Show clock synchronization information

**Contents** <interface>—Name of physical interface

<extensive>—Show clock synchronization information in detail

<master>—Show master clock information

<backup>—Show backup clock information

### <get-commit-information>

---

**Usage**

```
<rpc>
  <get-commit-information/>
</rpc>
```

**Description** Show pending commit requests (if any) and commit history

### <get-core-file-information>

---

**Usage**

```
<rpc>
  <get-core-file-information>
    <component>component</component>
    <local/>
    <detail/>
    <brief/>
    <core-filename>core-filename</core-filename> <!-- mandatory -->
  </get-core-file-information>
</rpc>
```

**Description** Display the stack trace of core file

**Contents** <component>—Name of the component (uuid or serial number)

<local>—Display contents of local repository

<detail>—View stack trace with details of binary

<brief>—View details of binary

<core-filename>—Name of core file

## <get-core-key-list>

---

**Usage**

```
<rpc>
  <get-core-key-list/>
</rpc>
```

**Description** Show core keys in use

## <get-cos-adaptive-shaper-information>

---

**Usage**

```
<rpc>
  <get-cos-adaptive-shaper-information>
    <adaptive-shaper-name>adaptive-shaper-name</adaptive-shaper-name>
  </get-cos-adaptive-shaper-information>
</rpc>
```

**Description** Show trigger types and associated rate for adaptive shaper

**Contents** <adaptive-shaper-name>—Name of adaptive shaper

## <get-cos-classifier-information>

---

**Usage**

```
<rpc>
  <get-cos-classifier-information>
    <classifier-name>classifier-name</classifier-name>
    <type>type</type>
  </get-cos-classifier-information>
</rpc>
```

**Description** Show mapping of code point to forwarding class/loss priority

**Contents** <classifier-name>—Name of classifier

- dscp - Differentiated Services code point (DSCP)
- dscp-ipv6 - Differentiated Services code point (DSCP) for IPv6
- exp - MPLS experimental code point
- ieee-802.1 - IEEE-802.1 code point
- inet-precedence - IPv4 precedence code point
- ieee-802.1ad - IEEE-802.1ad (DEI) code point

<type>—Type of classifier

- dscp - Differentiated Services code point (DSCP)
- dscp-ipv6 - Differentiated Services code point (DSCP) for IPv6
- exp - MPLS experimental code point
- ieee-802.1 - IEEE-802.1 code point
- inet-precedence - IPv4 precedence code point
- ieee-802.1ad - IEEE-802.1ad (DEI) code point

---

### <get-cos-classifier-table-information>

---

**Usage**

```
<rpc>
  <get-cos-classifier-table-information>
</get-cos-classifier-table-information>
</rpc>
```

**Description** Show classifier information

**Contents** <get-cos-classifier-table-map-information>—Show mapping of interfaces to classifiers

---

### <get-cos-classifier-table-map-information>

---

**Usage**

```
<rpc>
  <get-cos-classifier-table-map-information/>
</rpc>
```

**Description** Show mapping of interfaces to classifiers

---

### <get-cos-code-point-map-information>

---

**Usage**

```
<rpc>
  <get-cos-code-point-map-information>
    <dscp/>
    <dscp-ipv6/>
    <exp/>
    <ieee-802.1/>
    <inet-precedence/>
    <ieee-802.1ad/>
  </get-cos-code-point-map-information>
</rpc>
```

**Description** Show mapping of symbolic name to code point bit pattern

- Contents**
- <dscp>—Differentiated Services code point (DSCP)
  - <dscp-ipv6>—Differentiated Services code point (DSCP) for IPv6
  - <exp>—MPLS experimental code point
  - <ieee-802.1>—IEEE-802.1 code point
  - <inet-precedence>—IPv4 precedence code point
  - <ieee-802.1ad>—IEEE-802.1ad (DEI) code point

---

### <get-cos-congestion-notification-information>

---

**Usage**

```
<rpc>
  <get-cos-congestion-notification-information>
    <cnp-name>cnp-name</cnp-name>
  </get-cos-congestion-notification-information>
</rpc>
```

**Description** Show congestion-notification information

**Contents** <cnp-name>—Name of congestion notification profile

---

### <get-cos-drop-profile-information>

---

**Usage**

```
<rpc>
  <get-cos-drop-profile-information>
    <profile-name>profile-name</profile-name>
  </get-cos-drop-profile-information>
</rpc>
```

**Description** Show interpolated data points of named drop profile

**Contents** <profile-name>—Name of drop profile

---

### <get-cos-fabric-scheduler-map-information>

---

**Usage**

```
<rpc>
  <get-cos-fabric-scheduler-map-information/>
</rpc>
```

**Description** Show fabric scheduler map information

## <get-cos-forwarding-class-information>

---

**Usage**

```

<rpc>
  <get-cos-forwarding-class-information>

  <get-cos-forwarding-class-map-information>get-cos-forwarding-class-map-information</get-cos-forwarding-class-map-information>

  </get-cos-forwarding-class-information>
</rpc>

```

**Description** Show mapping of forwarding class names to queue numbers

**Contents** <get-cos-forwarding-class-map-information>—Name of forwarding class map

## <get-cos-forwarding-class-map-interface-table-information>

---

**Usage**

```

<rpc>
  <get-cos-forwarding-class-map-interface-table-information/>
</rpc>

```

**Description** Show interface to forwarding class mapping

## <get-cos-forwarding-class-map-table-information>

---

**Usage**

```

<rpc>
  <get-cos-forwarding-class-map-table-information>
  </get-cos-forwarding-class-map-table-information>
</rpc>

```

**Description** Show forwarding class map information

**Contents** <get-cos-forwarding-class-map-interface-table-information>—Show interface to forwarding class mapping

## <get-cos-forwarding-class-set-information>

---

**Usage**

```

<rpc>
  <get-cos-forwarding-class-set-information>

  <forwarding-class-set-name>forwarding-class-set-name</forwarding-class-set-name>

  </get-cos-forwarding-class-set-information>

```

```
</rpc>
```

**Description** Show forwarding-class-sets that are active

**Contents** <forwarding-class-set-name>—Name of forwarding class set

---

## <get-cos-fragmentation-map-information>

---

### Usage

```
<rpc>
  <get-cos-fragmentation-map-information>
    <fragmentation-map-name>fragmentation-map-name</fragmentation-map-name>

  </get-cos-fragmentation-map-information>
</rpc>
```

**Description** Show mapping of forwarding classes to fragmentation options

**Contents** <fragmentation-map-name>—Name of fragmentation map

---

## <get-cos-fwtab-fabric-scheduler-map-information>

---

### Usage

```
<rpc>
  <get-cos-fwtab-fabric-scheduler-map-information/>
</rpc>
```

**Description** Show fabric scheduler map

---

## <get-cos-information>

---

### Usage

```
<rpc>
  <get-cos-information>
  </get-cos-information>
</rpc>
```

**Description** Show class-of-service (CoS) information

**Contents** <get-cos-forwarding-class-information>—Show mapping of forwarding class names to queue numbers

<get-cos-forwarding-class-set-information>—Show forwarding-class-sets that are active

<get-cos-drop-profile-information>—Show interpolated data points of named drop profile

<get-cos-adaptive-shaper-information>—Show trigger types and associated rate for adaptive shaper

<get-cos-virtual-channel-information>—Show virtual channel names

<get-cos-virtual-channel-group-information>—Show virtual channel group information

<get-cos-classifier-information>—Show mapping of code point to forwarding class/loss priority

<get-cos-l2tp-session-map-information>—Show mapping of CoS objects to L2TP sessions

<get-cos-loss-priority-map-information>—Show mapping of code point to loss priority

<get-cos-loss-priority-rewrite-information>—Show mapping of loss priority to code point

<get-cos-rewrite-information>—Show mapping of forwarding class/loss priority to code point

<get-cos-multi-destination-information>—Show multi destination

<get-cos-code-point-map-information>—Show mapping of symbolic name to code point bit pattern

<get-cos-scheduler-map-information>—Show mapping of forwarding classes to schedulers

<get-cos-traffic-control-profile-information>—Show traffic control profiles

<get-cos-fragmentation-map-information>—Show mapping of forwarding classes to fragmentation options

<get-cos-interface-map-information>—Show mapping of CoS objects to interfaces

<get-cos-interface-set-map-information>—Show mapping of CoS objects to interface-set

<get-cos-routing-instance-map-information>—Show mapping of CoS objects to routing instance

<get-cos-table-information>—Show forwarding table information

<fabric>—Show fabric information

<get-cos-translation-table-map-information>—Show mapping of code point to code point

<get-cos-congestion-notification-information>—Show congestion-notification information

---

## <get-cos-interface-map-information>

---

### Usage

```
<rpc>  
  <get-cos-interface-map-information>  
    <interface-name>interface-name</interface-name>  
    <comprehensive/>  
    <detail/>
```

```
</get-cos-interface-map-information>
</rpc>
```

**Description** Show mapping of CoS objects to interfaces

**Contents** <interface-name>—Name of interface  
  
<comprehensive>—Show interface, filter, policer and CoS information comprehensively  
  
<detail>—Show interface information, filter, policer and CoS object names

---

### <get-cos-interface-set-map-information>

---

**Usage**

```
<rpc>
  <get-cos-interface-set-map-information>
    <interface-set-name>interface-set-name</interface-set-name>
  </get-cos-interface-set-map-information>
</rpc>
```

**Description** Show mapping of CoS objects to interface-set

**Contents** <interface-set-name>—Name of interface set

---

### <get-cos-l2tp-session-map-information>

---

**Usage**

```
<rpc>
  <get-cos-l2tp-session-map-information>
    <session-id>session-id</session-id>
  </get-cos-l2tp-session-map-information>
</rpc>
```

**Description** Show mapping of CoS objects to L2TP sessions

**Contents** <session-id>—Session Index

---

### <get-cos-loss-priority-map-information>

---

**Usage**

```
<rpc>
  <get-cos-loss-priority-map-information>
    <loss-priority-map-name>loss-priority-map-name</loss-priority-map-name>
    <type>type</type>
  </get-cos-loss-priority-map-information>
</rpc>
```

**Description** Show mapping of code point to loss priority

**Contents** <loss-priority-map-name>—Name of loss priority map

- frame-relay-de - Frame Relay discard eligible code point

<type>—

- frame-relay-de - Frame Relay discard eligible code point

---

### <get-cos-loss-priority-map-table-binding-information>

---

**Usage**

```
<rpc>  
  <get-cos-loss-priority-map-table-binding-information/>  
</rpc>
```

**Description** Show interface to loss priority map binding

---

### <get-cos-loss-priority-map-table-information>

---

**Usage**

```
<rpc>  
  <get-cos-loss-priority-map-table-information>  
  </get-cos-loss-priority-map-table-information>  
</rpc>
```

**Description** Show loss priority map table

**Contents** <get-cos-loss-priority-map-table-binding-information>—Show interface to loss priority map binding

---

### <get-cos-loss-priority-rewrite-information>

---

**Usage**

```
<rpc>  
  <get-cos-loss-priority-rewrite-information>  
  <loss-priority-rewrite-name>loss-priority-rewrite-name</loss-priority-rewrite-name>  
  
  <type>type</type>  
  </get-cos-loss-priority-rewrite-information>  
</rpc>
```

**Description** Show mapping of loss priority to code point

**Contents** <loss-priority-rewrite-name>—Name of loss priority rewrite

- frame-relay-de - Frame Relay discard eligible code point

<type>—

- frame-relay-de - Frame Relay discard eligible code point

---

## <get-cos-loss-priority-rewrite-table-binding-information>

---

### Usage

```
<rpc>
  <get-cos-loss-priority-rewrite-table-binding-information/>
</rpc>
```

**Description** Show interface to loss priority rewrite binding

---

## <get-cos-loss-priority-rewrite-table-information>

---

### Usage

```
<rpc>
  <get-cos-loss-priority-rewrite-table-information>
  </get-cos-loss-priority-rewrite-table-information>
</rpc>
```

**Description** Show loss priority rewrite table

**Contents** <get-cos-loss-priority-rewrite-table-binding-information>—Show interface to loss priority rewrite binding

---

## <get-cos-multi-destination-information>

---

### Usage

```
<rpc>
  <get-cos-multi-destination-information/>
</rpc>
```

**Description** Show multi destination

---

## <get-cos-policer-table-map-information>

---

### Usage

```
<rpc>
  <get-cos-policer-table-map-information/>
</rpc>
```

**Description** Show policer

## <get-cos-red-information>

### Usage

```
<rpc>
  <get-cos-red-information/>
</rpc>
```

**Description** Show random early detection drop profile

## <get-cos-rewrite-information>

### Usage

```
<rpc>
  <get-cos-rewrite-information>
    <rewrite-rule-name>rewrite-rule-name</rewrite-rule-name>
    <type>type</type>
  </get-cos-rewrite-information>
</rpc>
```

**Description** Show mapping of forwarding class/loss priority to code point

**Contents** <rewrite-rule-name>—Name of rewrite rule

- dscp - Differentiated Services code point (DSCP)
- dscp-ipv6 - Differentiated Services code point (DSCP) for IPv6
- exp - MPLS experimental code point
- ieee-802.1 - IEEE-802.1 code point
- inet-precedence - IPv4 precedence code point
- frame-relay-de - Frame relay discard eligible bit code point
- ieee-802.1ad - IEEE-802.1ad (DEI) code point

<type>—Type of rewrite rule

- dscp - Differentiated Services code point (DSCP)
- dscp-ipv6 - Differentiated Services code point (DSCP) for IPv6
- exp - MPLS experimental code point
- ieee-802.1 - IEEE-802.1 code point
- inet-precedence - IPv4 precedence code point
- frame-relay-de - Frame relay discard eligible bit code point
- ieee-802.1ad - IEEE-802.1ad (DEI) code point

## <get-cos-rewrite-table-information>

---

**Usage**

```
<rpc>  
  <get-cos-rewrite-table-information>  
  </get-cos-rewrite-table-information>  
</rpc>
```

**Description** Show rewrite information

**Contents** <get-cos-rewrite-table-map-information>—Show interface to rewrite rule mapping

## <get-cos-rewrite-table-map-information>

---

**Usage**

```
<rpc>  
  <get-cos-rewrite-table-map-information/>  
</rpc>
```

**Description** Show interface to rewrite rule mapping

## <get-cos-routing-instance-map-information>

---

**Usage**

```
<rpc>  
  <get-cos-routing-instance-map-information>  
    <routing-instance-name>routing-instance-name</routing-instance-name>  
  </get-cos-routing-instance-map-information>  
</rpc>
```

**Description** Show mapping of CoS objects to routing instance

**Contents** <routing-instance-name>—Name of routing instance

## <get-cos-scheduler-map-information>

---

**Usage**

```
<rpc>  
  <get-cos-scheduler-map-information>  
    <scheduler-map-name>scheduler-map-name</scheduler-map-name>  
  </get-cos-scheduler-map-information>  
</rpc>
```

**Description** Show mapping of forwarding classes to schedulers

**Contents**    <scheduler-map-name>—Name of scheduler map

## <get-cos-scheduler-map-table-information>

---

**Usage**

```
<rpc>
  <get-cos-scheduler-map-table-information/>
</rpc>
```

**Description**    Show scheduler map

## <get-cos-shaper-table-map-information>

---

**Usage**

```
<rpc>
  <get-cos-shaper-table-map-information/>
</rpc>
```

**Description**    Show shaper

## <get-cos-table-information>

---

**Usage**

```
<rpc>
  <get-cos-table-information>
  </get-cos-table-information>
</rpc>
```

**Description**    Show forwarding table information

**Contents**    <get-cos-classifier-table-information>—Show classifier information

                 <get-cos-loss-priority-map-table-information>—Show loss priority map table

                 <get-cos-loss-priority-rewrite-table-information>—Show loss priority rewrite table

                 <get-cos-scheduler-map-table-information>—Show scheduler map

                 <get-cos-policer-table-map-information>—Show policer

                 <get-cos-shaper-table-map-information>—Show shaper

                 <get-cos-red-information>—Show random early detection drop profile

                 <get-cos-rewrite-table-information>—Show rewrite information

                 <get-cos-forwarding-class-map-table-information>—Show forwarding class map information

<fabric>—Show fabric information

<get-cos-translation-table-information>—Show translation table information

---

## <get-cos-traffic-control-profile-information>

---

### Usage

```
<rpc>
  <get-cos-traffic-control-profile-information>

  <traffic-control-profile-name>traffic-control-profile-name</traffic-control-profile-name>

  </get-cos-traffic-control-profile-information>
</rpc>
```

**Description** Show traffic control profiles

**Contents** <traffic-control-profile-name>—Name of traffic control profile

---

## <get-cos-translation-table-information>

---

### Usage

```
<rpc>
  <get-cos-translation-table-information>
  </get-cos-translation-table-information>
</rpc>
```

**Description** Show translation table information

**Contents** <get-cos-translation-table-mapping-information>—Show mapping of interfaces to translation table

---

## <get-cos-translation-table-map-information>

---

### Usage

```
<rpc>
  <get-cos-translation-table-map-information>
  <translation-table-name>translation-table-name</translation-table-name>
  <type>type</type>
  </get-cos-translation-table-map-information>
</rpc>
```

**Description** Show mapping of code point to code point

**Contents** <translation-table-name>—Name of translation table

- to-inet-precedence-from-inet-precedence - INET PRECEDENCE to INET PRECEDENCE translation table
- to-dscp-from-dscp - DSCP to DSCP translation table
- to-dscp-ipv6-from-dscp-ipv6 - DSCP IPV6 to DSCP IPV6 translation table
- to-exp-from-exp - EXP to EXP translation table

<type>—Type of translation table

- to-inet-precedence-from-inet-precedence - INET PRECEDENCE to INET PRECEDENCE translation table
- to-dscp-from-dscp - DSCP to DSCP translation table
- to-dscp-ipv6-from-dscp-ipv6 - DSCP IPV6 to DSCP IPV6 translation table
- to-exp-from-exp - EXP to EXP translation table

---

### <get-cos-translation-table-mapping-information>

---

#### Usage

```
<rpc>  
<get-cos-translation-table-mapping-information/>  
</rpc>
```

**Description** Show mapping of interfaces to translation table

---

### <get-cos-virtual-channel-group-information>

---

#### Usage

```
<rpc>  
<get-cos-virtual-channel-group-information>  
  
<virtual-channel-group-name>virtual-channel-group-name</virtual-channel-group-name>  
  
</get-cos-virtual-channel-group-information>  
</rpc>
```

**Description** Show virtual channel group information

**Contents** <virtual-channel-group-name>—Name of virtual channel group

---

### <get-cos-virtual-channel-information>

---

#### Usage

```
<rpc>  
<get-cos-virtual-channel-information>  
<virtual-channel-name>virtual-channel-name</virtual-channel-name>
```

```
</get-cos-virtual-channel-information>
</rpc>
```

**Description** Show virtual channel names

**Contents** <virtual-channel-name>—Name of virtual channel

---

### <get-cpcd-pic-information>

---

**Usage**

```
<rpc>
  <get-cpcd-pic-information>
    <pic-name>pic-name</pic-name>
  </get-cpcd-pic-information>
</rpc>
```

**Description** Show pic database

**Contents** <pic-name>—

---

### <get-cpcd-pic-statistics>

---

**Usage**

```
<rpc>
  <get-cpcd-pic-statistics>
    <pic-name>pic-name</pic-name> <!-- mandatory -->
  </get-cpcd-pic-statistics>
</rpc>
```

**Description** Show captive portal and content delivery statistics by PIC

**Contents** <pic-name>—

---

### <get-cpcd-profile>

---

**Usage**

```
<rpc>
  <get-cpcd-profile>
    <profile-name>profile-name</profile-name>
  </get-cpcd-profile>
</rpc>
```

**Description** Show profile database

**Contents** <profile-name>—

## <get-cpcd-rule>

---

**Usage**

```

<rpc>
  <get-cpcd-rule>
    <rule-name>rule-name</rule-name>
    <term>term</term>
  </get-cpcd-rule>
</rpc>

```

**Description** Show rule database

**Contents** <rule-name>—  
 <term>—Term name

## <get-cpcd-rule-set>

---

**Usage**

```

<rpc>
  <get-cpcd-rule-set>
    <ruleset-name>ruleset-name</ruleset-name>
  </get-cpcd-rule-set>
</rpc>

```

**Description** Show rule set database

**Contents** <ruleset-name>—

## <get-cpcd-service-set>

---

**Usage**

```

<rpc>
  <get-cpcd-service-set>
    <sset-name>sset-name</sset-name> <!-- mandatory -->
    <brief/>
    <detail/>
    <summary/>
  </get-cpcd-service-set>
</rpc>

```

**Description** Show service set database

**Contents** <sset-name>—  
 <brief>—Display brief output (default)

<detail>—Display detailed output

<summary>—Display summary output

---

## <get-craft-information>

### Usage

```
<rpc>  
  <get-craft-information/>  
</rpc>
```

**Description** Show craft interface status

---

## <get-database-replication-statistics-information>

### Usage

```
<rpc>  
  <get-database-replication-statistics-information/>  
</rpc>
```

**Description** Show database replication statistics

---

## <get-database-replication-summary-information>

### Usage

```
<rpc>  
  <get-database-replication-summary-information/>  
</rpc>
```

**Description** Show database replication summary

---

## <get-ddos-ancp-aggregate>

### Usage

```
<rpc>  
  <get-ddos-ancp-aggregate/>  
</rpc>
```

**Description** Show aggregate for all ANCP traffic information

---

## <get-ddos-ancp-information>

### Usage

```
<rpc>  
  <get-ddos-ancp-information>
```

```
</get-ddos-ancp-information>
</rpc>
```

**Description** Show ANCP traffic information

**Contents** <get-ddos-ancp-parameters>—Show ANCP protocol parameters  
<get-ddos-ancp-statistics>—Show ANCP statistics and states  
<get-ddos-ancp-violations>—Show ANCP traffic violations  
<get-ddos-ancp-aggregate>—Show aggregate for all ANCP traffic information

---

### <get-ddos-ancp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ancp-parameters>
    <brief/>
    <detail/>
  </get-ddos-ancp-parameters>
</rpc>
```

**Description** Show ANCP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ancp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ancp-statistics>
    <brief/>
    <detail/>
  </get-ddos-ancp-statistics>
</rpc>
```

**Description** Show ANCP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-ancp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ancp-violations/>
</rpc>
```

**Description** Show ANCP traffic violations

## <get-ddos-ancpv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ancpv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all ANCPv6 traffic information

## <get-ddos-ancpv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-ancpv6-information>
  </get-ddos-ancpv6-information>
</rpc>
```

**Description** Show ANCPv6 traffic information

**Contents**

- <get-ddos-ancpv6-parameters>—Show ANCPv6 protocol parameters
- <get-ddos-ancpv6-statistics>—Show ANCPv6 statistics and states
- <get-ddos-ancpv6-violations>—Show ANCPv6 traffic violations
- <get-ddos-ancpv6-aggregate>—Show aggregate for all ANCPv6 traffic information

## <get-ddos-ancpv6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ancpv6-parameters>
  <brief/>
  <detail/>
</get-ddos-ancpv6-parameters>
</rpc>
```

**Description** Show ANCPv6 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ancpv6-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ancpv6-statistics>
    <brief/>
    <detail/>
  </get-ddos-ancpv6-statistics>
</rpc>
```

**Description** Show ANCPv6 statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ancpv6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ancpv6-violations/>
</rpc>
```

**Description** Show ANCPv6 traffic violations

---

### <get-ddos-arp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-arp-aggregate/>
</rpc>
```

**Description** Show aggregate for all ARP traffic information

---

### <get-ddos-arp-information>

---

**Usage**

```
<rpc>
  <get-ddos-arp-information>
  </get-ddos-arp-information>
```

</rpc>

**Description** Show ARP traffic information

**Contents** <get-ddos-arp-parameters>—Show ARP protocol parameters  
<get-ddos-arp-statistics>—Show ARP statistics and states  
<get-ddos-arp-violations>—Show ARP traffic violations  
<get-ddos-arp-aggregate>—Show aggregate for all ARP traffic information

---

### <get-ddos-arp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-arp-parameters>
    <brief/>
    <detail/>
  </get-ddos-arp-parameters>
</rpc>
```

**Description** Show ARP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-arp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-arp-statistics>
    <brief/>
    <detail/>
  </get-ddos-arp-statistics>
</rpc>
```

**Description** Show ARP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

### <get-ddos-arp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-arp-violations/>
</rpc>
```

**Description** Show ARP traffic violations

### <get-ddos-atm-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-atm-aggregate/>
</rpc>
```

**Description** Show aggregate for all ATM traffic information

### <get-ddos-atm-information>

---

**Usage**

```
<rpc>
  <get-ddos-atm-information>
  </get-ddos-atm-information>
</rpc>
```

**Description** Show ATM traffic information

**Contents** <get-ddos-atm-parameters>—Show ATM protocol parameters

<get-ddos-atm-statistics>—Show ATM statistics and states

<get-ddos-atm-violations>—Show ATM traffic violations

<get-ddos-atm-aggregate>—Show aggregate for all ATM traffic information

### <get-ddos-atm-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-atm-parameters>
  <brief/>
  <detail/>
  </get-ddos-atm-parameters>
</rpc>
```

**Description** Show ATM protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-atm-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-atm-statistics>
    <brief/>
    <detail/>
  </get-ddos-atm-statistics>
</rpc>
```

**Description** Show ATM statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-atm-violations>

---

**Usage**

```
<rpc>
  <get-ddos-atm-violations/>
</rpc>
```

**Description** Show ATM traffic violations

---

### <get-ddos-bfd-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-bfd-aggregate/>
</rpc>
```

**Description** Show aggregate for all BFD traffic information

---

### <get-ddos-bfd-information>

---

**Usage**

```
<rpc>
  <get-ddos-bfd-information>
  </get-ddos-bfd-information>
```

`</rpc>`

**Description** Show BFD traffic information

**Contents** `<get-ddos-bfd-parameters>`—Show BFD protocol parameters  
`<get-ddos-bfd-statistics>`—Show BFD statistics and states  
`<get-ddos-bfd-violations>`—Show BFD traffic violations  
`<get-ddos-bfd-aggregate>`—Show aggregate for all BFD traffic information

---

### `<get-ddos-bfd-parameters>`

---

**Usage**

```
<rpc>
  <get-ddos-bfd-parameters>
    <brief/>
    <detail/>
  </get-ddos-bfd-parameters>
</rpc>
```

**Description** Show BFD protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-bfd-statistics>`

---

**Usage**

```
<rpc>
  <get-ddos-bfd-statistics>
    <brief/>
    <detail/>
  </get-ddos-bfd-statistics>
</rpc>
```

**Description** Show BFD statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

## <get-ddos-bfd-violations>

---

**Usage**

```
<rpc>
  <get-ddos-bfd-violations/>
</rpc>
```

**Description** Show BFD traffic violations

## <get-ddos-bfdv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-bfdv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all BFDv6 traffic information

## <get-ddos-bfdv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-bfdv6-information>
  </get-ddos-bfdv6-information>
</rpc>
```

**Description** Show BFDv6 traffic information

**Contents**

- <get-ddos-bfdv6-parameters>—Show BFDv6 protocol parameters
- <get-ddos-bfdv6-statistics>—Show BFDv6 statistics and states
- <get-ddos-bfdv6-violations>—Show BFDv6 traffic violations
- <get-ddos-bfdv6-aggregate>—Show aggregate for all BFDv6 traffic information

## <get-ddos-bfdv6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-bfdv6-parameters>
  <brief/>
  <detail/>
  </get-ddos-bfdv6-parameters>
</rpc>
```

**Description** Show BFDv6 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-bfdv6-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-bfdv6-statistics>
    <brief/>
    <detail/>
  </get-ddos-bfdv6-statistics>
</rpc>
```

**Description** Show BFDv6 statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-bfdv6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-bfdv6-violations/>
</rpc>
```

**Description** Show BFDv6 traffic violations

---

### <get-ddos-bgp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-bgp-aggregate/>
</rpc>
```

**Description** Show aggregate for all BGP traffic information

---

### <get-ddos-bgp-information>

---

**Usage**

```
<rpc>
  <get-ddos-bgp-information>
  </get-ddos-bgp-information>
```

```
</rpc>
```

**Description** Show BGP traffic information

**Contents** `<get-ddos-bgp-parameters>`—Show BGP protocol parameters  
`<get-ddos-bgp-statistics>`—Show BGP statistics and states  
`<get-ddos-bgp-violations>`—Show BGP traffic violations  
`<get-ddos-bgp-aggregate>`—Show aggregate for all BGP traffic information

---

### `<get-ddos-bgp-parameters>`

---

**Usage**

```
<rpc>  
  <get-ddos-bgp-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-bgp-parameters>  
</rpc>
```

**Description** Show BGP protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-bgp-statistics>`

---

**Usage**

```
<rpc>  
  <get-ddos-bgp-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-bgp-statistics>  
</rpc>
```

**Description** Show BGP statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

### <get-ddos-bgp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-bgp-violations/>
</rpc>
```

**Description** Show BGP traffic violations

### <get-ddos-bgpv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-bgpv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all BGPv6 traffic information

### <get-ddos-bgpv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-bgpv6-information>
  </get-ddos-bgpv6-information>
</rpc>
```

**Description** Show BGPv6 traffic information

**Contents**

- <get-ddos-bgpv6-parameters>—Show BGPv6 protocol parameters
- <get-ddos-bgpv6-statistics>—Show BGPv6 statistics and states
- <get-ddos-bgpv6-violations>—Show BGPv6 traffic violations
- <get-ddos-bgpv6-aggregate>—Show aggregate for all BGPv6 traffic information

### <get-ddos-bgpv6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-bgpv6-parameters>
  <brief/>
  <detail/>
  </get-ddos-bgpv6-parameters>
</rpc>
```

**Description** Show BGPv6 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-bgpv6-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-bgpv6-statistics>
    <brief/>
    <detail/>
  </get-ddos-bgpv6-statistics>
</rpc>
```

**Description** Show BGPv6 statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-bgpv6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-bgpv6-violations/>
</rpc>
```

**Description** Show BGPv6 traffic violations

---

### <get-ddos-demuxauto-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-demuxauto-aggregate/>
</rpc>
```

**Description** Show aggregate for all demux autosense traffic information

---

### <get-ddos-demuxauto-information>

---

**Usage**

```
<rpc>
  <get-ddos-demuxauto-information>
  </get-ddos-demuxauto-information>
```

</rpc>

**Description** Show demux autosense traffic information

**Contents** <get-ddos-demuxauto-parameters>—Show Demux-Autosense protocol parameters  
<get-ddos-demuxauto-statistics>—Show Demux-Autosense statistics and states  
<get-ddos-demuxauto-violations>—Show Demux-Autosense traffic violations  
<get-ddos-demuxauto-aggregate>—Show aggregate for all demux autosense traffic information

---

### <get-ddos-demuxauto-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-demuxauto-parameters>
    <brief/>
    <detail/>
  </get-ddos-demuxauto-parameters>
</rpc>
```

**Description** Show Demux-Autosense protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-demuxauto-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-demuxauto-statistics>
    <brief/>
    <detail/>
  </get-ddos-demuxauto-statistics>
</rpc>
```

**Description** Show Demux-Autosense statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-demuxauto-violations>

---

**Usage**

```
<rpc>
  <get-ddos-demuxauto-violations/>
</rpc>
```

**Description** Show Demux-Autosense traffic violations

## <get-ddos-dhcpv4-ack>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-ack/>
</rpc>
```

**Description** Show DHCPv4 DHCPACK information

## <get-ddos-dhcpv4-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-aggregate/>
</rpc>
```

**Description** Show aggregate for all DHCPv4 traffic information

## <get-ddos-dhcpv4-bad-pack>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-bad-pack/>
</rpc>
```

**Description** Show DHCPv4 traffic with bad format information

## <get-ddos-dhcpv4-bootp>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-bootp/>
</rpc>
```

**Description** Show DHCPv4 DHCPBOOTP information

### <get-ddos-dhcpv4-decline>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv4-decline/>  
</rpc>
```

**Description** Show DHCPv4 DHCPDECLINE information

### <get-ddos-dhcpv4-discover>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv4-discover/>  
</rpc>
```

**Description** Show DHCPv4 DHCPDISCOVER information

### <get-ddos-dhcpv4-forcerenew>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv4-forcerenew/>  
</rpc>
```

**Description** Show DHCPv4 DHCPFORCERENEW information

### <get-ddos-dhcpv4-inform>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv4-inform/>  
</rpc>
```

**Description** Show DHCPv4 DHCPINFORM information

### <get-ddos-dhcpv4-information>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv4-information>  
  </get-ddos-dhcpv4-information>  
</rpc>
```

**Description** Show DHCPv4 traffic information

**Contents**

- <get-ddos-dhcpv4-parameters>—Show DHCPv4 protocol parameters
- <get-ddos-dhcpv4-statistics>—Show DHCPv4 statistics and states
- <get-ddos-dhcpv4-violations>—Show DHCPv4 traffic violations
- <get-ddos-dhcpv4-aggregate>—Show aggregate for all DHCPv4 traffic information
- <get-ddos-dhcpv4-unclass>—Show unclassified DHCPv4 traffic information
- <get-ddos-dhcpv4-discover>—Show DHCPv4 DHCPDISCOVER information
- <get-ddos-dhcpv4-offer>—Show DHCPv4 DHCPOFFER information
- <get-ddos-dhcpv4-request>—Show DHCPv4 DHCPREQUEST information
- <get-ddos-dhcpv4-decline>—Show DHCPv4 DHCPDECLINE information
- <get-ddos-dhcpv4-ack>—Show DHCPv4 DHCPACK information
- <get-ddos-dhcpv4-nak>—Show DHCPv4 DHCPNAK information
- <get-ddos-dhcpv4-release>—Show DHCPv4 DHCPRELEASE information
- <get-ddos-dhcpv4-inform>—Show DHCPv4 DHCPINFORM information
- <get-ddos-dhcpv4-renew>—Show DHCPv4 DHCPRENEW information
- <get-ddos-dhcpv4-forcerenew>—Show DHCPv4 DHCPFORCERENEW information
- <get-ddos-dhcpv4-leasequery>—Show DHCPv4 DHCPLEASEQUERY information
- <get-ddos-dhcpv4-leaseuna>—Show DHCPv4 DHCPLEASEUNASSIGNED information
- <get-ddos-dhcpv4-leaseunk>—Show DHCPv4 DHCPLEASEUNKNOWN information
- <get-ddos-dhcpv4-leaseact>—Show DHCPv4 DHCPLEASEACTIVE information
- <get-ddos-dhcpv4-bootp>—Show DHCPv4 DHCPBOOTP information
- <get-ddos-dhcpv4-no-msgtype>—Show DHCPv4 traffic with missing message type information
- <get-ddos-dhcpv4-bad-pack>—Show DHCPv4 traffic with bad format information

---

## <get-ddos-dhcpv4-leaseact>

### Usage

```
<rpc>  
  <get-ddos-dhcpv4-leaseact/>  
</rpc>
```

**Description** Show DHCPv4 DHCPLEASEACTIVE information

---

### <get-ddos-dhcpv4-leasequery>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-leasequery/>
</rpc>
```

**Description** Show DHCPv4 DHCPLEASEQUERY information

---

### <get-ddos-dhcpv4-leaseuna>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-leaseuna/>
</rpc>
```

**Description** Show DHCPv4 DHCPLEASEUNASSIGNED information

---

### <get-ddos-dhcpv4-leaseunk>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-leaseunk/>
</rpc>
```

**Description** Show DHCPv4 DHCPLEASEUNKOWN information

---

### <get-ddos-dhcpv4-nak>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-nak/>
</rpc>
```

**Description** Show DHCPv4 DHCPNAK information

---

### <get-ddos-dhcpv4-no-msgtype>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-no-msgtype/>
</rpc>
```

**Description** Show DHCPv4 traffic with missing message type information

### **<get-ddos-dhcpv4-offer>**

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-offer/>
</rpc>
```

**Description** Show DHCPv4 DHCP OFFER information

### **<get-ddos-dhcpv4-parameters>**

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-parameters>
    <brief/>
    <detail/>
  </get-ddos-dhcpv4-parameters>
</rpc>
```

**Description** Show DHCPv4 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

### **<get-ddos-dhcpv4-release>**

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-release/>
</rpc>
```

**Description** Show DHCPv4 DHCP RELEASE information

### **<get-ddos-dhcpv4-renew>**

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-renew/>
</rpc>
```

**Description** Show DHCPv4 DHCP RENEW information

## <get-ddos-dhcpv4-request>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-request/>
</rpc>
```

**Description** Show DHCPv4 DHCPREQUEST information

## <get-ddos-dhcpv4-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-statistics>
    <brief/>
    <detail/>
  </get-ddos-dhcpv4-statistics>
</rpc>
```

**Description** Show DHCPv4 statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-dhcpv4-unclass>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-unclass/>
</rpc>
```

**Description** Show unclassified DHCPv4 traffic information

## <get-ddos-dhcpv4-violations>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv4-violations/>
</rpc>
```

**Description** Show DHCPv4 traffic violations

## <get-ddos-dhcpv6-advertise>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv6-advertise/>
</rpc>
```

**Description** Show DHCPv6 ADVERTISE information

## <get-ddos-dhcpv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all DHCPv6 traffic information

## <get-ddos-dhcpv6-confirm>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv6-confirm/>
</rpc>
```

**Description** Show DHCPv6 CONFIRM information

## <get-ddos-dhcpv6-decline>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv6-decline/>
</rpc>
```

**Description** Show DHCPv6 DECLINE information

## <get-ddos-dhcpv6-info-req>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv6-info-req/>
</rpc>
```

**Description** Show DHCPv6 INFORMATION-REQUEST information

## <get-ddos-dhcpv6-information>

---

### Usage

```
<rpc>
  <get-ddos-dhcpv6-information>
</get-ddos-dhcpv6-information>
</rpc>
```

**Description** Show DHCPv6 traffic information

**Contents**

- <get-ddos-dhcpv6-parameters>—Show DHCPv6 protocol parameters
- <get-ddos-dhcpv6-statistics>—Show DHCPv6 statistics and states
- <get-ddos-dhcpv6-violations>—Show DHCPv6 traffic violations
- <get-ddos-dhcpv6-aggregate>—Show aggregate for all DHCPv6 traffic information
- <get-ddos-dhcpv6-unclass>—Show unclassified DHCPv6 traffic information
- <get-ddos-dhcpv6-solicit>—Show DHCPv6 SOLICIT information
- <get-ddos-dhcpv6-advertise>—Show DHCPv6 ADVERTISE information
- <get-ddos-dhcpv6-request>—Show DHCPv6 REQUEST information
- <get-ddos-dhcpv6-confirm>—Show DHCPv6 CONFIRM information
- <get-ddos-dhcpv6-renew>—Show DHCPv6 RENEW information
- <get-ddos-dhcpv6-rebind>—Show DHCPv6 REBIND information
- <get-ddos-dhcpv6-reply>—Show DHCPv6 REPLY information
- <get-ddos-dhcpv6-release>—Show DHCPv6 RELEASE information
- <get-ddos-dhcpv6-decline>—Show DHCPv6 DECLINE information
- <get-ddos-dhcpv6-reconfig>—Show DHCPv6 RECONFIGURE information
- <get-ddos-dhcpv6-info-req>—Show DHCPv6 INFORMATION-REQUEST information
- <get-ddos-dhcpv6-relay-for>—Show DHCPv6 RELAY-FORW information
- <get-ddos-dhcpv6-relay-rep>—Show DHCPv6 RELAY-REPL information
- <get-ddos-dhcpv6-leasequery>—Show DHCPv6 LEASEQUERY information
- <get-ddos-dhcpv6-leaseq-re>—Show DHCPv6 LEASEQUERY-REPLY information
- <get-ddos-dhcpv6-leaseq-do>—Show DHCPv6 LEASEQUERY-DONE information
- <get-ddos-dhcpv6-leaseq-da>—Show DHCPv6 LEASEQUERY-DATA information

### <get-ddos-dhcpv6-leaseq-da>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-leaseq-da/>  
</rpc>
```

**Description** Show DHCPv6 LEASEQUERY-DATA information

### <get-ddos-dhcpv6-leaseq-do>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-leaseq-do/>  
</rpc>
```

**Description** Show DHCPv6 LEASEQUERY-DONE information

### <get-ddos-dhcpv6-leaseq-re>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-leaseq-re/>  
</rpc>
```

**Description** Show DHCPv6 LEASEQUERY-REPLY information

### <get-ddos-dhcpv6-leasequery>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-leasequery/>  
</rpc>
```

**Description** Show DHCPv6 LEASEQUERY information

### <get-ddos-dhcpv6-parameters>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-dhcpv6-parameters>
```

</rpc>

**Description** Show DHCPv6 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-dhcpv6-rebind>

---

**Usage**

```
<rpc>  
<get-ddos-dhcpv6-rebind/>  
</rpc>
```

**Description** Show DHCPv6 REBIND information

---

### <get-ddos-dhcpv6-reconfig>

---

**Usage**

```
<rpc>  
<get-ddos-dhcpv6-reconfig/>  
</rpc>
```

**Description** Show DHCPv6 RECONFIGURE information

---

### <get-ddos-dhcpv6-relay-for>

---

**Usage**

```
<rpc>  
<get-ddos-dhcpv6-relay-for/>  
</rpc>
```

**Description** Show DHCPv6 RELAY-FORW information

---

### <get-ddos-dhcpv6-relay-rep>

---

**Usage**

```
<rpc>  
<get-ddos-dhcpv6-relay-rep/>  
</rpc>
```

**Description** Show DHCPv6 RELAY-REPL information

## <get-ddos-dhcpv6-release>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-release/>  
</rpc>
```

**Description** Show DHCPv6 RELEASE information

## <get-ddos-dhcpv6-renew>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-renew/>  
</rpc>
```

**Description** Show DHCPv6 RENEW information

## <get-ddos-dhcpv6-reply>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-reply/>  
</rpc>
```

**Description** Show DHCPv6 REPLY information

## <get-ddos-dhcpv6-request>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-request/>  
</rpc>
```

**Description** Show DHCPv6 REQUEST information

## <get-ddos-dhcpv6-solicit>

---

**Usage**

```
<rpc>  
  <get-ddos-dhcpv6-solicit/>  
</rpc>
```

**Description** Show DHCPv6 SOLICIT information

## <get-ddos-dhcpv6-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv6-statistics>
  <brief/>
  <detail/>
</get-ddos-dhcpv6-statistics>
</rpc>
```

**Description** Show DHCPv6 statistics and states

**Contents** <brief>—Show brief output  
            <detail>—Show detailed output

## <get-ddos-dhcpv6-unclass>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv6-unclass/>
</rpc>
```

**Description** Show unclassified DHCPv6 traffic information

## <get-ddos-dhcpv6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-dhcpv6-violations/>
</rpc>
```

**Description** Show DHCPv6 traffic violations

## <get-ddos-diameter-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-diameter-aggregate/>
</rpc>
```

**Description** Show aggregate for all Diameter/Gx+ traffic information

## <get-ddos-diameter-information>

---

**Usage**

```
<rpc>
  <get-ddos-diameter-information>
</get-ddos-diameter-information>
</rpc>
```

**Description** Show Diameter/Gx+ traffic information

**Contents** <get-ddos-diameter-parameters>—Show Diameter protocol parameters

<get-ddos-diameter-statistics>—Show Diameter statistics and states

<get-ddos-diameter-violations>—Show Diameter traffic violations

<get-ddos-diameter-aggregate>—Show aggregate for all Diameter/Gx+ traffic information

## <get-ddos-diameter-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-diameter-parameters>
    <brief/>
    <detail/>
  </get-ddos-diameter-parameters>
</rpc>
```

**Description** Show Diameter protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-diameter-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-diameter-statistics>
    <brief/>
    <detail/>
  </get-ddos-diameter-statistics>
</rpc>
```

**Description** Show Diameter statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

### <get-ddos-diameter-violations>

---

**Usage**

```
<rpc>
  <get-ddos-diameter-violations/>
</rpc>
```

**Description** Show Diameter traffic violations

---

### <get-ddos-dns-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-dns-aggregate/>
</rpc>
```

**Description** Show aggregate for all DNS traffic information

---

### <get-ddos-dns-information>

---

**Usage**

```
<rpc>
  <get-ddos-dns-information>
  </get-ddos-dns-information>
</rpc>
```

**Description** Show DNS traffic information

**Contents**

- <get-ddos-dns-parameters>—Show DNS protocol parameters
- <get-ddos-dns-statistics>—Show DNS statistics and states
- <get-ddos-dns-violations>—Show DNS traffic violations
- <get-ddos-dns-aggregate>—Show aggregate for all DNS traffic information

---

### <get-ddos-dns-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-dns-parameters>
  <brief/>
  <detail/>
</get-ddos-dns-parameters>
```

```
</rpc>
```

**Description** Show DNS protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-dns-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-dns-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-dns-statistics>  
</rpc>
```

**Description** Show DNS statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-dns-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-dns-violations/>  
</rpc>
```

**Description** Show DNS traffic violations

---

### <get-ddos-dtcp-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-dtcp-aggregate/>  
</rpc>
```

**Description** Show aggregate for all dtcp traffic information

## <get-ddos-dtcp-information>

---

**Usage**

```
<rpc>
  <get-ddos-dtcp-information>
</get-ddos-dtcp-information>
</rpc>
```

**Description** Show dtcp traffic information

**Contents** <get-ddos-dtcp-parameters>—Show dtcp protocol parameters

<get-ddos-dtcp-statistics>—Show dtcp statistics and states

<get-ddos-dtcp-violations>—Show dtcp traffic violations

<get-ddos-dtcp-aggregate>—Show aggregate for all dtcp traffic information

## <get-ddos-dtcp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-dtcp-parameters>
    <brief/>
    <detail/>
  </get-ddos-dtcp-parameters>
</rpc>
```

**Description** Show dtcp protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-dtcp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-dtcp-statistics>
    <brief/>
    <detail/>
  </get-ddos-dtcp-statistics>
</rpc>
```

**Description** Show dtcp statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-dtcp-violations>

---

### Usage

```
<rpc>
  <get-ddos-dtcp-violations/>
</rpc>
```

**Description** Show dtcp traffic violations

---

## <get-ddos-dynvlan-aggregate>

---

### Usage

```
<rpc>
  <get-ddos-dynvlan-aggregate/>
</rpc>
```

**Description** Show aggregate for all dynamic vlan exceptions information

---

## <get-ddos-dynvlan-information>

---

### Usage

```
<rpc>
  <get-ddos-dynvlan-information>
  </get-ddos-dynvlan-information>
</rpc>
```

**Description** Show dynamic vlan exceptions information

**Contents**

- <get-ddos-dynvlan-parameters>—Show Dynamic-Vlan protocol parameters
- <get-ddos-dynvlan-statistics>—Show Dynamic-Vlan statistics and states
- <get-ddos-dynvlan-violations>—Show Dynamic-Vlan traffic violations
- <get-ddos-dynvlan-aggregate>—Show aggregate for all dynamic vlan exceptions information

---

## <get-ddos-dynvlan-parameters>

---

### Usage

```
<rpc>
  <get-ddos-dynvlan-parameters>
  <brief/>
  <detail/>
</get-ddos-dynvlan-parameters>
```

`</rpc>`

**Description** Show Dynamic-Vlan protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-dynvlan-statistics>`

---

**Usage**

```
<rpc>
  <get-ddos-dynvlan-statistics>
    <brief/>
    <detail/>
  </get-ddos-dynvlan-statistics>
</rpc>
```

**Description** Show Dynamic-Vlan statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-dynvlan-violations>`

---

**Usage**

```
<rpc>
  <get-ddos-dynvlan-violations/>
</rpc>
```

**Description** Show Dynamic-Vlan traffic violations

---

### `<get-ddos-egpv6-aggregate>`

---

**Usage**

```
<rpc>
  <get-ddos-egpv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all EGPv6 traffic information

## <get-ddos-egpv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-egpv6-information>
</get-ddos-egpv6-information>
</rpc>
```

**Description** Show EGPv6 traffic information

**Contents** <get-ddos-egpv6-parameters>—Show EGPv6 protocol parameters

<get-ddos-egpv6-statistics>—Show EGPv6 statistics and states

<get-ddos-egpv6-violations>—Show EGPv6 traffic violations

<get-ddos-egpv6-aggregate>—Show aggregate for all EGPv6 traffic information

## <get-ddos-egpv6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-egpv6-parameters>
    <brief/>
    <detail/>
  </get-ddos-egpv6-parameters>
</rpc>
```

**Description** Show EGPv6 protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-egpv6-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-egpv6-statistics>
    <brief/>
    <detail/>
  </get-ddos-egpv6-statistics>
</rpc>
```

**Description** Show EGPv6 statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

### <get-ddos-egpv6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-egpv6-violations/>
</rpc>
```

**Description** Show EGPv6 traffic violations

---

### <get-ddos-eoam-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-eoam-aggregate/>
</rpc>
```

**Description** Show aggregate for all EOAM traffic information

---

### <get-ddos-eoam-information>

---

**Usage**

```
<rpc>
  <get-ddos-eoam-information>
  </get-ddos-eoam-information>
</rpc>
```

**Description** Show EOAM traffic information

**Contents**

- <get-ddos-eoam-parameters>—Show EOAM protocol parameters
- <get-ddos-eoam-statistics>—Show EOAM statistics and states
- <get-ddos-eoam-violations>—Show EOAM traffic violations
- <get-ddos-eoam-aggregate>—Show aggregate for all EOAM traffic information

---

### <get-ddos-eoam-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-eoam-parameters>
  <brief/>
  <detail/>
</get-ddos-eoam-parameters>
```

```
</rpc>
```

**Description** Show EOAM protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-eoam-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-eoam-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-eoam-statistics>  
</rpc>
```

**Description** Show EOAM statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-eoam-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-eoam-violations/>  
</rpc>
```

**Description** Show EOAM traffic violations

---

### <get-ddos-esmc-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-esmc-aggregate/>  
</rpc>
```

**Description** Show aggregate for all ESMC traffic information

## <get-ddos-esmc-information>

---

**Usage**

```
<rpc>  
  <get-ddos-esmc-information>  
  </get-ddos-esmc-information>  
</rpc>
```

**Description** Show ESMC traffic information

**Contents** <get-ddos-esmc-parameters>—Show ESMC protocol parameters  
<get-ddos-esmc-statistics>—Show ESMC statistics and states  
<get-ddos-esmc-violations>—Show ESMC traffic violations  
<get-ddos-esmc-aggregate>—Show aggregate for all ESMC traffic information

## <get-ddos-esmc-parameters>

---

**Usage**

```
<rpc>  
  <get-ddos-esmc-parameters>  
  <brief/>  
  <detail/>  
  </get-ddos-esmc-parameters>  
</rpc>
```

**Description** Show ESMC protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-esmc-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-esmc-statistics>  
  <brief/>  
  <detail/>  
  </get-ddos-esmc-statistics>  
</rpc>
```

**Description** Show ESMC statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-esmc-violations>

---

### Usage

```
<rpc>
  <get-ddos-esmc-violations/>
</rpc>
```

**Description** Show ESMC traffic violations

---

## <get-ddos-ftp-aggregate>

---

### Usage

```
<rpc>
  <get-ddos-ftp-aggregate/>
</rpc>
```

**Description** Show aggregate for all FTP traffic information

---

## <get-ddos-ftp-information>

---

### Usage

```
<rpc>
  <get-ddos-ftp-information>
  </get-ddos-ftp-information>
</rpc>
```

**Description** Show FTP traffic information

**Contents**

- <get-ddos-ftp-parameters>—Show FTP protocol parameters
- <get-ddos-ftp-statistics>—Show FTP statistics and states
- <get-ddos-ftp-violations>—Show FTP traffic violations
- <get-ddos-ftp-aggregate>—Show aggregate for all FTP traffic information

---

## <get-ddos-ftp-parameters>

---

### Usage

```
<rpc>
  <get-ddos-ftp-parameters>
  <brief/>
  <detail/>
</get-ddos-ftp-parameters>
```

`</rpc>`

**Description** Show FTP protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-ftp-statistics>`

---

**Usage**

```
<rpc>
  <get-ddos-ftp-statistics>
    <brief/>
    <detail/>
  </get-ddos-ftp-statistics>
</rpc>
```

**Description** Show FTP statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-ftp-violations>`

---

**Usage**

```
<rpc>
  <get-ddos-ftp-violations/>
</rpc>
```

**Description** Show FTP traffic violations

---

### `<get-ddos-ftp6-aggregate>`

---

**Usage**

```
<rpc>
  <get-ddos-ftp6-aggregate/>
</rpc>
```

**Description** Show aggregate for all FTPv6 traffic information

## <get-ddos-ftp6-information>

---

**Usage**

```
<rpc>
  <get-ddos-ftp6-information>
</get-ddos-ftp6-information>
</rpc>
```

**Description** Show FTPv6 traffic information

**Contents** <get-ddos-ftp6-parameters>—Show FTPv6 protocol parameters

<get-ddos-ftp6-statistics>—Show FTPv6 statistics and states

<get-ddos-ftp6-violations>—Show FTPv6 traffic violations

<get-ddos-ftp6-aggregate>—Show aggregate for all FTPv6 traffic information

## <get-ddos-ftp6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ftp6-parameters>
    <brief/>
    <detail/>
  </get-ddos-ftp6-parameters>
</rpc>
```

**Description** Show FTPv6 protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-ftp6-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ftp6-statistics>
    <brief/>
    <detail/>
  </get-ddos-ftp6-statistics>
</rpc>
```

**Description** Show FTPv6 statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-ftp6-violations>

---

### Usage

```
<rpc>
  <get-ddos-ftp6-violations/>
</rpc>
```

**Description** Show FTPv6 traffic violations

## <get-ddos-fw-host-aggregate>

---

### Usage

```
<rpc>
  <get-ddos-fw-host-aggregate/>
</rpc>
```

**Description** Show aggregate for all packets via firewall 'send-to-host' action information

## <get-ddos-fw-host-information>

---

### Usage

```
<rpc>
  <get-ddos-fw-host-information>
  </get-ddos-fw-host-information>
</rpc>
```

**Description** Show packets via firewall 'send-to-host' action information

**Contents**

- <get-ddos-fw-host-parameters>—Show Firewall-Host protocol parameters
- <get-ddos-fw-host-statistics>—Show Firewall-Host statistics and states
- <get-ddos-fw-host-violations>—Show Firewall-Host traffic violations
- <get-ddos-fw-host-aggregate>—Show aggregate for all packets via firewall 'send-to-host' action information

## <get-ddos-fw-host-parameters>

---

### Usage

```
<rpc>
  <get-ddos-fw-host-parameters>
  <brief/>
  <detail/>
</get-ddos-fw-host-parameters>
```

```
</rpc>
```

**Description** Show Firewall-Host protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-fw-host-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-fw-host-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-fw-host-statistics>  
</rpc>
```

**Description** Show Firewall-Host statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-fw-host-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-fw-host-violations/>  
</rpc>
```

**Description** Show Firewall-Host traffic violations

---

### <get-ddos-fw-reject-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-fw-reject-aggregate/>  
</rpc>
```

**Description** Show aggregate for all packets via firewall 'reject' action information

## <get-ddos-fw-reject-information>

---

**Usage**

```
<rpc>
  <get-ddos-fw-reject-information>
</get-ddos-fw-reject-information>
</rpc>
```

**Description** Show packets via firewall 'reject' action information

**Contents** <get-ddos-fw-reject-parameters>—Show Firewall-Reject protocol parameters

<get-ddos-fw-reject-statistics>—Show Firewall-Reject statistics and states

<get-ddos-fw-reject-violations>—Show Firewall-Reject traffic violations

<get-ddos-fw-reject-aggregate>—Show aggregate for all packets via firewall 'reject' action information

## <get-ddos-fw-reject-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-fw-reject-parameters>
    <brief/>
    <detail/>
  </get-ddos-fw-reject-parameters>
</rpc>
```

**Description** Show Firewall-Reject protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-fw-reject-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-fw-reject-statistics>
    <brief/>
    <detail/>
  </get-ddos-fw-reject-statistics>
</rpc>
```

**Description** Show Firewall-Reject statistics and states

**Contents**    <brief>—Show brief output  
                 <detail>—Show detailed output

---

## <get-ddos-fw-reject-violations>

---

**Usage**

```
<rpc>
  <get-ddos-fw-reject-violations/>
</rpc>
```

**Description**    Show Firewall-Reject traffic violations

---

## <get-ddos-gre-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-gre-aggregate/>
</rpc>
```

**Description**    Show aggregate for all GRE traffic information

---

## <get-ddos-gre-information>

---

**Usage**

```
<rpc>
  <get-ddos-gre-information>
  </get-ddos-gre-information>
</rpc>
```

**Description**    Show GRE traffic information

**Contents**    <get-ddos-gre-parameters>—Show GRE protocol parameters  
                 <get-ddos-gre-statistics>—Show GRE statistics and states  
                 <get-ddos-gre-violations>—Show GRE traffic violations  
                 <get-ddos-gre-aggregate>—Show aggregate for all GRE traffic information

---

## <get-ddos-gre-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-gre-parameters>
  <brief/>
  <detail/>
```

```
</get-ddos-gre-parameters>
</rpc>
```

**Description** Show GRE protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-gre-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-gre-statistics>
    <brief/>
    <detail/>
  </get-ddos-gre-statistics>
</rpc>
```

**Description** Show GRE statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-gre-violations>

---

**Usage**

```
<rpc>
  <get-ddos-gre-violations/>
</rpc>
```

**Description** Show GRE traffic violations

---

### <get-ddos-icmp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-icmp-aggregate/>
</rpc>
```

**Description** Show aggregate for all ICMP traffic information

## <get-ddos-icmp-information>

---

**Usage**

```
<rpc>
  <get-ddos-icmp-information>
</get-ddos-icmp-information>
</rpc>
```

**Description** Show ICMP traffic information

**Contents** <get-ddos-icmp-parameters>—Show ICMP protocol parameters

<get-ddos-icmp-statistics>—Show ICMP statistics and states

<get-ddos-icmp-violations>—Show ICMP traffic violations

<get-ddos-icmp-aggregate>—Show aggregate for all ICMP traffic information

## <get-ddos-icmp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-icmp-parameters>
    <brief/>
    <detail/>
  </get-ddos-icmp-parameters>
</rpc>
```

**Description** Show ICMP protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-icmp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-icmp-statistics>
    <brief/>
    <detail/>
  </get-ddos-icmp-statistics>
</rpc>
```

**Description** Show ICMP statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

### <get-ddos-icmp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-icmp-violations/>
</rpc>
```

**Description** Show ICMP traffic violations

---

### <get-ddos-igmp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-igmp-aggregate/>
</rpc>
```

**Description** Show aggregate for all IGMP traffic information

---

### <get-ddos-igmp-information>

---

**Usage**

```
<rpc>
  <get-ddos-igmp-information>
  </get-ddos-igmp-information>
</rpc>
```

**Description** Show IGMP traffic information

**Contents** <get-ddos-igmp-parameters>—Show IGMP protocol parameters

<get-ddos-igmp-statistics>—Show IGMP statistics and states

<get-ddos-igmp-violations>—Show IGMP traffic violations

<get-ddos-igmp-aggregate>—Show aggregate for all IGMP traffic information

---

### <get-ddos-igmp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-igmp-parameters>
  <brief/>
  <detail/>
</get-ddos-igmp-parameters>
```

```
</rpc>
```

**Description** Show IGMP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-igmp-snoop-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-igmp-snoop-aggregate/>  
</rpc>
```

**Description** Show aggregate for all snooped igmp traffic information

---

### <get-ddos-igmp-snoop-information>

---

**Usage**

```
<rpc>  
  <get-ddos-igmp-snoop-information>  
  </get-ddos-igmp-snoop-information>  
</rpc>
```

**Description** Show snooped igmp traffic information

**Contents** <get-ddos-igmp-snoop-parameters>—Show IGMP-Snoop protocol parameters  
<get-ddos-igmp-snoop-statistics>—Show IGMP-Snoop statistics and states  
<get-ddos-igmp-snoop-violations>—Show IGMP-Snoop traffic violations  
<get-ddos-igmp-snoop-aggregate>—Show aggregate for all snooped igmp traffic information

---

### <get-ddos-igmp-snoop-parameters>

---

**Usage**

```
<rpc>  
  <get-ddos-igmp-snoop-parameters>  
  <brief/>  
  <detail/>  
  </get-ddos-igmp-snoop-parameters>  
</rpc>
```

**Description** Show IGMP-Snoop protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-igmp-snoop-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-igmp-snoop-statistics>
    <brief/>
    <detail/>
  </get-ddos-igmp-snoop-statistics>
</rpc>
```

**Description** Show IGMP-Snoop statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-igmp-snoop-violations>

---

**Usage**

```
<rpc>
  <get-ddos-igmp-snoop-violations/>
</rpc>
```

**Description** Show IGMP-Snoop traffic violations

---

### <get-ddos-igmp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-igmp-statistics>
    <brief/>
    <detail/>
  </get-ddos-igmp-statistics>
</rpc>
```

**Description** Show IGMP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-igmp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-igmp-violations/>
</rpc>
```

**Description** Show IGMP traffic violations

## <get-ddos-igmpv4v6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-igmpv4v6-aggregate/>
</rpc>
```

**Description** Show aggregate for all IGMPv4-v6 traffic information

## <get-ddos-igmpv4v6-information>

---

**Usage**

```
<rpc>
  <get-ddos-igmpv4v6-information>
  </get-ddos-igmpv4v6-information>
</rpc>
```

**Description** Show IGMPv4-v6 traffic information

**Contents**

- <get-ddos-igmpv4v6-parameters>—Show IGMPv4v6 protocol parameters
- <get-ddos-igmpv4v6-statistics>—Show IGMPv4v6 statistics and states
- <get-ddos-igmpv4v6-violations>—Show IGMPv4v6 traffic violations
- <get-ddos-igmpv4v6-aggregate>—Show aggregate for all IGMPv4-v6 traffic information

## <get-ddos-igmpv4v6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-igmpv4v6-parameters>
  <brief/>
  <detail/>
  </get-ddos-igmpv4v6-parameters>
</rpc>
```

**Description** Show IGMPv4v6 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-igmpv4v6-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-igmpv4v6-statistics>  
  <brief/>  
  <detail/>  
  </get-ddos-igmpv4v6-statistics>  
</rpc>
```

**Description** Show IGMPv4v6 statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-igmpv4v6-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-igmpv4v6-violations/>  
</rpc>
```

**Description** Show IGMPv4v6 traffic violations

---

### <get-ddos-igmpv6-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-igmpv6-aggregate/>  
</rpc>
```

**Description** Show aggregate for all IGMPv6 traffic information

---

### <get-ddos-igmpv6-information>

---

**Usage**

```
<rpc>  
  <get-ddos-igmpv6-information>  
  </get-ddos-igmpv6-information>
```

```
</rpc>
```

**Description** Show IGMPv6 traffic information

**Contents** `<get-ddos-igmpv6-parameters>`—Show IGMPv6 protocol parameters  
`<get-ddos-igmpv6-statistics>`—Show IGMPv6 statistics and states  
`<get-ddos-igmpv6-violations>`—Show IGMPv6 traffic violations  
`<get-ddos-igmpv6-aggregate>`—Show aggregate for all IGMPv6 traffic information

---

### `<get-ddos-igmpv6-parameters>`

---

**Usage**

```
<rpc>  
  <get-ddos-igmpv6-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-igmpv6-parameters>  
</rpc>
```

**Description** Show IGMPv6 protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-igmpv6-statistics>`

---

**Usage**

```
<rpc>  
  <get-ddos-igmpv6-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-igmpv6-statistics>  
</rpc>
```

**Description** Show IGMPv6 statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

### <get-ddos-igmpv6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-igmpv6-violations/>
</rpc>
```

**Description** Show IGMPv6 traffic violations

### <get-ddos-ip-frag-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ip-frag-aggregate/>
</rpc>
```

**Description** Show aggregate for all IP-Fragments information

### <get-ddos-ip-frag-first-frag>

---

**Usage**

```
<rpc>
  <get-ddos-ip-frag-first-frag/>
</rpc>
```

**Description** Show First IP fragment information

### <get-ddos-ip-frag-information>

---

**Usage**

```
<rpc>
  <get-ddos-ip-frag-information>
</get-ddos-ip-frag-information>
</rpc>
```

**Description** Show IP-Fragments information

**Contents**

- <get-ddos-ip-frag-parameters>—Show IP-Fragments protocol parameters
- <get-ddos-ip-frag-statistics>—Show IP-Fragments statistics and states
- <get-ddos-ip-frag-violations>—Show IP-Fragments traffic violations
- <get-ddos-ip-frag-aggregate>—Show aggregate for all IP-Fragments information
- <get-ddos-ip-frag-first-frag>—Show First IP fragment information

<get-ddos-ip-frag-trail-frag>—Show Trailing IP fragment information

---

## <get-ddos-ip-frag-parameters>

---

### Usage

```
<rpc>
  <get-ddos-ip-frag-parameters>
    <brief/>
    <detail/>
  </get-ddos-ip-frag-parameters>
</rpc>
```

**Description** Show IP-Fragments protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

## <get-ddos-ip-frag-statistics>

---

### Usage

```
<rpc>
  <get-ddos-ip-frag-statistics>
    <brief/>
    <detail/>
  </get-ddos-ip-frag-statistics>
</rpc>
```

**Description** Show IP-Fragments statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

## <get-ddos-ip-frag-trail-frag>

---

### Usage

```
<rpc>
  <get-ddos-ip-frag-trail-frag/>
</rpc>
```

**Description** Show Trailing IP fragment information

### <get-ddos-ip-frag-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ip-frag-violations/>
</rpc>
```

**Description** Show IP-Fragments traffic violations

### <get-ddos-ip-opt-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ip-opt-aggregate/>
</rpc>
```

**Description** Show aggregate for all ip options traffic information

### <get-ddos-ip-opt-information>

---

**Usage**

```
<rpc>
  <get-ddos-ip-opt-information>
  </get-ddos-ip-opt-information>
</rpc>
```

**Description** Show ip options traffic information

**Contents**

- <get-ddos-ip-opt-parameters>—Show IP-Options protocol parameters
- <get-ddos-ip-opt-statistics>—Show IP-Options statistics and states
- <get-ddos-ip-opt-violations>—Show IP-Options traffic violations
- <get-ddos-ip-opt-aggregate>—Show aggregate for all ip options traffic information
- <get-ddos-ip-opt-unclass>—Show unclassified ip options traffic information
- <get-ddos-ip-opt-rt-alert>—Show Router alert options traffic information

### <get-ddos-ip-opt-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ip-opt-parameters>
  <brief/>
  <detail/>
```

```
</get-ddos-ip-opt-parameters>
</rpc>
```

**Description** Show IP-Options protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ip-opt-rt-alert>

---

**Usage**

```
<rpc>
  <get-ddos-ip-opt-rt-alert/>
</rpc>
```

**Description** Show Router alert options traffic information

---

### <get-ddos-ip-opt-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ip-opt-statistics>
    <brief/>
    <detail/>
  </get-ddos-ip-opt-statistics>
</rpc>
```

**Description** Show IP-Options statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ip-opt-unclass>

---

**Usage**

```
<rpc>
  <get-ddos-ip-opt-unclass/>
</rpc>
```

**Description** Show unclassified ip options traffic information

## <get-ddos-ip-opt-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ip-opt-violations/>
</rpc>
```

**Description** Show IP-Options traffic violations

## <get-ddos-ipv4-uncls-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ipv4-uncls-aggregate/>
</rpc>
```

**Description** Show aggregate for all unclassified host-bound IPv4 traffic information

## <get-ddos-ipv4-uncls-information>

---

**Usage**

```
<rpc>
  <get-ddos-ipv4-uncls-information>
  </get-ddos-ipv4-uncls-information>
</rpc>
```

**Description** Show unclassified host-bound IPv4 traffic information

**Contents**

- <get-ddos-ipv4-uncls-parameters>—Show IPv4-Unclassified protocol parameters
- <get-ddos-ipv4-uncls-statistics>—Show IPv4-Unclassified statistics and states
- <get-ddos-ipv4-uncls-violations>—Show IPv4-Unclassified traffic violations
- <get-ddos-ipv4-uncls-aggregate>—Show aggregate for all unclassified host-bound IPv4 traffic information

## <get-ddos-ipv4-uncls-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ipv4-uncls-parameters>
  <brief/>
  <detail/>
  </get-ddos-ipv4-uncls-parameters>
</rpc>
```

**Description** Show IPv4-Unclassified protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ipv4-uncls-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-ipv4-uncls-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-ipv4-uncls-statistics>  
</rpc>
```

**Description** Show IPv4-Unclassified statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ipv4-uncls-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-ipv4-uncls-violations/>  
</rpc>
```

**Description** Show IPv4-Unclassified traffic violations

---

### <get-ddos-ipv6-uncls-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-ipv6-uncls-aggregate/>  
</rpc>
```

**Description** Show aggregate for all unclassified host-bound IPv6 traffic information

---

### <get-ddos-ipv6-uncls-information>

---

**Usage**

```
<rpc>  
  <get-ddos-ipv6-uncls-information>  
  </get-ddos-ipv6-uncls-information>
```

</rpc>

**Description** Show unclassified host-bound IPv6 traffic information

**Contents** <get-ddos-ipv6-uncls-parameters>—Show IPv6-Unclassified protocol parameters  
<get-ddos-ipv6-uncls-statistics>—Show IPv6-Unclassified statistics and states  
<get-ddos-ipv6-uncls-violations>—Show IPv6-Unclassified traffic violations  
<get-ddos-ipv6-uncls-aggregate>—Show aggregate for all unclassified host-bound IPv6 traffic information

---

### <get-ddos-ipv6-uncls-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ipv6-uncls-parameters>
    <brief/>
    <detail/>
  </get-ddos-ipv6-uncls-parameters>
</rpc>
```

**Description** Show IPv6-Unclassified protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ipv6-uncls-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ipv6-uncls-statistics>
    <brief/>
    <detail/>
  </get-ddos-ipv6-uncls-statistics>
</rpc>
```

**Description** Show IPv6-Unclassified statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-ipv6-uncls-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ipv6-uncls-violations/>
</rpc>
```

**Description** Show IPv6-Unclassified traffic violations

## <get-ddos-isis-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-isis-aggregate/>
</rpc>
```

**Description** Show aggregate for all ISIS traffic information

## <get-ddos-isis-information>

---

**Usage**

```
<rpc>
  <get-ddos-isis-information>
  </get-ddos-isis-information>
</rpc>
```

**Description** Show ISIS traffic information

**Contents**

- <get-ddos-isis-parameters>—Show ISIS protocol parameters
- <get-ddos-isis-statistics>—Show ISIS statistics and states
- <get-ddos-isis-violations>—Show ISIS traffic violations
- <get-ddos-isis-aggregate>—Show aggregate for all ISIS traffic information

## <get-ddos-isis-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-isis-parameters>
  <brief/>
  <detail/>
  </get-ddos-isis-parameters>
</rpc>
```

**Description** Show ISIS protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-isis-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-isis-statistics>
    <brief/>
    <detail/>
  </get-ddos-isis-statistics>
</rpc>
```

**Description** Show ISIS statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-isis-violations>

---

**Usage**

```
<rpc>
  <get-ddos-isis-violations/>
</rpc>
```

**Description** Show ISIS traffic violations

---

### <get-ddos-jfm-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-jfm-aggregate/>
</rpc>
```

**Description** Show aggregate for all JFM traffic information

---

### <get-ddos-jfm-information>

---

**Usage**

```
<rpc>
  <get-ddos-jfm-information>
  </get-ddos-jfm-information>
```

```
</rpc>
```

**Description** Show JFM traffic information

**Contents** `<get-ddos-jfm-parameters>`—Show JFM protocol parameters  
`<get-ddos-jfm-statistics>`—Show JFM statistics and states  
`<get-ddos-jfm-violations>`—Show JFM traffic violations  
`<get-ddos-jfm-aggregate>`—Show aggregate for all JFM traffic information

---

### `<get-ddos-jfm-parameters>`

---

**Usage**

```
<rpc>  
  <get-ddos-jfm-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-jfm-parameters>  
</rpc>
```

**Description** Show JFM protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-jfm-statistics>`

---

**Usage**

```
<rpc>  
  <get-ddos-jfm-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-jfm-statistics>  
</rpc>
```

**Description** Show JFM statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

### <get-ddos-jfm-violations>

---

**Usage**

```
<rpc>
  <get-ddos-jfm-violations/>
</rpc>
```

**Description** Show JFM traffic violations

### <get-ddos-l2tp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-l2tp-aggregate/>
</rpc>
```

**Description** Show aggregate for all l2tp traffic information

### <get-ddos-l2tp-information>

---

**Usage**

```
<rpc>
  <get-ddos-l2tp-information>
  </get-ddos-l2tp-information>
</rpc>
```

**Description** Show l2tp traffic information

**Contents** <get-ddos-l2tp-parameters>—Show L2TP protocol parameters

<get-ddos-l2tp-statistics>—Show L2TP statistics and states

<get-ddos-l2tp-violations>—Show L2TP traffic violations

<get-ddos-l2tp-aggregate>—Show aggregate for all l2tp traffic information

### <get-ddos-l2tp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-l2tp-parameters>
  <brief/>
  <detail/>
  </get-ddos-l2tp-parameters>
</rpc>
```

**Description** Show L2TP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-l2tp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-l2tp-statistics>
    <brief/>
    <detail/>
  </get-ddos-l2tp-statistics>
</rpc>
```

**Description** Show L2TP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-l2tp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-l2tp-violations/>
</rpc>
```

**Description** Show L2TP traffic violations

---

### <get-ddos-lacp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-lacp-aggregate/>
</rpc>
```

**Description** Show aggregate for all LACP traffic information

---

### <get-ddos-lacp-information>

---

**Usage**

```
<rpc>
  <get-ddos-lacp-information>
  </get-ddos-lacp-information>
```

`</rpc>`

**Description** Show LACP traffic information

**Contents** `<get-ddos-lacp-parameters>`—Show LACP protocol parameters  
`<get-ddos-lacp-statistics>`—Show LACP statistics and states  
`<get-ddos-lacp-violations>`—Show LACP traffic violations  
`<get-ddos-lacp-aggregate>`—Show aggregate for all LACP traffic information

---

### `<get-ddos-lacp-parameters>`

---

**Usage**

```
<rpc>  
  <get-ddos-lacp-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-lacp-parameters>  
</rpc>
```

**Description** Show LACP protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-lacp-statistics>`

---

**Usage**

```
<rpc>  
  <get-ddos-lacp-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-lacp-statistics>  
</rpc>
```

**Description** Show LACP statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

## <get-ddos-lacp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-lacp-violations/>
</rpc>
```

**Description** Show LACP traffic violations

## <get-ddos-ldp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ldp-aggregate/>
</rpc>
```

**Description** Show aggregate for all LDP traffic information

## <get-ddos-ldp-information>

---

**Usage**

```
<rpc>
  <get-ddos-ldp-information>
  </get-ddos-ldp-information>
</rpc>
```

**Description** Show LDP traffic information

**Contents**

- <get-ddos-ldp-parameters>—Show LDP protocol parameters
- <get-ddos-ldp-statistics>—Show LDP statistics and states
- <get-ddos-ldp-violations>—Show LDP traffic violations
- <get-ddos-ldp-aggregate>—Show aggregate for all LDP traffic information

## <get-ddos-ldp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ldp-parameters>
  <brief/>
  <detail/>
  </get-ddos-ldp-parameters>
</rpc>
```

**Description** Show LDP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ldp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ldp-statistics>
    <brief/>
    <detail/>
  </get-ddos-ldp-statistics>
</rpc>
```

**Description** Show LDP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ldp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ldp-violations/>
</rpc>
```

**Description** Show LDP traffic violations

---

### <get-ddos-ldpv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ldpv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all LDPv6 traffic information

---

### <get-ddos-ldpv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-ldpv6-information>
  </get-ddos-ldpv6-information>
```

```
</rpc>
```

**Description** Show LDPv6 traffic information

**Contents** `<get-ddos-ldpv6-parameters>`—Show LDPv6 protocol parameters  
`<get-ddos-ldpv6-statistics>`—Show LDPv6 statistics and states  
`<get-ddos-ldpv6-violations>`—Show LDPv6 traffic violations  
`<get-ddos-ldpv6-aggregate>`—Show aggregate for all LDPv6 traffic information

---

### `<get-ddos-ldpv6-parameters>`

---

**Usage**

```
<rpc>  
  <get-ddos-ldpv6-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-ldpv6-parameters>  
</rpc>
```

**Description** Show LDPv6 protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-ldpv6-statistics>`

---

**Usage**

```
<rpc>  
  <get-ddos-ldpv6-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-ldpv6-statistics>  
</rpc>
```

**Description** Show LDPv6 statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

### <get-ddos-ldpv6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ldpv6-violations/>
</rpc>
```

**Description** Show LDPv6 traffic violations

### <get-ddos-ldp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ldp-aggregate/>
</rpc>
```

**Description** Show aggregate for all LLDP traffic information

### <get-ddos-ldp-information>

---

**Usage**

```
<rpc>
  <get-ddos-ldp-information>
  </get-ddos-ldp-information>
</rpc>
```

**Description** Show LLDP traffic information

**Contents**

- <get-ddos-ldp-parameters>—Show LLDP protocol parameters
- <get-ddos-ldp-statistics>—Show LLDP statistics and states
- <get-ddos-ldp-violations>—Show LLDP traffic violations
- <get-ddos-ldp-aggregate>—Show aggregate for all LLDP traffic information

### <get-ddos-ldp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ldp-parameters>
  <brief/>
  <detail/>
  </get-ddos-ldp-parameters>
</rpc>
```

**Description** Show LLDP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ldp-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-ldp-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-ldp-statistics>  
</rpc>
```

**Description** Show LLDP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ldp-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-ldp-violations/>  
</rpc>
```

**Description** Show LLDP traffic violations

---

### <get-ddos-lmp-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-lmp-aggregate/>  
</rpc>
```

**Description** Show aggregate for all LMP traffic information

---

### <get-ddos-lmp-information>

---

**Usage**

```
<rpc>  
  <get-ddos-lmp-information>  
  </get-ddos-lmp-information>
```

`</rpc>`

**Description** Show LMP traffic information

**Contents** `<get-ddos-lmp-parameters>`—Show LMP protocol parameters  
`<get-ddos-lmp-statistics>`—Show LMP statistics and states  
`<get-ddos-lmp-violations>`—Show LMP traffic violations  
`<get-ddos-lmp-aggregate>`—Show aggregate for all LMP traffic information

### `<get-ddos-lmp-parameters>`

---

**Usage**

```
<rpc>
  <get-ddos-lmp-parameters>
    <brief/>
    <detail/>
  </get-ddos-lmp-parameters>
</rpc>
```

**Description** Show LMP protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

### `<get-ddos-lmp-statistics>`

---

**Usage**

```
<rpc>
  <get-ddos-lmp-statistics>
    <brief/>
    <detail/>
  </get-ddos-lmp-statistics>
</rpc>
```

**Description** Show LMP statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

## <get-ddos-lmp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-lmp-violations/>
</rpc>
```

**Description** Show LMP traffic violations

## <get-ddos-lmpv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-lmpv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all LMPv6 traffic information

## <get-ddos-lmpv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-lmpv6-information>
  </get-ddos-lmpv6-information>
</rpc>
```

**Description** Show LMPv6 traffic information

**Contents**

- <get-ddos-lmpv6-parameters>—Show LMPv6 protocol parameters
- <get-ddos-lmpv6-statistics>—Show LMPv6 statistics and states
- <get-ddos-lmpv6-violations>—Show LMPv6 traffic violations
- <get-ddos-lmpv6-aggregate>—Show aggregate for all LMPv6 traffic information

## <get-ddos-lmpv6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-lmpv6-parameters>
  <brief/>
  <detail/>
  </get-ddos-lmpv6-parameters>
</rpc>
```

**Description** Show LMPv6 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-lmpv6-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-lmpv6-statistics>  
  <brief/>  
  <detail/>  
</get-ddos-lmpv6-statistics>  
</rpc>
```

**Description** Show LMPv6 statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-lmpv6-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-lmpv6-violations/>  
</rpc>
```

**Description** Show LMPv6 traffic violations

---

### <get-ddos-mac-host-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-mac-host-aggregate/>  
</rpc>
```

**Description** Show aggregate for all L2-MAC configured 'send-to-host' information

---

### <get-ddos-mac-host-information>

---

**Usage**

```
<rpc>  
  <get-ddos-mac-host-information>  
</get-ddos-mac-host-information>
```

```
</rpc>
```

**Description** Show L2-MAC configured 'send-to-host' information

**Contents** <get-ddos-mac-host-parameters>—Show Mac-Host protocol parameters  
<get-ddos-mac-host-statistics>—Show Mac-Host statistics and states  
<get-ddos-mac-host-violations>—Show Mac-Host traffic violations  
<get-ddos-mac-host-aggregate>—Show aggregate for all L2-MAC configured 'send-to-host' information

---

### <get-ddos-mac-host-parameters>

---

**Usage**

```
<rpc>  
  <get-ddos-mac-host-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-mac-host-parameters>  
</rpc>
```

**Description** Show Mac-Host protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-mac-host-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-mac-host-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-mac-host-statistics>  
</rpc>
```

**Description** Show Mac-Host statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

### <get-ddos-mac-host-violations>

---

**Usage**

```
<rpc>
  <get-ddos-mac-host-violations/>
</rpc>
```

**Description** Show Mac-Host traffic violations

### <get-ddos-mcast-copy-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-mcast-copy-aggregate/>
</rpc>
```

**Description** Show aggregate for all host copy due to multicast routing information

### <get-ddos-mcast-copy-information>

---

**Usage**

```
<rpc>
  <get-ddos-mcast-copy-information>
  </get-ddos-mcast-copy-information>
</rpc>
```

**Description** Show host copy due to multicast routing information

**Contents**

- <get-ddos-mcast-copy-parameters>—Show Multicast-Copy protocol parameters
- <get-ddos-mcast-copy-statistics>—Show Multicast-Copy statistics and states
- <get-ddos-mcast-copy-violations>—Show Multicast-Copy traffic violations
- <get-ddos-mcast-copy-aggregate>—Show aggregate for all host copy due to multicast routing information

### <get-ddos-mcast-copy-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-mcast-copy-parameters>
  <brief/>
  <detail/>
  </get-ddos-mcast-copy-parameters>
</rpc>
```

**Description** Show Multicast-Copy protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-mcast-copy-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-mcast-copy-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-mcast-copy-statistics>  
</rpc>
```

**Description** Show Multicast-Copy statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-mcast-copy-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-mcast-copy-violations/>  
</rpc>
```

**Description** Show Multicast-Copy traffic violations

---

### <get-ddos-mlp-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-mlp-aggregate/>  
</rpc>
```

**Description** Show aggregate for all MLP traffic information

---

### <get-ddos-mlp-aging-exc>

---

**Usage**

```
<rpc>  
  <get-ddos-mlp-aging-exc/>
```

```
</rpc>
```

**Description** Show MLP aging exceptions information

## <get-ddos-mlp-information>

---

### Usage

```
<rpc>
  <get-ddos-mlp-information>
</get-ddos-mlp-information>
</rpc>
```

**Description** Show MLP traffic information

**Contents**

- <get-ddos-mlp-parameters>—Show MLP protocol parameters
- <get-ddos-mlp-statistics>—Show MLP statistics and states
- <get-ddos-mlp-violations>—Show MLP traffic violations
- <get-ddos-mlp-aggregate>—Show aggregate for all MLP traffic information
- <get-ddos-mlp-unclass>—Show unclassified MLP traffic information
- <get-ddos-mlp-packets>—Show MLP packets information
- <get-ddos-mlp-aging-exc>—Show MLP aging exceptions information

## <get-ddos-mlp-packets>

---

### Usage

```
<rpc>
  <get-ddos-mlp-packets/>
</rpc>
```

**Description** Show MLP packets information

## <get-ddos-mlp-parameters>

---

### Usage

```
<rpc>
  <get-ddos-mlp-parameters>
    <brief/>
    <detail/>
  </get-ddos-mlp-parameters>
</rpc>
```

**Description** Show MLP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-mlp-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-mlp-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-mlp-statistics>  
</rpc>
```

**Description** Show MLP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-mlp-unclass>

---

**Usage**

```
<rpc>  
  <get-ddos-mlp-unclass/>  
</rpc>
```

**Description** Show unclassified MLP traffic information

---

### <get-ddos-mlp-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-mlp-violations/>  
</rpc>
```

**Description** Show MLP traffic violations

---

### <get-ddos-msdp-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-msdp-aggregate/>
```

```
</rpc>
```

**Description** Show aggregate for all MSDP traffic information

### <get-ddos-msdp-information>

---

**Usage**

```
<rpc>
  <get-ddos-msdp-information>
</get-ddos-msdp-information>
</rpc>
```

**Description** Show MSDP traffic information

**Contents** <get-ddos-msdp-parameters>—Show MSDP protocol parameters

<get-ddos-msdp-statistics>—Show MSDP statistics and states

<get-ddos-msdp-violations>—Show MSDP traffic violations

<get-ddos-msdp-aggregate>—Show aggregate for all MSDP traffic information

### <get-ddos-msdp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-msdp-parameters>
    <brief/>
    <detail/>
  </get-ddos-msdp-parameters>
</rpc>
```

**Description** Show MSDP protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

### <get-ddos-msdp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-msdp-statistics>
    <brief/>
    <detail/>
  </get-ddos-msdp-statistics>
</rpc>
```

**Description** Show MSDP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-msdp-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-msdp-violations/>  
</rpc>
```

**Description** Show MSDP traffic violations

---

### <get-ddos-msdpv6-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-msdpv6-aggregate/>  
</rpc>
```

**Description** Show aggregate for all MSDPv6 traffic information

---

### <get-ddos-msdpv6-information>

---

**Usage**

```
<rpc>  
  <get-ddos-msdpv6-information>  
  </get-ddos-msdpv6-information>  
</rpc>
```

**Description** Show MSDPv6 traffic information

**Contents** <get-ddos-msdpv6-parameters>—Show MSDPv6 protocol parameters  
<get-ddos-msdpv6-statistics>—Show MSDPv6 statistics and states  
<get-ddos-msdpv6-violations>—Show MSDPv6 traffic violations  
<get-ddos-msdpv6-aggregate>—Show aggregate for all MSDPv6 traffic information

---

### <get-ddos-msdpv6-parameters>

---

**Usage**

```
<rpc>
```

```
<get-ddos-msdpv6-parameters>  
<brief/>  
<detail/>  
</get-ddos-msdpv6-parameters>  
</rpc>
```

**Description** Show MSDPv6 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-msdpv6-statistics>

---

**Usage**

```
<rpc>  
<get-ddos-msdpv6-statistics>  
<brief/>  
<detail/>  
</get-ddos-msdpv6-statistics>  
</rpc>
```

**Description** Show MSDPv6 statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-msdpv6-violations>

---

**Usage**

```
<rpc>  
<get-ddos-msdpv6-violations/>  
</rpc>
```

**Description** Show MSDPv6 traffic violations

---

### <get-ddos-mvrrp-aggregate>

---

**Usage**

```
<rpc>  
<get-ddos-mvrrp-aggregate/>  
</rpc>
```

**Description** Show aggregate for all MVRP traffic information

## <get-ddos-mvrp-information>

---

**Usage**

```
<rpc>
  <get-ddos-mvrp-information>
</get-ddos-mvrp-information>
</rpc>
```

**Description** Show MVRP traffic information

**Contents** <get-ddos-mvrp-parameters>—Show MVRP protocol parameters

<get-ddos-mvrp-statistics>—Show MVRP statistics and states

<get-ddos-mvrp-violations>—Show MVRP traffic violations

<get-ddos-mvrp-aggregate>—Show aggregate for all MVRP traffic information

## <get-ddos-mvrp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-mvrp-parameters>
    <brief/>
    <detail/>
  </get-ddos-mvrp-parameters>
</rpc>
```

**Description** Show MVRP protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-mvrp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-mvrp-statistics>
    <brief/>
    <detail/>
  </get-ddos-mvrp-statistics>
</rpc>
```

**Description** Show MVRP statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

### <get-ddos-mvrp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-mvrp-violations/>
</rpc>
```

**Description** Show MVRP traffic violations

### <get-ddos-ntp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-aggregate/>
</rpc>
```

**Description** Show aggregate for all NTP traffic information

### <get-ddos-ntp-information>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-information>
  </get-ddos-ntp-information>
</rpc>
```

**Description** Show NTP traffic information

**Contents**

- <get-ddos-ntp-parameters>—Show NTP protocol parameters
- <get-ddos-ntp-statistics>—Show NTP statistics and states
- <get-ddos-ntp-violations>—Show NTP traffic violations
- <get-ddos-ntp-aggregate>—Show aggregate for all NTP traffic information

### <get-ddos-ntp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-parameters>
  <brief/>
  <detail/>
</get-ddos-ntp-parameters>
```

</rpc>

**Description** Show NTP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ntp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-statistics>
    <brief/>
    <detail/>
  </get-ddos-ntp-statistics>
</rpc>
```

**Description** Show NTP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ntp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-violations/>
</rpc>
```

**Description** Show NTP traffic violations

---

### <get-ddos-oam-lfm-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-oam-lfm-aggregate/>
</rpc>
```

**Description** Show aggregate for all OAM-LFM traffic information

## <get-ddos-oam-lfm-information>

---

**Usage**

```
<rpc>
  <get-ddos-oam-lfm-information>
</get-ddos-oam-lfm-information>
</rpc>
```

**Description** Show OAM-LFM traffic information

**Contents** <get-ddos-oam-lfm-parameters>—Show OAM-LFM protocol parameters

<get-ddos-oam-lfm-statistics>—Show OAM-LFM statistics and states

<get-ddos-oam-lfm-violations>—Show OAM-LFM traffic violations

<get-ddos-oam-lfm-aggregate>—Show aggregate for all OAM-LFM traffic information

## <get-ddos-oam-lfm-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-oam-lfm-parameters>
    <brief/>
    <detail/>
  </get-ddos-oam-lfm-parameters>
</rpc>
```

**Description** Show OAM-LFM protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-oam-lfm-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-oam-lfm-statistics>
    <brief/>
    <detail/>
  </get-ddos-oam-lfm-statistics>
</rpc>
```

**Description** Show OAM-LFM statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-oam-lfm-violations>

---

### Usage

```
<rpc>
  <get-ddos-oam-lfm-violations/>
</rpc>
```

**Description** Show OAM-LFM traffic violations

---

## <get-ddos-ospf-aggregate>

---

### Usage

```
<rpc>
  <get-ddos-ospf-aggregate/>
</rpc>
```

**Description** Show aggregate for all OSPF traffic information

---

## <get-ddos-ospf-information>

---

### Usage

```
<rpc>
  <get-ddos-ospf-information>
  </get-ddos-ospf-information>
</rpc>
```

**Description** Show OSPF traffic information

**Contents**

- <get-ddos-ospf-parameters>—Show OSPF protocol parameters
- <get-ddos-ospf-statistics>—Show OSPF statistics and states
- <get-ddos-ospf-violations>—Show OSPF traffic violations
- <get-ddos-ospf-aggregate>—Show aggregate for all OSPF traffic information

---

## <get-ddos-ospf-parameters>

---

### Usage

```
<rpc>
  <get-ddos-ospf-parameters>
  <brief/>
  <detail/>
</get-ddos-ospf-parameters>
```

</rpc>

**Description** Show OSPF protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ospf-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-ospf-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-ospf-statistics>  
</rpc>
```

**Description** Show OSPF statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-ospf-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-ospf-violations/>  
</rpc>
```

**Description** Show OSPF traffic violations

---

### <get-ddos-ospfv3v6-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-ospfv3v6-aggregate/>  
</rpc>
```

**Description** Show aggregate for all OSPFv3v6 traffic information

## <get-ddos-ospfv3v6-information>

---

**Usage**

```
<rpc>
  <get-ddos-ospfv3v6-information>
</get-ddos-ospfv3v6-information>
</rpc>
```

**Description** Show OSPFv3v6 traffic information

**Contents** <get-ddos-ospfv3v6-parameters>—Show OSPFv3v6 protocol parameters  
<get-ddos-ospfv3v6-statistics>—Show OSPFv3v6 statistics and states  
<get-ddos-ospfv3v6-violations>—Show OSPFv3v6 traffic violations  
<get-ddos-ospfv3v6-aggregate>—Show aggregate for all OSPFv3v6 traffic information

## <get-ddos-ospfv3v6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ospfv3v6-parameters>
    <brief/>
    <detail/>
  </get-ddos-ospfv3v6-parameters>
</rpc>
```

**Description** Show OSPFv3v6 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-ospfv3v6-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ospfv3v6-statistics>
    <brief/>
    <detail/>
  </get-ddos-ospfv3v6-statistics>
</rpc>
```

**Description** Show OSPFv3v6 statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

### <get-ddos-ospfv3v6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ospfv3v6-violations/>
</rpc>
```

**Description** Show OSPFv3v6 traffic violations

---

### <get-ddos-pfe-alive-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-pfe-alive-aggregate/>
</rpc>
```

**Description** Show aggregate for all pfe alive traffic information

---

### <get-ddos-pfe-alive-information>

---

**Usage**

```
<rpc>
  <get-ddos-pfe-alive-information>
  </get-ddos-pfe-alive-information>
</rpc>
```

**Description** Show pfe alive traffic information

**Contents** <get-ddos-pfe-alive-parameters>—Show Pfe-Alive protocol parameters

<get-ddos-pfe-alive-statistics>—Show Pfe-Alive statistics and states

<get-ddos-pfe-alive-violations>—Show Pfe-Alive traffic violations

<get-ddos-pfe-alive-aggregate>—Show aggregate for all pfe alive traffic information

---

### <get-ddos-pfe-alive-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-pfe-alive-parameters>
  <brief/>
  <detail/>
</get-ddos-pfe-alive-parameters>
```

</rpc>

**Description** Show Pfe-Alive protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-pfe-alive-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-pfe-alive-statistics>
    <brief/>
    <detail/>
  </get-ddos-pfe-alive-statistics>
</rpc>
```

**Description** Show Pfe-Alive statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-pfe-alive-violations>

---

**Usage**

```
<rpc>
  <get-ddos-pfe-alive-violations/>
</rpc>
```

**Description** Show Pfe-Alive traffic violations

---

### <get-ddos-pim-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-pim-aggregate/>
</rpc>
```

**Description** Show aggregate for all PIM traffic information

## <get-ddos-pim-information>

---

**Usage**

```
<rpc>
  <get-ddos-pim-information>
</get-ddos-pim-information>
</rpc>
```

**Description** Show PIM traffic information

**Contents** <get-ddos-pim-parameters>—Show PIM protocol parameters

<get-ddos-pim-statistics>—Show PIM statistics and states

<get-ddos-pim-violations>—Show PIM traffic violations

<get-ddos-pim-aggregate>—Show aggregate for all PIM traffic information

## <get-ddos-pim-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-pim-parameters>
    <brief/>
    <detail/>
  </get-ddos-pim-parameters>
</rpc>
```

**Description** Show PIM protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-pim-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-pim-statistics>
    <brief/>
    <detail/>
  </get-ddos-pim-statistics>
</rpc>
```

**Description** Show PIM statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-pim-violations>

---

### Usage

```
<rpc>
  <get-ddos-pim-violations/>
</rpc>
```

**Description** Show PIM traffic violations

---

## <get-ddos-pmvrp-aggregate>

---

### Usage

```
<rpc>
  <get-ddos-pmvrp-aggregate/>
</rpc>
```

**Description** Show aggregate for all PMVRP traffic information

---

## <get-ddos-pmvrp-information>

---

### Usage

```
<rpc>
  <get-ddos-pmvrp-information>
  </get-ddos-pmvrp-information>
</rpc>
```

**Description** Show PMVRP traffic information

**Contents**

- <get-ddos-pmvrp-parameters>—Show PMVRP protocol parameters
- <get-ddos-pmvrp-statistics>—Show PMVRP statistics and states
- <get-ddos-pmvrp-violations>—Show PMVRP traffic violations
- <get-ddos-pmvrp-aggregate>—Show aggregate for all PMVRP traffic information

---

## <get-ddos-pmvrp-parameters>

---

### Usage

```
<rpc>
  <get-ddos-pmvrp-parameters>
  <brief/>
  <detail/>
</get-ddos-pmvrp-parameters>
```

`</rpc>`

**Description** Show PMVRP protocol parameters

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-pmvrp-statistics>`

---

**Usage**

```
<rpc>
  <get-ddos-pmvrp-statistics>
    <brief/>
    <detail/>
  </get-ddos-pmvrp-statistics>
</rpc>
```

**Description** Show PMVRP statistics and states

**Contents** `<brief>`—Show brief output  
`<detail>`—Show detailed output

---

### `<get-ddos-pmvrp-violations>`

---

**Usage**

```
<rpc>
  <get-ddos-pmvrp-violations/>
</rpc>
```

**Description** Show PMVRP traffic violations

---

### `<get-ddos-pos-aggregate>`

---

**Usage**

```
<rpc>
  <get-ddos-pos-aggregate/>
</rpc>
```

**Description** Show aggregate for all POS traffic information

## <get-ddos-pos-information>

---

**Usage**

```
<rpc>  
  <get-ddos-pos-information>  
  </get-ddos-pos-information>  
</rpc>
```

**Description** Show POS traffic information

**Contents** <get-ddos-pos-parameters>—Show POS protocol parameters

<get-ddos-pos-statistics>—Show POS statistics and states

<get-ddos-pos-violations>—Show POS traffic violations

<get-ddos-pos-aggregate>—Show aggregate for all POS traffic information

## <get-ddos-pos-parameters>

---

**Usage**

```
<rpc>  
  <get-ddos-pos-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-pos-parameters>  
</rpc>
```

**Description** Show POS protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-pos-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-pos-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-pos-statistics>  
</rpc>
```

**Description** Show POS statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

### <get-ddos-pos-violations>

---

**Usage**

```
<rpc>
  <get-ddos-pos-violations/>
</rpc>
```

**Description** Show POS traffic violations

---

### <get-ddos-ppp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ppp-aggregate/>
</rpc>
```

**Description** Show aggregate for all PPP control traffic information

---

### <get-ddos-ppp-auth>

---

**Usage**

```
<rpc>
  <get-ddos-ppp-auth/>
</rpc>
```

**Description** Show Authentication Protocol information

---

### <get-ddos-ppp-information>

---

**Usage**

```
<rpc>
  <get-ddos-ppp-information>
  </get-ddos-ppp-information>
</rpc>
```

**Description** Show PPP control traffic information

**Contents** <get-ddos-ppp-parameters>—Show PPP protocol parameters  
<get-ddos-ppp-statistics>—Show PPP statistics and states  
<get-ddos-ppp-violations>—Show PPP traffic violations  
<get-ddos-ppp-aggregate>—Show aggregate for all PPP control traffic information

<get-ddos-ppp-lcp>—Show Link Control Protocol information

<get-ddos-ppp-auth>—Show Authentication Protocol information

<get-ddos-ppp-ipcp>—Show IP Control Protocol information

<get-ddos-ppp-ipv6cp>—Show IPv6 Control Protocol information

<get-ddos-ppp-mplscp>—Show MPLS Control Protocol information

<get-ddos-ppp-isis>—Show ISIS Protocol information

---

### <get-ddos-ppp-ipcp>

---

**Usage**

```
<rpc>  
  <get-ddos-ppp-ipcp/>  
</rpc>
```

**Description** Show IP Control Protocol information

---

### <get-ddos-ppp-ipv6cp>

---

**Usage**

```
<rpc>  
  <get-ddos-ppp-ipv6cp/>  
</rpc>
```

**Description** Show IPv6 Control Protocol information

---

### <get-ddos-ppp-isis>

---

**Usage**

```
<rpc>  
  <get-ddos-ppp-isis/>  
</rpc>
```

**Description** Show ISIS Protocol information

---

### <get-ddos-ppp-lcp>

---

**Usage**

```
<rpc>  
  <get-ddos-ppp-lcp/>  
</rpc>
```

**Description** Show Link Control Protocol information

### <get-ddos-ppp-mplscp>

---

**Usage**

```
<rpc>
  <get-ddos-ppp-mplscp/>
</rpc>
```

**Description** Show MPLS Control Protocol information

### <get-ddos-ppp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ppp-parameters>
    <brief/>
    <detail/>
  </get-ddos-ppp-parameters>
</rpc>
```

**Description** Show PPP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

### <get-ddos-ppp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ppp-statistics>
    <brief/>
    <detail/>
  </get-ddos-ppp-statistics>
</rpc>
```

**Description** Show PPP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-ppp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ppp-violations/>
</rpc>
```

**Description** Show PPP traffic violations

## <get-ddos-pppoe-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-pppoe-aggregate/>
</rpc>
```

**Description** Show aggregate for all PPPoE control traffic information

## <get-ddos-pppoe-information>

---

**Usage**

```
<rpc>
  <get-ddos-pppoe-information>
  </get-ddos-pppoe-information>
</rpc>
```

**Description** Show PPPoE control traffic information

**Contents**

<get-ddos-pppoe-parameters>—Show PPPoE protocol parameters

<get-ddos-pppoe-statistics>—Show PPPoE statistics and states

<get-ddos-pppoe-violations>—Show PPPoE traffic violations

<get-ddos-pppoe-aggregate>—Show aggregate for all PPPoE control traffic information

<get-ddos-pppoe-padi>—Show PPPoE PADI information

<get-ddos-pppoe-pado>—Show PPPoE PADO information

<get-ddos-pppoe-padr>—Show PPPoE PADR information

<get-ddos-pppoe-pads>—Show PPPoE PADS information

<get-ddos-pppoe-padt>—Show PPPoE PADT information

<get-ddos-pppoe-padm>—Show PPPoE PADM information

<get-ddos-pppoe-padn>—Show PPPoE PADN information

---

### <get-ddos-pppoe-padi>

---

#### Usage

```
<rpc>  
<get-ddos-pppoe-padi/>  
</rpc>
```

**Description** Show PPPoE PADI information

---

### <get-ddos-pppoe-padm>

---

#### Usage

```
<rpc>  
<get-ddos-pppoe-padm/>  
</rpc>
```

**Description** Show PPPoE PADM information

---

### <get-ddos-pppoe-padn>

---

#### Usage

```
<rpc>  
<get-ddos-pppoe-padn/>  
</rpc>
```

**Description** Show PPPoE PADN information

---

### <get-ddos-pppoe-pado>

---

#### Usage

```
<rpc>  
<get-ddos-pppoe-pado/>  
</rpc>
```

**Description** Show PPPoE PADO information

---

### <get-ddos-pppoe-padr>

---

#### Usage

```
<rpc>  
<get-ddos-pppoe-padr/>  
</rpc>
```

**Description** Show PPPoE PADR information

---

### <get-ddos-pppoe-pads>

---

**Usage**

```
<rpc>
  <get-ddos-pppoe-pads/>
</rpc>
```

**Description** Show PPPoE PADS information

---

### <get-ddos-pppoe-padt>

---

**Usage**

```
<rpc>
  <get-ddos-pppoe-padt/>
</rpc>
```

**Description** Show PPPoE PADT information

---

### <get-ddos-pppoe-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-pppoe-parameters>
    <brief/>
    <detail/>
  </get-ddos-pppoe-parameters>
</rpc>
```

**Description** Show PPPoE protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-pppoe-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-pppoe-statistics>
    <brief/>
    <detail/>
  </get-ddos-pppoe-statistics>
</rpc>
```

**Description** Show PPPoE statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-pppoe-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-pppoe-violations/>  
</rpc>
```

**Description** Show PPPoE traffic violations

---

### <get-ddos-protocols-information>

---

**Usage**

```
<rpc>  
  <get-ddos-protocols-information>  
  </get-ddos-protocols-information>  
</rpc>
```

**Description** Show protocol information

**Contents** <get-ddos-protocols-parameters>—Show parameters for all protocols  
<get-ddos-protocols-statistics>—Show statistics and states for all protocols  
<get-ddos-protocols-violations>—Show summary of all protocol violations  
<get-ddos-ipv4-uncls-information>—Show unclassified host-bound IPv4 traffic information  
<get-ddos-ipv6-uncls-information>—Show unclassified host-bound IPv6 traffic information  
<get-ddos-dynvlan-information>—Show dynamic vlan exceptions information  
<get-ddos-ppp-information>—Show PPP control traffic information  
<get-ddos-pppoe-information>—Show PPPoE control traffic information  
<get-ddos-dhcpv4-information>—Show DHCPv4 traffic information  
<get-ddos-dhcpv6-information>—Show DHCPv6 traffic information  
<get-ddos-vchassis-information>—Show virtual chassis traffic information  
<get-ddos-icmp-information>—Show ICMP traffic information  
<get-ddos-igmp-information>—Show IGMP traffic information

<get-ddos-ospf-information>—Show OSPF traffic information

<get-ddos-rsvp-information>—Show RSVP traffic information

<get-ddos-pim-information>—Show PIM traffic information

<get-ddos-rip-information>—Show RIP traffic information

<get-ddos-ntp-information>—Show NTP traffic information

<get-ddos-bfd-information>—Show BFD traffic information

<get-ddos-lmp-information>—Show LMP traffic information

<get-ddos-ldp-information>—Show LDP traffic information

<get-ddos-msdp-information>—Show MSDP traffic information

<get-ddos-bgp-information>—Show BGP traffic information

<get-ddos-vrrp-information>—Show VRRP traffic information

<get-ddos-telnet-information>—Show telnet traffic information

<get-ddos-ftp-information>—Show FTP traffic information

<get-ddos-ssh-information>—Show SSH traffic information

<get-ddos-snmp-information>—Show SNMP traffic information

<get-ddos-ancp-information>—Show ANCP traffic information

<get-ddos-igmpv6-information>—Show IGMPv6 traffic information

<get-ddos-egpv6-information>—Show EGPv6 traffic information

<get-ddos-rsipv6-information>—Show RSVPv6 traffic information

<get-ddos-igmpv4v6-information>—Show IGMPv4-v6 traffic information

<get-ddos-ripv6-information>—Show RIPv6 traffic information

<get-ddos-bfdv6-information>—Show BFDv6 traffic information

<get-ddos-lmpv6-information>—Show LMPv6 traffic information

<get-ddos-ldpv6-information>—Show LDPv6 traffic information

<get-ddos-msdpv6-information>—Show MSDPv6 traffic information

<get-ddos-bgpv6-information>—Show BGPv6 traffic information

<get-ddos-vrrpv6-information>—Show VRRPv6 traffic information

<get-ddos-telnetv6-information>—Show telnet-v6 traffic information

<get-ddos-ftp6-information>—Show FTPv6 traffic information

<get-ddos-ssh6-information>—Show SSHv6 traffic information

<get-ddos-snmp6-information>—Show SNMPv6 traffic information

<get-ddos-ancp6-information>—Show ANCPv6 traffic information

<get-ddos-ospfv3v6-information>—Show OSPFv3v6 traffic information

<get-ddos-lacp-information>—Show LACP traffic information

<get-ddos-stp-information>—Show STP traffic information

<get-ddos-esmc-information>—Show ESMC traffic information

<get-ddos-oam-lfm-information>—Show OAM-LFM traffic information

<get-ddos-eoam-information>—Show EOAM traffic information

<get-ddos-lldp-information>—Show LLDP traffic information

<get-ddos-mvrp-information>—Show MVRP traffic information

<get-ddos-pmvrp-information>—Show PMVRP traffic information

<get-ddos-arp-information>—Show ARP traffic information

<get-ddos-pvstp-information>—Show PVSTP traffic information

<get-ddos-isis-information>—Show ISIS traffic information

<get-ddos-pos-information>—Show POS traffic information

<get-ddos-mlp-information>—Show MLP traffic information

<get-ddos-jfm-information>—Show JFM traffic information

<get-ddos-atm-information>—Show ATM traffic information

<get-ddos-pfe-alive-information>—Show pfe alive traffic information

<get-ddos-ttl-information>—Show ttl traffic information

<get-ddos-ip-opt-information>—Show ip options traffic information

<get-ddos-redirect-information>—Show packets to trigger ICMP redirect information

<get-ddos-mcast-copy-information>—Show host copy due to multicast routing information

<get-ddos-mac-host-information>—Show L2-MAC configured 'send-to-host' information

<get-ddos-tun-frag-information>—Show tunnel fragment information

<get-ddos-igmp-snoop-information>—Show snooped igmp traffic information

<get-ddos-services-information>—Show services information

<get-ddos-demuxauto-information>—Show demux autosense traffic information

<get-ddos-fw-reject-information>—Show packets via firewall 'reject' action information

<get-ddos-fw-host-information>—Show packets via firewall 'send-to-host' action information

<get-ddos-tcp-flags-information>—Show packets with tcp flags information

<get-ddos-dtcp-information>—Show dtcp traffic information

<get-ddos-radius-information>—Show Radius traffic information

<get-ddos-ntp-information>—Show NTP traffic information

<get-ddos-tacacs-information>—Show TACACS traffic information

<get-ddos-dns-information>—Show DNS traffic information

<get-ddos-diameter-information>—Show Diameter/Gx+ traffic information

<get-ddos-ip-frag-information>—Show IP-Fragments information

<get-ddos-l2tp-information>—Show l2tp traffic information

<get-ddos-gre-information>—Show GRE traffic information

---

## <get-ddos-protocols-parameters>

---

### Usage

```
<rpc>  
  <get-ddos-protocols-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-protocols-parameters>  
</rpc>
```

**Description** Show parameters for all protocols

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-protocols-statistics>

---

### Usage

```
<rpc>  
  <get-ddos-protocols-statistics>  
    <brief/>  
    <detail/>
```

```
</get-ddos-protocols-statistics>
</rpc>
```

**Description** Show statistics and states for all protocols

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-protocols-violations>

---

**Usage**

```
<rpc>
  <get-ddos-protocols-violations/>
</rpc>
```

**Description** Show summary of all protocol violations

---

### <get-ddos-ntp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-aggregate/>
</rpc>
```

**Description** Show aggregate for all PTP traffic information

---

### <get-ddos-ntp-information>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-information>
  </get-ddos-ntp-information>
</rpc>
```

**Description** Show PTP traffic information

**Contents** <get-ddos-ntp-parameters>—Show PTP protocol parameters  
<get-ddos-ntp-statistics>—Show PTP statistics and states  
<get-ddos-ntp-violations>—Show PTP traffic violations  
<get-ddos-ntp-aggregate>—Show aggregate for all PTP traffic information

## <get-ddos-ntp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-parameters>
    <brief/>
    <detail/>
  </get-ddos-ntp-parameters>
</rpc>
```

**Description** Show NTP protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-ntp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-statistics>
    <brief/>
    <detail/>
  </get-ddos-ntp-statistics>
</rpc>
```

**Description** Show NTP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-ntp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ntp-violations/>
</rpc>
```

**Description** Show NTP traffic violations

## <get-ddos-pvstp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-pvstp-aggregate/>
</rpc>
```

</rpc>

**Description** Show aggregate for all PVSTP traffic information

---

### <get-ddos-pvstp-information>

---

**Usage**

```
<rpc>
  <get-ddos-pvstp-information>
</get-ddos-pvstp-information>
</rpc>
```

**Description** Show PVSTP traffic information

**Contents** <get-ddos-pvstp-parameters>—Show PVSTP protocol parameters

<get-ddos-pvstp-statistics>—Show PVSTP statistics and states

<get-ddos-pvstp-violations>—Show PVSTP traffic violations

<get-ddos-pvstp-aggregate>—Show aggregate for all PVSTP traffic information

---

### <get-ddos-pvstp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-pvstp-parameters>
    <brief/>
    <detail/>
  </get-ddos-pvstp-parameters>
</rpc>
```

**Description** Show PVSTP protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

### <get-ddos-pvstp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-pvstp-statistics>
    <brief/>
    <detail/>
  </get-ddos-pvstp-statistics>
</rpc>
```

**Description** Show PVSTP statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-pvstp-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-pvstp-violations/>  
</rpc>
```

**Description** Show PVSTP traffic violations

---

### <get-ddos-radius-account>

---

**Usage**

```
<rpc>  
  <get-ddos-radius-account/>  
</rpc>
```

**Description** Show Radius accounting traffic information

---

### <get-ddos-radius-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-radius-aggregate/>  
</rpc>
```

**Description** Show aggregate for all Radius traffic information

---

### <get-ddos-radius-auth>

---

**Usage**

```
<rpc>  
  <get-ddos-radius-auth/>  
</rpc>
```

**Description** Show Radius authorization traffic information

## <get-ddos-radius-information>

---

**Usage**

```
<rpc>
  <get-ddos-radius-information>
</get-ddos-radius-information>
</rpc>
```

**Description** Show Radius traffic information

**Contents** <get-ddos-radius-parameters>—Show Radius protocol parameters

<get-ddos-radius-statistics>—Show Radius statistics and states

<get-ddos-radius-violations>—Show Radius traffic violations

<get-ddos-radius-aggregate>—Show aggregate for all Radius traffic information

<get-ddos-radius-server>—Show Radius server traffic information

<get-ddos-radius-account>—Show Radius accounting traffic information

<get-ddos-radius-auth>—Show Radius authorization traffic information

## <get-ddos-radius-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-radius-parameters>
    <brief/>
    <detail/>
  </get-ddos-radius-parameters>
</rpc>
```

**Description** Show Radius protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-radius-server>

---

**Usage**

```
<rpc>
  <get-ddos-radius-server/>
</rpc>
```

**Description** Show Radius server traffic information

---

### <get-ddos-radius-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-radius-statistics>
    <brief/>
    <detail/>
  </get-ddos-radius-statistics>
</rpc>
```

**Description** Show Radius statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-radius-violations>

---

**Usage**

```
<rpc>
  <get-ddos-radius-violations/>
</rpc>
```

**Description** Show Radius traffic violations

---

### <get-ddos-redirect-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-redirect-aggregate/>
</rpc>
```

**Description** Show aggregate for all packets to trigger ICMP redirect information

---

### <get-ddos-redirect-information>

---

**Usage**

```
<rpc>
  <get-ddos-redirect-information>
  </get-ddos-redirect-information>
</rpc>
```

**Description** Show packets to trigger ICMP redirect information

- Contents**    <get-ddos-redirect-parameters>—Show Redirect protocol parameters
- <get-ddos-redirect-statistics>—Show Redirect statistics and states
- <get-ddos-redirect-violations>—Show Redirect traffic violations
- <get-ddos-redirect-aggregate>—Show aggregate for all packets to trigger ICMP redirect information

---

### <get-ddos-redirect-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-redirect-parameters>
  <brief/>
  <detail/>
</get-ddos-redirect-parameters>
</rpc>
```

**Description**    Show Redirect protocol parameters

- Contents**    <brief>—Show brief output
- <detail>—Show detailed output

---

### <get-ddos-redirect-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-redirect-statistics>
  <brief/>
  <detail/>
</get-ddos-redirect-statistics>
</rpc>
```

**Description**    Show Redirect statistics and states

- Contents**    <brief>—Show brief output
- <detail>—Show detailed output

---

### <get-ddos-redirect-violations>

---

**Usage**

```
<rpc>
  <get-ddos-redirect-violations/>
</rpc>
```

**Description** Show Redirect traffic violations

---

### <get-ddos-rip-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-rip-aggregate/>
</rpc>
```

**Description** Show aggregate for all RIP traffic information

---

### <get-ddos-rip-information>

---

**Usage**

```
<rpc>
  <get-ddos-rip-information>
</get-ddos-rip-information>
</rpc>
```

**Description** Show RIP traffic information

**Contents** <get-ddos-rip-parameters>—Show RIP protocol parameters

<get-ddos-rip-statistics>—Show RIP statistics and states

<get-ddos-rip-violations>—Show RIP traffic violations

<get-ddos-rip-aggregate>—Show aggregate for all RIP traffic information

---

### <get-ddos-rip-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-rip-parameters>
    <brief/>
    <detail/>
  </get-ddos-rip-parameters>
</rpc>
```

**Description** Show RIP protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-rip-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-rip-statistics>
  <brief/>
  <detail/>
</get-ddos-rip-statistics>
</rpc>
```

**Description** Show RIP statistics and states

**Contents** <brief>—Show brief output  
            <detail>—Show detailed output

## <get-ddos-rip-violations>

---

**Usage**

```
<rpc>
  <get-ddos-rip-violations/>
</rpc>
```

**Description** Show RIP traffic violations

## <get-ddos-ripv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ripv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all RIPv6 traffic information

## <get-ddos-ripv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-ripv6-information>
  </get-ddos-ripv6-information>
</rpc>
```

**Description** Show RIPv6 traffic information

**Contents** <get-ddos-ripv6-parameters>—Show RIPv6 protocol parameters

<get-ddos-ripv6-statistics>—Show RIPv6 statistics and states

<get-ddos-ripv6-violations>—Show RIPv6 traffic violations

<get-ddos-ripv6-aggregate>—Show aggregate for all RIPv6 traffic information

---

## <get-ddos-ripv6-parameters>

---

### Usage

```
<rpc>
  <get-ddos-ripv6-parameters>
    <brief/>
    <detail/>
  </get-ddos-ripv6-parameters>
</rpc>
```

**Description** Show RIPv6 protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-ripv6-statistics>

---

### Usage

```
<rpc>
  <get-ddos-ripv6-statistics>
    <brief/>
    <detail/>
  </get-ddos-ripv6-statistics>
</rpc>
```

**Description** Show RIPv6 statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-ripv6-violations>

---

### Usage

```
<rpc>
  <get-ddos-ripv6-violations/>
</rpc>
```

**Description** Show RIPv6 traffic violations

### <get-ddos-rsvp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-rsvp-aggregate/>
</rpc>
```

**Description** Show aggregate for all RSVP traffic information

### <get-ddos-rsvp-information>

---

**Usage**

```
<rpc>
  <get-ddos-rsvp-information>
  </get-ddos-rsvp-information>
</rpc>
```

**Description** Show RSVP traffic information

**Contents** <get-ddos-rsvp-parameters>—Show RSVP protocol parameters

<get-ddos-rsvp-statistics>—Show RSVP statistics and states

<get-ddos-rsvp-violations>—Show RSVP traffic violations

<get-ddos-rsvp-aggregate>—Show aggregate for all RSVP traffic information

### <get-ddos-rsvp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-rsvp-parameters>
  <brief/>
  <detail/>
  </get-ddos-rsvp-parameters>
</rpc>
```

**Description** Show RSVP protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-rsvp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-rsvp-statistics>
    <brief/>
    <detail/>
  </get-ddos-rsvp-statistics>
</rpc>
```

**Description** Show RSVP statistics and states

**Contents** <brief>—Show brief output  
            <detail>—Show detailed output

## <get-ddos-rsvp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-rsvp-violations/>
</rpc>
```

**Description** Show RSVP traffic violations

## <get-ddos-rsvpv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-rsvpv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all RSVPv6 traffic information

## <get-ddos-rsvpv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-rsvpv6-information>
  </get-ddos-rsvpv6-information>
</rpc>
```

**Description** Show RSVPv6 traffic information

**Contents** <get-ddos-rsvpv6-parameters>—Show RSVPv6 protocol parameters

<get-ddos-rsvpv6-statistics>—Show RSVPv6 statistics and states

<get-ddos-rsvpv6-violations>—Show RSVPv6 traffic violations

<get-ddos-rsvpv6-aggregate>—Show aggregate for all RSVPv6 traffic information

---

## <get-ddos-rsvpv6-parameters>

---

### Usage

```
<rpc>
  <get-ddos-rsvpv6-parameters>
    <brief/>
    <detail/>
  </get-ddos-rsvpv6-parameters>
</rpc>
```

**Description** Show RSVPv6 protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-rsvpv6-statistics>

---

### Usage

```
<rpc>
  <get-ddos-rsvpv6-statistics>
    <brief/>
    <detail/>
  </get-ddos-rsvpv6-statistics>
</rpc>
```

**Description** Show RSVPv6 statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-rsvpv6-violations>

---

### Usage

```
<rpc>
  <get-ddos-rsvpv6-violations/>
</rpc>
```

**Description** Show RSVPv6 traffic violations

## <get-ddos-services-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-services-aggregate/>
</rpc>
```

**Description** Show aggregate for all services information

## <get-ddos-services-information>

---

**Usage**

```
<rpc>
  <get-ddos-services-information>
  </get-ddos-services-information>
</rpc>
```

**Description** Show services information

**Contents** <get-ddos-services-parameters>—Show Services protocol parameters

<get-ddos-services-statistics>—Show Services statistics and states

<get-ddos-services-violations>—Show Services traffic violations

<get-ddos-services-aggregate>—Show aggregate for all services information

## <get-ddos-services-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-services-parameters>
  <brief/>
  <detail/>
  </get-ddos-services-parameters>
</rpc>
```

**Description** Show Services protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-services-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-services-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-services-statistics>  
</rpc>
```

**Description** Show Services statistics and states

**Contents** <brief>—Show brief output  
  
<detail>—Show detailed output

## <get-ddos-services-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-services-violations/>  
</rpc>
```

**Description** Show Services traffic violations

## <get-ddos-snmp-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-snmp-aggregate/>  
</rpc>
```

**Description** Show aggregate for all SNMP traffic information

## <get-ddos-snmp-information>

---

**Usage**

```
<rpc>  
  <get-ddos-snmp-information>  
  </get-ddos-snmp-information>  
</rpc>
```

**Description** Show SNMP traffic information

**Contents** <get-ddos-snmp-parameters>—Show SNMP protocol parameters

<get-ddos-snmp-statistics>—Show SNMP statistics and states

<get-ddos-snmp-violations>—Show SNMP traffic violations

<get-ddos-snmp-aggregate>—Show aggregate for all SNMP traffic information

---

## <get-ddos-snmp-parameters>

---

### Usage

```
<rpc>
  <get-ddos-snmp-parameters>
    <brief/>
    <detail/>
  </get-ddos-snmp-parameters>
</rpc>
```

**Description** Show SNMP protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-snmp-statistics>

---

### Usage

```
<rpc>
  <get-ddos-snmp-statistics>
    <brief/>
    <detail/>
  </get-ddos-snmp-statistics>
</rpc>
```

**Description** Show SNMP statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-snmp-violations>

---

### Usage

```
<rpc>
  <get-ddos-snmp-violations/>
</rpc>
```

**Description** Show SNMP traffic violations

### <get-ddos-snmpv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-snmpv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all SNMPv6 traffic information

### <get-ddos-snmpv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-snmpv6-information>
  </get-ddos-snmpv6-information>
</rpc>
```

**Description** Show SNMPv6 traffic information

**Contents** <get-ddos-snmpv6-parameters>—Show SNMPv6 protocol parameters

<get-ddos-snmpv6-statistics>—Show SNMPv6 statistics and states

<get-ddos-snmpv6-violations>—Show SNMPv6 traffic violations

<get-ddos-snmpv6-aggregate>—Show aggregate for all SNMPv6 traffic information

### <get-ddos-snmpv6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-snmpv6-parameters>
  <brief/>
  <detail/>
  </get-ddos-snmpv6-parameters>
</rpc>
```

**Description** Show SNMPv6 protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-snmpv6-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-snmpv6-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-snmpv6-statistics>  
</rpc>
```

**Description** Show SNMPv6 statistics and states

**Contents** <brief>—Show brief output  
  
<detail>—Show detailed output

## <get-ddos-snmpv6-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-snmpv6-violations/>  
</rpc>
```

**Description** Show SNMPv6 traffic violations

## <get-ddos-ssh-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-ssh-aggregate/>  
</rpc>
```

**Description** Show aggregate for all SSH traffic information

## <get-ddos-ssh-information>

---

**Usage**

```
<rpc>  
  <get-ddos-ssh-information>  
  </get-ddos-ssh-information>  
</rpc>
```

**Description** Show SSH traffic information

**Contents** <get-ddos-ssh-parameters>—Show SSH protocol parameters

<get-ddos-ssh-statistics>—Show SSH statistics and states

<get-ddos-ssh-violations>—Show SSH traffic violations

<get-ddos-ssh-aggregate>—Show aggregate for all SSH traffic information

## <get-ddos-ssh-parameters>

---

### Usage

```
<rpc>
  <get-ddos-ssh-parameters>
    <brief/>
    <detail/>
  </get-ddos-ssh-parameters>
</rpc>
```

**Description** Show SSH protocol parameters

**Contents** <brief>—Show brief output  
 <detail>—Show detailed output

## <get-ddos-ssh-statistics>

---

### Usage

```
<rpc>
  <get-ddos-ssh-statistics>
    <brief/>
    <detail/>
  </get-ddos-ssh-statistics>
</rpc>
```

**Description** Show SSH statistics and states

**Contents** <brief>—Show brief output  
 <detail>—Show detailed output

## <get-ddos-ssh-violations>

---

### Usage

```
<rpc>
  <get-ddos-ssh-violations/>
</rpc>
```

**Description** Show SSH traffic violations

## <get-ddos-sshv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-sshv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all SSHv6 traffic information

## <get-ddos-sshv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-sshv6-information>
  </get-ddos-sshv6-information>
</rpc>
```

**Description** Show SSHv6 traffic information

**Contents** <get-ddos-sshv6-parameters>—Show SSHv6 protocol parameters

<get-ddos-sshv6-statistics>—Show SSHv6 statistics and states

<get-ddos-sshv6-violations>—Show SSHv6 traffic violations

<get-ddos-sshv6-aggregate>—Show aggregate for all SSHv6 traffic information

## <get-ddos-sshv6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-sshv6-parameters>
  <brief/>
  <detail/>
  </get-ddos-sshv6-parameters>
</rpc>
```

**Description** Show SSHv6 protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

### <get-ddos-sshv6-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-sshv6-statistics>
    <brief/>
    <detail/>
  </get-ddos-sshv6-statistics>
</rpc>
```

**Description** Show SSHv6 statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

### <get-ddos-sshv6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-sshv6-violations/>
</rpc>
```

**Description** Show SSHv6 traffic violations

### <get-ddos-statistics-information>

---

**Usage**

```
<rpc>
  <get-ddos-statistics-information/>
</rpc>
```

**Description** Show overall statistics

### <get-ddos-stp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-stp-aggregate/>
</rpc>
```

**Description** Show aggregate for all STP traffic information

## <get-ddos-stp-information>

---

**Usage**

```
<rpc>
  <get-ddos-stp-information>
</get-ddos-stp-information>
</rpc>
```

**Description** Show STP traffic information

**Contents** <get-ddos-stp-parameters>—Show STP protocol parameters

<get-ddos-stp-statistics>—Show STP statistics and states

<get-ddos-stp-violations>—Show STP traffic violations

<get-ddos-stp-aggregate>—Show aggregate for all STP traffic information

## <get-ddos-stp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-stp-parameters>
    <brief/>
    <detail/>
  </get-ddos-stp-parameters>
</rpc>
```

**Description** Show STP protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-stp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-stp-statistics>
    <brief/>
    <detail/>
  </get-ddos-stp-statistics>
</rpc>
```

**Description** Show STP statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

### <get-ddos-stp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-stp-violations/>
</rpc>
```

**Description** Show STP traffic violations

---

### <get-ddos-tacacs-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-tacacs-aggregate/>
</rpc>
```

**Description** Show aggregate for all TACACS traffic information

---

### <get-ddos-tacacs-information>

---

**Usage**

```
<rpc>
  <get-ddos-tacacs-information>
  </get-ddos-tacacs-information>
</rpc>
```

**Description** Show TACACS traffic information

**Contents**

- <get-ddos-tacacs-parameters>—Show TACACS protocol parameters
- <get-ddos-tacacs-statistics>—Show TACACS statistics and states
- <get-ddos-tacacs-violations>—Show TACACS traffic violations
- <get-ddos-tacacs-aggregate>—Show aggregate for all TACACS traffic information

---

### <get-ddos-tacacs-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-tacacs-parameters>
  <brief/>
  <detail/>
</get-ddos-tacacs-parameters>
```

```
</rpc>
```

**Description** Show TACACS protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-tacacs-statistics>

---

**Usage**

```
<rpc>  
  <get-ddos-tacacs-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-tacacs-statistics>  
</rpc>
```

**Description** Show TACACS statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-tacacs-violations>

---

**Usage**

```
<rpc>  
  <get-ddos-tacacs-violations/>  
</rpc>
```

**Description** Show TACACS traffic violations

---

### <get-ddos-tcp-flags-aggregate>

---

**Usage**

```
<rpc>  
  <get-ddos-tcp-flags-aggregate/>  
</rpc>
```

**Description** Show aggregate for all packets with tcp flags information

### <get-ddos-tcp-flags-establish>

---

**Usage**

```
<rpc>
  <get-ddos-tcp-flags-establish/>
</rpc>
```

**Description** Show Non-first packets of TCP connections (ACK | RST) information

### <get-ddos-tcp-flags-information>

---

**Usage**

```
<rpc>
  <get-ddos-tcp-flags-information>
  </get-ddos-tcp-flags-information>
</rpc>
```

**Description** Show packets with tcp flags information

**Contents** <get-ddos-tcp-flags-parameters>—Show TCP-Flags protocol parameters

<get-ddos-tcp-flags-statistics>—Show TCP-Flags statistics and states

<get-ddos-tcp-flags-violations>—Show TCP-Flags traffic violations

<get-ddos-tcp-flags-aggregate>—Show aggregate for all packets with tcp flags information

<get-ddos-tcp-flags-unclass>—Show unclassified packets with tcp flags information

<get-ddos-tcp-flags-initial>—Show First packets of TCP connections (SYN & !ACK) information

<get-ddos-tcp-flags-establish>—Show Non-first packets of TCP connections (ACK | RST) information

### <get-ddos-tcp-flags-initial>

---

**Usage**

```
<rpc>
  <get-ddos-tcp-flags-initial/>
</rpc>
```

**Description** Show First packets of TCP connections (SYN & !ACK) information

## <get-ddos-tcp-flags-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-tcp-flags-parameters>
  <brief/>
  <detail/>
</get-ddos-tcp-flags-parameters>
</rpc>
```

**Description** Show TCP-Flags protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-tcp-flags-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-tcp-flags-statistics>
  <brief/>
  <detail/>
</get-ddos-tcp-flags-statistics>
</rpc>
```

**Description** Show TCP-Flags statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-tcp-flags-unclass>

---

**Usage**

```
<rpc>
  <get-ddos-tcp-flags-unclass/>
</rpc>
```

**Description** Show unclassified packets with tcp flags information

## <get-ddos-tcp-flags-violations>

---

**Usage**

```
<rpc>
  <get-ddos-tcp-flags-violations/>
```

```
</rpc>
```

**Description** Show TCP-Flags traffic violations

### <get-ddos-telnet-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-telnet-aggregate/>
</rpc>
```

**Description** Show aggregate for all telnet traffic information

### <get-ddos-telnet-information>

---

**Usage**

```
<rpc>
  <get-ddos-telnet-information>
  </get-ddos-telnet-information>
</rpc>
```

**Description** Show telnet traffic information

**Contents** <get-ddos-telnet-parameters>—Show Telnet protocol parameters

<get-ddos-telnet-statistics>—Show Telnet statistics and states

<get-ddos-telnet-violations>—Show Telnet traffic violations

<get-ddos-telnet-aggregate>—Show aggregate for all telnet traffic information

### <get-ddos-telnet-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-telnet-parameters>
  <brief/>
  <detail/>
  </get-ddos-telnet-parameters>
</rpc>
```

**Description** Show Telnet protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-telnet-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-telnet-statistics>
    <brief/>
    <detail/>
  </get-ddos-telnet-statistics>
</rpc>
```

**Description** Show Telnet statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

## <get-ddos-telnet-violations>

---

**Usage**

```
<rpc>
  <get-ddos-telnet-violations/>
</rpc>
```

**Description** Show Telnet traffic violations

## <get-ddos-telnetv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-telnetv6-aggregate/>
</rpc>
```

**Description** Show aggregate for all telnet-v6 traffic information

## <get-ddos-telnetv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-telnetv6-information>
  </get-ddos-telnetv6-information>
</rpc>
```

**Description** Show telnet-v6 traffic information

**Contents** <get-ddos-telnetv6-parameters>—Show Telnetv6 protocol parameters

<get-ddos-telnetv6-statistics>—Show Telnetv6 statistics and states

<get-ddos-telnetv6-violations>—Show Telnetv6 traffic violations

<get-ddos-telnetv6-aggregate>—Show aggregate for all telnet-v6 traffic information

---

## <get-ddos-telnetv6-parameters>

---

### Usage

```
<rpc>
  <get-ddos-telnetv6-parameters>
    <brief/>
    <detail/>
  </get-ddos-telnetv6-parameters>
</rpc>
```

**Description** Show Telnetv6 protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-telnetv6-statistics>

---

### Usage

```
<rpc>
  <get-ddos-telnetv6-statistics>
    <brief/>
    <detail/>
  </get-ddos-telnetv6-statistics>
</rpc>
```

**Description** Show Telnetv6 statistics and states

**Contents** <brief>—Show brief output

<detail>—Show detailed output

---

## <get-ddos-telnetv6-violations>

---

### Usage

```
<rpc>
  <get-ddos-telnetv6-violations/>
</rpc>
```

**Description** Show Telnetv6 traffic violations

## <get-ddos-ttl-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-ttl-aggregate/>
</rpc>
```

**Description** Show aggregate for all ttl traffic information

## <get-ddos-ttl-information>

---

**Usage**

```
<rpc>
  <get-ddos-ttl-information>
</get-ddos-ttl-information>
</rpc>
```

**Description** Show ttl traffic information

**Contents** <get-ddos-ttl-parameters>—Show TTL protocol parameters

<get-ddos-ttl-statistics>—Show TTL statistics and states

<get-ddos-ttl-violations>—Show TTL traffic violations

<get-ddos-ttl-aggregate>—Show aggregate for all ttl traffic information

## <get-ddos-ttl-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-ttl-parameters>
    <brief/>
    <detail/>
  </get-ddos-ttl-parameters>
</rpc>
```

**Description** Show TTL protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

## <get-ddos-ttl-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-ttl-statistics>
    <brief/>
    <detail/>
  </get-ddos-ttl-statistics>
</rpc>
```

**Description** Show TTL statistics and states

**Contents** <brief>—Show brief output  
            <detail>—Show detailed output

## <get-ddos-ttl-violations>

---

**Usage**

```
<rpc>
  <get-ddos-ttl-violations/>
</rpc>
```

**Description** Show TTL traffic violations

## <get-ddos-tun-frag-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-tun-frag-aggregate/>
</rpc>
```

**Description** Show aggregate for all tunnel fragment information

## <get-ddos-tun-frag-information>

---

**Usage**

```
<rpc>
  <get-ddos-tun-frag-information>
  </get-ddos-tun-frag-information>
</rpc>
```

**Description** Show tunnel fragment information

**Contents** <get-ddos-tun-frag-parameters>—Show Tunnel-Fragment protocol parameters

- <get-ddos-tun-frag-statistics>—Show Tunnel-Fragment statistics and states
- <get-ddos-tun-frag-violations>—Show Tunnel-Fragment traffic violations
- <get-ddos-tun-frag-aggregate>—Show aggregate for all tunnel fragment information

---

## <get-ddos-tun-frag-parameters>

---

### Usage

```
<rpc>  
  <get-ddos-tun-frag-parameters>  
    <brief/>  
    <detail/>  
  </get-ddos-tun-frag-parameters>  
</rpc>
```

**Description** Show Tunnel-Fragment protocol parameters

**Contents** <brief>—Show brief output  
  
<detail>—Show detailed output

---

## <get-ddos-tun-frag-statistics>

---

### Usage

```
<rpc>  
  <get-ddos-tun-frag-statistics>  
    <brief/>  
    <detail/>  
  </get-ddos-tun-frag-statistics>  
</rpc>
```

**Description** Show Tunnel-Fragment statistics and states

**Contents** <brief>—Show brief output  
  
<detail>—Show detailed output

---

## <get-ddos-tun-frag-violations>

---

### Usage

```
<rpc>  
  <get-ddos-tun-frag-violations/>  
</rpc>
```

**Description** Show Tunnel-Fragment traffic violations

---

### <get-ddos-vchassis-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-vchassis-aggregate/>
</rpc>
```

**Description** Show aggregate for all virtual chassis traffic information

---

### <get-ddos-vchassis-control-hi>

---

**Usage**

```
<rpc>
  <get-ddos-vchassis-control-hi/>
</rpc>
```

**Description** Show high priority control traffic information

---

### <get-ddos-vchassis-control-lo>

---

**Usage**

```
<rpc>
  <get-ddos-vchassis-control-lo/>
</rpc>
```

**Description** Show low priority control traffic information

---

### <get-ddos-vchassis-information>

---

**Usage**

```
<rpc>
  <get-ddos-vchassis-information>
</get-ddos-vchassis-information>
</rpc>
```

**Description** Show virtual chassis traffic information

**Contents**

- <get-ddos-vchassis-parameters>—Show Virtual-Chassis protocol parameters
- <get-ddos-vchassis-statistics>—Show Virtual-Chassis statistics and states
- <get-ddos-vchassis-violations>—Show Virtual-Chassis traffic violations
- <get-ddos-vchassis-aggregate>—Show aggregate for all virtual chassis traffic information
- <get-ddos-vchassis-unclass>—Show unclassified virtual chassis traffic information

<get-ddos-vchassis-control-hi>—Show high priority control traffic information

<get-ddos-vchassis-control-lo>—Show low priority control traffic information

<get-ddos-vchassis-vc-packets>—Show all exception packets on vc link information

<get-ddos-vchassis-vc-ttl-err>—Show ttl errors information

---

## <get-ddos-vchassis-parameters>

---

### Usage

```
<rpc>
  <get-ddos-vchassis-parameters>
  <brief/>
  <detail/>
</get-ddos-vchassis-parameters>
</rpc>
```

**Description** Show Virtual-Chassis protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

## <get-ddos-vchassis-statistics>

---

### Usage

```
<rpc>
  <get-ddos-vchassis-statistics>
  <brief/>
  <detail/>
</get-ddos-vchassis-statistics>
</rpc>
```

**Description** Show Virtual-Chassis statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

## <get-ddos-vchassis-unclass>

---

### Usage

```
<rpc>
  <get-ddos-vchassis-unclass/>
</rpc>
```

**Description** Show unclassified virtual chassis traffic information

---

### <get-ddos-vchassis-vc-packets>

---

**Usage**

```
<rpc>
  <get-ddos-vchassis-vc-packets/>
</rpc>
```

**Description** Show all exception packets on vc link information

---

### <get-ddos-vchassis-vc-ttl-err>

---

**Usage**

```
<rpc>
  <get-ddos-vchassis-vc-ttl-err/>
</rpc>
```

**Description** Show ttl errors information

---

### <get-ddos-vchassis-violations>

---

**Usage**

```
<rpc>
  <get-ddos-vchassis-violations/>
</rpc>
```

**Description** Show Virtual-Chassis traffic violations

---

### <get-ddos-version>

---

**Usage**

```
<rpc>
  <get-ddos-version/>
</rpc>
```

**Description** Show version

---

### <get-ddos-vrrp-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-vrrp-aggregate/>
</rpc>
```

**Description** Show aggregate for all VRRP traffic information

### <get-ddos-vrrp-information>

---

**Usage**

```
<rpc>
  <get-ddos-vrrp-information>
</get-ddos-vrrp-information>
</rpc>
```

**Description** Show VRRP traffic information

**Contents** <get-ddos-vrrp-parameters>—Show VRRP protocol parameters

<get-ddos-vrrp-statistics>—Show VRRP statistics and states

<get-ddos-vrrp-violations>—Show VRRP traffic violations

<get-ddos-vrrp-aggregate>—Show aggregate for all VRRP traffic information

### <get-ddos-vrrp-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-vrrp-parameters>
    <brief/>
    <detail/>
  </get-ddos-vrrp-parameters>
</rpc>
```

**Description** Show VRRP protocol parameters

**Contents** <brief>—Show brief output

<detail>—Show detailed output

### <get-ddos-vrrp-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-vrrp-statistics>
    <brief/>
    <detail/>
  </get-ddos-vrrp-statistics>
</rpc>
```

**Description** Show VRRP statistics and states

**Contents**    <brief>—Show brief output  
                 <detail>—Show detailed output

---

### <get-ddos-vrrp-violations>

---

**Usage**

```
<rpc>
  <get-ddos-vrrp-violations/>
</rpc>
```

**Description**    Show VRRP traffic violations

---

### <get-ddos-vrrpv6-aggregate>

---

**Usage**

```
<rpc>
  <get-ddos-vrrpv6-aggregate/>
</rpc>
```

**Description**    Show aggregate for all VRRPv6 traffic information

---

### <get-ddos-vrrpv6-information>

---

**Usage**

```
<rpc>
  <get-ddos-vrrpv6-information>
  </get-ddos-vrrpv6-information>
</rpc>
```

**Description**    Show VRRPv6 traffic information

**Contents**    <get-ddos-vrrpv6-parameters>—Show VRRPv6 protocol parameters  
                 <get-ddos-vrrpv6-statistics>—Show VRRPv6 statistics and states  
                 <get-ddos-vrrpv6-violations>—Show VRRPv6 traffic violations  
                 <get-ddos-vrrpv6-aggregate>—Show aggregate for all VRRPv6 traffic information

---

### <get-ddos-vrrpv6-parameters>

---

**Usage**

```
<rpc>
  <get-ddos-vrrpv6-parameters>
  <brief/>
  <detail/>
```

```
</get-ddos-vrrpv6-parameters>
</rpc>
```

**Description** Show VRRPv6 protocol parameters

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-vrrpv6-statistics>

---

**Usage**

```
<rpc>
  <get-ddos-vrrpv6-statistics>
    <brief/>
    <detail/>
  </get-ddos-vrrpv6-statistics>
</rpc>
```

**Description** Show VRRPv6 statistics and states

**Contents** <brief>—Show brief output  
<detail>—Show detailed output

---

### <get-ddos-vrrpv6-violations>

---

**Usage**

```
<rpc>
  <get-ddos-vrrpv6-violations/>
</rpc>
```

**Description** Show VRRPv6 traffic violations

---

### <get-destination-class-statistics>

---

**Usage**

```
<rpc>
  <get-destination-class-statistics>
    <class-name>class-name</class-name> <!-- mandatory -->
    <interface-name>interface-name</interface-name>
  </get-destination-class-statistics>
</rpc>
```

**Description** Show statistics for destination class

**Contents** <all>—Display all destination class usage

<class-name>—Name of destination class

<interface-name>—Name of logical interface

## <get-dhcp-relay-binding-information>

---

### Usage

```
<rpc>
  <get-dhcp-relay-binding-information>
    <brief/>
    <detail/>
    <summary/>
    <address>address</address>
    <routing-instance>routing-instance</routing-instance>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
  </get-dhcp-relay-binding-information>
</rpc>
```

**Description** Show DHCP relay client binding information

**Contents** <brief>—Display brief information

<detail>—Display detailed information

<summary>—Display summary information

<address>—IP address or MAC address or Session Id of DHCP client binding

<interface>—Name of interface on which to show bindings

<routing-instance>—Name of routing instance

<bridge-domain>—Name of bridge domain

<logical-system>—Name of logical system

## <get-dhcp-relay-statistics-information>

---

### Usage

```
<rpc>
  <get-dhcp-relay-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
  </get-dhcp-relay-statistics-information>
</rpc>
```

**Description** Show DHCP statistics

**Contents** <routing-instance>—Name of routing instance  
<bridge-domain>—Name of bridge domain  
<logical-system>—Name of logical system

---

## <get-dhcp-server-binding-information>

### Usage

```
<rpc>  
  <get-dhcp-server-binding-information>  
    <brief/>  
    <detail/>  
    <summary/>  
    <address>address</address>  
    <routing-instance>routing-instance</routing-instance>  
    <logical-system>logical-system</logical-system>  
  </get-dhcp-server-binding-information>  
</rpc>
```

**Description** Show DHCP server client binding information

**Contents** <brief>—Display brief information  
<detail>—Display detailed information  
<summary>—Display summary information  
<address>—IP address or MAC address or Session Id of DHCP client binding  
<interface>—Name of interface on which to show bindings  
<routing-instance>—Name of routing instance  
<logical-system>—Name of logical system

---

## <get-dhcp-server-statistics-information>

### Usage

```
<rpc>  
  <get-dhcp-server-statistics-information>  
    <routing-instance>routing-instance</routing-instance>  
    <logical-system>logical-system</logical-system>  
  </get-dhcp-server-statistics-information>  
</rpc>
```

**Description** Show DHCP server statistics

**Contents** <routing-instance>—Name of routing instance  
 <logical-system>—Name of logical system

## <get-dhcp-service-statistics-information>

### Usage

```
<rpc>
  <get-dhcp-service-statistics-information>
    <interface>interface</interface>
  </get-dhcp-service-statistics-information>
</rpc>
```

**Description** Show DHCP service statistics

**Contents** <interface>—Name of interface

## <get-dhcp-user-aaa-test-result>

### Usage

```
<rpc>
  <get-dhcp-user-aaa-test-result>
    <user>user</user> <!-- mandatory -->
    <password>password</password>
    <profile>profile</profile>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <mac-address>mac-address</mac-address>
    <option-82>option-82</option-82>
    <source-address>source-address</source-address>
    <terminate-code>terminate-code</terminate-code>
  </get-dhcp-user-aaa-test-result>
</rpc>
```

**Description** Test the aaa servers for a dhcp user

**Contents** <user>—The username to test

- username - The username to test
- access-profile-name - Specify the access profile name which to use for user
- logical-system-name - Specify the logical-system in which to authenticate user
- routing-instance-name - Specify the routing-instance in which to authenticate use
- client-request - Terminated-id with default mapping to 1
- lost-carrier - Terminated-id with default mapping to 2
- nak - Terminated-id with default mapping to 15

- nas-logout - Terminated-id with default mapping to 10
- no-offers - Terminated-id with default mapping to 4

<password>—The password associated with username

- access-profile-name - Specify the access profile name which to use for user
- logical-system-name - Specify the logical-system in which to authenticate user
- routing-instance-name - Specify the routing-instance in which to authenticate use
- client-request - Terminated-id with default mapping to 1
- lost-carrier - Terminated-id with default mapping to 2
- nak - Terminated-id with default mapping to 15
- nas-logout - Terminated-id with default mapping to 10
- no-offers - Terminated-id with default mapping to 4

<profile>—Specify the access profile name which to use for user

- access-profile-name - Specify the access profile name which to use for user
- logical-system-name - Specify the logical-system in which to authenticate user
- routing-instance-name - Specify the routing-instance in which to authenticate use
- client-request - Terminated-id with default mapping to 1
- lost-carrier - Terminated-id with default mapping to 2
- nak - Terminated-id with default mapping to 15
- nas-logout - Terminated-id with default mapping to 10
- no-offers - Terminated-id with default mapping to 4

<logical-system>—Specify the logical-system in which to authenticate user

- logical-system-name - Specify the logical-system in which to authenticate user
- routing-instance-name - Specify the routing-instance in which to authenticate use
- client-request - Terminated-id with default mapping to 1
- lost-carrier - Terminated-id with default mapping to 2
- nak - Terminated-id with default mapping to 15
- nas-logout - Terminated-id with default mapping to 10
- no-offers - Terminated-id with default mapping to 4

<routing-instance>—Specify the routing-instance in which to authenticate user

- routing-instance-name - Specify the routing-instance in which to authenticate use
- client-request - Terminated-id with default mapping to 1
- lost-carrier - Terminated-id with default mapping to 2
- nak - Terminated-id with default mapping to 15
- nas-logout - Terminated-id with default mapping to 10
- no-offers - Terminated-id with default mapping to 4

<mac-address>—Specify the Mac address of the DHCP client

- client-request - Terminated-id with default mapping to 1
- lost-carrier - Terminated-id with default mapping to 2
- nak - Terminated-id with default mapping to 15
- nas-logout - Terminated-id with default mapping to 10
- no-offers - Terminated-id with default mapping to 4

<option-82>—Specify the DHCP option 82

- client-request - Terminated-id with default mapping to 1
- lost-carrier - Terminated-id with default mapping to 2
- nak - Terminated-id with default mapping to 15
- nas-logout - Terminated-id with default mapping to 10
- no-offers - Terminated-id with default mapping to 4

<source-address>—Use specified address as source address

- client-request - Terminated-id with default mapping to 1
- lost-carrier - Terminated-id with default mapping to 2
- nak - Terminated-id with default mapping to 15
- nas-logout - Terminated-id with default mapping to 10
- no-offers - Terminated-id with default mapping to 4

<terminate-code>—Specify DHCP terminate-code

- client-request - Terminated-id with default mapping to 1
- lost-carrier - Terminated-id with default mapping to 2
- nak - Terminated-id with default mapping to 15
- nas-logout - Terminated-id with default mapping to 10
- no-offers - Terminated-id with default mapping to 4

## <get-dhcpv6-relay-binding-information>

---

### Usage

```
<rpc>
  <get-dhcpv6-relay-binding-information>
    <brief/>
    <detail/>
    <summary/>
    <address>address</address>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-dhcpv6-relay-binding-information>
</rpc>
```

**Description** Show DHCPv6 relay client binding information

**Contents** <brief>—Display brief information

<detail>—Display detailed information

<summary>—Display summary information

<address>—IPv6 Prefix or session-id or CID <cid-len/0x.../0x...> of DHCPv6 client binding

<interface>—Name of interface on which to show bindings

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

## <get-dhcpv6-relay-statistics-information>

---

### Usage

```
<rpc>
  <get-dhcpv6-relay-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-dhcpv6-relay-statistics-information>
</rpc>
```

**Description** Show DHCPv6 relay statistics

**Contents** <routing-instance>—Name of routing instance

<logical-system>—Name of logical system

## <get-dhcpv6-server-binding-information>

### Usage

```

<rpc>
  <get-dhcpv6-server-binding-information>
  <brief/>
  <detail/>
  <summary/>
  <address>address</address>
  <routing-instance>routing-instance</routing-instance>
  <logical-system>logical-system</logical-system>
</get-dhcpv6-server-binding-information>
</rpc>

```

**Description** Show DHCPv6 server client binding information

**Contents**

- <brief>—Display brief information
- <detail>—Display detailed information
- <summary>—Display summary information
- <address>—IPv6 Prefix or session-id or CID <cid-len/0x.../0x...> of DHCPv6 client binding
- <interface>—Name of interface on which to show bindings
- <routing-instance>—Name of routing instance
- <logical-system>—Name of logical system

## <get-dhcpv6-server-statistics-information>

### Usage

```

<rpc>
  <get-dhcpv6-server-statistics-information>
  <routing-instance>routing-instance</routing-instance>
  <logical-system>logical-system</logical-system>
</get-dhcpv6-server-statistics-information>
</rpc>

```

**Description** Show DHCPv6 server statistics

**Contents**

- <routing-instance>—Name of routing instance
- <logical-system>—Name of logical system

## <get-dhcpv6-service-statistics-information>

---

**Usage**

```
<rpc>
  <get-dhcpv6-service-statistics-information>
    <interface>interface</interface>
  </get-dhcpv6-service-statistics-information>
</rpc>
```

**Description** Show DHCPv6 service statistics

**Contents** <interface>—Name of interface

## <get-diameter-function-information>

---

**Usage**

```
<rpc>
  <get-diameter-function-information>
    <summary/>
    <brief/>
    <detail/>
    <jsrc/>
    <charging-gw/>
    <packet-triggered-subscribers/>
    <gx-plus/>
  </get-diameter-function-information>
</rpc>
```

**Description** Show diameter function information

**Contents** <summary>—Display summary output (default)

<brief>—Display brief output

<detail>—Display detailed output

<jsrc>—Function to use SRC application

<charging-gw>—Function to use CHARGING application

<packet-triggered-subscribers>—Function to use PACKET-TRIGGERED-SUBSCRIBERS application

<gx-plus>—Function to use GX-PLUS application

<get-diameter-function-statistics>—Show diameter function statistics

## <get-diameter-function-statistics>

### Usage

```

<rpc>
  <get-diameter-function-statistics>
    <summary/>
    <brief/>
    <detail/>
    <jsrc/>
    <charging-gw/>
    <packet-triggered-subscribers/>
    <gx-plus/>
  </get-diameter-function-statistics>
</rpc>

```

**Description** Show diameter function statistics

**Contents**

- <summary>—Display summary output (default)
- <brief>—Display brief output
- <detail>—Display detailed output
- <jsrc>—Function to use SRC application
- <charging-gw>—Function to use CHARGING application
- <packet-triggered-subscribers>—Function to use PACKET-TRIGGERED-SUBSCRIBERS application
- <gx-plus>—Function to use GX-PLUS application

## <get-diameter-information>

### Usage

```

<rpc>
  <get-diameter-information>
    <summary/>
    <brief/>
    <detail/>
  </get-diameter-information>
</rpc>

```

**Description** Show diameter information

**Contents**

- <summary>—Display summary output (default)
- <brief>—Display brief output
- <detail>—Display detailed output

<get-diameter-function-information>—Show diameter function information

<get-diameter-instance-information>—Show diameter instance information

<get-diameter-network-element-information>—Show diameter network-element information

<get-diameter-route-information>—Show diameter route information

<get-diameter-peer-information>—Show diameter peer information

---

## <get-diameter-instance-information>

---

### Usage

```
<rpc>
  <get-diameter-instance-information>
    <summary/>
    <brief/>
    <detail/>
    <instance-name>instance-name</instance-name>
  </get-diameter-instance-information>
</rpc>
```

**Description** Show diameter instance information

**Contents** <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<instance-name>—Instance name

---

## <get-diameter-network-element-information>

---

### Usage

```
<rpc>
  <get-diameter-network-element-information>
    <summary/>
    <brief/>
    <detail/>
    <network-element-name>network-element-name</network-element-name>
  </get-diameter-network-element-information>
</rpc>
```

**Description** Show diameter network-element information

**Contents** <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<network-element-name>—Network-element name

<get-diameter-network-element-map-information>—Show diameter network-element map to peers

## <get-diameter-network-element-map-information>

### Usage

```
<rpc>
  <get-diameter-network-element-map-information>
  <summary/>
  <brief/>
  <detail/>

  <network-element-map-name>network-element-map-name</network-element-map-name>

  </get-diameter-network-element-map-information>
</rpc>
```

**Description** Show diameter network-element map to peers

**Contents** <summary>—Display summary output (default)

<brief>—Display brief output

<detail>—Display detailed output

<network-element-map-name>—Network-element name

## <get-diameter-peer-information>

### Usage

```
<rpc>
  <get-diameter-peer-information>
  <summary/>
  <brief/>
  <detail/>
  <peer-name>peer-name</peer-name>
  </get-diameter-peer-information>
</rpc>
```

**Description** Show diameter peer information

**Contents** <summary>—Display summary output (default)

<brief>—Display brief output

<detail>—Display detailed output

<peer-name>—Peer name

<get-diameter-peer-map-information>—Show diameter peer mapping to network-elements

<get-diameter-peer-statistics>—Show diameter peer statistics

---

## <get-diameter-peer-map-information>

---

### Usage

```
<rpc>
  <get-diameter-peer-map-information>
    <summary/>
    <brief/>
    <detail/>
    <peer-map-name>peer-map-name</peer-map-name>
  </get-diameter-peer-map-information>
</rpc>
```

**Description** Show diameter peer mapping to network-elements

**Contents** <summary>—Display summary output (default)

<brief>—Display brief output

<detail>—Display detailed output

<peer-map-name>—Peer name

---

## <get-diameter-peer-statistics>

---

### Usage

```
<rpc>
  <get-diameter-peer-statistics>
    <summary/>
    <brief/>
    <detail/>
    <peer-statistics-name>peer-statistics-name</peer-statistics-name>
  </get-diameter-peer-statistics>
</rpc>
```

**Description** Show diameter peer statistics

**Contents** <summary>—Display summary output (default)

<brief>—Display brief output

<detail>—Display detailed output

<peer-statistics-name>—Peer name

## <get-diameter-route-information>

---

**Usage**

```

<rpc>
  <get-diameter-route-information>
    <summary/>
    <brief/>
    <detail/>
    <route-name>route-name</route-name>
  </get-diameter-route-information>
</rpc>

```

**Description** Show diameter route information

**Contents** <summary>—Display summary output (default)

<brief>—Display brief output

<detail>—Display detailed output

<route-name>—Route name

## <get-directory-usage-information>

---

**Usage**

```

<rpc>
  <get-directory-usage-information>
    <path>path</path>
    <depth>depth</depth>
  </get-directory-usage-information>
</rpc>

```

**Description** Show local directory information

**Contents** <path>—Path of root directory to traverse

<depth>—Depth of directories to traverse

## <get-domain-map-statistics>

---

**Usage**

```

<rpc>
  <get-domain-map-statistics/>
</rpc>

```

**Description** Domain-map module statistics

## <get-dvmrp-interfaces-information>

---

**Usage**

```
<rpc>
  <get-dvmrp-interfaces-information>
    <logical-system>logical-system</logical-system>
  </get-dvmrp-interfaces-information>
</rpc>
```

**Description** Show DVMRP interfaces

**Contents** <logical-system>—Name of logical system, or 'all'

## <get-dvmrp-neighbors-information>

---

**Usage**

```
<rpc>
  <get-dvmrp-neighbors-information>
    <logical-system>logical-system</logical-system>
  </get-dvmrp-neighbors-information>
</rpc>
```

**Description** Show DVMRP neighbors

**Contents** <logical-system>—Name of logical system, or 'all'

## <get-dvmrp-prefix-information>

---

**Usage**

```
<rpc>
  <get-dvmrp-prefix-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <prefix>prefix</prefix>
  </get-dvmrp-prefix-information>
</rpc>
```

**Description** Show DVMRP prefixes

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<prefix>—DVMRP prefix

## <get-dvmrp-prunes-information>

---

**Usage**

```
<rpc>
  <get-dvmrp-prunes-information>
    <logical-system>logical-system</logical-system>
    <all/>
    <rx/>
    <tx/>
  </get-dvmrp-prunes-information>
</rpc>
```

**Description** Show DVMRP prunes

**Contents** <logical-system>—Name of logical system, or 'all'

<all>—Display both received and transmitted prunes

<rx>—Display received prunes

<tx>—Display transmitted prunes

## <get-elmi-information>

---

**Usage**

```
<rpc>
  <get-elmi-information>
    <interface>interface</interface>
  </get-elmi-information>
</rpc>
```

**Description** Show ethernet local management information

**Contents** <interface>—Name of interface

<get-elmi-statistics>—Show ethernet local management statistics

## <get-elmi-statistics>

---

**Usage**

```
<rpc>
  <get-elmi-statistics>
    <interface>interface</interface>
  </get-elmi-statistics>
</rpc>
```

**Description** Show ethernet local management statistics

**Contents** <interface>—Name of interface

## <get-environment-cb-information>

---

**Usage**

```
<rpc>
  <get-environment-cb-information>
    <interconnect-device>interconnect-device</interconnect-device> <!-- mandatory
-->
    <slot>slot</slot>
  </get-environment-cb-information>
</rpc>
```

**Description** Show Control Board information

**Contents** <interconnect-device>—Interconnect device identifier

<slot>—CB slot number

## <get-environment-cip-information>

---

**Usage**

```
<rpc>
  <get-environment-cip-information>
    <slot>slot</slot>
  </get-environment-cip-information>
</rpc>
```

**Description** Show Connector Interface Panel Information

**Contents** <slot>—CIP slot number

## <get-environment-feb-information>

---

**Usage**

```
<rpc>
  <get-environment-feb-information>
    <slot>slot</slot>
  </get-environment-feb-information>
</rpc>
```

**Description** Show Forwarding Engine Board information

**Contents** <slot>—FEB slot number

## <get-environment-fpc-information>

### Usage

```

<rpc>
  <get-environment-fpc-information>
    <interconnect-device>interconnect-device</interconnect-device> <!-- mandatory
-->
    <fpc-slot>fpc-slot</fpc-slot>
  </get-environment-fpc-information>
</rpc>

```

**Description** Show Flexible PIC Concentrator information

**Contents** <interconnect-device>—Interconnect device identifier

<fpc-slot>—FPC slot number

## <get-environment-fpm-information>

### Usage

```

<rpc>
  <get-environment-fpm-information/>
</rpc>

```

**Description** Show craft interface information

## <get-environment-information>

### Usage

```

<rpc>
  <get-environment-information>
  </get-environment-information>
</rpc>

```

**Description** Show component status and temperature, cooling system speeds

**Contents** <get-environment-sib-information>—Show Switch Interface Board information

<get-environment-fpc-information>—Show Flexible PIC Concentrator information

<get-environment-fpm-information>—Show craft interface information

<get-environment-mcs-information>—Show Miscellaneous Control Subsystem information

<get-environment-pcg-information>—Show Packet Forwarding Engine Clock Generator information

<get-environment-scg-information>—Show SONET Clock Generator information

<get-environment-cb-information>—Show Control Board information

<get-environment-psu-information>—Show Power Supply Unit information

<get-environment-power-supply-unit-information>—Show power supply unit information

<get-environment-pem-information>—Show Power Entry Module information

<get-environment-re-information>—Show Routing Engine information

<get-environment-sfm-information>—Show Switching and Forwarding Module information

<get-environment-feb-information>—Show Forwarding Engine Board information

<get-environment-cip-information>—Show Connector Interface Panel Information

## <get-environment-mcs-information>

---

### Usage

```
<rpc>
  <get-environment-mcs-information>
    <slot>slot</slot>
  </get-environment-mcs-information>
</rpc>
```

**Description** Show Miscellaneous Control Subsystem information

**Contents** <slot>—MCS slot number

## <get-environment-pcg-information>

---

### Usage

```
<rpc>
  <get-environment-pcg-information>
    <slot>slot</slot>
  </get-environment-pcg-information>
</rpc>
```

**Description** Show Packet Forwarding Engine Clock Generator information

**Contents** <slot>—PCG slot number

## <get-environment-pem-information>

---

### Usage

```
<rpc>
  <get-environment-pem-information>
```

```

    <slot>slot</slot>
  </get-environment-pem-information>
</rpc>

```

**Description** Show Power Entry Module information

**Contents** <slot>—PEM slot number

---

### <get-environment-power-supply-unit-information>

---

**Usage**

```

<rpc>
  <get-environment-power-supply-unit-information>
    <slot>slot</slot>
  </get-environment-power-supply-unit-information>
</rpc>

```

**Description** Show power supply unit information

**Contents** <slot>—FPC slot number

---

### <get-environment-psu-information>

---

**Usage**

```

<rpc>
  <get-environment-psu-information>
    <slot>slot</slot>
  </get-environment-psu-information>
</rpc>

```

**Description** Show Power Supply Unit information

**Contents** <slot>—PSU slot number

---

### <get-environment-re-information>

---

**Usage**

```

<rpc>
  <get-environment-re-information>
    <interconnect-device>interconnect-device</interconnect-device> <!-- mandatory
-->
    <slot>slot</slot>
  </get-environment-re-information>
</rpc>

```

**Description** Show Routing Engine information

**Contents**    <interconnect-device>—Interconnect device identifier  
                  <slot>—Routing Engine slot number

## <get-environment-scg-information>

---

### Usage

```
<rpc>
  <get-environment-scg-information>
    <slot>slot</slot>
  </get-environment-scg-information>
</rpc>
```

**Description**    Show SONET Clock Generator information

**Contents**    <slot>—SCG slot number

## <get-environment-sfm-information>

---

### Usage

```
<rpc>
  <get-environment-sfm-information>
    <sfm_plane>sfm_plane</sfm_plane>
  </get-environment-sfm-information>
</rpc>
```

**Description**    Show Switching and Forwarding Module information

**Contents**    <sfm\_plane>—SFM slot number

## <get-environment-sib-information>

---

### Usage

```
<rpc>
  <get-environment-sib-information>
    <sib-slot>sib-slot</sib-slot>
  </get-environment-sib-information>
</rpc>
```

**Description**    Show Switch Interface Board information

**Contents**    <f13>—Show SIB F13 information  
                  <f2s>—Show SIB F2S information  
                  <sib-slot>—SIB slot number

## <get-esis-adjacency-information>

### Usage

```

<rpc>
  <get-esis-adjacency-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <esis-neighbor-id>esis-neighbor-id</esis-neighbor-id>
  </get-esis-adjacency-information>
</rpc>

```

**Description** Show ES-IS adjacency database

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <extensive>—Display extensive output
- <instance>—Name of ES-IS instance
- <esis-neighbor-id>—NSAP/NET of end system

## <get-esis-interface-information>

### Usage

```

<rpc>
  <get-esis-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <interface-name>interface-name</interface-name>
  </get-esis-interface-information>
</rpc>

```

**Description** Show ES-IS interface information

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <brief>—Display brief output (default)
- <detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of ES-IS instance

<interface-name>—Name of interface

---

## <get-es-is-statistics-information>

---

### Usage

```
<rpc>
  <get-es-is-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-es-is-statistics-information>
</rpc>
```

**Description** Show ES-IS performance statistics

**Contents** <logical-system>—Name of logical system, or 'all'  
  
<instance>—Name of ES-IS instance

---

## <get-evc-information>

---

### Usage

```
<rpc>
  <get-evc-information>
    <evc-id>evc-id</evc-id>
  </get-evc-information>
</rpc>
```

**Description** Show ethernet virtual circuit information

**Contents** <evc-id>—EVC identifier

---

## <get-event-scripts-policies>

---

### Usage

```
<rpc>
  <get-event-scripts-policies/>
</rpc>
```

**Description** Show event policies configured through event-scripts

## <get-event-summary>

### Usage

```

<rpc>
  <get-event-summary>
    <syslogfile>syslogfile</syslogfile>
    <event-id>event-id</event-id>
    <daemon-name>daemon-name</daemon-name>
    <event-description>event-description</event-description>
    <start-time>start-time</start-time>
    <end-time>end-time</end-time>
    <total-message-display>total-message-display</total-message-display>
    <show-start-event>show-start-event</show-start-event>
    <show-end-event>show-end-event</show-end-event>
    <new-search/>
    <output-file-name>output-file-name</output-file-name>
  </get-event-summary>
</rpc>

```

**Description** Show syslog event

**Contents**

- <syslogfile>—Syslog file name filter
- <event-id>—Event Id filter
- <daemon-name>—Daemon name filter
- <event-description>—Regular expression for description filter
- <start-time>—Start time filter. Format is mm/dd/yyyy hour:min
- <end-time>—End time filter. Format is mm/dd/yyyy hour:min
- <total-message-display>—Number of messages displayed per page
- <show-start-event>—Requested event starting number
- <show-end-event>—Requested event ending number
- <new-search>—It is a new search
- <output-file-name>—File name where filtered messages are stored

## <get-external-manager-information>

### Usage

```

<rpc>
  <get-external-manager-information>
    <external-manager-name-information>external-manager-name-information</external-manager-name-information>
  </get-external-manager-information>
</rpc>

```

```
<detail/>
<extensive/>
</get-external-manager-information>
</rpc>
```

**Description** Show external manager configuration information

**Contents** <external-manager-name-information>—Show information for a specific external manager

<terse>—Display terse output

<detail>—Display detailed output

<extensive>—Display extensive output

---

## <get-external-manager-statistics-information>

---

### Usage

```
<rpc>
  <get-external-manager-statistics-information>

  <external-manager-name-statistics>external-manager-name-statistics</external-manager-name-statistics>

  <terse/>
  <detail/>
  <extensive/>
</get-external-manager-statistics-information>
</rpc>
```

**Description** Show external manager statistics

**Contents** <external-manager-name-statistics>—Show statistics for a specific external manager

<terse>—Display terse output

<detail>—Display detailed output

<extensive>—Display extensive output

---

## <get-fabric-queue-information>

---

### Usage

```
<rpc>
  <get-fabric-queue-information>
    <destination>destination</destination>
    <source>source</source>
    <summary/>
  </get-fabric-queue-information>
</rpc>
```

<b>Description</b>	Show fabric queue statistics
<b>Contents</b>	<code>&lt;destination&gt;</code> —Destination FPC for which to show details <code>&lt;source&gt;</code> —Source FPC for which to show details <code>&lt;summary&gt;</code> —Display summary output

---

### `<get-fabric-statistics>`

---

**Usage**

```
<rpc>  
  <get-fabric-statistics/>  
</rpc>
```

**Description** Show RPDF statistics information

---

### `<get-fabric-summary-information>`

---

**Usage**

```
<rpc>  
  <get-fabric-summary-information/>  
</rpc>
```

**Description** Show RPDF summary information

---

### `<get-feb-brief-information>`

---

**Usage**

```
<rpc>  
  <get-feb-brief-information>  
  </get-feb-brief-information>  
</rpc>
```

**Description** Show Forwarding Engine Board status

**Contents** `<get-feb-information>`—Show detailed output

---

### `<get-feb-information>`

---

**Usage**

```
<rpc>  
  <get-feb-information>  
    <feb_slot>feb_slot</feb_slot>  
  </get-feb-information>
```

```
</rpc>
```

**Description** Show detailed output

**Contents** <feb\_slot>—FEB slot number

---

### <get-feb-redundancy-error-information>

---

**Usage**

```
<rpc>  
  <get-feb-redundancy-error-information/>  
</rpc>
```

**Description** Show error information

---

### <get-feb-redundancy-group-information>

---

**Usage**

```
<rpc>  
  <get-feb-redundancy-group-information>  
    <group>group</group> <!-- mandatory -->  
    <errors/>  
  </get-feb-redundancy-group-information>  
</rpc>
```

**Description** Show FEB redundancy group information

**Contents** <group>—Name of FEB redundancy group  
  
<errors>—Include error information

---

### <get-feb-redundancy-information>

---

**Usage**

```
<rpc>  
  <get-feb-redundancy-information>  
  </get-feb-redundancy-information>  
</rpc>
```

**Description** Show Forwarding Engine Board redundancy information

**Contents** <get-feb-redundancy-error-information>—Show error information  
  
<get-feb-redundancy-group-information>—Show FEB redundancy group information

## <get-firmware-information>

---

**Usage**

```
<rpc>
  <get-firmware-information>
    <fpc>fpc</fpc>
  </get-firmware-information>
</rpc>
```

**Description** Show firmware and operating system version for components

**Contents** <fpc>—Flexible PIC Controller slot number  
<get-firmware-information-detail>—Show detailed output

## <get-firmware-information-detail>

---

**Usage**

```
<rpc>
  <get-firmware-information-detail/>
</rpc>
```

**Description** Show detailed output

## <get-flow-table-statistics-information>

---

**Usage**

```
<rpc>
  <get-flow-table-statistics-information>
    <detail/>
  </get-flow-table-statistics-information>
</rpc>
```

**Description** Show flow table statistics

**Contents** <detail>—Show detailed statistics information

## <get-fm-fabric-reachability-information>

---

**Usage**

```
<rpc>
  <get-fm-fabric-reachability-information>
    <detail/>
  </get-fm-fabric-reachability-information>
</rpc>
```

**Description** Show current status of fabric reachability

**Contents** <detail>—Show reachability output in detail

---

### <get-fm-fpc-errors>

---

**Usage**

```
<rpc>
  <get-fm-fpc-errors>
    <slot>slot</slot> <!-- mandatory -->
  </get-fm-fpc-errors>
</rpc>
```

**Description** Show Flexible PIC Controller errors

**Contents** <slot>—FPC slot number

---

### <get-fm-fpc-state-information>

---

**Usage**

```
<rpc>
  <get-fm-fpc-state-information/>
</rpc>
```

**Description** Show summary fabric management FPC state from Routing Engine

---

### <get-fm-plane-location-information>

---

**Usage**

```
<rpc>
  <get-fm-plane-location-information/>
</rpc>
```

**Description** Show fabric plane location

---

### <get-fm-plane-state-information>

---

**Usage**

```
<rpc>
  <get-fm-plane-state-information>
    <terse/>
    <detail/>
    <extensive/>
    <number>number</number>
  </get-fm-plane-state-information>
```

`</rpc>`

**Description** Show state of fabric management plane

**Contents** `<terse>`—Show terse output  
`<detail>`—Show detail output  
`<extensive>`—Show extensive output  
`<number>`—Fabric plane number

---

### `<get-fm-sib-errors>`

---

**Usage**

```
<rpc>
  <get-fm-sib-errors>
    <sib-slot>sib-slot</sib-slot> <!-- mandatory -->
  </get-fm-sib-errors>
</rpc>
```

**Description** Show Switch Interface Board errors

**Contents** `<f13>`—Show SIB F13 errors  
`<f2s>`—Show SIB F2S errors  
`<sib-slot>`—SIB slot number

---

### `<get-fm-sib-state-information>`

---

**Usage**

```
<rpc>
  <get-fm-sib-state-information/>
</rpc>
```

**Description** Show summary fabric management SIB state from Routing Engine

---

### `<get-fm-state-information>`

---

**Usage**

```
<rpc>
  <get-fm-state-information/>
</rpc>
```

**Description** Show summary fabric management state

## <get-fm-topology>

---

**Usage**

```
<rpc>
  <get-fm-topology>
    <plane>plane</plane>
  </get-fm-topology>
</rpc>
```

**Description** Show fabric topology for plane

**Contents** <plane>—Fabric plane number

## <get-fm-unreachable-dest-information>

---

**Usage**

```
<rpc>
  <get-fm-unreachable-dest-information/>
</rpc>
```

**Description** Show unreachable destinations on all active planes

## <get-forwarding-table-information>

---

**Usage**

```
<rpc>
  <get-forwarding-table-information>
    <detail/>
    <extensive/>
    <multicast/>
    <family>family</family>
    <vpn>vpn</vpn>
    <table>table</table>
    <interface-name>interface-name</interface-name>
    <vlan>vlan</vlan>
    <bridge-domain>bridge-domain</bridge-domain>
    <summary/>
    <matching>matching</matching>
    <destination>destination</destination>
    <learning-vlan-id>learning-vlan-id</learning-vlan-id>
    <label>label</label>
    <ccc>ccc</ccc>
    <all/>
  </get-forwarding-table-information>
</rpc>
```

**Description** Show entries in all forwarding tables

**Contents** <detail>—Display all routes

- inet - IP version 4 (IPv4)
- inet6 - IP version 6 (IPv6)
- unix - UNIX
- iso - International Standards Organization protocol
- tnp - Trivial Network Protocol
- mpls - Multiprotocol Label Switching
- vpls - Virtual private LAN service
- bridge - Bridge (Layer 2 switching)
- vlan-classification - VLAN classification table
- ethernet-switching - Switch forwarding table
- fibre-channel - Fibre channel forwarding table
- fmembers - Fibre channel membership table
- fabric-multicast - Fabric multicast routing table
- fabric-replication - Fabric replication routing table

## &lt;extensive&gt;—Display extensive information about routes

- inet - IP version 4 (IPv4)
- inet6 - IP version 6 (IPv6)
- unix - UNIX
- iso - International Standards Organization protocol
- tnp - Trivial Network Protocol
- mpls - Multiprotocol Label Switching
- vpls - Virtual private LAN service
- bridge - Bridge (Layer 2 switching)
- vlan-classification - VLAN classification table
- ethernet-switching - Switch forwarding table
- fibre-channel - Fibre channel forwarding table
- fmembers - Fibre channel membership table
- fabric-multicast - Fabric multicast routing table
- fabric-replication - Fabric replication routing table

## &lt;multicast&gt;—Display multicast routes

- inet - IP version 4 (IPv4)
- inet6 - IP version 6 (IPv6)

- unix - UNIX
- iso - International Standards Organization protocol
- tnp - Trivial Network Protocol
- mpls - Multiprotocol Label Switching
- vpls - Virtual private LAN service
- bridge - Bridge (Layer 2 switching)
- vlan-classification - VLAN classification table
- ethernet-switching - Switch forwarding table
- fibre-channel - Fibre channel forwarding table
- fmembers - Fibre channel membership table
- fabric-multicast - Fabric multicast routing table
- fabric-replication - Fabric replication routing table

<family>—Name of family

- inet - IP version 4 (IPv4)
- inet6 - IP version 6 (IPv6)
- unix - UNIX
- iso - International Standards Organization protocol
- tnp - Trivial Network Protocol
- mpls - Multiprotocol Label Switching
- vpls - Virtual private LAN service
- bridge - Bridge (Layer 2 switching)
- vlan-classification - VLAN classification table
- ethernet-switching - Switch forwarding table
- fibre-channel - Fibre channel forwarding table
- fmembers - Fibre channel membership table
- fabric-multicast - Fabric multicast routing table
- fabric-replication - Fabric replication routing table

<vpn>—Name of VPN instance

<table>—Name of routing table

<interface-name>—Interface name

<vlan>—VLAN name

<bridge-domain>—Name of bridging domain

<summary>—Display count of routes instead of details

<matching>—IP prefix and length for entries to match

<destination>—Destination prefix

<learning-vlan-id>—Learning VLAN

<label>—Label for entries to match

<ccc>—Circuit cross-connect interface name for entries to match

<all>—Display all routing forwarding-tables

---

### <get-fpc-alarm-information>

---

**Usage**

```
<rpc>
  <get-fpc-alarm-information>
    <fpc-slot>fpc-slot</fpc-slot> <!-- mandatory -->
  </get-fpc-alarm-information>
</rpc>
```

**Description** Show alarm status for a FPC

**Contents** <fpc-slot>—Flexible PIC Controller slot number

---

### <get-fpc-feb-connectivity-information>

---

**Usage**

```
<rpc>
  <get-fpc-feb-connectivity-information/>
</rpc>
```

**Description** Show connectivity between Flexible PIC Concentrators and Forwarding Engine boards

---

### <get-fpc-information>

---

**Usage**

```
<rpc>
  <get-fpc-information>
    <detail/>
    <fpc-slot>fpc-slot</fpc-slot>
  </get-fpc-information>
</rpc>
```

**Description** Show Flexible PIC Concentrator status

**Contents**    <get-pic-information>—Show Physical Interface Cards installed in FPC  
                 <detail>—Display detailed output  
                 <fpc-slot>—FPC slot number

---

## <get-fru-information>

---

### Usage

```
<rpc>  
  <get-fru-information/>  
</rpc>
```

**Description**    Show Line Card Chassis (LCC) status

---

## <get-fru-power-on-sequence>

---

### Usage

```
<rpc>  
  <get-fru-power-on-sequence/>  
</rpc>
```

**Description**    Show chassis fru power on sequence

---

## <get-fwdd-information>

---

### Usage

```
<rpc>  
  <get-fwdd-information/>  
</rpc>
```

**Description**    Show forwarding process (fwdd) status

---

## <get-ggsn-apn-statistics-information>

---

### Usage

```
<rpc>  
  <get-ggsn-apn-statistics-information>  
    <apn-name>apn-name</apn-name>  
  </get-ggsn-apn-statistics-information>  
</rpc>
```

**Description**    Show access point name statistics

**Contents**    <apn-name>—Name of APN

### <get-ggsn-charging-statistics-information>

---

**Usage**

```
<rpc>
  <get-ggsn-charging-statistics-information/>
</rpc>
```

**Description** Show charging statistics

### <get-ggsn-gtp-prime-statistics-information>

---

**Usage**

```
<rpc>
  <get-ggsn-gtp-prime-statistics-information/>
</rpc>
```

**Description** Show GPRS Tunneling Protocol Prime statistics

### <get-ggsn-gtp-statistics-information>

---

**Usage**

```
<rpc>
  <get-ggsn-gtp-statistics-information/>
</rpc>
```

**Description** Show GPRS tunneling protocol statistics

### <get-ggsn-imsi-trace>

---

**Usage**

```
<rpc>
  <get-ggsn-imsi-trace>
    <imsi-identifier>imsi-identifier</imsi-identifier> <!-- mandatory -->
  </get-ggsn-imsi-trace>
</rpc>
```

**Description** Show trace information for Identifier for International Mobile Subscriber Identity

**Contents** <imsi-identifier>—Identifier for IMSI

### <get-ggsn-imsi-user-information>

---

**Usage**

```
<rpc>
```

```
<get-ggsn-imsi-user-information>
  <imsi-identifier>imsi-identifier</imsi-identifier> <!-- mandatory -->
</get-ggsn-imsi-user-information>
</rpc>
```

**Description** Show International Mobile Subscriber Identity statistics

**Contents** <imsi-identifier>—Identifier for IMSI

---

### <get-ggsn-interface-information>

---

**Usage**

```
<rpc>
  <get-ggsn-interface-information/>
</rpc>
```

**Description** Show GGSN operational status information

---

### <get-ggsn-l2tp-tunnel-statistics-information>

---

**Usage**

```
<rpc>
  <get-ggsn-l2tp-tunnel-statistics-information>
    <lac-address>lac-address</lac-address>
  </get-ggsn-l2tp-tunnel-statistics-information>
</rpc>
```

**Description** Show L2TP tunnel statistics

**Contents** <lac-address>—IP address of LAC

---

### <get-ggsn-msisdn-trace>

---

**Usage**

```
<rpc>
  <get-ggsn-msisdn-trace>
    <msisdn-identifier>msisdn-identifier</msisdn-identifier> <!-- mandatory -->
  </get-ggsn-msisdn-trace>
</rpc>
```

**Description** Show trace information for Mobile Station Integrated Services Digital Network

**Contents** <msisdn-identifier>—Identifier for MSISDN

### <get-ggsn-radius-statistics-information>

---

**Usage**

```
<rpc>
  <get-ggsn-radius-statistics-information/>
</rpc>
```

**Description** Show RADIUS statistics

### <get-ggsn-sgsn-statistics-information>

---

**Usage**

```
<rpc>
  <get-ggsn-sgsn-statistics-information>
    <address>address</address>
  </get-ggsn-sgsn-statistics-information>
</rpc>
```

**Description** Show statistics for client Serving GPRS Support Node

**Contents** <address>—IP address and optional prefix length of SGSN

### <get-ggsn-statistics>

---

**Usage**

```
<rpc>
  <get-ggsn-statistics>
</get-ggsn-statistics>
</rpc>
```

**Description** Show GGSN statistics

**Contents** <get-ggsn-gtp-statistics-information>—Show GPRS tunneling protocol statistics

<get-ggsn-charging-statistics-information>—Show charging statistics

<get-ggsn-radius-statistics-information>—Show RADIUS statistics

<get-ggsn-gtp-prime-statistics-information>—Show GPRS Tunneling Protocol Prime statistics

<get-ggsn-imsi-user-information>—Show International Mobile Subscriber Identity statistics

<msisdn>—Show Mobile Station Integrated Services Digital Network statistics

<get-ggsn-apn-statistics-information>—Show access point name statistics

<get-ggsn-sgsn-statistics-information>—Show statistics for client Serving GPRS Support Node

<get-ggsn-l2tp-tunnel-statistics-information>—Show L2TP tunnel statistics

---

## <get-ggsn-trace>

---

### Usage

```
<rpc>
  <get-ggsn-trace/>
</rpc>
```

**Description** Show all trace information

---

## <get-gre-ka-information>

---

### Usage

```
<rpc>
  <get-gre-ka-information>
    <interface-name>interface-name</interface-name>
  </get-gre-ka-information>
</rpc>
```

**Description** Show GRE Keepalive information

**Contents** <interface-name>—Display information for this logical interface

---

## <get-gx-plus-state-information>

---

### Usage

```
<rpc>
  <get-gx-plus-state-information/>
</rpc>
```

**Description** Show gx-plus state information

---

## <get-gx-plus-statistics-information>

---

### Usage

```
<rpc>
  <get-gx-plus-statistics-information>
    <brief/>
    <detail/>
    <extensive/>
  </get-gx-plus-statistics-information>
</rpc>
```

<b>Description</b>	Show gx-plus statistics information
<b>Contents</b>	<code>&lt;brief&gt;</code> —Show brief output (default) <code>&lt;detail&gt;</code> —Show detailed output <code>&lt;extensive&gt;</code> —Show extensive output

---

### `<get-gx-plus-sync-state-information>`

---

<b>Usage</b>	<pre>&lt;rpc&gt;   &lt;get-gx-plus-sync-state-information/&gt; &lt;/rpc&gt;</pre>
<b>Description</b>	Show gx-plus sync-state information

---

### `<get-hakr-keychain-information>`

---

<b>Usage</b>	<pre>&lt;rpc&gt;   &lt;get-hakr-keychain-information&gt;     &lt;brief/&gt;     &lt;detail/&gt;   &lt;/get-hakr-keychain-information&gt; &lt;/rpc&gt;</pre>
<b>Description</b>	Show all protocols keychain
<b>Contents</b>	<code>&lt;brief&gt;</code> —Display brief output (default) <code>&lt;detail&gt;</code> —Display detailed output

---

### `<get-hash-table-information>`

---

<b>Usage</b>	<pre>&lt;rpc&gt;   &lt;get-hash-table-information&gt;      &lt;real-server-group-name-hash&gt;real-server-group-name-hash&lt;/real-server-group-name-hash&gt;      &lt;terse/&gt;     &lt;detail/&gt;   &lt;/get-hash-table-information&gt; &lt;/rpc&gt;</pre>
<b>Description</b>	Show server load balance hash table information

**Contents**    <real-server-group-name-hash>—Show hash table information for a specific real server group

                 <terse>—Display terse output

                 <detail>—Display detailed output

---

## <get-header-redirect-set-statistics-information>

### Usage

```
<rpc>
  <get-header-redirect-set-statistics-information>
  <detail/>
</get-header-redirect-set-statistics-information>
</rpc>
```

**Description**    Show header redirect set statistics

**Contents**    <detail>—Display detailed statistics

---

## <get-health-monitor-alarm-information>

### Usage

```
<rpc>
  <get-health-monitor-alarm-information>
  <brief/>
  <detail/>
</get-health-monitor-alarm-information>
</rpc>
```

**Description**    Show health-monitor alarms

**Contents**    <brief>—Display brief output (default)

                 <detail>—Display detailed output

---

## <get-health-monitor-information>

### Usage

```
<rpc>
  <get-health-monitor-information>
</get-health-monitor-information>
</rpc>
```

**Description**    Show health-monitoring information

**Contents**    <get-health-monitor-alarm-information>—Show health-monitor alarms

<get-health-monitor-log-information>—Show health-monitoring logs

---

### <get-health-monitor-log-information>

---

**Usage**

```
<rpc>  
  <get-health-monitor-log-information/>  
</rpc>
```

**Description** Show health-monitoring logs

---

### <get-helper-statistics-information>

---

**Usage**

```
<rpc>  
  <get-helper-statistics-information/>  
</rpc>
```

**Description** Show helper statistics

---

### <get-history-results>

---

**Usage**

```
<rpc>  
  <get-history-results>  
    <brief/>  
    <detail/>  
    <owner>owner</owner>  
    <test>test</test>  
    <since>since</since>  
  </get-history-results>  
</rpc>
```

**Description** Show history results

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<owner>—Name of owner

<test>—Name of test

<since>—Show history since YYYY-MM-DD.HH:MM:SS

## <get-idp-addos-application-information>

---

**Usage**

```
<rpc>
  <get-idp-addos-application-information>
    <application-name>application-name</application-name>
    <context>context</context>
    <server>server</server>
    <zone>zone</zone>
    <detail/>
  </get-idp-addos-application-information>
</rpc>
```

**Description** Show DDOS Application information

**Contents** <application-name>—Application name

<context>—Context name

<server>—Application server address

<zone>—Application server zone

<detail>—Show application details

## <get-idp-application-system-cache>

---

**Usage**

```
<rpc>
  <get-idp-application-system-cache/>
</rpc>
```

**Description** Show IDP application system cache

## <get-idp-applications-information>

---

**Usage**

```
<rpc>
  <get-idp-applications-information/>
</rpc>
```

**Description** Show IDP application statistics

## <get-idp-attack-description-information>

---

**Usage**

```
<rpc>
```

```
<get-idp-attack-description-information>
  <attack-name>attack-name</attack-name> <!-- mandatory -->
</get-idp-attack-description-information>
</rpc>
```

**Description** Show description of specified attack

**Contents** <attack-name>—Attack name

---

### <get-idp-attack-detail-information>

---

**Usage**

```
<rpc>
  <get-idp-attack-detail-information>
    <attack-name>attack-name</attack-name> <!-- mandatory -->
  </get-idp-attack-detail-information>
</rpc>
```

**Description** Show details of specified attack

**Contents** <attack-name>—Attack name

---

### <get-idp-attack-table-information>

---

**Usage**

```
<rpc>
  <get-idp-attack-table-information/>
</rpc>
```

**Description** Show IDP attack table

---

### <get-idp-counter-information>

---

**Usage**

```
<rpc>
  <get-idp-counter-information>
    <counter-class>counter-class</counter-class> <!-- mandatory -->
  </get-idp-counter-information>
</rpc>
```

**Description** Show IDP counters

**Contents** <counter-class>—Show IDP counters by counter class

## <get-idp-detail-status-information>

---

**Usage**

```
<rpc>
  <get-idp-detail-status-information/>
</rpc>
```

**Description** Show IDP detail status

## <get-idp-lsys-policy-association>

---

**Usage**

```
<rpc>
  <get-idp-lsys-policy-association/>
</rpc>
```

**Description** Show IDP policy association

## <get-idp-memory-information>

---

**Usage**

```
<rpc>
  <get-idp-memory-information/>
</rpc>
```

**Description** Show IDP data plane memory statistics

## <get-idp-policy-commit-status>

---

**Usage**

```
<rpc>
  <get-idp-policy-commit-status>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
    <clear/>
  </get-idp-policy-commit-status>
</rpc>
```

**Description** Show the status of ongoing policy compilation and load

**Contents** <re0>—RE0  
<re1>—RE1

<clear>—Clears the policy commit status

## <get-idp-policy-template-information>

### Usage

```
<rpc>
  <get-idp-policy-template-information/>
</rpc>
```

**Description** Show available policy templates

## <get-idp-predefined-attack-filters>

### Usage

```
<rpc>
  <get-idp-predefined-attack-filters>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
    <category>category</category>
    <severity>severity</severity>
    <direction>direction</direction>
  </get-idp-predefined-attack-filters>
</rpc>
```

**Description** Configure filters

**Contents** <re0>—RE0

- info - Provide information of attack when it matches
- warning - The attack is a minor one
- minor - The attack is a minor one
- major - The attack is a major one
- critical - The attack is a critical one
- client-to-server - Select attacks from client to server
- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction
- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

<re1>—RE1

- info - Provide information of attack when it matches
- warning - The attack is a minor one
- minor - The attack is a minor one
- major - The attack is a major one
- critical - The attack is a critical one
- client-to-server - Select attacks from client to server
- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction
- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

<category>—Category of attack

- info - Provide information of attack when it matches
- warning - The attack is a minor one
- minor - The attack is a minor one
- major - The attack is a major one
- critical - The attack is a critical one
- client-to-server - Select attacks from client to server
- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction
- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

<severity>—Severity of attack

- info - Provide information of attack when it matches
- warning - The attack is a minor one
- minor - The attack is a minor one
- major - The attack is a major one
- critical - The attack is a critical one
- client-to-server - Select attacks from client to server
- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction

- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

<direction>—Direction of attack

- client-to-server - Select attacks from client to server
- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction
- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

## <get-idp-predefined-attack-group-filters>

### Usage

```
<rpc>
  <get-idp-predefined-attack-group-filters>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
    <category>category</category>
  </get-idp-predefined-attack-group-filters>
</rpc>
```

**Description** Configure filters

**Contents** <re0>—RE0  
 <re1>—RE1  
 <category>—Category of attack group

## <get-idp-predefined-attack-groups>

### Usage

```
<rpc>
  <get-idp-predefined-attack-groups>
</get-idp-predefined-attack-groups>
</rpc>
```

**Description** Show predefined attack groups

**Contents** <get-idp-predefined-attack-group-filters>—Configure filters

## <get-idp-predefined-attacks>

---

**Usage**

```
<rpc>
  <get-idp-predefined-attacks>
</get-idp-predefined-attacks>
</rpc>
```

**Description** Show predefined attacks

**Contents** <get-idp-predefined-attack-filters>—Configure filters

## <get-idp-recent-security-package-information>

---

**Usage**

```
<rpc>
  <get-idp-recent-security-package-information>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
  </get-idp-recent-security-package-information>
</rpc>
```

**Description** List ten most recent security package versions

**Contents** <re0>—RE0  
          <re1>—RE1

## <get-idp-security-package-information>

---

**Usage**

```
<rpc>
  <get-idp-security-package-information>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
  </get-idp-security-package-information>
</rpc>
```

**Description** Show the version of currently installed security-package

**Contents** <re0>—RE0  
          <re1>—RE1

### <get-idp-ssl-key-information>

---

**Usage**

```
<rpc>
  <get-idp-ssl-key-information>
    <key-name>key-name</key-name>
  </get-idp-ssl-key-information>
</rpc>
```

**Description** Show SSL keys

**Contents** <key-name>—Key name

### <get-idp-ssl-session-cache-information>

---

**Usage**

```
<rpc>
  <get-idp-ssl-session-cache-information/>
</rpc>
```

**Description** Session ID cache

### <get-idp-status-information>

---

**Usage**

```
<rpc>
  <get-idp-status-information>
  </get-idp-status-information>
</rpc>
```

**Description** Show IDP status

**Contents** <get-idp-detail-status-information>—Show IDP detail status

### <get-idp-subscriber-policy-list>

---

**Usage**

```
<rpc>
  <get-idp-subscriber-policy-list/>
</rpc>
```

**Description** Show the list of currently installed policies

## <get-igmp-group-information>

---

**Usage**

```
<rpc>
  <get-igmp-group-information>
    <logical-system>logical-system</logical-system>
    <terse/>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-igmp-group-information>
</rpc>
```

**Description** Show IGMP group members

**Contents** <logical-system>—Name of logical system, or 'all'

<terse>—Display terse output

<brief>—Display brief output (default)

<detail>—Display detailed output

<group-name>—Name of group

## <get-igmp-interface-information>

---

**Usage**

```
<rpc>
  <get-igmp-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
  </get-igmp-interface-information>
</rpc>
```

**Description** Show IGMP interfaces

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

## <get-igmp-output-group-information>

### Usage

```

<rpc>
  <get-igmp-output-group-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-igmp-output-group-information>
</rpc>

```

**Description** Show IGMP output group members

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<group-name>—Name of group

## <get-igmp-snooping-interface-information>

### Usage

```

<rpc>
  <get-igmp-snooping-interface-information>
    <brief/>
    <detail/>
    <interface>interface</interface>
    <vlan-id>vlan-id</vlan-id>
    <instance>instance</instance>
  </get-igmp-snooping-interface-information>
</rpc>

```

**Description** Show IGMP snooping interfaces

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<interface>—Name of interface

<vlan-id>—VLAN ID for a learning domain

<instance>—Name of routing-instance

<bridge-domain>—For a particular bridge-domain

## <get-igmp-snooping-membership-information>

---

### Usage

```
<rpc>
  <get-igmp-snooping-membership-information>
    <brief/>
    <detail/>
    <group>group</group>
    <interface>interface</interface>
    <vlan-id>vlan-id</vlan-id>
    <instance>instance</instance>
  </get-igmp-snooping-membership-information>
</rpc>
```

**Description** Show IGMP snooping group membership

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<group>—IP address range for group

<interface>—Name of interface

<vlan-id>—VLAN ID for a learning domain

<instance>—Name of routing-instance

<bridge-domain>—For a particular bridge-domain

## <get-igmp-snooping-statistics-information>

---

### Usage

```
<rpc>
  <get-igmp-snooping-statistics-information>
    <interface>interface</interface>
    <vlan-id>vlan-id</vlan-id>
    <instance>instance</instance>
  </get-igmp-snooping-statistics-information>
</rpc>
```

**Description** Show IGMP snooping statistics

**Contents** <interface>—Name of interface

<vlan-id>—VLAN ID for a learning domain

<instance>—Name of routing-instance

<bridge-domain>—For a particular bridge-domain

## <get-igmp-statistics-information>

---

**Usage**

```

<rpc>
  <get-igmp-statistics-information>
    <logical-system>logical-system</logical-system>
    <interface>interface</interface>
  </get-igmp-statistics-information>
</rpc>

```

**Description** Show IGMP statistics

**Contents** <logical-system>—Name of logical system, or 'all'

<interface>—Name of interface

## <get-ingress-replication-information>

---

**Usage**

```

<rpc>
  <get-ingress-replication-information>
    <logical-system>logical-system</logical-system>
    <mvpn/>
    <tunnel-name>tunnel-name</tunnel-name>
  </get-ingress-replication-information>
</rpc>

```

**Description** Show Ingress-Replication tunnel information

**Contents** <logical-system>—Name of logical system, or 'all'

<mvpn>—MVPN ingress-replication tunnels

<tunnel-name>—Name of Ingress-Replication tunnel

## <get-inline-nat-statistics-information>

---

**Usage**

```

<rpc>
  <get-inline-nat-statistics-information>
    <interface>interface</interface>
  </get-inline-nat-statistics-information>
</rpc>

```

**Description** Show global inline nat statistics

**Contents** <interface>—Name of adaptive services interface

## <get-instance-information>

---

**Usage**

```
<rpc>
  <get-instance-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <summary/>
    <brief/>
    <detail/>
    <instance-name>instance-name</instance-name>
  </get-instance-information>
</rpc>
```

**Description** Show routing instances information

**Contents** <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<summary>—Display summary output

<brief>—Display brief output (default)

<detail>—Display detailed output

<instance-name>—Particular instance name

<get-operational-routing-instance-information>—Show operational routing instances

## <get-inter-chassis-control-protocol-information>

---

**Usage**

```
<rpc>
  <get-inter-chassis-control-protocol-information>
    <brief/>
    <detail/>
  </get-inter-chassis-control-protocol-information>
</rpc>
```

**Description** Show Inter Chassis Control Protocol information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

## <get-interface-filter-information>

### Usage

```

<rpc>
  <get-interface-filter-information>
    <interface-name>interface-name</interface-name>
  </get-interface-filter-information>
</rpc>

```

**Description** Show interface filters information

**Contents** <interface-name>—Name of physical or logical interface

## <get-interface-information>

### Usage

```

<rpc>
  <get-interface-information>
    <routing-instance>routing-instance</routing-instance>
    <extensive/>
    <statistics/>
    <media/>
    <detail/>
    <terse/>
    <brief/>
    <descriptions/>
    <snmp-index>snmp-index</snmp-index>
    <switch-port>switch-port</switch-port>
    <interface-name>interface-name</interface-name>
  </get-interface-information>
</rpc>

```

**Description** Show interface information

**Contents** <routing>—Show routing status

- all - All instances
- instance-name - Instance name

<get-targeting-information>—Show Distribution information of a bundle

- all - All instances
- instance-name - Instance name

<get-mc-ae-interface-information>—Show MC-AE configured interface information

- all - All instances
- instance-name - Instance name

<routing-instance>—Name of routing instance

- all - All instances
- instance-name - Instance name

<controller>—Show controller information

<interface-set>—Show interface set information

<show-interfaces-interval>—Show interval statistics

<show-interfaces-far-end-interval>—Show far end interval statistics

<get-mac-database>—Show media access control database information

<get-interface-queue-information>—Show queue statistics for this interface

<get-interface-filter-information>—Show interface filters information

<get-interface-policer-information>—Show interface policers information

<diagnostics>—Show interface diagnostics information

<extensive>—Display extensive output

<statistics>—Display statistics and detailed output

<media>—Display media information

<detail>—Display detailed output

<terse>—Display terse output

<brief>—Display brief output

<descriptions>—Display interface description strings

<get-destination-class-statistics>—Show statistics for destination class

<get-source-class-statistics>—Show statistics for source class

<snmp-index>—SNMP index of interface

<switch-port>—Front end port number

<interface-name>—Name of physical or logical interface

<get-redundancy-status>—Show redundancy status

---

## <get-interface-location-information>

---

### Usage

```
<rpc>  
  <get-interface-location-information>
```

```

    <lcc>lcc</lcc> <!-- mandatory -->
    <fpc>fpc</fpc> <!-- mandatory -->
  </get-interface-location-information>
</rpc>

```

**Description** Show interface name given location

**Contents** <lcc>—LCC number  
 <fpc>—FPC number

---

### <get-interface-location-name-information>

---

**Usage**

```

<rpc>
  <get-interface-location-name-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-interface-location-name-information>
</rpc>

```

**Description** Show physical location given interface name

**Contents** <interface-name>—Interface name

---

### <get-interface-optics-diagnostics-information>

---

**Usage**

```

<rpc>
  <get-interface-optics-diagnostics-information>
    <interface-name>interface-name</interface-name>
  </get-interface-optics-diagnostics-information>
</rpc>

```

**Description** Show interface optics-diagnostics information

**Contents** <interface-name>—Name of physical interface

---

### <get-interface-policer-information>

---

**Usage**

```

<rpc>
  <get-interface-policer-information>
    <interface-name>interface-name</interface-name>
  </get-interface-policer-information>
</rpc>

```

**Description** Show interface policers information

**Contents** <interface-name>—Name of physical or logical interface

---

## <get-interface-queue-information>

---

### Usage

```
<rpc>
  <get-interface-queue-information>
    <forwarding-class>forwarding-class</forwarding-class>
    <ingress/>
    <egress/>
    <both-ingress-egress/>
    <aggregate/>
    <remaining-traffic/>
    <source-chassis>source-chassis</source-chassis>
    <source-fpc>source-fpc</source-fpc>
    <interface-name>interface-name</interface-name>
  </get-interface-queue-information>
</rpc>
```

**Description** Show queue statistics for this interface

**Contents** <forwarding-class>—Name of forwarding class

<ingress>—Display ingress queue statistics

<egress>—Display egress queue statistics

<both-ingress-egress>—Display both ingress and egress queue statistics

<aggregate>—Display aggregate queue statistics

<remaining-traffic>—Display remaining-traffic queue statistics

<source-chassis>—Source chassis name for which to show details

<source-fpc>—Source FPC for which to show details

<interface-name>—Name of physical interface

---

## <get-interface-set-queue-information>

---

### Usage

```
<rpc>
  <get-interface-set-queue-information>
    <forwarding-class>forwarding-class</forwarding-class>
    <ingress/>
    <egress/>
    <both-ingress-egress/>
    <aggregate/>
```

```

    <remaining-traffic/>
    <interface-set-name>interface-set-name</interface-set-name>
  </get-interface-set-queue-information>
</rpc>

```

**Description** Show queue statistics for this interface-set

**Contents**

- <forwarding-class>—Name of forwarding class
- <ingress>—Display ingress queue statistics
- <egress>—Display egress queue statistics
- <both-ingress-egress>—Display both ingress and egress queue statistics
- <aggregate>—Display aggregate queue statistics
- <remaining-traffic>—Display remaining-traffic queue statistics
- <interface-set-name>—Name of interface set

---

## <get-ioc-npc-connectivity-information>

### Usage

```

<rpc>
  <get-ioc-npc-connectivity-information/>
</rpc>

```

**Description** Show connectivity between IOC and NPC

---

## <get-ip-mip-binding-information>

### Usage

```

<rpc>
  <get-ip-mip-binding-information>
    <ip-address>ip-address</ip-address> <!-- mandatory -->
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-ip-mip-binding-information>
</rpc>

```

**Description** Show binding detail based on IP address

**Contents**

- <ip-address>—Show binding detail based on IP address
- <routing-instance>—Name of routing instance
- <logical-system>—Name of logical system

## <get-ipv6-nd-information>

---

**Usage**

```
<rpc>
  <get-ipv6-nd-information/>
</rpc>
```

**Description** Show IPv6 neighbor cache information

## <get-ipv6-ra-information>

---

**Usage**

```
<rpc>
  <get-ipv6-ra-information>
    <logical-system>logical-system</logical-system>
    <interface>interface</interface>
    <conflicts/>
    <prefix>prefix</prefix>
    <virtual-router/>
  </get-ipv6-ra-information>
</rpc>
```

**Description** Show IPv6 router advertisement information

**Contents** <logical-system>—Name of logical system, or 'all'

<interface>—Name of interface

<conflicts>—Display conflicting information

<prefix>—Prefix and optional prefix length

<virtual-router>—Display only virtual-interface information

## <get-isis-adjacency-information>

---

**Usage**

```
<rpc>
  <get-isis-adjacency-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <system-id>system-id</system-id>
  </get-isis-adjacency-information>
</rpc>
```

<b>Description</b>	Show IS-IS adjacency database
<b>Contents</b>	<p>&lt;logical-system&gt;—Name of logical system, or 'all'</p> <p>&lt;brief&gt;—Display brief output (default)</p> <p>&lt;detail&gt;—Display detailed output</p> <p>&lt;extensive&gt;—Display extensive output</p> <p>&lt;instance&gt;—Name of IS-IS instance</p> <p>&lt;system-id&gt;—System ID of intermediate system</p>

---

### <get-isis-authentication-information>

---

**Usage**

```
<rpc>
  <get-isis-authentication-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-isis-authentication-information>
</rpc>
```

<b>Description</b>	Show IS-IS authentication information
--------------------	---------------------------------------

<b>Contents</b>	<p>&lt;logical-system&gt;—Name of logical system, or 'all'</p> <p>&lt;instance&gt;—Name of IS-IS instance</p>
-----------------	---

---

### <get-isis-backup-coverage-information>

---

**Usage**

```
<rpc>
  <get-isis-backup-coverage-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-isis-backup-coverage-information>
</rpc>
```

<b>Description</b>	Show IS-IS backup coverage
--------------------	----------------------------

<b>Contents</b>	<p>&lt;logical-system&gt;—Name of logical system, or 'all'</p> <p>&lt;instance&gt;—Name of IS-IS instance</p>
-----------------	---

## <get-isis-backup-lsp-information>

---

**Usage**

```
<rpc>
  <get-isis-backup-lsp-information>
    <logical-system>logical-system</logical-system>
  </get-isis-backup-lsp-information>
</rpc>
```

**Description** Show IS-IS MPLS backup LSP information

**Contents** <logical-system>—Name of logical system, or 'all'

## <get-isis-backup-spf-results-information>

---

**Usage**

```
<rpc>
  <get-isis-backup-spf-results-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <level>level</level>
    <no-coverage/>
    <topology>topology</topology>
  </get-isis-backup-spf-results-information>
</rpc>
```

**Description** Show results from backup SPF runs

**Contents** <logical-system>—Name of logical system, or 'all'

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<instance>—IS-IS instance

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<level>—Number of IS-IS level

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<no-coverage>—Destinations with no backup coverage

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<topology>—Name of topology

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

## <get-isis-context-identifier-information>

### Usage

```
<rpc>
  <get-isis-context-identifier-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <instance>instance</instance>
  </get-isis-context-identifier-information>
</rpc>
```

**Description** Show IS-IS context-identifier information

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<instance>—Name of IS-IS instance

<get-isis-context-identifier-origin-information>—Show IS-IS context-identifier information

## <get-isis-context-identifier-origin-information>

---

### Usage

```
<rpc>
  <get-isis-context-identifier-origin-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <id_addr>id_addr</id_addr> <!-- mandatory -->
    <instance>instance</instance>
  </get-isis-context-identifier-origin-information>
</rpc>
```

**Description** Show IS-IS context-identifier information

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<id\_addr>—Context identifier address of session

<instance>—Name of IS-IS instance

## <get-isis-database-information>

---

### Usage

```
<rpc>
  <get-isis-database-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <level>level</level>
    <system-id>system-id</system-id>
  </get-isis-database-information>
</rpc>
```

**Description** Show IS-IS link-state database

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of IS-IS instance

<level>—Number of IS-IS level

<system-id>—System ID of IS

## <get-isis-hostname-information>

### Usage

```
<rpc>
  <get-isis-hostname-information>
    <logical-system>logical-system</logical-system>
  </get-isis-hostname-information>
</rpc>
```

**Description** Show IS-IS hostname database

**Contents** <logical-system>—Name of logical system, or 'all'

## <get-isis-interface-information>

### Usage

```
<rpc>
  <get-isis-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <interface-name>interface-name</interface-name>
  </get-isis-interface-information>
</rpc>
```

**Description** Show IS-IS interface information

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of IS-IS instance

<interface-name>—Name of interface

## <get-isis-overview-information>

---

**Usage**

```
<rpc>
  <get-isis-overview-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-isis-overview-information>
</rpc>
```

**Description** Show overview of IS-IS information

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of IS-IS instance

## <get-isis-route-information>

---

**Usage**

```
<rpc>
  <get-isis-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <destination>destination</destination>
    <inet/>
    <inet6/>
    <iso/>
    <topology>topology</topology>
  </get-isis-route-information>
</rpc>
```

**Description** Show IS-IS routing table

**Contents** <logical-system>—Name of logical system, or 'all'

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<instance>—Name of IS-IS instance

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<destination>—IP address and optional prefix length of destination

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<inet>—Display IPv4 routes

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<inet6>—Display IPv6 routes

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<iso>—Display CLNS routes

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<topology>—Name of topology from which routes were learned

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

---

## <get-isis-spf-log-information>

---

### Usage

```
<rpc>
  <get-isis-spf-log-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <level>level</level>
    <topology>topology</topology>
```

```
</get-isis-spf-log-information>
</rpc>
```

**Description** Show log of SPF runs

**Contents** <logical-system>—Name of logical system, or 'all'

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<instance>—Name of IS-IS instance

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<level>—Number of IS-IS level

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<topology>—Name of topology

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

---

## <get-isis-spf-results-brief-information>

---

### Usage

```
<rpc>
  <get-isis-spf-results-brief-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <level>level</level>
    <topology>topology</topology>
  </get-isis-spf-results-brief-information>
</rpc>
```

**Description** Show brief summary of SPF results

**Contents** <logical-system>—Name of logical system, or 'all'

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<instance>—Name of IS-IS instance

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<level>—Number of level

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<topology>—Name of topology

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

## <get-isis-spf-results-information>

### Usage

```
<rpc>
  <get-isis-spf-results-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <level>level</level>
    <topology>topology</topology>
  </get-isis-spf-results-information>
</rpc>
```

**Description** Show results from SPF runs

<b>Contents</b>	<p>&lt;logical-system&gt;—Name of logical system, or 'all'</p> <ul style="list-style-type: none"><li>• unicast - Unicast topology</li><li>• ipv4-multicast - IPv4 multicast topology</li><li>• ipv6-unicast - IPv6 unicast topology</li><li>• ipv6-multicast - IPv6 multicast topology</li></ul> <p>&lt;instance&gt;—IS-IS instance</p> <ul style="list-style-type: none"><li>• unicast - Unicast topology</li><li>• ipv4-multicast - IPv4 multicast topology</li><li>• ipv6-unicast - IPv6 unicast topology</li><li>• ipv6-multicast - IPv6 multicast topology</li></ul> <p>&lt;level&gt;—Number of IS-IS level</p> <ul style="list-style-type: none"><li>• unicast - Unicast topology</li><li>• ipv4-multicast - IPv4 multicast topology</li><li>• ipv6-unicast - IPv6 unicast topology</li><li>• ipv6-multicast - IPv6 multicast topology</li></ul> <p>&lt;topology&gt;—Name of topology</p> <ul style="list-style-type: none"><li>• unicast - Unicast topology</li><li>• ipv4-multicast - IPv4 multicast topology</li><li>• ipv6-unicast - IPv6 unicast topology</li><li>• ipv6-multicast - IPv6 multicast topology</li></ul>
-----------------	---

---

## <get-isis-statistics-information>

---

### Usage

```
<rpc>
  <get-isis-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-isis-statistics-information>
</rpc>
```

**Description** Show IS-IS performance statistics

<b>Contents</b>	<p>&lt;logical-system&gt;—Name of logical system, or 'all'</p> <p>&lt;instance&gt;—Name of IS-IS instance</p>
-----------------	---

## <get-key-vg-binding>

---

**Usage**

```
<rpc>
  <get-key-vg-binding/>
</rpc>
```

**Description** Show core key assigned for (vlan, group)

## <get-l2ckt-connection-information>

---

**Usage**

```
<rpc>
  <get-l2ckt-connection-information>
    <logical-system>logical-system</logical-system>
    <neighbor>neighbor</neighbor>
    <interface>interface</interface>
    <down/>
    <up/>
    <up-down/>
    <brief/>
    <extensive/>
    <history/>
    <status/>
    <summary/>
  </get-l2ckt-connection-information>
</rpc>
```

**Description** Show the Layer 2 circuit connections

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <neighbor>—IP address of neighbor
- <interface>—Name of interface
- <down>—Display nonoperational connections
- <up>—Display operational connections
- <up-down>—Display both operational and nonoperational connections (default)
- <brief>—Display one-line version of output
- <extensive>—Display connection status and history
- <history>—Display connection history
- <status>—Display connection and interface status (default)

<summary>—Display summary output

---

## <get-l2cpd-replication-information>

---

### Usage

```
<rpc>  
  <get-l2cpd-replication-information/>  
</rpc>
```

**Description** Stateful replication

---

## <get-l2cpd-task-memory>

---

### Usage

```
<rpc>  
  <get-l2cpd-task-memory>  
    <summary/>  
    <brief/>  
    <detail/>  
    <history/>  
  </get-l2cpd-task-memory>  
</rpc>
```

**Description** Show memory utilization of l2cp tasks

**Contents** <summary>—Display current and maximum memory usage

<brief>—Display current/maximum/available memory

<detail>—Display memory usage by individual users

<history>—Display memory usage in the recent past

---

## <get-l2cpd-tasks-io-statistics>

---

### Usage

```
<rpc>  
  <get-l2cpd-tasks-io-statistics/>  
</rpc>
```

**Description** Show task I/O statistics

---

## <get-l2tp-destination-information>

---

### Usage

```
<rpc>  
  <get-l2tp-destination-information>
```

```

<extensive/>
<brief/>
<detail/>
<filter>filter</filter>
<local-gateway>local-gateway</local-gateway>
<peer-gateway>peer-gateway</peer-gateway>
</get-l2tp-destination-information>
</rpc>

```

**Description** Show active L2TP destination list

**Contents**

- <extensive>—Display extensive output
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <local-gateway>—Local gateway address to use as filter
- <peer-gateway>—Peer gateway address to use as filter

## <get-l2tp-multilink-information>

---

### Usage

```

<rpc>
<get-l2tp-multilink-information>
<extensive/>
<brief/>
<detail/>
<statistics/>
<filter>filter</filter>
<bundle-id>bundle-id</bundle-id>
</get-l2tp-multilink-information>
</rpc>

```

**Description** Show active L2TP multilink list

**Contents**

- <extensive>—Display extensive output
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <statistics>—Display statistics
- <bundle-id>—Filter by multilink bundle ID

## <get-l2tp-session-information>

---

### Usage

```
<rpc>
  <get-l2tp-session-information>
    <extensive/>
    <brief/>
    <detail/>
    <statistics/>
    <filter>filter</filter>
    <tunnel-group>tunnel-group</tunnel-group>
    <local-tunnel-id>local-tunnel-id</local-tunnel-id>
    <interface>interface</interface>
    <local-gateway>local-gateway</local-gateway>
    <local-gateway-name>local-gateway-name</local-gateway-name>
    <peer-gateway>peer-gateway</peer-gateway>
    <peer-gateway-name>peer-gateway-name</peer-gateway-name>
    <local-session-id>local-session-id</local-session-id>
    <user>user</user>
  </get-l2tp-session-information>
</rpc>
```

**Description** Show active L2TP session list

**Contents** <extensive>—Display extensive output

<brief>—Display brief output (default)

<detail>—Display detailed output

<statistics>—Display statistics

<tunnel-group>—Tunnel group to use as filter

<local-tunnel-id>—Local tunnel ID to use as filter

<interface>—Interface name to use as filter

<local-gateway>—Local gateway address to use as filter

<local-gateway-name>—Local gateway name to use as filter

<peer-gateway>—Peer gateway address to use as filter

<peer-gateway-name>—Peer gateway name to use as filter

<local-session-id>—Local session ID to use as filter

<user>—Username to use as filter

## <get-l2tp-summary-information>

### Usage

```

<rpc>
  <get-l2tp-summary-information>
    <interface>interface</interface>
  </get-l2tp-summary-information>
</rpc>

```

**Description** Show L2TP summary information

**Contents** <interface>—Name of adaptive services interface

## <get-l2tp-tunnel-information>

### Usage

```

<rpc>
  <get-l2tp-tunnel-information>
    <extensive/>
    <brief/>
    <detail/>
    <statistics/>
    <filter>filter</filter>
    <tunnel-group>tunnel-group</tunnel-group>
    <local-tunnel-id>local-tunnel-id</local-tunnel-id>
    <interface>interface</interface>
    <local-gateway>local-gateway</local-gateway>
    <local-gateway-name>local-gateway-name</local-gateway-name>
    <peer-gateway>peer-gateway</peer-gateway>
    <peer-gateway-name>peer-gateway-name</peer-gateway-name>
  </get-l2tp-tunnel-information>
</rpc>

```

**Description** Show active L2TP tunnel list

**Contents**

- <extensive>—Display extensive output
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <statistics>—Display statistics
- <tunnel-group>—Tunnel group to use as filter
- <local-tunnel-id>—Local tunnel ID to use as filter
- <interface>—Interface name to use as filter
- <local-gateway>—Local gateway address to use as filter

<local-gateway-name>—Local gateway name to use as filter

<peer-gateway>—Peer gateway address to use as filter

<peer-gateway-name>—Peer gateway name to use as filter

---

## <get-l2vpn-connection-information>

---

### Usage

```
<rpc>
  <get-l2vpn-connection-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <local-site>local-site</local-site>
    <remote-site>remote-site</remote-site>
    <down/>
    <up/>
    <up-down/>
    <brief/>
    <extensive/>
    <history/>
    <status/>
    <summary/>
  </get-l2vpn-connection-information>
</rpc>
```

**Description** Show Layer 2 VPN connections information

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of Layer 2 VPN instance
- <local-site>—Name or ID of Layer 2 VPN local site
- <remote-site>—ID of Layer 2 VPN remote site
- <down>—Display nonoperational connections
- <up>—Display operational connections
- <up-down>—Display both non- and operational connections (default)
- <brief>—Display one-line version of output
- <extensive>—Display connection status and history
- <history>—Display connection history
- <status>—Display connection and circuit status (default)
- <summary>—Display summary output

### <get-lacp-interface-information>

---

**Usage**

```
<rpc>
  <get-lacp-interface-information>
    <interface-name>interface-name</interface-name>
  </get-lacp-interface-information>
</rpc>
```

**Description** Show LACP interfaces information

**Contents** <interface-name>—Name of interface

### <get-lacp-interface-statistics>

---

**Usage**

```
<rpc>
  <get-lacp-interface-statistics>
    <interface-name>interface-name</interface-name>
  </get-lacp-interface-statistics>
</rpc>
```

**Description** Show LACP interface statistics

**Contents** <interface-name>—Name of interface

### <get-ldp-database-information>

---

**Usage**

```
<rpc>
  <get-ldp-database-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <session>session</session>
    <inet/>
    <l2circuit/>
    <p2mp/>
  </get-ldp-database-information>
</rpc>
```

**Description** Show LDP label database

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of LDP routing instance

<session>—IP address of session destination

<inet>—Display IPv4 bindings

<l2circuit>—Display Layer 2 circuit bindings

<p2mp>—Display P2MP bindings

---

## <get-ldp-fec-filters-information>

---

### Usage

```
<rpc>
  <get-ldp-fec-filters-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <fec>fec</fec>
  </get-ldp-fec-filters-information>
</rpc>
```

**Description** Show filters for forwarding equivalence classes

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of LDP routing instance

<fec>—Forwarding equivalence class

---

## <get-ldp-interface-information>

---

### Usage

```
<rpc>
  <get-ldp-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <interface-name>interface-name</interface-name>
  </get-ldp-interface-information>
</rpc>
```

**Description** Show LDP interface status

**Contents**    <logical-system>—Name of logical system, or 'all'

                 <brief>—Display brief output (default)

                 <detail>—Display detailed output

                 <extensive>—Display extensive output

                 <instance>—Name of LDP routing instance

                 <interface-name>—Name of interface

---

## <get-ldp-neighbor-information>

---

### Usage

```
<rpc>
  <get-ldp-neighbor-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <neighbor>neighbor</neighbor>
  </get-ldp-neighbor-information>
</rpc>
```

**Description**    Show LDP neighbor status

**Contents**    <logical-system>—Name of logical system, or 'all'

                 <brief>—Display brief output (default)

                 <detail>—Display detailed output

                 <extensive>—Display extensive output

                 <instance>—Name of LDP routing instance

                 <neighbor>—IP address of the neighbor

---

## <get-ldp-overview-information>

---

### Usage

```
<rpc>
  <get-ldp-overview-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-ldp-overview-information>
</rpc>
```

**Description**    Show LDP overview information

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of LDP routing instance

## <get-ldp-path-information>

---

### Usage

```
<rpc>
  <get-ldp-path-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <destination>destination</destination>
  </get-ldp-path-information>
</rpc>
```

**Description** Show LDP path table

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of LDP routing instance

<destination>—IP address and optional prefix length of destination

## <get-ldp-route-information>

---

### Usage

```
<rpc>
  <get-ldp-route-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <destination>destination</destination>
  </get-ldp-route-information>
</rpc>
```

**Description** Show LDP internal topology table

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of LDP routing instance

<destination>—IP address and optional prefix length of destination

## <get-ldp-session-information>

### Usage

```
<rpc>
  <get-ldp-session-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <destination>destination</destination>
  </get-ldp-session-information>
</rpc>
```

**Description** Show LDP session status

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of LDP routing instance

<destination>—IP address of session destination

## <get-ldp-statistics-information>

### Usage

```
<rpc>
  <get-ldp-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-ldp-statistics-information>
</rpc>
```

**Description** Show LDP statistics

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of LDP routing instance

---

### <get-ldp-traffic-statistics-information>

---

**Usage**

```
<rpc>
  <get-ldp-traffic-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <inet/>
    <p2mp/>
  </get-ldp-traffic-statistics-information>
</rpc>
```

**Description** Show packet statistics for LDP label-switched paths

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of LDP routing instance

<inet>—Display statistics for INET FECs

<p2mp>—Display statistics for P2MP FECs

---

### <get-lfmd-information>

---

**Usage**

```
<rpc>
  <get-lfmd-information>
    <detail/>
    <brief/>
    <interface-name>interface-name</interface-name>
  </get-lfmd-information>
</rpc>
```

**Description** Show link-fault-management information

**Contents** <detail>—Display detailed data

<brief>—Display brief data (default)

<interface-name>—Name of physical interface

---

### <get-license-information>

---

**Usage**

```
<rpc>
```

```
<get-license-information/>
</rpc>
```

**Description** Show installed feature licenses

---

### <get-license-key-information>

---

**Usage**

```
<rpc>
  <get-license-key-information/>
</rpc>
```

**Description** Show license keys

---

### <get-license-summary-information>

---

**Usage**

```
<rpc>
  <get-license-summary-information>
  </get-license-summary-information>
</rpc>
```

**Description** Show feature licenses information

**Contents** <get-license-information>—Show installed feature licenses

<get-license-key-information>—Show license keys

<get-license-usage-summary>—Show licensed features

---

### <get-license-usage-summary>

---

**Usage**

```
<rpc>
  <get-license-usage-summary/>
</rpc>
```

**Description** Show licensed features

---

### <get-link-services-cpu-usage>

---

**Usage**

```
<rpc>
  <get-link-services-cpu-usage>
  <interface>interface</interface> <!-- mandatory -->
  <brief/>
```

```
<detail/>
</get-link-services-cpu-usage>
</rpc>
```

**Description** Show cpu usage as a percentage for the specified PIC

**Contents** <interface>—Name of link services interface

<brief>—Display brief output (1 and 5 second average)

<detail>—Display detailed output (per cpu average)

---

## <get-lldp-neighbors-information>

### Usage

```
<rpc>
<get-lldp-neighbors-information>
</get-lldp-neighbors-information>
</rpc>
```

**Description** Show LLDP neighbor information

**Contents** <interface>—Show LLDP neighbors on this interface

---

## <get-lm-information>

### Usage

```
<rpc>
<get-lm-information>
</get-lm-information>
</rpc>
```

**Description** Show link management information

**Contents** <get-lm-peer-information>—Show peer information

<get-lm-te-link-information>—Show traffic engineering links information

<get-lm-statistics-information>—Show link management statistics

<get-lm-routing-information>—Show link management information for routing

---

## <get-lm-peer-information>

### Usage

```
<rpc>
<get-lm-peer-information>
```

```
<peer-name>peer-name</peer-name>
</get-lm-peer-information>
</rpc>
```

**Description** Show peer information

**Contents** <peer-name>—Name of peer

---

### <get-lm-peer-statistics>

---

**Usage**

```
<rpc>
<get-lm-peer-statistics>
  <peer-name>peer-name</peer-name>
</get-lm-peer-statistics>
</rpc>
```

**Description** Show link management statistics for a peer

**Contents** <peer-name>—Name of peer

---

### <get-lm-routing-information>

---

**Usage**

```
<rpc>
<get-lm-routing-information>
</get-lm-routing-information>
</rpc>
```

**Description** Show link management information for routing

**Contents** <get-lm-routing-peer-information>—Show peer information

<get-lm-routing-te-link-information>—Show traffic engineering links information

<get-lm-routing-resource-information>—Show resource information

---

### <get-lm-routing-peer-information>

---

**Usage**

```
<rpc>
<get-lm-routing-peer-information>
  <peer-name>peer-name</peer-name>
</get-lm-routing-peer-information>
</rpc>
```

**Description** Show peer information

**Contents** <peer-name>—Name of peer

---

### <get-lm-routing-resource-information>

---

**Usage**

```
<rpc>
  <get-lm-routing-resource-information>
    <resource-name>resource-name</resource-name>
  </get-lm-routing-resource-information>
</rpc>
```

**Description** Show resource information

**Contents** <resource-name>—Name of resource

---

### <get-lm-routing-te-link-information>

---

**Usage**

```
<rpc>
  <get-lm-routing-te-link-information>
    <brief/>
    <detail/>
    <link-name>link-name</link-name>
  </get-lm-routing-te-link-information>
</rpc>
```

**Description** Show traffic engineering links information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<link-name>—Name of traffic engineering link

---

### <get-lm-statistics-information>

---

**Usage**

```
<rpc>
  <get-lm-statistics-information>
</get-lm-statistics-information>
</rpc>
```

**Description** Show link management statistics

**Contents** <get-lm-peer-statistics>—Show link management statistics for a peer

## <get-lm-te-link-information>

---

**Usage**

```
<rpc>
  <get-lm-te-link-information>
    <brief/>
    <detail/>
    <link-name>link-name</link-name>
  </get-lm-te-link-information>
</rpc>
```

**Description** Show traffic engineering links information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<link-name>—Name of traffic engineering link

## <get-local-policy-decision-function-flows-interface>

---

**Usage**

```
<rpc>
  <get-local-policy-decision-function-flows-interface>
    <interface-name>interface-name</interface-name>
  </get-local-policy-decision-function-flows-interface>
</rpc>
```

**Description** Show local policy decision function flows by interface name

**Contents** <interface-name>—

## <get-local-policy-decision-function-flows-subscriber>

---

**Usage**

```
<rpc>
  <get-local-policy-decision-function-flows-subscriber>
    <subscriber>subscriber</subscriber>
  </get-local-policy-decision-function-flows-subscriber>
</rpc>
```

**Description** Show local policy decision function flows by subscriber name

**Contents** <subscriber>—

## <get-local-policy-decision-function-statistics-interface>

---

**Usage**

```
<rpc>
  <get-local-policy-decision-function-statistics-interface>
    <interface-name>interface-name</interface-name>
  </get-local-policy-decision-function-statistics-interface>
</rpc>
```

**Description** Show local policy decision function statistics by interface name

**Contents** <interface-name>—

## <get-local-policy-decision-function-statistics-subscriber>

---

**Usage**

```
<rpc>
  <get-local-policy-decision-function-statistics-subscriber>
    <subscriber>subscriber</subscriber>
  </get-local-policy-decision-function-statistics-subscriber>
</rpc>
```

**Description** Show local policy decision function statistics by subscriber name

**Contents** <subscriber>—

## <get-mac-database>

---

**Usage**

```
<rpc>
  <get-mac-database>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <mac-address>mac-address</mac-address>
  </get-mac-database>
</rpc>
```

**Description** Show media access control database information

**Contents** <interface-name>—Name of physical or logical interface  
          <mac-address>—MAC address

## <get-mac-ip-binding-information>

---

**Usage**

```
<rpc>
```

```

<get-mac-ip-binding-information>
  <brief/>
  <detail/>
  <l2domain>l2domain</l2domain>
  <mac-address>mac-address</mac-address>
</get-mac-ip-binding-information>
</rpc>

```

**Description** Show Mac ip Binding information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<l2domain>—L2domain

<mac-address>—Mac address

### <get-mac-rewrite-interface-information>

#### Usage

```

<rpc>
  <get-mac-rewrite-interface-information>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
  </get-mac-rewrite-interface-information>
</rpc>

```

**Description** Show mac-rewrite interface information

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

### <get-mc-ae-interface-information>

#### Usage

```

<rpc>
  <get-mc-ae-interface-information>
    <id>id</id>
    <unit>unit</unit>
  </get-mc-ae-interface-information>
</rpc>

```

**Description** Show MC-AE configured interface information

**Contents**   <id>—MC-AE id  
              <unit>—Logical interface unit number

---

### <get-mc-ccpc-src-mod-filters>

---

**Usage**

```
<rpc>
  <get-mc-ccpc-src-mod-filters/>
</rpc>
```

**Description**   Show source mod filters

---

### <get-mc-edge-key-to-map-binding>

---

**Usage**

```
<rpc>
  <get-mc-edge-key-to-map-binding>
    <core-key>core-key</core-key> <!-- mandatory -->
  </get-mc-edge-key-to-map-binding>
</rpc>
```

**Description**   Show core-key to member map binding

**Contents**   <core-key>—Core key mapping to be displayed about

---

### <get-mc-edge-map-to-key-binding>

---

**Usage**

```
<rpc>
  <get-mc-edge-map-to-key-binding>
    <core-key>core-key</core-key> <!-- mandatory -->
  </get-mc-edge-map-to-key-binding>
</rpc>
```

**Description**   Show member map to core key binding

**Contents**   <core-key>—Core key mapping to be displayed about

---

### <get-mc-edge-vg-portmap>

---

**Usage**

```
<rpc>
  <get-mc-edge-vg-portmap/>
</rpc>
```

**Description** Show port bitmap per (vlan, group)

---

### <get-mc-nsf>

---

**Usage**

```
<rpc>
  <get-mc-nsf/>
</rpc>
```

**Description** Show multicast non-stop-forwarding information

---

### <get-mc-root-key-to-map-binding>

---

**Usage**

```
<rpc>
  <get-mc-root-key-to-map-binding/>
</rpc>
```

**Description** Show core-key to member map binding

---

### <get-mc-root-map-to-key-binding>

---

**Usage**

```
<rpc>
  <get-mc-root-map-to-key-binding/>
</rpc>
```

**Description** Show member map to core key binding

---

### <get-mc-root-vg-pfemap>

---

**Usage**

```
<rpc>
  <get-mc-root-vg-pfemap/>
</rpc>
```

**Description** Show PFE bitmap per (vlan, group)

---

### <get-mc-vccpdf-adjacency-database>

---

**Usage**

```
<rpc>
  <get-mc-vccpdf-adjacency-database/>
</rpc>
```

**Description** Show VCCPDF adjacencies

## <get-mip-binding-information>

---

**Usage**

```
<rpc>
  <get-mip-binding-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-mip-binding-information>
</rpc>
```

**Description** Show binding information

**Contents** <routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<get-nai-mip-binding-information>—Show binding detail based on nai

<get-ip-mip-binding-information>—Show binding detail based on IP address

<get-summary-mip-binding-information>—Show summary of binding table

## <get-mip-ha-interface-information>

---

**Usage**

```
<rpc>
  <get-mip-ha-interface-information>
    <interface-name>interface-name</interface-name>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-mip-ha-interface-information>
</rpc>
```

**Description** Show home-agent details on the interfaces it is running

**Contents** <interface-name>—Show home-agent details based on interface

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

## <get-mip-ha-overview-information>

---

**Usage**

```
<rpc>
  <get-mip-ha-overview-information>
    <routing-instance>routing-instance</routing-instance>
```

```

    <logical-system>logical-system</logical-system>
  </get-mip-ha-overview-information>
</rpc>

```

**Description** Show overview

**Contents** <routing-instance>—Name of routing instance  
 <logical-system>—Name of logical system

### <get-mip-ha-traffic-information>

---

**Usage**

```

<rpc>
  <get-mip-ha-traffic-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-mip-ha-traffic-information>
</rpc>

```

**Description** Show traffic information

**Contents** <routing-instance>—Name of routing instance  
 <logical-system>—Name of logical system

### <get-mip-ha-virtual-network-information>

---

**Usage**

```

<rpc>
  <get-mip-ha-virtual-network-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-mip-ha-virtual-network-information>
</rpc>

```

**Description** Show virtual network related information

**Contents** <routing-instance>—Name of routing instance  
 <logical-system>—Name of logical system

### <get-mip-wimax-release-information>

---

**Usage**

```

<rpc>
  <get-mip-wimax-release-information>

```

```
<routing-instance>routing-instance</routing-instance>
<logical-system>logical-system</logical-system>
</get-mip-wimax-release-information>
</rpc>
```

**Description** Show WiMAX release supported by Mobile IP

**Contents** <routing-instance>—Name of routing instance  
            <logical-system>—Name of logical system

---

## <get-mld-group-information>

### Usage

```
<rpc>
<get-mld-group-information>
<logical-system>logical-system</logical-system>
<terse/>
<brief/>
<detail/>
<group-name>group-name</group-name>
</get-mld-group-information>
</rpc>
```

**Description** Show MLD group members

**Contents** <logical-system>—Name of logical system, or 'all'  
            <terse>—Display terse output  
            <brief>—Display brief output (default)  
            <detail>—Display detailed output  
            <group-name>—Name of group

---

## <get-mld-interface-information>

### Usage

```
<rpc>
<get-mld-interface-information>
<logical-system>logical-system</logical-system>
<brief/>
<detail/>
<interface-name>interface-name</interface-name>
</get-mld-interface-information>
</rpc>
```

**Description** Show MLD interfaces

**Contents**    <logical-system>—Name of logical system, or 'all'

                 <brief>—Display brief output (default)

                 <detail>—Display detailed output

                 <interface-name>—Name of interface

---

### <get-mld-output-group-information>

---

**Usage**

```
<rpc>
  <get-mld-output-group-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-mld-output-group-information>
</rpc>
```

**Description**    Show MLD output group members

**Contents**    <logical-system>—Name of logical system, or 'all'

                 <brief>—Display brief output (default)

                 <detail>—Display detailed output

                 <group-name>—Name of group

---

### <get-mld-statistics-information>

---

**Usage**

```
<rpc>
  <get-mld-statistics-information>
    <logical-system>logical-system</logical-system>
    <interface>interface</interface>
  </get-mld-statistics-information>
</rpc>
```

**Description**    Show MLD statistics

**Contents**    <logical-system>—Name of logical system, or 'all'

                 <interface>—Name of interface

## <get-mpls-admin-group-extended-information>

---

**Usage**

```
<rpc>
  <get-mpls-admin-group-extended-information>
    <logical-system>logical-system</logical-system>
  </get-mpls-admin-group-extended-information>
</rpc>
```

**Description** Show MPLS extended administrative groups

**Contents** <logical-system>—Name of logical system, or 'all'

## <get-mpls-admin-group-information>

---

**Usage**

```
<rpc>
  <get-mpls-admin-group-information>
    <logical-system>logical-system</logical-system>
  </get-mpls-admin-group-information>
</rpc>
```

**Description** Show MPLS administrative groups

**Contents** <logical-system>—Name of logical system, or 'all'

## <get-mpls-call-admission-control-information>

---

**Usage**

```
<rpc>
  <get-mpls-call-admission-control-information>
    <logical-system>logical-system</logical-system>
    <lsp-name>lsp-name</lsp-name>
  </get-mpls-call-admission-control-information>
</rpc>
```

**Description** Show CAC information for MPLS LSPs

**Contents** <logical-system>—Name of logical system, or 'all'

<lsp-name>—Name of LSP

## <get-mpls-context-identifier-information>

---

**Usage**

```
<rpc>
```

```

<get-mpls-context-identifier-information>
<logical-system>logical-system</logical-system>
<primary/>
<protector/>
<brief/>
<detail/>
<id>id</id>
</get-mpls-context-identifier-information>
</rpc>

```

**Description** Show configured egress protection context identifiers

**Contents** <logical-system>—Name of logical system, or 'all'

<primary>—Display primary context identifier(s)

<protector>—Display protector context identifier(s)

<brief>—Display brief output (default)

<detail>—Display detailed output

<id>—Identifier

### <get-mpls-cspf-information>

---

**Usage**

```

<rpc>
<get-mpls-cspf-information>
<logical-system>logical-system</logical-system>
</get-mpls-cspf-information>
</rpc>

```

**Description** Show Constrained Shortest Path First statistics

**Contents** <logical-system>—Name of logical system, or 'all'

### <get-mpls-diffserv-te-information>

---

**Usage**

```

<rpc>
<get-mpls-diffserv-te-information>
<logical-system>logical-system</logical-system>
</get-mpls-diffserv-te-information>
</rpc>

```

**Description** Show MPLS Differentiated Services traffic engineering global properties

**Contents** <logical-system>—Name of logical system, or 'all'

---

## <get-mpls-interface-information>

---

### Usage

```
<rpc>
  <get-mpls-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
  </get-mpls-interface-information>
</rpc>
```

**Description** Show MPLS interfaces

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

---

## <get-mpls-lsp-defaults-information>

---

### Usage

```
<rpc>
  <get-mpls-lsp-defaults-information>
    <logical-system>logical-system</logical-system>
  </get-mpls-lsp-defaults-information>
</rpc>
```

**Description** Display LSP defaults

**Contents** <logical-system>—Name of logical system, or 'all'

---

## <get-mpls-lsp-information>

---

### Usage

```
<rpc>
  <get-mpls-lsp-information>
    <logical-system>logical-system</logical-system>
    <ingress/>
    <egress/>
    <transit/>
    <terse/>
    <brief/>
    <detail/>
    <extensive/>
    <descriptions/>
    <up/>
  </get-mpls-lsp-information>
</rpc>
```

```
<down/>
<unidirectional/>
<bidirectional/>
<p2mp/>
<statistics/>
<bypass/>
<regex>regex</regex>
</get-mpls-lsp-information>
</rpc>
```

**Description** Show configured label-switched paths

**Contents** <logical-system>—Name of logical system, or 'all'

<ingress>—Display LSPs originating at this router

<egress>—Display LSPs ending at this router

<transit>—Display LSPs transiting this router

<terse>—Display terse output

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<descriptions>—Display LSP description strings

<up>—Display active LSPs

<down>—Display inactive LSPs

<unidirectional>—Display unidirectional LSPs

<bidirectional>—Display bidirectional LSPs

<p2mp>—Display point-to-multipoint LSPs

<statistics>—Display packet statistics for LSPs

<bypass>—Display LSPs used for protecting other LSPs

<get-mpls-lsp-defaults-information>—Display LSP defaults

<regex>—Regular expression for LSP names to match

---

## <get-mpls-path-information>

---

### Usage

```
<rpc>
<get-mpls-path-information>
```

```
<logical-system>logical-system</logical-system>
<path>path</path>
</get-mpls-path-information>
</rpc>
```

**Description** Show configured named paths

**Contents** <logical-system>—Name of logical system, or 'all'

<path>—Name of label-switched path

---

## <get-mpls-static-lsp-information>

---

### Usage

```
<rpc>
<get-mpls-static-lsp-information>
<logical-system>logical-system</logical-system>
<bypass/>
<ingress/>
<transit/>
<terse/>
<brief/>
<detail/>
<extensive/>
<descriptions/>
<statistics/>
<up/>
<down/>
<regex>regex</regex>
</get-mpls-static-lsp-information>
</rpc>
```

**Description** Show configured static label-switched paths

**Contents** <logical-system>—Name of logical system, or 'all'

<bypass>—Display bypass LSPs originating at this router

<ingress>—Display LSPs originating at this router

<transit>—Display LSPs transiting this router

<terse>—Display terse output

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<descriptions>—Display LSP description strings

- <statistics>—Display packet statistics for LSPs
- <up>—Display active LSPs
- <down>—Display inactive LSPs
- <regex>—Regular expression for LSP names to match

---

## <get-msdp-source-active-information>

---

### Usage

```
<rpc>
  <get-msdp-source-active-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <group>group</group>
    <source>source</source>
    <peer>peer</peer>
    <local/>
    <originator>originator</originator>
    <brief/>
    <detail/>
  </get-msdp-source-active-information>
</rpc>
```

**Description** Show the source-active (SA) cache

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of instance
- <group>—Name of group
- <source>—Name of source
- <peer>—IPv4 address of peer
- <local>—Display SA cache entries originating at this router
- <originator>—IPv4 address of peer that originated SA cache entries
- <brief>—Display brief output (default)
- <detail>—Display detailed output

---

## <get-msdp-source-information>

---

### Usage

```
<rpc>
  <get-msdp-source-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
```

```
<source>source</source>
</get-msdp-source-information>
</rpc>
```

**Description** Show multicast sources learned from MSDP

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<source>—IP address and optional prefix length of source

---

## <get-msdp-statistics-information>

### Usage

```
<rpc>
<get-msdp-statistics-information>
<logical-system>logical-system</logical-system>
<instance>instance</instance>
<peer>peer</peer>
</get-msdp-statistics-information>
</rpc>
```

**Description** Show MSDP statistics

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<peer>—IPv4 address and optional prefix length of MSDP peers

---

## <get-msp-session-table>

### Usage

```
<rpc>
<get-msp-session-table>
<all/>
<limit>limit</limit>
<extensive/>
<brief/>
<terse/>
<source-prefix>source-prefix</source-prefix>
<destination-prefix>destination-prefix</destination-prefix>
<source-port>source-port</source-port>
<destination-port>destination-port</destination-port>
<protocol>protocol</protocol>
<service-set>service-set</service-set>
<interface>interface</interface>
<application-protocol>application-protocol</application-protocol>
<get-service-msp-sess-count-information/>
```

```
</get-msp-session-table>  
</rpc>
```

**Description** Show session table entries

**Contents** <all>—Display all the entries

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol

<get-service-msp-sess-count-information>—Show count of matching entries

---

## <get-mspinfo-connections>

### Usage

```
<rpc>
  <get-mspinfo-connections>
    <inet/>
    <inet6/>
    <extensive/>
    <show-routing-instances/>
    <interface>interface</interface>
  </get-mspinfo-connections>
</rpc>
```

**Description** Show connection activity on the extension provider PIC

**Contents**

- <inet>—Display IPv4 connections
- <inet6>—Display IPv6 connections
- <extensive>—Display extensive output
- <show-routing-instances>—Display routing instances
- <interface>—Name of extension provider interface

---

## <get-mspinfo-packages>

### Usage

```
<rpc>
  <get-mspinfo-packages>
    <detail/>
    <interface>interface</interface>
  </get-mspinfo-packages>
</rpc>
```

**Description** Show packages loaded on the extension provider PIC

**Contents** <detail>—  
 <interface>—Name of extension provider interface

### <get-mspinfo-processes>

---

**Usage**

```
<rpc>
  <get-mspinfo-processes>
    <detail/>
    <wide/>
    <interface>interface</interface>
  </get-mspinfo-processes>
</rpc>
```

**Description** Show system process table on the extension provider PIC

**Contents** <detail>—Display detailed output  
 <wide>—Display information even if wider than 80 columns  
 <get-mspinfo-processes-brief>—Display brief output  
 <get-mspinfo-processes-extensive>—Display brief output  
 <interface>—Name of extension provider interface

### <get-mspinfo-processes-brief>

---

**Usage**

```
<rpc>
  <get-mspinfo-processes-brief>
    <interface>interface</interface>
  </get-mspinfo-processes-brief>
</rpc>
```

**Description** Display brief output

**Contents** <interface>—Name of extension provider interface

### <get-mspinfo-processes-extensive>

---

**Usage**

```
<rpc>
  <get-mspinfo-processes-extensive>
    <interface>interface</interface>
```

```
</get-mspinfo-processes-extensive>
</rpc>
```

**Description** Display brief output

**Contents** <interface>—Name of extension provider interface

---

## <get-mspinfo-uptime>

---

### Usage

```
<rpc>
<get-mspinfo-uptime>
<interface>interface</interface>
</get-mspinfo-uptime>
</rpc>
```

**Description** Show uptime on the extension provider PIC

**Contents** <interface>—Name of extension provider interface

---

## <get-mspinfo-virtual-memory>

---

### Usage

```
<rpc>
<get-mspinfo-virtual-memory>
<interface>interface</interface>
</get-mspinfo-virtual-memory>
</rpc>
```

**Description** Show kernel dynamic memory usage on the extension provider PIC

**Contents** <interface>—Name of extension provider interface

---

## <get-mstp-configuration-information>

---

### Usage

```
<rpc>
<get-mstp-configuration-information>
<brief/>
<detail/>
<logical-system>logical-system</logical-system>
<routing-instance>routing-instance</routing-instance>
</get-mstp-configuration-information>
</rpc>
```

**Description** Show MSTP configuration

**Contents**    <brief>—Display brief output (default)

                 <detail>—Display detailed output

                 <logical-system>—Name of logical system

                 <routing-instance>—Name of routing instance

## <get-multicast-backup-pe-address-information>

---

### Usage

```
<rpc>
  <get-multicast-backup-pe-address-information>
    <logical-system>logical-system</logical-system>
    <pe_address>pe_address</pe_address> <!-- mandatory -->
  </get-multicast-backup-pe-address-information>
</rpc>
```

**Description**    Show groups a PE address is associated with

**Contents**    <logical-system>—Name of logical system, or 'all'

                 <pe\_address>—IP address of the PE

## <get-multicast-backup-pe-groups-information>

---

### Usage

```
<rpc>
  <get-multicast-backup-pe-groups-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-multicast-backup-pe-groups-information>
</rpc>
```

**Description**    Show backup PE groups

**Contents**    <logical-system>—Name of logical system, or 'all'

                 <instance>—Name of instance

                 <group>—Show information for specified group

                 <get-multicast-backup-pe-address-information>—Show groups a PE address is associated with

## <get-multicast-flow-maps-information>

---

### Usage

```
<rpc>
```

```
<get-multicast-flow-maps-information>
<logical-system>logical-system</logical-system>
<brief/>
<detail/>
</get-multicast-flow-maps-information>
</rpc>
```

**Description** Show configured flow maps

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

---

## <get-multicast-interface-information>

### Usage

```
<rpc>
<get-multicast-interface-information>
<logical-system>logical-system</logical-system>
</get-multicast-interface-information>
</rpc>
```

**Description** Show configured interfaces

**Contents** <logical-system>—Name of logical system, or 'all'

---

## <get-multicast-next-hops-information>

### Usage

```
<rpc>
<get-multicast-next-hops-information>
<logical-system>logical-system</logical-system>
<brief/>
<detail/>
<identifier>identifier</identifier>
<inet/>
<inet6/>
</get-multicast-next-hops-information>
</rpc>
```

**Description** Show the multicast next-hop table

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<identifier>—ID of next hop

<inet>—Display IPv4 information

<inet6>—Display IPv6 information

---

### <get-multicast-pim-to-igmp-proxy-information>

---

#### Usage

```
<rpc>
  <get-multicast-pim-to-igmp-proxy-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-multicast-pim-to-igmp-proxy-information>
</rpc>
```

**Description** Show pim-to-igmp-proxy information

**Contents** <logical-system>—Name of logical system, or 'all'  
<instance>—Name of instance

---

### <get-multicast-pim-to-mld-proxy-information>

---

#### Usage

```
<rpc>
  <get-multicast-pim-to-mld-proxy-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-multicast-pim-to-mld-proxy-information>
</rpc>
```

**Description** Show pim-to-mld-proxy information

**Contents** <logical-system>—Name of logical system, or 'all'  
<instance>—Name of instance

---

### <get-multicast-route-information>

---

#### Usage

```
<rpc>
  <get-multicast-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <all/>
    <active/>
  </get-multicast-route-information>
</rpc>
```

```
<inactive/>
<brief/>
<detail/>
<extensive/>
<inet/>
<inet6/>
<group>group</group>
<source-prefix>source-prefix</source-prefix>
<regexp>regexp</regexp>
</get-multicast-route-information>
</rpc>
```

**Description** Show the multicast routing table

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of instance
- <all>—Display all route entries
- <active>—Display active route entries
- <inactive>—Display inactive route entries
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <extensive>—Display extensive output
- <inet>—Display IPv4 information
- <inet6>—Display IPv6 information
- <group>—IP address and optional prefix length of group
- <source-prefix>—IP address and optional prefix length of source for routes
- <regexp>—Regular expression for session to match

---

## <get-multicast-rpf-information>

---

### Usage

```
<rpc>
  <get-multicast-rpf-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <summary/>
    <prefix>prefix</prefix>
    <inet/>
    <inet6/>
  </get-multicast-rpf-information>
```

```
</rpc>
```

**Description** Show reverse-path forwarding (RPF) source network information

**Contents**

```
<logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<summary>—Display summary output

<prefix>—IP address and optional prefix length of host

<inet>—Display RPF information for IPv4

<inet6>—Display RPF information for IPv6
```

## <get-multicast-scope-information>

---

### Usage

```
<rpc>
  <get-multicast-scope-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <inet/>
    <inet6/>
  </get-multicast-scope-information>
</rpc>
```

**Description** Show administratively scoped multicast information

**Contents**

```
<logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<inet>—Display IPv4 information

<inet6>—Display IPv6 information
```

## <get-multicast-sessions-information>

---

### Usage

```
<rpc>
  <get-multicast-sessions-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <regexp>regexp</regexp>
  </get-multicast-sessions-information>
```

</rpc>

**Description** Show announced multicast sessions

**Contents** <logical-system>—Name of logical system, or 'all'  
  
<brief>—Display brief output (default)  
  
<detail>—Display detailed output  
  
<extensive>—Display extensive output  
  
<regexp>—Regular expression for sessions to match

---

### <get-multicast-snooping-next-hops-information>

---

**Usage**

```
<rpc>  
  <get-multicast-snooping-next-hops-information>  
    <brief/>  
    <detail/>  
    <identifier>identifier</identifier>  
  </get-multicast-snooping-next-hops-information>  
</rpc>
```

**Description** Show the multicast next-hop snooping table

**Contents** <brief>—Display brief output (default)  
  
<detail>—Display detailed output  
  
<identifier>—ID of next hop

---

### <get-multicast-snooping-route-information>

---

**Usage**

```
<rpc>  
  <get-multicast-snooping-route-information>  
    <all/>  
    <active/>  
    <inactive/>  
    <brief/>  
    <detail/>  
    <extensive/>  
    <vlan-id>vlan-id</vlan-id>  
    <mesh-group>mesh-group</mesh-group>  
    <group>group</group>  
    <source-prefix>source-prefix</source-prefix>  
    <regexp>regexp</regexp>  
    <bridge-domain>bridge-domain</bridge-domain>
```

```

    <instance>instance</instance>
  </get-multicast-snooping-route-information>
</rpc>

```

**Description** Show the multicast snooping routing table

**Contents**

- <all>—Display all route entries
- <active>—Display active route entries
- <inactive>—Display inactive route entries
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <extensive>—Display extensive output
- <vlan-id>—VLAN ID for a learning domain
- <mesh-group>—Name of a mesh-group
- <group>—IP address and optional prefix length of group
- <source-prefix>—IP address and optional prefix length of source
- <regexp>—Regular expression for session to match
- <bridge-domain>—Name of bridge-domain
- <instance>—Name of routing-instance

## <get-multicast-statistics-information>

---

### Usage

```

<rpc>
  <get-multicast-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <inet/>
    <inet6/>
  </get-multicast-statistics-information>
</rpc>

```

**Description** Show multicast statistics

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of instance
- <inet>—Display statistics for IPv4

<inet6>—Display statistics for IPv6

---

## <get-multicast-usage-information>

---

### Usage

```
<rpc>
  <get-multicast-usage-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <brief/>
    <detail/>
    <inet/>
    <inet6/>
  </get-multicast-usage-information>
</rpc>
```

**Description** Show multicast usage information

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<inet>—Display IPv4 information

<inet6>—Display IPv6 information

---

## <get-mvpn-instance-information>

---

### Usage

```
<rpc>
  <get-mvpn-instance-information>
    <logical-system>logical-system</logical-system>
    <instance-name>instance-name</instance-name>
    <summary/>
    <extensive/>
  </get-mvpn-instance-information>
</rpc>
```

**Description** Show MVPN instance

**Contents** <logical-system>—Name of logical system, or 'all'

<instance-name>—Name of MVPN instance

<summary>—Display summary output

<extensive>—Display detailed version of output

## <get-mvrp-applicant-information>

### Usage

```
<rpc>
  <get-mvrp-applicant-information>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <interface>interface</interface>
    <vlan>vlan</vlan>
  </get-mvrp-applicant-information>
</rpc>
```

**Description** Show MVRP applicant state

**Contents** <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<interface>—Name of interface

<vlan>—VLAN ID

## <get-mvrp-dynamic-vlan-memberships>

### Usage

```
<rpc>
  <get-mvrp-dynamic-vlan-memberships>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <vlan>vlan</vlan>
    <interface>interface</interface>
  </get-mvrp-dynamic-vlan-memberships>
</rpc>
```

**Description** Show MVRP dynamic VLAN memberships

**Contents** <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<vlan>—VLAN ID

<interface>—Name of interface

## <get-mvrp-information>

---

**Usage**

```
<rpc>
  <get-mvrp-information>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
  </get-mvrp-information>
</rpc>
```

**Description** Show MVRP Protocol information

**Contents** <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<get-mvrp-interface-information>—Show MVRP interface information

<get-mvrp-registration-state>—Show MVRP registration state

<get-mvrp-applicant-information>—Show MVRP applicant state

<get-mvrp-interface-statistics>—Show MVRP interface statistics

<get-mvrp-dynamic-vlan-memberships>—Show MVRP dynamic VLAN memberships

## <get-mvrp-interface-information>

---

**Usage**

```
<rpc>
  <get-mvrp-interface-information>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <interface>interface</interface>
  </get-mvrp-interface-information>
</rpc>
```

**Description** Show MVRP interface information

**Contents** <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<interface>—Name of interface

## <get-mvrp-interface-statistics>

---

**Usage**

```
<rpc>
```

```

<get-mvrp-interface-statistics>
  <logical-system>logical-system</logical-system>
  <routing-instance>routing-instance</routing-instance>
  <interface>interface</interface>
</get-mvrp-interface-statistics>
</rpc>

```

**Description** Show MVRP interface statistics

**Contents** <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<interface>—Name of interface

### <get-mvrp-registration-state>

---

**Usage**

```

<rpc>
  <get-mvrp-registration-state>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <interface>interface</interface>
    <vlan>vlan</vlan>
  </get-mvrp-registration-state>
</rpc>

```

**Description** Show MVRP registration state

**Contents** <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<interface>—Name of interface

<vlan>—VLAN ID

### <get-nai-mip-binding-information>

---

**Usage**

```

<rpc>
  <get-nai-mip-binding-information>
    <network-access-identifier>network-access-identifier</network-access-identifier>
  <!-- mandatory -->
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-nai-mip-binding-information>
</rpc>

```

**Description** Show binding detail based on nai

**Contents** <network-access-identifier>—Show binding detail based on nai  
<routing-instance>—Name of routing instance  
<logical-system>—Name of logical system

---

### <get-operational-routing-instance-information>

---

**Usage**

```
<rpc>  
  <get-operational-routing-instance-information/>  
</rpc>
```

**Description** Show operational routing instances

---

### <get-ospf-backup-coverage-information>

---

**Usage**

```
<rpc>  
  <get-ospf-backup-coverage-information>  
    <logical-system>logical-system</logical-system>  
    <instance>instance</instance>  
    <topology>topology</topology>  
  </get-ospf-backup-coverage-information>  
</rpc>
```

**Description** Show OSPF backup coverage

**Contents** <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology
- ipv4-multicast - IPv4 multicast topology

- name - Topology name

## <get-ospf-backup-lsp-information>

---

### Usage

```
<rpc>
  <get-ospf-backup-lsp-information>
    <logical-system>logical-system</logical-system>
  </get-ospf-backup-lsp-information>
</rpc>
```

**Description** Show OSPF MPLS backup LSP information

**Contents** <logical-system>—Name of logical system, or 'all'

## <get-ospf-backup-neighbor-information>

---

### Usage

```
<rpc>
  <get-ospf-backup-neighbor-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <topology>topology</topology>
    <area>area</area>
  </get-ospf-backup-neighbor-information>
</rpc>
```

**Description** Show OSPF backup neighbors

**Contents** <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<area>—OSPF area ID

---

## <get-ospf-backup-spf-information>

---

### Usage

```
<rpc>
  <get-ospf-backup-spf-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <topology>topology</topology>
    <area>area</area>
    <no-coverage/>
    <node-id>node-id</node-id>
    <brief/>
    <detail/>
  </get-ospf-backup-spf-information>
</rpc>
```

**Description** Show OSPF backup SPF calculations information

**Contents** <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<area>—OSPF area ID

<no-coverage>—Entries with no backup coverage

<node-id>—Display nodes matching the node-id

<brief>—Display brief output (default)

<detail>—Display detailed output

## <get-ospf-context-id-information>

### Usage

```

<rpc>
  <get-ospf-context-id-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <context-id>context-id</context-id>
    <area>area</area>
    <instance>instance</instance>
  </get-ospf-context-id-information>
</rpc>

```

**Description** Show OSPF context identifier information

**Contents**

- <logical-system>—Name of logical system, or 'all'
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <context-id>—IP address representing a context identifier
- <area>—OSPF area ID
- <instance>—Name of OSPF instance

## <get-ospf-database-information>

### Usage

```

<rpc>
  <get-ospf-database-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <summary/>
    <router/>
    <network/>
    <netsummary/>
    <asbrsummary/>
    <external/>
    <nssa/>
    <link-local/>
    <opaque-area/>
    <area>area</area>
    <lsa-id>lsa-id</lsa-id>
    <advertising-router>advertising-router</advertising-router>
    <instance>instance</instance>
  </get-ospf-database-information>

```

</rpc>

**Description** Show OSPF link-state database

**Contents** <logical-system>—Name of logical system, or 'all'

- self - Router ID of this router
- router-id - Router ID of advertising router

<brief>—Display brief output (default)

- self - Router ID of this router
- router-id - Router ID of advertising router

<detail>—Display detailed output

- self - Router ID of this router
- router-id - Router ID of advertising router

<extensive>—Display extensive output

- self - Router ID of this router
- router-id - Router ID of advertising router

<summary>—Display summary output

- self - Router ID of this router
- router-id - Router ID of advertising router

<router>—Router link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<network>—Network link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<netsummary>—Summary network link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<asbrsummary>—Summary AS boundary router link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<external>—External link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<nssa>—Not-so-stubby area link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<link-local>—Link local link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<opaque-area>—Opaque area-scope link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<area>—OSPF area ID

- self - Router ID of this router
- router-id - Router ID of advertising router

<lsa-id>—Link-state advertisement ID

- self - Router ID of this router
- router-id - Router ID of advertising router

<advertising-router>—Router ID of advertising router

- self - Router ID of this router
- router-id - Router ID of advertising router

<instance>—Name of OSPF instance

---

## <get-ospf-interface-information>

---

### Usage

```
<rpc>
  <get-ospf-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <interface-name>interface-name</interface-name>
    <area>area</area>
    <instance>instance</instance>
  </get-ospf-interface-information>
```

</rpc>

**Description** Show OSPF interface status information

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<interface-name>—Name of logical interface

<area>—OSPF area ID

<instance>—Name of OSPF instance

---

## <get-ospf-io-statistics-information>

---

### Usage

```
<rpc>
  <get-ospf-io-statistics-information>
    <logical-system>logical-system</logical-system>
  </get-ospf-io-statistics-information>
</rpc>
```

**Description** Show OSPF I/O statistics

**Contents** <logical-system>—Name of logical system, or 'all'

---

## <get-ospf-log-information>

---

### Usage

```
<rpc>
  <get-ospf-log-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <topology>topology</topology>
  </get-ospf-log-information>
</rpc>
```

**Description** Show shortest-path-first calculations from OSPF log

**Contents** <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology

- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

## <get-ospf-neighbor-information>

### Usage

```
<rpc>
<get-ospf-neighbor-information>
<logical-system>logical-system</logical-system>
<brief/>
<detail/>
<extensive/>
<interface>interface</interface>
<area>area</area>
<neighbor>neighbor</neighbor>
<instance>instance</instance>
</get-ospf-neighbor-information>
</rpc>
```

**Description** Show OSPF neighbor status information

**Contents** <logical-system>—Name of logical system, or 'all'

- all - Show all instances
- instance-name - Name of OSPF instance

<brief>—Display brief output (default)

- all - Show all instances
- instance-name - Name of OSPF instance

<detail>—Display detailed output

- all - Show all instances
- instance-name - Name of OSPF instance

<extensive>—Display extensive output

- all - Show all instances
- instance-name - Name of OSPF instance

<interface>—Name of logical interface

- all - Show all instances
- instance-name - Name of OSPF instance

<area>—OSPF area ID

- all - Show all instances
- instance-name - Name of OSPF instance

<neighbor>—IP address or ID of neighbor

- all - Show all instances
- instance-name - Name of OSPF instance

<instance>—Name of OSPF instance

- all - Show all instances
- instance-name - Name of OSPF instance

---

## <get-ospf-overview-information>

---

### Usage

```
<rpc>
  <get-ospf-overview-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <extensive/>
    <instance>instance</instance>
  </get-ospf-overview-information>
</rpc>
```

**Description** Show overview of OSPF information

**Contents** <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<extensive>—Display extensive output

<instance>—Name of OSPF instance

## <get-ospf-route-information>

### Usage

```

<rpc>
  <get-ospf-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <topology>topology</topology>
    <intra/>
    <inter/>
    <extern/>
    <router/>
    <abr/>
    <asbr/>
    <network/>
    <no-backup-coverage/>
    <destination>destination</destination>
    <brief/>
    <detail/>
    <extensive/>
  </get-ospf-route-information>
</rpc>

```

**Description** Show OSPF routing table

**Contents** <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<intra>—Display intra-area routes

<inter>—Display inter-area routes

<extern>—Display external routes

<router>—Display routes to all routers

<abr>—Display routes to area border routers

<asbr>—Display routes to AS border routers

<network>—Display routes to networks

<no-backup-coverage>—Display routes with no backup coverage

<destination>—IP address and optional prefix length of destination

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

---

## <get-ospf-statistics-information>

### Usage

```
<rpc>
  <get-ospf-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-ospf-statistics-information>
</rpc>
```

**Description** Show OSPF statistics

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of OSPF instance

---

## <get-ospf3-backup-coverage-information>

### Usage

```
<rpc>
  <get-ospf3-backup-coverage-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-backup-coverage-information>
</rpc>
```

**Description** Show OSPFv3 backup coverage

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm

- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPF instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

## <get-ospf3-backup-lsp-information>

### Usage

```
<rpc>
<get-ospf3-backup-lsp-information>
<logical-system>logical-system</logical-system>
<realm>realm</realm>
</get-ospf3-backup-lsp-information>
</rpc>
```

**Description** Show OSPFv3 MPLS backup LSP information

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

## <get-ospf3-backup-neighbor-information>

### Usage

```
<rpc>
<get-ospf3-backup-neighbor-information>
<logical-system>logical-system</logical-system>
```

```
<instance>instance</instance>
<area>area</area>
</get-ospf3-backup-neighbor-information>
</rpc>
```

**Description** Show OSPFv3 backup neighbors

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of OSPF instance

<area>—OSPF area ID

---

## <get-ospf3-backup-spf-information>

---

### Usage

```
<rpc>
<get-ospf3-backup-spf-information>
<logical-system>logical-system</logical-system>
<instance>instance</instance>
<realm>realm</realm>
<area>area</area>
<no-coverage/>
<node-id>node-id</node-id>
<brief/>
<detail/>
</get-ospf3-backup-spf-information>
</rpc>
```

**Description** Show OSPFv3 backup SPF calculations information

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPF instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm

- ipv4-multicast - IPv4 multicast realm

<area>—OSPF area ID

<no-coverage>—Entries with no backup coverage

<node-id>—Display nodes matching the node-id

<brief>—Display brief output (default)

<detail>—Display detailed output

## <get-ospf3-database-information>

### Usage

```
<rpc>
<get-ospf3-database-information>
<logical-system>logical-system</logical-system>
<brief/>
<detail/>
<extensive/>
<summary/>
<router/>
<network/>
<inter-area-prefix/>
<inter-area-router/>
<external/>
<nssa/>
<link/>
<link-local/>
<intra-area-prefix/>
<area>area</area>
<lsa-id>lsa-id</lsa-id>
<advertising-router>advertising-router</advertising-router>
<instance>instance</instance>
<realm>realm</realm>
</get-ospf3-database-information>
</rpc>
```

**Description** Show OSPFv3 link-state database

**Contents** <logical-system>—Name of logical system, or 'all'

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<brief>—Display brief output (default)

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<detail>—Display detailed output

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<extensive>—Display extensive output

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<summary>—Display summary output

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<router>—Router LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<network>—Network LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<inter-area-prefix>—Inter-area-prefix LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<inter-area-router>—Inter-area-router LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<external>—External LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<nssa>—NSSA LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<link>—Link LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<link-local>—Link-local LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<intra-area-prefix>—Intra-area-prefix LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—Area ID of OSPFv3 area

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<lsa-id>—ID of link-state advertisement

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<advertising-router>—Router ID of advertising router

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

## <get-ospf3-interface-information>

### Usage

```
<rpc>
  <get-ospf3-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <interface-name>interface-name</interface-name>
    <area>area</area>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-interface-information>
</rpc>
```

**Description** Show OSPFv3 interface status

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<brief>—Display brief output (default)

- ipv6-multicast - IPv6 multicast realm

- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<detail>—Display detailed output

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<extensive>—Display extensive output

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<interface-name>—Name of logical interface

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—OSPF area ID

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

---

## <get-ospf3-io-statistics-information>

---

### Usage

```
<rpc>  
<get-ospf3-io-statistics-information>  
<logical-system>logical-system</logical-system>
```

```

    </get-ospf3-io-statistics-information>
  </rpc>

```

**Description** Show OSPFv3 I/O statistics

**Contents** <logical-system>—Name of logical system, or 'all'

## <get-ospf3-log-information>

### Usage

```

<rpc>
  <get-ospf3-log-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-log-information>
</rpc>

```

**Description** Show OSPFv3 SPF log

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

## <get-ospf3-neighbor-information>

### Usage

```

<rpc>
  <get-ospf3-neighbor-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>

```

```
<extensive/>
<interface>interface</interface>
<area>area</area>
<neighbor>neighbor</neighbor>
<instance>instance</instance>
<realm>realm</realm>
</get-ospf3-neighbor-information>
</rpc>
```

**Description** Show OSPFv3 neighbor status

**Contents** <logical-system>—Name of logical system, or 'all'

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<brief>—Display brief output (default)

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<detail>—Display detailed output

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<extensive>—Display extensive output

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<interface>—Name of logical interface

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—OSPF area ID

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<neighbor>—IP address or ID of neighbor

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

---

## <get-ospf3-overview-information>

### Usage

<rpc>

```
<get-ospf3-overview-information>
<logical-system>logical-system</logical-system>
<brief/>
<extensive/>
<instance>instance</instance>
<realm>realm</realm>
</get-ospf3-overview-information>
</rpc>
```

**Description** Show overview of OSPFv3 information

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<brief>—Display brief output (default)

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<extensive>—Display extensive output

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

---

## <get-ospf3-route-information>

### Usage

```
<rpc>
<get-ospf3-route-information>
```

```

<logical-system>logical-system</logical-system>
<instance>instance</instance>
<realm>realm</realm>
<intra/>
<inter/>
<extern/>
<router/>
<abr/>
<asbr/>
<transit/>
<network/>
<no-backup-coverage/>
<destination>destination</destination>
<brief/>
<detail/>
<extensive/>
</get-ospf3-route-information>
</rpc>

```

**Description** Show the OSPFv3 routing table

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPF instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<intra>—Display intra-area routes

<inter>—Display inter-area routes

<extern>—Display external routes

<router>—Display routes to all routers

<abr>—Display routes to area border routers

<asbr>—Display routes to AS border routers

<transit>—Display routes to pseudonodes

<network>—Display routes to networks

<no-backup-coverage>—Display routes with no backup coverage

<destination>—Address and optional prefix length of destination

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

---

## <get-ospf3-statistics-information>

---

### Usage

```
<rpc>
  <get-ospf3-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-statistics-information>
</rpc>
```

**Description** Show OSPFv3 statistics

**Contents** <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

## <get-package-backup-information>

---

**Usage**

```
<rpc>
  <get-package-backup-information/>
</rpc>
```

**Description** Show status of old system software packages

## <get-packet-distribution-information>

---

**Usage**

```
<rpc>
  <get-packet-distribution-information>

  <packet-size-distribution-information>packet-size-distribution-information</packet-size-distribution-information>

  </get-packet-distribution-information>
</rpc>
```

**Description** Show packet size distribution

**Contents** <packet-size-distribution-information>—Name of service, wildcard, or 'all'

## <get-passive-monitoring-error-information>

---

**Usage**

```
<rpc>
  <get-passive-monitoring-error-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-passive-monitoring-error-information>
</rpc>
```

**Description** Show error statistics

**Contents** <interface-name>—Name of monitoring interface, wildcard, or 'all'

## <get-passive-monitoring-flow-information>

---

**Usage**

```
<rpc>
  <get-passive-monitoring-flow-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-passive-monitoring-flow-information>
</rpc>
```

**Description** Show flow statistics

**Contents** <interface-name>—Name of monitoring interface, wildcard, or 'all'

---

### <get-passive-monitoring-information>

---

**Usage**

```
<rpc>  
  <get-passive-monitoring-information>  
  </get-passive-monitoring-information>  
</rpc>
```

**Description** Show information about passive monitoring

**Contents** <get-passive-monitoring-usage-information>—Show CPU utilization  
<get-passive-monitoring-memory-information>—Show memory utilization  
<get-passive-monitoring-flow-information>—Show flow statistics  
<get-passive-monitoring-error-information>—Show error statistics  
<get-passive-monitoring-status-information>—Show status information

---

### <get-passive-monitoring-memory-information>

---

**Usage**

```
<rpc>  
  <get-passive-monitoring-memory-information>  
    <interface-name>interface-name</interface-name> <!-- mandatory -->  
  </get-passive-monitoring-memory-information>  
</rpc>
```

**Description** Show memory utilization

**Contents** <interface-name>—Name of monitoring interface, wildcard, or 'all'

---

### <get-passive-monitoring-status-information>

---

**Usage**

```
<rpc>  
  <get-passive-monitoring-status-information>  
    <interface-name>interface-name</interface-name> <!-- mandatory -->  
  </get-passive-monitoring-status-information>  
</rpc>
```

**Description** Show status information

**Contents** <interface-name>—Name of monitoring interface, wildcard, or 'all'

### <get-passive-monitoring-usage-information>

---

**Usage**

```
<rpc>
  <get-passive-monitoring-usage-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-passive-monitoring-usage-information>
</rpc>
```

**Description** Show CPU utilization

**Contents** <interface-name>—Name of monitoring interface, wildcard, or 'all'

### <get-pdp-diagnostics-per-apn>

---

**Usage**

```
<rpc>
  <get-pdp-diagnostics-per-apn>
    <apn>apn</apn> <!-- mandatory -->
  </get-pdp-diagnostics-per-apn>
</rpc>
```

**Description** Show PDP context diagnostics information

**Contents** <apn>—APN for which to show PDP Contexts

### <get-pfe-information>

---

**Usage**

```
<rpc>
  <get-pfe-information/>
</rpc>
```

**Description** Show list of Packet Forwarding Engine components

### <get-pfe-statistics>

---

**Usage**

```
<rpc>
  <get-pfe-statistics>
    <sfm>sfm</sfm>
    <feb>feb</feb>
    <cid>cid</cid>
    <lcc>lcc</lcc>
```

```
<fpc>fpc</fpc>
</get-pfe-statistics>
</rpc>
```

**Description** Show Packet Forwarding Engine traffic statistics

**Contents** <protocol>—Show detailed Packet Forwarding Engine traffic statistics for a protocol

<multicast>—Show Multicast statistics

<cpu>—Show CPU statistics

<egress-queues>—Show egress-queues statistics

<sfm>—Slot number of SFM for which to show traffic statistics

<feb>—Slot number of FEB for which to show traffic statistics

<lcc>—Slot number of LCC that houses FPC

<fpc>—Slot number of FPC for which to show traffic statistics

---

## <get-pgcpd-active-configuration>

**Usage**

```
<rpc>
<get-pgcpd-active-configuration>
</get-pgcpd-active-configuration>
</rpc>
```

**Description** Show pgcpd active-configuration

**Contents** <get-service-pgcp-active-configuration-gateway>—Show gateway active configuration

---

## <get-pgm-nak>

**Usage**

```
<rpc>
<get-pgm-nak/>
</rpc>
```

**Description** Show PGM negative acknowledgments

---

## <get-pgm-source-path-messages>

**Usage**

```
<rpc>
<get-pgm-source-path-messages/>
```

```
</rpc>
```

**Description** Show PGM source path messages

---

### <get-pgm-statistics>

---

**Usage**

```
<rpc>
  <get-pgm-statistics/>
</rpc>
```

**Description** Show PGM packet statistics

---

### <get-pic-detail>

---

**Usage**

```
<rpc>
  <get-pic-detail>
    <fpc-slot>fpc-slot</fpc-slot>
    <pic-slot>pic-slot</pic-slot> <!-- mandatory -->
  </get-pic-detail>
</rpc>
```

**Description** Show Physical Interface Card state, type, and uptime

**Contents** <fpc-slot>—Slot number of FPC that houses PIC

<pic-slot>—PIC slot number

---

### <get-pic-information>

---

**Usage**

```
<rpc>
  <get-pic-information>
    <slot>slot</slot>
  </get-pic-information>
</rpc>
```

**Description** Show Physical Interface Cards installed in FPC

**Contents** <slot>—FPC slot number

## <get-pim-bootstrap-information>

---

**Usage**

```
<rpc>
  <get-pim-bootstrap-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-pim-bootstrap-information>
</rpc>
```

**Description** Show PIM bootstrap routers

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

## <get-pim-data-mdt-join-information>

---

**Usage**

```
<rpc>
  <get-pim-data-mdt-join-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance> <!-- mandatory -->
  </get-pim-data-mdt-join-information>
</rpc>
```

**Description** Show received PIM data-mdt-joins

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of PIM instance

## <get-pim-interfaces-information>

---

**Usage**

```
<rpc>
  <get-pim-interfaces-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <interface-name>interface-name</interface-name>
    <inet/>
    <inet6/>
  </get-pim-interfaces-information>
</rpc>
```

**Description** Show PIM interfaces

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<interface-name>—Name of interface

<inet>—Display IPv4 interfaces

<inet6>—Display IPv6 interfaces

## <get-pim-join-information>

---

### Usage

```
<rpc>
  <get-pim-join-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <summary/>
    <brief/>
    <detail/>
    <extensive/>
    <range>range</range>
    <inet/>
    <inet6/>
  </get-pim-join-information>
</rpc>
```

**Description** Show PIM join/prune state

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<summary>—Display summary output

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<range>—IP address and optional prefix length of group

<inet>—Display IPv4 join/prune state

<inet6>—Display IPv6 join/prune state

## <get-pim-mdt-information>

---

### Usage

```
<rpc>
  <get-pim-mdt-information>
```

```
<logical-system>logical-system</logical-system>
<outgoing/>
<incoming/>
<brief/>
<detail/>
<extensive/>
<range>range</range>
<instance>instance</instance> <!-- mandatory -->
</get-pim-mdt-information>
</rpc>
```

**Description** Show state of PIM multicast data tunnels

**Contents** <logical-system>—Name of logical system, or 'all'

<get-pim-data-mdt-join-information>—Show received PIM data-mdt-joins

<outgoing>—Display outgoing multicast data tunnels

<incoming>—Display incoming multicast data tunnels

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<range>—IP address and optional prefix length of group

<instance>—Name of PIM instance

---

## <get-pim-mvpn-information>

---

### Usage

```
<rpc>
<get-pim-mvpn-information>
<logical-system>logical-system</logical-system>
</get-pim-mvpn-information>
</rpc>
```

**Description** Show PIM MVPN instances

**Contents** <logical-system>—Name of logical system, or 'all'

---

## <get-pim-neighbors-information>

---

### Usage

```
<rpc>
<get-pim-neighbors-information>
<logical-system>logical-system</logical-system>
```

```

    <instance>instance</instance>
    <brief/>
    <detail/>
    <inet/>
    <inet6/>
  </get-pim-neighbors-information>
</rpc>

```

**Description** Show PIM neighbors

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<inet>—Display IPv4 neighbors

<inet6>—Display IPv6 neighbors

## <get-pim-rps-information>

### Usage

```

<rpc>
  <get-pim-rps-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <brief/>
    <detail/>
    <extensive/>
    <group-address>group-address</group-address>
    <inet/>
    <inet6/>
  </get-pim-rps-information>
</rpc>

```

**Description** Show PIM rendezvous points

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<group-address>—IP address of group

<inet>—Display IPv4 rendezvous points

<inet6>—Display IPv6 rendezvous points

## <get-pim-source-information>

---

### Usage

```
<rpc>
  <get-pim-source-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <brief/>
    <detail/>
    <source>source</source>
    <inet/>
    <inet6/>
  </get-pim-source-information>
</rpc>
```

**Description** Show the PIM source RPF state

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<source>—IP address and optional prefix length of source RPFs

<inet>—Display IPv4 PIM source RPF state

<inet6>—Display IPv6 PIM source RPF state

## <get-pim-statistics-information>

---

### Usage

```
<rpc>
  <get-pim-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <interface>interface</interface>
    <inet/>
    <inet6/>
  </get-pim-statistics-information>
</rpc>
```

**Description** Show PIM statistics

**Contents** <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<interface>—Name of interface

<inet>—Display IPv4 PIM statistics

<inet6>—Display IPv6 PIM statistics

## <get-pki-ca-certificate>

---

### Usage

```
<rpc>
  <get-pki-ca-certificate>
    <ca-profile>ca-profile</ca-profile>
    <brief/>
    <detail/>
  </get-pki-ca-certificate>
</rpc>
```

**Description** Show certificate-authority certificate information

**Contents** <ca-profile>—Certificate authority profile

<brief>—Display brief output

<detail>—Display detailed output

## <get-pki-certificate-request>

---

### Usage

```
<rpc>
  <get-pki-certificate-request>
    <certificate-id>certificate-id</certificate-id>
    <brief/>
    <detail/>
  </get-pki-certificate-request>
</rpc>
```

**Description** Show PKCS-10 certificate request information

**Contents** <certificate-id>—Certificate identifier

<brief>—Display brief output

<detail>—Display detailed output

## <get-pki-crl>

---

**Usage**

```
<rpc>
  <get-pki-crl>
    <ca-profile>ca-profile</ca-profile>
    <brief/>
    <detail/>
  </get-pki-crl>
</rpc>
```

**Description** Show certificate revocation list information

**Contents** <ca-profile>—Certificate authority profile

<brief>—Display brief output

<detail>—Display detailed output

## <get-pki-local-certificate>

---

**Usage**

```
<rpc>
  <get-pki-local-certificate>
    <certificate-choice>certificate-choice</certificate-choice>
    <certificate-id>certificate-id</certificate-id>
    <system-generated/>
    <brief/>
    <detail/>
  </get-pki-local-certificate>
</rpc>
```

**Description** Show router certificate information

**Contents** <certificate-id>—Certificate identifier

<system-generated>—Autogenerated self-signed certificate

<brief>—Display brief output

<detail>—Display detailed output

## <get-power-budget-information>

---

**Usage**

```
<rpc>
  <get-power-budget-information/>
</rpc>
```

**Description** Show power budget chassis information

### <get-power-management>

---

**Usage**

```
<rpc>
  <get-power-management/>
</rpc>
```

**Description** Show power ratings for the router

### <get-power-usage-information>

---

**Usage**

```
<rpc>
  <get-power-usage-information>
</get-power-usage-information>
</rpc>
```

**Description** Show Chassis Power Usages

**Contents** <get-fru-power-on-sequence>—Show chassis fru power on sequence

### <get-ppp-address-pool-inforamation>

---

**Usage**

```
<rpc>
  <get-ppp-address-pool-inforamation>
  <detail/>
  <pool-name>pool-name</pool-name> <!-- mandatory -->
</get-ppp-address-pool-inforamation>
</rpc>
```

**Description** Show PPP address pool information

**Contents** <detail>—Display detailed information

<pool-name>—Address pool name

### <get-ppp-interface-information>

---

**Usage**

```
<rpc>
  <get-ppp-interface-information>
  <interface-name>interface-name</interface-name> <!-- mandatory -->
  <extensive/>
```

```
<terse/>
</get-ppp-interface-information>
</rpc>
```

**Description** Show PPP interface information

**Contents** <interface-name>—Interface name  
<extensive>—Display detailed output  
<terse>—Display terse output

---

## <get-ppp-statistics-information>

### Usage

```
<rpc>
<get-ppp-statistics-information>
<detail/>
<memory/>
</get-ppp-statistics-information>
</rpc>
```

**Description** Show PPP statistics

**Contents** <detail>—Display detailed statistics  
<memory>—Display PPP process memory statistics

---

## <get-ppp-summary-information>

### Usage

```
<rpc>
<get-ppp-summary-information/>
</rpc>
```

**Description** Show PPP summary information

---

## <get-ppp-user-aaa-test-result>

### Usage

```
<rpc>
<get-ppp-user-aaa-test-result>
<user>user</user> <!-- mandatory -->
<password>password</password>
<profile>profile</profile>
<logical-system>logical-system</logical-system>
<routing-instance>routing-instance</routing-instance>
<terminate-code-choice>terminate-code-choice</terminate-code-choice>
```

```

    <terminate-code>terminate-code</terminate-code>
    <l2tp-terminate-code>l2tp-terminate-code</l2tp-terminate-code>
  </get-ppp-user-aaa-test-result>
</rpc>

```

**Description** Test the aaa servers for a ppp user

**Contents** <user>—The username to test

- username - The username to test
- access-profile-name - Specify the access profile name which to use for user
- logical-system-name - Specify the logical-system in which to authenticate user
- routing-instance-name - Specify the routing-instance in which to authenticate use
- admin-logout - Terminated-id with default mapping to 10
- authenticate-authenticator-timeout - Terminated-id with default mapping to 10
- authenticate-challenge-timeout - Terminated-id with default mapping to 17
- authenticate-chap-no-resources - Terminated-id with default mapping to 10
- authenticate-chap-peer-authenticator-timeout - Terminated-id with default mapping to 17
- authenticate-chap-peer-challenge-timeout - Terminated-id with default mapping to 17
- authenticate-deny-by-peer - Terminated-id with default mapping to 4
- authenticate-eap-challenge-larger-than-mtu - Terminated-id with default mapping to 10
- authenticate-eap-peer-authenticator-timeout - Terminated-id with default mapping to 10
- authenticate-eap-request-timeout - Terminated-id with default mapping to 10
- authenticate-inactivity-timeout - Terminated-id with default mapping to 8
- authenticate-max-requests - Terminated-id with default mapping to 10
- authenticate-no-authenticator - Terminated-id with default mapping to 10
- authenticate-no-resources - Terminated-id with default mapping to 10
- authenticate-pap-peer-authenticator-timeout - Terminated-id with default mapping to 10
- authenticate-pap-request-timeout - Terminated-id with default mapping to 5
- authenticate-session-timeout - Terminated-id with default mapping to 10
- authenticate-too-many-requests - Terminated-id with default mapping to 17
- authenticate-tunnel-fail-immediate - Terminated-id with default mapping to 10

- authenticate-tunnel-unsupported-tunnel-type - Terminated-id with default mapping to 10
- bridging-admin-disable - Terminated-id with default mapping to 10
- bridging-failed-to-activate-family-bridging - Terminated-id with default mapping to 10
- bridging-inhibited-by-authentication - Terminated-id with default mapping to 10
- bridging-link-down - Terminated-id with default mapping to 10
- bridging-max-configure-exceeded - Terminated-id with default mapping to 10
- bridging-max-passive-retries-exceeded - Terminated-id with default mapping to 10
- bridging-max-sevice-disable - Terminated-id with default mapping to 10
- bridging-no-local-ieee802-tagged-frame-format - Terminated-id with default mapping to 10
- bridging-no-local-mac-frame-format - Terminated-id with default mapping to 2
- bridging-no-peer-ieee802-tagged-frame-format - Terminated-id with default mapping to 10
- bridging-no-peer-mac-fram-fromat - Terminated-id with default mapping to 8
- bridging-no-service - Terminated-id with default mapping to 10
- bridging-renegotiate-rx-conf-ack - Terminated-id with default mapping to 10
- bridging-renegotiate-rx-conf-nak - Terminated-id with default mapping to 10
- bridging-renegotiate-rx-conf-rej - Terminated-id with default mapping to 10
- bridging-renegotiate-rx-conf-req - Terminated-id with default mapping to 10
- bridging-stale-stacking - Terminated-id with default mapping to 10
- bridging-terminate-code-rej - Terminated-id with default mapping to 10
- bridging-terminate-term-ack - Terminated-id with default mapping to 10
- bridging-terminate-term-req - Terminated-id with default mapping to 10
- bundle-fail-create - Terminated-id with default mapping to 10
- bundle-fail-engine-add - Terminated-id with default mapping to 10
- bundle-fail-fragment-size-mismatch - Terminated-id with default mapping to 10
- bundle-fail-fragmentation-location - Terminated-id with default mapping to 10
- bundle-fail-fragmentation-mismatch - Terminated-id with default mapping to 10
- bundle-fail-hash-link-selection-mismatch - Terminated-id with default mapping to 10
- bundle-fail-join - Terminated-id with default mapping to 10

- bundle-fail-local-mped-not-set-yet - Terminated-id with default mapping to 10
- bundle-fail-local-mrru-mismatch - Terminated-id with default mapping to 10
- bundle-fail-local-mru-mismatch - Terminated-id with default mapping to 10
- bundle-fail-peer-endpoint-discriminator-mismatch - Terminated-id with default mapping to 10
- bundle-fail-peer-mrru-mismatch - Terminated-id with default mapping to 6
- bundle-fail-reassembly-location - Terminated-id with default mapping to 10
- bundle-fail-reassembly-mismatch - Terminated-id with default mapping to 10
- bundle-fail-record-network - Terminated-id with default mapping to 10
- bundle-fail-server-location-mismatch - Terminated-id with default mapping to 10
- bundle-fail-static-link - Terminated-id with default mapping to 10
- dynamic-profile-instantiation-failed - Terminated-id with default mapping to 9
- failover-during-authentication - Terminated-id with default mapping to 17
- interface-admin-disable - Terminated-id with default mapping to 6
- interface-no-hardware - Terminated-id with default mapping to 8
- ip-admin-disable - Terminated-id with default mapping to 10
- ip-failed-to-activate-family-inet - Terminated-id with default mapping to 10

---

## <get-pppoe-interface-information>

---

### Usage

```
<rpc>
  <get-pppoe-interface-information>
    <brief/>
    <detail/>
    <extensive/>
    <interface-name>interface-name</interface-name>
  </get-pppoe-interface-information>
</rpc>
```

**Description** Show interface information

**Contents**

- <brief>—Show brief output
- <detail>—Show detailed output
- <extensive>—Show extensive output
- <interface-name>—Name of PPPoE logical interface

## <get-pppoe-service-name-table-information>

### Usage

```
<rpc>
  <get-pppoe-service-name-table-information>
    <table-name>table-name</table-name>
  </get-pppoe-service-name-table-information>
</rpc>
```

**Description** Show service name table information

**Contents** <table-name>—Name of PPPoE service name table

## <get-pppoe-session-information>

### Usage

```
<rpc>
  <get-pppoe-session-information>
    <service>service</service>
    <aci>aci</aci>
    <ari>ari</ari>
  </get-pppoe-session-information>
</rpc>
```

**Description** Show active PPPoE session information

**Contents** <service>—Name of PPPoE service

<aci>—Agent Circuit ID

<ari>—Agent Remote ID

## <get-pppoe-statistics-information>

### Usage

```
<rpc>
  <get-pppoe-statistics-information>

  <underlying-interface-name>underlying-interface-name</underlying-interface-name>

  </get-pppoe-statistics-information>
</rpc>
```

**Description** Show PPPoE-related interface statistics

**Contents** <underlying-interface-name>—Name of PPPoE underlying logical interface

## <get-pppoe-underlying-interface-information>

---

**Usage**

```
<rpc>
  <get-pppoe-underlying-interface-information>
    <brief/>
    <detail/>
    <extensive/>

  <underlying-interface-name>underlying-interface-name</underlying-interface-name>

  </get-pppoe-underlying-interface-information>
</rpc>
```

**Description** Show underlying interface information

**Contents** <brief>—Show brief output

<detail>—Show detailed output

<extensive>—Show extensive output

<underlying-interface-name>—Name of PPPoE underlying logical interface

## <get-pppoe-version>

---

**Usage**

```
<rpc>
  <get-pppoe-version/>
</rpc>
```

**Description** Show version

## <get-probe-results>

---

**Usage**

```
<rpc>
  <get-probe-results>
    <owner>owner</owner>
    <test>test</test>
  </get-probe-results>
</rpc>
```

**Description** Show probe results

**Contents** <owner>—Name of owner

<test>—Name of test

## <get-process-health-information>

---

### Usage

```
<rpc>
  <get-process-health-information>
    <name_pid_choice>name_pid_choice</name_pid_choice>
    <process-name>process-name</process-name>
    <pid>pid</pid>
  </get-process-health-information>
</rpc>
```

**Description** Show process health information

**Contents** <process-name>—Process name  
  
<pid>—Process identifier

## <get-psd-information>

---

### Usage

```
<rpc>
  <get-psd-information/>
</rpc>
```

**Description** Show Protected System Domain (PSD) status

## <get-ntp-clock>

---

### Usage

```
<rpc>
  <get-ntp-clock>
    <brief/>
    <detail/>
  </get-ntp-clock>
</rpc>
```

**Description** Show clock details

**Contents** <brief>—Display brief output  
  
<detail>—Display detail output

## <get-ntp-global-information>

---

**Usage**

```
<rpc>
  <get-ntp-global-information/>
</rpc>
```

**Description** Show NTP related global information

## <get-ntp-lock-status>

---

**Usage**

```
<rpc>
  <get-ntp-lock-status>
    <brief/>
    <detail/>
  </get-ntp-lock-status>
</rpc>
```

**Description** Show NTP slave clock locking status

**Contents** <brief>—Display brief output  
<detail>—Display detail output

## <get-ntp-master>

---

**Usage**

```
<rpc>
  <get-ntp-master>
    <interface>interface</interface>
    <brief/>
    <detail/>
  </get-ntp-master>
</rpc>
```

**Description** Show interfaces that drive clock to downstream slaves

**Contents** <interface>—Name of physical interface  
<brief>—Display brief output  
<detail>—Display detail output

## <get-ptp-port>

---

**Usage**

```

<rpc>
  <get-ptp-port>
    <remote-ip>remote-ip</remote-ip>
    <brief/>
    <detail/>
  </get-ptp-port>
</rpc>

```

**Description** Show port stream details

**Contents** <remote-ip>—IP address of remote peer

<brief>—Display brief output

<detail>—Display detail output

## <get-ptp-slave>

---

**Usage**

```

<rpc>
  <get-ptp-slave>
    <interface>interface</interface>
    <brief/>
    <detail/>
  </get-ptp-slave>
</rpc>

```

**Description** Show interfaces that receive clock from upstream

**Contents** <interface>—Name of physical interface

<brief>—Display brief output

<detail>—Display detail output

## <get-ptp-statistics>

---

**Usage**

```

<rpc>
  <get-ptp-statistics>
    <brief/>
    <detail/>
  </get-ptp-statistics>
</rpc>

```

<b>Description</b>	Show PTP statistics
<b>Contents</b>	<brief>—Display brief output  <detail>—Display detail output

---

### <get-r2cp-interface-information>

---

#### Usage

```
<rpc>  
  <get-r2cp-interface-information>  
    <brief/>  
    <detail/>  
    <extensive/>  
    <interface-name>interface-name</interface-name>  
  </get-r2cp-interface-information>  
</rpc>
```

<b>Description</b>	Show interface information
<b>Contents</b>	<brief>—Show brief output  <detail>—Show detailed output  <extensive>—Show extensive output  <interface-name>—Name of R2CP interface

---

### <get-r2cp-radio-information>

---

#### Usage

```
<rpc>  
  <get-r2cp-radio-information>  
    <brief/>  
    <detail/>  
    <extensive/>  
    <radio-name>radio-name</radio-name>  
  </get-r2cp-radio-information>  
</rpc>
```

<b>Description</b>	Show radio
<b>Contents</b>	<brief>—Show brief output  <detail>—Show detailed output  <extensive>—Show extensive output  <radio-name>—Name of R2CP radio

## <get-r2cp-session-information>

### Usage

```

<rpc>
  <get-r2cp-session-information>
    <brief/>
    <detail/>
    <extensive/>
    <session-id>session-id</session-id>
    <session-id>session-id</session-id>
    <vlan>vlan</vlan>
  </get-r2cp-session-information>
</rpc>

```

**Description** Show sessions

**Contents**

- <brief>—Show brief output
- <detail>—Show detailed output
- <extensive>—Show extensive output
- <session-id>—Session ID
- <vlan>—Vlan identifier

## <get-r2cp-statistics>

### Usage

```

<rpc>
  <get-r2cp-statistics/>
</rpc>

```

**Description** Show statistics

## <get-radius-profile-access-test-result>

### Usage

```

<rpc>
  <get-radius-profile-access-test-result>
    <profile-name>profile-name</profile-name> <!-- mandatory -->
    <user>user</user> <!-- mandatory -->
    <password>password</password> <!-- mandatory -->
    <get-radius-profile-access-test-detail-result/>
  </get-radius-profile-access-test-result>
</rpc>

```

**Description** Test user access to an access profile

<b>Contents</b>	<code>&lt;profile-name&gt;</code> —Access profile name
	<code>&lt;user&gt;</code> —User name to be authenticated to the RADIUS server
	<code>&lt;password&gt;</code> —Password for the user
	<code>&lt;get-radius-profile-access-test-detail-result&gt;</code> —Show radius attributes returned by the server

---

## `<get-radius-server-access-test-result>`

### Usage

```
<rpc>
  <get-radius-server-access-test-result>
    <address>address</address> <!-- mandatory -->
    <authentication-port>authentication-port</authentication-port>
    <secret>secret</secret> <!-- mandatory -->
    <user>user</user> <!-- mandatory -->
    <password>password</password> <!-- mandatory -->
    <timeout>timeout</timeout>
    <retry>retry</retry>
    <source-address>source-address</source-address>
  </get-radius-server-access-test-result>
</rpc>
```

**Description** Test user access to a radius server

<b>Contents</b>	<code>&lt;address&gt;</code> —RADIUS server address
	<code>&lt;authentication-port&gt;</code> —RADIUS server authentication port number
	<code>&lt;secret&gt;</code> —Shared secret with the RADIUS server
	<code>&lt;user&gt;</code> —User name to be authenticated to the RADIUS server
	<code>&lt;password&gt;</code> —Password for the user
	<code>&lt;timeout&gt;</code> —Request timeout period
	<code>&lt;retry&gt;</code> —Retry attempts
	<code>&lt;source-address&gt;</code> —Use specified address as source address

---

## `<get-raps-pdu-information>`

### Usage

```
<rpc>
  <get-raps-pdu-information>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-raps-pdu-information>
```

</rpc>

**Description** Show RAPS PDU information for ethernet ring

**Contents** <brief>—Display brief output (default)  
 <detail>—Display detailed output  
 <group-name>—Name of protection group

## <get-raps-state-machine-information>

---

### Usage

```
<rpc>
  <get-raps-state-machine-information>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-raps-state-machine-information>
</rpc>
```

**Description** Show RAPS state machine information for ethernet ring

**Contents** <brief>—Display brief output (default)  
 <detail>—Display detailed output  
 <group-name>—Name of protection group

## <get-real-server-group-information>

---

### Usage

```
<rpc>
  <get-real-server-group-information>

  <real-server-group-name-information>real-server-group-name-information</real-server-group-name-information>

  <terse/>
  <detail/>
  </get-real-server-group-information>
</rpc>
```

**Description** Show real server group configuration information

**Contents** <real-server-group-name-information>—Show information for a specific real server group  
 <terse>—Display terse output

<detail>—Display detailed output

---

## <get-real-server-group-statistics-information>

---

### Usage

```
<rpc>
  <get-real-server-group-statistics-information>

  <real-server-name-statistics>real-server-name-statistics</real-server-name-statistics>

  <terse/>
  <detail/>
  <extensive/>
</get-real-server-group-statistics-information>
</rpc>
```

**Description** Show real server group statistics

**Contents** <real-server-name-statistics>—Show statistics for a specific real server group

<terse>—Display terse output

<detail>—Display detailed output

<extensive>—Display extensive output

---

## <get-real-server-health-monitor-information>

---

### Usage

```
<rpc>
  <get-real-server-health-monitor-information>

  <real-server-name-health-monitor>real-server-name-health-monitor</real-server-name-health-monitor>

  <terse/>
  <detail/>
  </get-real-server-health-monitor-information>
</rpc>
```

**Description** Show real server health monitor configuration information

**Contents** <real-server-name-health-monitor>—Show information for a specific health monitor

<terse>—Display terse output

<detail>—Display detailed output

## <get-real-server-health-monitor-statistics-information>

### Usage

```

<rpc>
  <get-real-server-health-monitor-statistics-information>

  <real-server-health-monitor-name-statistics>real-server-health-monitor-name-statistics</real-server-health-monitor-name-statistics>

  <terse/>
  <detail/>
  </get-real-server-health-monitor-statistics-information>
</rpc>

```

**Description** Show real server health monitor statistics

**Contents** <real-server-health-monitor-name-statistics>—Show statistics for a specific health monitor

<terse>—Display terse output

<detail>—Display detailed output

## <get-real-server-information>

### Usage

```

<rpc>
  <get-real-server-information>

  <real-server-name-information>real-server-name-information</real-server-name-information>

  <terse/>
  <detail/>
  </get-real-server-information>
</rpc>

```

**Description** Show real server configuration information

**Contents** <real-server-name-information>—Show information for a specific server

<terse>—Display terse output

<detail>—Display detailed output

## <get-real-server-statistics-information>

### Usage

```

<rpc>
  <get-real-server-statistics-information>

  <real-server-name-statistics>real-server-name-statistics</real-server-name-statistics>

```

```
<terse/>
<detail/>
<extensive/>
</get-real-server-statistics-information>
</rpc>
```

**Description** Show real server statistics

**Contents** <real-server-name-statistics>—Show statistics for a specific server

<terse>—Display terse output

<detail>—Display detailed output

<extensive>—Display extensive output

---

## <get-redundancy-status>

### Usage

```
<rpc>
<get-redundancy-status>
  <interface-name>interface-name</interface-name>
</get-redundancy-status>
</rpc>
```

**Description** Show redundancy status

**Contents** <interface-name>—Name of interface

<get-redundancy-status-details>—Show redundancy status details

---

## <get-redundancy-status-details>

### Usage

```
<rpc>
<get-redundancy-status-details>
  <interface-name>interface-name</interface-name>
</get-redundancy-status-details>
</rpc>
```

**Description** Show redundancy status details

**Contents** <interface-name>—Name of interface

## <get-rescue-information>

---

**Usage**

```
<rpc>
  <get-rescue-information>
    <format>format</format>
  </get-rescue-information>
</rpc>
```

**Description** Show rescue configuration

**Contents** <format>—Output format of configuration (XML or text)

- text - Output text configuration
- xml - Output XML configuration

## <get-ring-data-channel-information>

---

**Usage**

```
<rpc>
  <get-ring-data-channel-information>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-ring-data-channel-information>
</rpc>
```

**Description** Show data channel for ethernet ring

**Contents** <brief>—Display brief output (default)

<detail>—Display detailed output

<group-name>—Name of protection group

## <get-ring-interface-information>

---

**Usage**

```
<rpc>
  <get-ring-interface-information>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-ring-interface-information>
</rpc>
```

**Description** Show interface information for ethernet ring

**Contents**    <brief>—Display brief output (default)  
                 <detail>—Display detailed output  
                 <group-name>—Name of protection group

## <get-ring-tatistics>

---

### Usage

```
<rpc>
  <get-ring-tatistics>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-ring-tatistics>
</rpc>
```

**Description**    Show statistics for ethernet ring

**Contents**    <brief>—Display brief output (default)  
                 <detail>—Display detailed output  
                 <group-name>—Name of protection group

## <get-ring-vlan-information>

---

### Usage

```
<rpc>
  <get-ring-vlan-information>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-ring-vlan-information>
</rpc>
```

**Description**    Show VLAN information for ethernet ring data channel

**Contents**    <brief>—Display brief output (default)  
                 <detail>—Display detailed output  
                 <group-name>—Name of protection group

## <get-rip-general-statistics-information>

---

### Usage

```
<rpc>
  <get-rip-general-statistics-information>
```

```
<logical-system>logical-system</logical-system>
</get-rip-general-statistics-information>
</rpc>
```

**Description** Show RIP general statistics

**Contents** <logical-system>—Name of logical system, or 'all'

---

## <get-rip-neighbor-information>

---

### Usage

```
<rpc>
<get-rip-neighbor-information>
  <logical-system>logical-system</logical-system>
  <neighbor-name>neighbor-name</neighbor-name>
  <instance>instance</instance>
</get-rip-neighbor-information>
</rpc>
```

**Description** Show RIP interfaces

**Contents** <logical-system>—Name of logical system, or 'all'

- all - Show all instances
- instance-name - Name of RIP instance

<neighbor-name>—Name of RIP neighbor

- all - Show all instances
- instance-name - Name of RIP instance

<instance>—Name of RIP instance

- all - Show all instances
- instance-name - Name of RIP instance

---

## <get-rip-statistics-information>

---

### Usage

```
<rpc>
<get-rip-statistics-information>
  <logical-system>logical-system</logical-system>
  <neighbor-name>neighbor-name</neighbor-name>
  <instance>instance</instance>
</get-rip-statistics-information>
</rpc>
```

<b>Description</b>	Show RIP statistics
<b>Contents</b>	<p>&lt;logical-system&gt;—Name of logical system, or 'all'</p> <ul style="list-style-type: none"><li>• all - Show all instances</li><li>• instance-name - Name of RIP instance</li></ul> <p>&lt;neighbor-name&gt;—Name of RIP neighbor</p> <ul style="list-style-type: none"><li>• all - Show all instances</li><li>• instance-name - Name of RIP instance</li></ul> <p>&lt;instance&gt;—Name of RIP instance</p> <ul style="list-style-type: none"><li>• all - Show all instances</li><li>• instance-name - Name of RIP instance</li></ul>

---

## <get-rmon-alarm-information>

---

<b>Usage</b>	<pre>&lt;rpc&gt;   &lt;get-rmon-alarm-information&gt;   &lt;brief/&gt;   &lt;detail/&gt; &lt;/get-rmon-alarm-information&gt; &lt;/rpc&gt;</pre>
<b>Description</b>	Show RMON alarms
<b>Contents</b>	<p>&lt;brief&gt;—Display brief output (default)</p> <p>&lt;detail&gt;—Display detailed output</p>

---

## <get-rmon-event-information>

---

<b>Usage</b>	<pre>&lt;rpc&gt;   &lt;get-rmon-event-information&gt;   &lt;brief/&gt;   &lt;detail/&gt; &lt;/get-rmon-event-information&gt; &lt;/rpc&gt;</pre>
<b>Description</b>	Show RMON events
<b>Contents</b>	<p>&lt;brief&gt;—Display brief output (default)</p>

<detail>—Display detailed output

### <get-rmon-history-information>

---

**Usage**

```
<rpc>
  <get-rmon-history-information>
    <index>index</index>
    <sample-index>sample-index</sample-index>
  </get-rmon-history-information>
</rpc>
```

**Description** Show RMON history

**Contents** <index>—  
  
<sample-index>—

### <get-rmon-information>

---

**Usage**

```
<rpc>
  <get-rmon-information>
</get-rmon-information>
</rpc>
```

**Description** Show remote monitoring information

**Contents** <get-rmon-history-information>—Show RMON history  
  
<get-rmon-alarm-information>—Show RMON alarms  
  
<get-rmon-event-information>—Show RMON events  
  
<get-rmon-log-information>—Show rmon monitoring logs

### <get-rmon-log-information>

---

**Usage**

```
<rpc>
  <get-rmon-log-information/>
</rpc>
```

**Description** Show rmon monitoring logs

## <get-rollback-information>

---

**Usage**

```
<rpc>
  <get-rollback-information>
    <rollback>rollback</rollback> <!-- mandatory -->
    <compare>compare</compare>
    <format>format</format>
  </get-rollback-information>
</rpc>
```

**Description** Show rolled back configuration

**Contents** <rollback>—Rollback number to display

- text - Output text configuration
- xml - Output XML configuration

<compare>—Rollback number to compare

- text - Output text configuration
- xml - Output XML configuration

<format>—Output format of configuration (XML or text)

- text - Output text configuration
- xml - Output XML configuration

## <get-route-engine-information>

---

**Usage**

```
<rpc>
  <get-route-engine-information>
    <slot>slot</slot>
  </get-route-engine-information>
</rpc>
```

**Description** Show Routing Engine status

**Contents** <slot>—Routing Engine slot number

<get-bios-version-information>—Show BIOS firmware version

## <get-route-information>

### Usage

```

<rpc>
  <get-route-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <destination>destination</destination>
    <all/>
    <terse/>
    <brief/>
    <detail/>
    <extensive/>
    <best/>
    <exact/>
    <range/>
    <table>table</table>
    <label>label</label>
    <ccc>ccc</ccc>
    <inactive-prefix/>
    <inactive-path/>
    <active-path/>

**Description** Show routing table information

**Contents** <get-forwarding-table-information>—Show entries in all forwarding tables

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network

- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<get-instance-information>—Show routing instances information

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit

- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<resolution>—Show next-hop resolution database

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)

- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<get-route-summary-information>—Show routing table statistics

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership

- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<martians>—Show martian networks

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel

- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<rib-groups>—Show group of routing tables

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route

- access - Access route
- access-internal - Access-internal route

<snooping>—Show routes for multicast snooping

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route

- access - Access route
- access-internal - Access-internal route

<logical-system>—Name of logical system, or 'all'

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route

- access - Access route
- access-internal - Access-internal route

<fabric>—Internal fabric state

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route

- access - Access route
- access-internal - Access-internal route

<destination>—IP address and optional prefix length of destination

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route

- access - Access route
- access-internal - Access-internal route

<all>—Show all entries, including hidden entries

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route

- access - Access route
- access-internal - Access-internal route

<terse>—Display terse output

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
