**Description**

## CHAPTER 15

# Operational Response Tag Elements Specific to EX Series and QFX Series

This chapter lists the Extensible Markup Language (XML) tag elements in the Junos XML application programming interface (API) that contain operational information. The Junos XML protocol and NETCONF servers return them in response to requests from client applications.

The tags listed in this chapter are specific to devices belonging to the following platforms:

- EX Series
- QFX Series

The tags are divided into the following sections and listed in alphabetical order within each section.

- [Summary of Connectivity Fault Management Response Tags on page 7369](#)
- [Summary of Chassis Response Tags on page 7482](#)
- [Summary of 802.1X Process Response Tags on page 7669](#)
- [Summary of ESW Response Tags on page 7695](#)
- [Summary of Layer 2 Control Protocol Response Tags on page 7821](#)
- [Summary of sFLOW Response Tags on page 7880](#)
- [Summary of VCCP Response Tags on page 7881](#)
- [Summary of Uplink Failure Detection Information Response Tags on page 7975](#)

## Summary of Connectivity Fault Management Response Tags

            <fabric-plane-number>
              fabric-plane-number
            </fabric-plane-number>
            <fabric-plane-status>
              fabric-plane-status
            </fabric-plane-status>
          </feb-redundancy-group-feb-fabric-plane-errors>
        </feb-redundancy-group-feb-errors>
      </feb-redundancy-group-errors>
    </feb-redundancy-error-information>

```

**Description** FEB redundancy error information for a fabric plane

### <feb-redundancy-group-feb-fpc-errors>

#### Usage

```
<feb-redundancy-error-information>
  <feb-redundancy-group-errors>
    <feb-redundancy-group-feb-errors>
      <feb-redundancy-group-feb-fpc-errors>
        <fpc-slot>
          fpc-slot
        </fpc-slot>
        <fpc-link-status>
          fpc-link-status
        </fpc-link-status>
      </feb-redundancy-group-feb-fpc-errors>
    </feb-redundancy-group-feb-errors>
  </feb-redundancy-group-errors>
</feb-redundancy-error-information>
```

**Description** FEB redundancy error information for an FPC

### <feb-redundancy-group-information>

#### Usage

```
<feb-redundancy-information>
  <feb-redundancy-group-information>
    <feb-redundancy-group-name>
      feb-redundancy-group-name
    </feb-redundancy-group-name>
    <feb-redundancy-group-description>
      feb-redundancy-group-description
    </feb-redundancy-group-description>

    <feb-redundancy-group-information-item>....</feb-redundancy-group-information-item>

    <feb-redundancy-autofailover>
      feb-redundancy-autofailover
    </feb-redundancy-autofailover>
    <feb-redundancy-switch-reason>
      feb-redundancy-switch-reason
    </feb-redundancy-switch-reason>
  </feb-redundancy-group-information>
</feb-redundancy-information>
```

**Description** FEB redundancy information for a redundancy group

### <feb-redundancy-group-information-item>

#### Usage

```
<feb-redundancy-information>
  <feb-redundancy-group-information>
    <feb-redundancy-group-information-item>
      <feb-slot>
```

```

    feb-slot
  </feb-slot>
  <feb-state>
    feb-state
  </feb-state>
  <redundancy-priority>
    redundancy-priority
  </redundancy-priority>
  <connected-fpcs>
    connected-fpcs
  </connected-fpcs>
  <redundancy-state>
    redundancy-state
  </redundancy-state>
  <redundancy-state-description>
    redundancy-state-description
  </redundancy-state-description>
</feb-redundancy-group-information-item>
</feb-redundancy-group-information>
</feb-redundancy-information>

```

**Description** FEB redundancy information for a FEB

### <feb-redundancy-information>

#### Usage

```

<feb-redundancy-information>
  <feb-redundancy-group-information>....</feb-redundancy-group-information>
</feb-redundancy-information>

```

**Description** FEB redundancy information

### <firmware>

#### Usage

```

<firmware>
  <type>
    type
  </type>
  <firmware-version>
    firmware-version
  </firmware-version>
</firmware>

```

**Description**

### <firmware>

#### Usage

```

<chassis-inventory>
  <chassis>

```

```
<chassis-module>
  <firmware>
    <type>
      type
    </type>
    <firmware-version>
      firmware-version
    </firmware-version>
  </firmware>
</chassis-module>
</chassis>
</chassis-inventory>
```

#### Description

<firmware>

#### Usage

```
<chassis-inventory>
<chassis>
  <chassis-module>
    <chassis-sub-module>
      <firmware>
        <type>
          type
        </type>
        <firmware-version>
          firmware-version
        </firmware-version>
      </firmware>
    </chassis-sub-module>
  </chassis-module>
</chassis>
</chassis-inventory>
```

#### Description

<firmware>

#### Usage

```
<firmware-information>
<chassis>
  <chassis-module>
    <firmware>
      <type>
        type
      </type>
      <firmware-version>
        firmware-version
      </firmware-version>
    </firmware>
  </chassis-module>
</chassis>
```

```
</firmware-information>
```

#### Description

```
<firmware>
```

#### Usage

```
<firmware-information>
<chassis>
  <chassis-module>
    <chassis-sub-module>
      <firmware>
        <type>
          type
        </type>
        <firmware-version>
          firmware-version
        </firmware-version>
      </firmware>
    </chassis-sub-module>
  </chassis-module>
</chassis>
</firmware-information>
```

#### Description

```
<firmware>
```

#### Usage

```
<multi-routing-engine-results>
<multi-routing-engine-item>
  <chassis-inventory>
    <chassis>
      <chassis-module>
        <firmware>
          <type>
            type
          </type>
          <firmware-version>
            firmware-version
          </firmware-version>
        </firmware>
      </chassis-module>
    </chassis>
  </chassis-inventory>
</multi-routing-engine-item>
</multi-routing-engine-results>
```

#### Description

## <firmware>

### Usage

```
<multi-routing-engine-results>
<multi-routing-engine-item>
<chassis-inventory>
<chassis>
<chassis-module>
<chassis-sub-module>
<firmware>
<type>
  type
</type>
<firmware-version>
  firmware-version
</firmware-version>
</firmware>
</chassis-sub-module>
</chassis-module>
</chassis>
</chassis-inventory>
</multi-routing-engine-item>
</multi-routing-engine-results>
```

### Description

## <firmware>

### Usage

```
<multi-routing-engine-results>
<multi-routing-engine-item>
<firmware-information>
<chassis>
<chassis-module>
<firmware>
<type>
  type
</type>
<firmware-version>
  firmware-version
</firmware-version>
</firmware>
</chassis-module>
</chassis>
</firmware-information>
</multi-routing-engine-item>
</multi-routing-engine-results>
```

### Description

**<firmware>****Usage**

```

<multi-routing-engine-results>
  <multi-routing-engine-item>
    <firmware-information>
      <chassis>
        <chassis-module>
          <chassis-sub-module>
            <firmware>
              <type>
                type
              </type>
              <firmware-version>
                firmware-version
              </firmware-version>
            </firmware>
          </chassis-sub-module>
        </chassis-module>
      </chassis>
    </firmware-information>
  </multi-routing-engine-item>
</multi-routing-engine-results>

```

**Description****<firmware-information>****Usage**

```

<firmware-information>
  <chassis>....</chassis>
</firmware-information>

```

**Description** Information about component firmware versions

**<firmware-information>****Usage**

```

<multi-routing-engine-results>
  <multi-routing-engine-item>
    <firmware-information>
      <chassis>....</chassis>
    </firmware-information>
  </multi-routing-engine-item>
</multi-routing-engine-results>

```

**Description** Information about component firmware versions

## <firmware-module>

### Usage

```
<firmware-version-information>
  <firmware-module>
    <firmware-name>
      firmware-name
    </firmware-name>
    <firmware-type>
      firmware-type
    </firmware-type>
    <firmware-version>
      firmware-version
    </firmware-version>
  </firmware-module>
</firmware-version-information>
```

### Description

## <firmware-version-information>

### Usage

```
<firmware-version-information>
  <firmware-module>....</firmware-module>
</firmware-version-information>
```

**Description** Information about component firmware versions

## <firmware-version-mismatch>

### Usage

```
<firmware-version-mismatch>
  <routing-engine-software-version>
    routing-engine-software-version
  </routing-engine-software-version>
  <jfirmware-version>
    jfirmware-version
  </jfirmware-version>
</firmware-version-mismatch>
```

**Description** Firmware version mismatch warning

## <firmware-version-mismatch>

### Usage

```
<system-firmware-compatibility-information>
  <firmware-version-mismatch>
    <routing-engine-software-version>
      routing-engine-software-version
    </routing-engine-software-version>
    <jfirmware-version>
```

```

    jfirmware-version
  </jfirmware-version>
</firmware-version-mismatch>
</system-firmware-compatibility-information>

```

**Description** Firmware version mismatch warning

### <firmware-version-mismatch>

#### Usage

```

<multi-routing-engine-results>
  <multi-routing-engine-item>
    <system-firmware-compatibility-information>
      <firmware-version-mismatch>
        <routing-engine-software-version>
          routing-engine-software-version
        </routing-engine-software-version>
        <jfirmware-version>
          jfirmware-version
        </jfirmware-version>
      </firmware-version-mismatch>
    </system-firmware-compatibility-information>
  </multi-routing-engine-item>
</multi-routing-engine-results>

```

**Description** Firmware version mismatch warning

### <fm-fabric-reachability-information>

#### Usage

```

<fm-fabric-reachability-information>
  <fab-reach-status>
    fab-reach-status
  </fab-reach-status>
  <fab-reachability-detect>....</fab-reachability-detect>

## <fpc-mac-information>

### Usage

```
<chassis-mac-information>
  <fpc-mac-information>
    <slot>
      slot
    </slot>
    <mac-address>
      mac-address
    </mac-address>
    <count>
      count
    </count>
  </fpc-mac-information>
</chassis-mac-information>
```

**Description**    MAC address block information

## <fpga-registers>

### Usage

```
<environment-component-information>
  <environment-component-item>
```

```

    <fpga-registers>
      <fpga-registers-name>
        fpga-registers-name
      </fpga-registers-name>
      <fpga-registers-value>
        fpga-registers-value
      </fpga-registers-value>
    </fpga-registers>
  </environment-component-item>
</environment-component-information>

```

**Description** FPGA register values

### <fpga-revision-detail>

#### Usage

```

<environment-component-information>
  <environment-component-item>
    <fpga-revision-detail>
      <fpga-revision-name>
        fpga-revision-name
      </fpga-revision-name>
      <fpga-revision-value>
        fpga-revision-value
      </fpga-revision-value>
    </fpga-revision-detail>
  </environment-component-item>
</environment-component-information>

```

**Description** FPGA revision in detail

### <front-panel>

#### Usage

```

<front-panel>
  <front-panel-title>....</front-panel-title>
  <display-panel>....</display-panel>
  <system-led>....</system-led>
  <interface-led>....</interface-led>
</front-panel>

```

**Description** Information from the LCD-LED interfaces

### <front-panel>

#### Usage

```

<get-craft-information>
  <front-panel>
    <front-panel-title>....</front-panel-title>
    <display-panel>....</display-panel>
    <system-led>....</system-led>
  </front-panel>

```

```
<interface-led>....</interface-led>
</front-panel>
</get-craft-information>
```

**Description** Information from the LCD-LED interfaces

## <front-panel-title>

### Usage

```
<front-panel>
  <front-panel-title>
    <name>
      name
    </name>
  </front-panel-title>
</front-panel>
```

**Description**

## <front-panel-title>

### Usage

```
<get-craft-information>
  <front-panel>
    <front-panel-title>
      <name>
        name
      </name>
    </front-panel-title>
  </front-panel>
</get-craft-information>
```

**Description**

## <fru>

### Usage

```
<fru-information>
  <fru>
    <slot>
      slot
    </slot>
    <state>
      state
    </state>
    <up-time>
      up-time
    </up-time>
    <comment>
      comment
    </comment>
  </fru>
```

```
</fru-information>
```

**Description**

**<fru-information>**

**Usage**

```
<fru-information>
  <fru>....</fru>
</fru-information>
```

**Description**

**<fru-power-on-sequence>**

**Usage**

```
<fru-power-on-sequence>
  <sequence>
    sequence
  </sequence>
</fru-power-on-sequence>
```

**Description** Chassis FRU Power On Sequence

**<get-craft-information>**

**Usage**

```
<get-craft-information>
  <front-panel>....</front-panel>
</get-craft-information>
```

**Description** Information from the LCD interface and, if applicable, theof the status LEDs on the front panels of other components installedin the chassis

**<hardware-version-information>**

**Usage**

```
<hardware-version-information>
  <chassis-version>....</chassis-version>
</hardware-version-information>
```

**Description** Firmware version information of hardware components

**<hchasd>**

**Usage**

```
<hchasd-information>

    <red-alarm>
      red-alarm
    </red-alarm>
    <bad-fan-red-alarm>
      bad-fan-red-alarm
    </bad-fan-red-alarm>
  </temperature-threshold>
</temperature-threshold-information>

<temperature-threshold-information-item>....</temperature-threshold-information-item>

</temperature-threshold>
</temperature-threshold-information>
```

**Description** Temperature threshold information for a component on the routing platform.

**<temperature-threshold-information>****Usage**

```
<temperature-threshold-information>
  <temperature-threshold>....</temperature-threshold>
</temperature-threshold-information>
```

**Description** Information about the temperature threshold settings for components in the routing platform

**<temperature-threshold-information-item>****Usage**

```

<temperature-threshold-information>
  <temperature-threshold>
    <temperature-threshold-information-item>
  </temperature-threshold-information-item>
  </temperature-threshold>
</temperature-threshold-information>

```

**Description****<vcpu>****Usage**

```

<vcpu-information>
  <vcpu>

    </description>
    <error-code>
      error-code
    </error-code>
    <temperature>
      temperature
    </temperature>
    <cpu-total>
      cpu-total
    </cpu-total>
    <cpu-interrupt>
      cpu-interrupt
    </cpu-interrupt>
    <memory-dram-size>
      memory-dram-size
    </memory-dram-size>
    <comment>
      comment
    </comment>
  </vcpu>
</vcpu-information>

```

**Description****<vcpu-information>****Usage**

```

<vcpu-information>

```

```
<vcpu>....</vcpu>
</vcpu-information>
```

**Description****<voltage>****Usage**

```
<environment-component-information>
<environment-component-item>
  <power-information>
    <voltage>
      <reference-voltage>
        reference-voltage
      </reference-voltage>
      <actual-voltage>
        actual-voltage
      </actual-voltage>
    </voltage>
  </power-information>
</environment-component-item>
</environment-component-information>
```

**Description****<write-register>****Usage**

```
<write-register>
  <cb-slot>
    cb-slot
  </cb-slot>
  <fchip-id>
    fchip-id
  </fchip-id>
  <address>
    address
  </address>
  <data>
    data
  </data>
</write-register>
```

**Description** Write switch fabric register

**<xf-read-register>****Usage**

```
<xf-read-register>
  <xfchip-id>
    xfchip-id
  </xfchip-id>
```

```
<xf-address>
  xf-address
</xf-address>
<xf-data>
  xf-data
</xf-data>
</xf-read-register>
```

**Description** Read XFCHIP register

### <xf-show-summary>

#### Usage

```
<xf-show-summary>
  <xfchip-id>
    xfchip-id
  </xfchip-id>
  <xf-mode>
    xf-mode
  </xf-mode>
</xf-show-summary>
```

**Description** Show XFCHIP summary

### <xf-write-register>

#### Usage

```
<xf-write-register>
  <xfchip-id>
    xfchip-id
  </xfchip-id>
  <xf-address>
    xf-address
  </xf-address>
  <xf-data>
    xf-data
  </xf-data>
</xf-write-register>
```

**Description** Write XFCHIP register

---

## Summary of 802.1X Process Response Tags

### <authentication-whitelist-information>

#### Usage

```
<authentication-whitelist-information>
  <authentication-whitelist-mac>....</authentication-whitelist-mac>

  <authentication-whitelist-mac-bypassed-users>....</authentication-whitelist-mac-bypassed-users>
```

</authentication-whitelist-information>

#### Description

### <authentication-whitelist-mac>

#### Usage

```
<authentication-whitelist-information>
  <authentication-whitelist-mac>
    <authentication-whitelist-mac-address>
      authentication-whitelist-mac-address

```

#### Description

#### <task-block-list>

##### Usage

```
<task-memory-information>
  <task-memory-allocator-report>
    <task-block-list>
      <task-block>....</task-block>
    </task-block-list>
  </task-memory-allocator-report>
```

```
</task-memory-information>
```

#### Description

**<task-io-information>**

#### Usage

```
<task-io-information>
  <task-io-task-name>
    task-io-task-name
  </task-io-task-name>
  <task-io-read>
    task-io-read
  </task-io-read>
  <task-io-write>
    task-io-write
  </task-io-write>
  <task-io-received>
    task-io-received
  </task-io-received>
  <task-io-sent>
    task-io-sent
  </task-io-sent>
  <task-io-dropped>
    task-io-dropped
  </task-io-dropped>
</task-io-information>
```

#### Description

**<task-jobs-background>**

#### Usage

```
<task-jobs-information>
  <task-jobs-background>
  </task-jobs-background>
</task-jobs-information>
```

#### Description

**<task-jobs-foreground>**

#### Usage

```
<task-jobs-information>
  <task-jobs-foreground>
  </task-jobs-foreground>
</task-jobs-information>
```

#### Description

## <task-jobs-information>

### Usage

```
<task-jobs-information>
  <task-jobs-fg-priority>
    task-jobs-fg-priority
  </task-jobs-fg-priority>
  <task-jobs-fg-task-name>
    task-jobs-fg-task-name
  </task-jobs-fg-task-name>
  <task-jobs-fg-wait>
    task-jobs-fg-wait
  </task-jobs-fg-wait>
  <task-jobs-fg-flags>
    task-jobs-fg-flags
  </task-jobs-fg-flags>
  <task-jobs-bg-priority>
    task-jobs-bg-priority
  </task-jobs-bg-priority>
  <task-jobs-bg-task-name>
    task-jobs-bg-task-name
  </task-jobs-bg-task-name>
  <task-jobs-bg-misses>
    task-jobs-bg-misses
  </task-jobs-bg-misses>
  <task-jobs-bg-runs>
    task-jobs-bg-runs
  </task-jobs-bg-runs>
  <task-jobs-bg-wait>
    task-jobs-bg-wait
  </task-jobs-bg-wait>
  <task-jobs-bg-flags>
    task-jobs-bg-flags
  </task-jobs-bg-flags>
  <task-jobs-foreground>....</task-jobs-foreground>
  <task-jobs-background>....</task-jobs-background>
</task-jobs-information>
```

### Description

## <task-lite-page>

### Usage

```
<task-lite-page-list>
  <task-lite-page>
    <tlp-name>
      tlp-name
    </tlp-name>
    <tlp-alloc-pages>
      tlp-alloc-pages
    </tlp-alloc-pages>
    <tlp-alloc-bytes>
      tlp-alloc-bytes
    </tlp-alloc-bytes>
  </task-lite-page>
</task-lite-page-list>
```

```

<tlp-max-alloc-pages>
  tlp-max-alloc-pages
</tlp-max-alloc-pages>
<tlp-max-alloc-bytes>
  tlp-max-alloc-bytes
</tlp-max-alloc-bytes>
</task-lite-page>
</task-lite-page-list>

```

#### Description

#### <task-lite-page>

##### Usage

```

<task-memory-information>
  <task-memory-allocator-report>
    <task-lite-page-list>
      <task-lite-page>
        <tlp-name>
          tlp-name
        </tlp-name>
        <tlp-alloc-pages>
          tlp-alloc-pages
        </tlp-alloc-pages>
        <tlp-alloc-bytes>
          tlp-alloc-bytes
        </tlp-alloc-bytes>
        <tlp-max-alloc-pages>
          tlp-max-alloc-pages
        </tlp-max-alloc-pages>
        <tlp-max-alloc-bytes>
          tlp-max-alloc-bytes
        </tlp-max-alloc-bytes>
      </task-lite-page>
    </task-lite-page-list>
  </task-memory-allocator-report>
</task-memory-information>

```

#### Description

#### <task-lite-page-list>

##### Usage

```

<task-lite-page-list>
  <task-lite-page>....</task-lite-page>
</task-lite-page-list>

```

#### Description

#### <task-lite-page-list>

##### Usage

```

<task-memory-information>

```

```
<task-memory-allocator-report>
  <task-lite-page-list>
    <task-lite-page>....</task-lite-page>

</interface>
```

## Description

### <interface-vlan-member>

#### Usage

```
<switching-interface-information>
  <interface>
    <interface-vlan-member-list>
      <interface-vlan-member>
        <interface-vlan-name>
          interface-vlan-name
        </interface-vlan-name>
        <interface-vlan-dot1q-tunneling>
          interface-vlan-dot1q-tunneling
        </interface-vlan-dot1q-tunneling>
        <interface-mapping-operation>
          interface-mapping-operation
        </interface-mapping-operation>
        <interface-mapping-tag>
          interface-mapping-tag
        </interface-mapping-tag>
        <interface-vlan-member-tagness>
          interface-vlan-member-tagness
        </interface-vlan-member-tagness>
        <interface-vlan-member-tagid>
          interface-vlan-member-tagid
        </interface-vlan-member-tagid>
        <interface-vlan-mac>
          interface-vlan-mac
        </interface-vlan-mac>
        <interface-msti-id>
          interface-msti-id
        </interface-msti-id>
        <blocking-status>
          blocking-status
        </blocking-status>
        <port-error-disable-time>
          port-error-disable-time
        </port-error-disable-time>
      </interface-vlan-member>
```

```

    </interface-vlan-member-list>
  </interface>
</switching-interface-information>

```

#### Description

### <interface-vlan-member-list>

#### Usage

```

<interface>
  <interface-vlan-member-list>
    <interface-protocol-mode>
      interface-protocol-mode
    </interface-protocol-mode>
    <interface-vlan-member>....</interface-vlan-member>
  </interface-vlan-member-list>
</interface>

```

#### Description

### <interface-vlan-member-list>

#### Usage

```

<switching-interface-information>
  <interface>
    <interface-vlan-member-list>
      <interface-protocol-mode>
        interface-protocol-mode
      </interface-protocol-mode>
      <interface-vlan-member>....</interface-vlan-member>
    </interface-vlan-member-list>
  </interface>
</switching-interface-information>

```

#### Description

### <ip-source-guard>

#### Usage

```

<ip-source-guard>
  <ip-source-guard-information>....</ip-source-guard-information>
</ip-source-guard>

```

#### Description

### <ip-source-guard-information>

#### Usage

```

<ip-source-guard>
  <ip-source-guard-information>
    <ipsg-vlan>
      ipsg-vlan

```

```
</ipsg-vlan>
<ipsg-vlan-tag>
  ipsg-vlan-tag
</ipsg-vlan-tag>

</cist-bridge-parameters>
```

</stp-bridge>

**Description** STP bridge parameters for Common and Internal Spanning Tree

### <dot1x-authentication-failed-users>

#### Usage

```
<dot1x-interface-information>
  <dot1x-authentication-failed-users>
    <authentication-failed-interface>
      authentication-failed-interface
    </authentication-failed-interface>
    <authentication-failed-mac-addr>
      authentication-failed-mac-addr
    </authentication-failed-mac-addr>
    <authentication-failed-user>
      authentication-failed-user
    </authentication-failed-user>
  </dot1x-authentication-failed-users>
</dot1x-interface-information>
```

**Description** List of users who failed authentication

### <dot1x-interface-information>

#### Usage

```
<dot1x-interface-information>
  <interface>....</interface>
  <dot1x-static-mac-address>....</dot1x-static-mac-address>
  <dot1x-authentication-failed-users>....</dot1x-authentication-failed-users>
</dot1x-interface-information>
```

**Description**

### <dot1x-static-mac-address>

#### Usage

```
<dot1x-interface-information>
  <dot1x-static-mac-address>
    <static-mac-address>
      static-mac-address
    </static-mac-address>
    <static-mac-vlan-assignment>
      static-mac-vlan-assignment
    </static-mac-vlan-assignment>
    <static-mac-interface>
      static-mac-interface
    </static-mac-interface>
  </dot1x-static-mac-address>
</dot1x-interface-information>
```

**Description** Information about configured static MAC addresses

### <erp-data-channel-entry>

#### Usage

```
<erp-data-channel-entry>
  <data-channel-interface-name>
    data-channel-interface-name
  </data-channel-interface-name>
  <data-channel-stp-index>
    data-channel-stp-index
  </data-channel-stp-index>
  <data-channel-forward-state>
    data-channel-forward-state
  </data-channel-forward-state>
</erp-data-channel-entry>
```

**Description** Data channel information about Ring port of a Ethernet Ring instance

### <erp-data-channel-entry>

#### Usage

```
<erp-data-channel-information>
  <erp-data-channels>
    <erp-data-channel-interfaces>
      <erp-data-channel-entry>
        <data-channel-interface-name>
          data-channel-interface-name
        </data-channel-interface-name>
        <data-channel-stp-index>
          data-channel-stp-index
        </data-channel-stp-index>
        <data-channel-forward-state>
          data-channel-forward-state
        </data-channel-forward-state>
      </erp-data-channel-entry>
    </erp-data-channel-interfaces>
  </erp-data-channels>
</erp-data-channel-information>
```

**Description** Data channel information about Ring port of a Ethernet Ring instance

### <erp-data-channel-information>

#### Usage

```
<erp-data-channel-information>
  <erp-data-channels>....</erp-data-channels>
</erp-data-channel-information>
```

**Description** Data channel information for one or more ethernet ring instances

## <erp-data-channel-interfaces>

### Usage

```
<erp-data-channel-information>
  <erp-data-channels>
    <erp-data-channel-interfaces>
      <erp-data-channel-entry>....</erp-data-channel-entry>
    </erp-data-channel-interfaces>
  </erp-data-channels>
</erp-data-channel-information>
```

**Description** Data channel information about ring ports

## <erp-data-channels>

### Usage

```
<erp-data-channel-information>
  <erp-data-channels>
    <erp-data-channel-protection-group-name>
      erp-data-channel-protection-group-name
    </erp-data-channel-protection-group-name>
    <erp-data-channel-interfaces>....</erp-data-channel-interfaces>
  </erp-data-channels>
</erp-data-channel-information>
```

### Description

## <erp-ifbd-entries>

### Usage

```
<erp-ifbd-information>
  <erp-ifbds>
    <erp-ifbd-entries>
      <erp-ifbd-entry>....</erp-ifbd-entry>
    </erp-ifbd-entries>
  </erp-ifbds>
</erp-ifbd-information>
```

**Description** VLAN information for one specific iring port

## <erp-ifbd-entry>

### Usage

```
<erp-ifbd-entry>
  <erp-ifbd-interface-name>
    erp-ifbd-interface-name
  </erp-ifbd-interface-name>
  <erp-ifbd-vlan>
    erp-ifbd-vlan
  </erp-ifbd-vlan>
  <erp-ifbd-stp-index>
```

```

    erp-ifbd-stp-index
  </erp-ifbd-stp-index>
  <erp-ifbd-bridge-domain>
    erp-ifbd-bridge-domain
  </erp-ifbd-bridge-domain>
</erp-ifbd-entry>

```

**Description** IFBD information controlled by a Ethernet Ring instance

### <erp-ifbd-entry>

#### Usage

```

<erp-ifbd-information>
  <erp-ifbds>
    <erp-ifbd-entries>
      <erp-ifbd-entry>
        <erp-ifbd-interface-name>
          erp-ifbd-interface-name
        </erp-ifbd-interface-name>
        <erp-ifbd-vlan>
          erp-ifbd-vlan
        </erp-ifbd-vlan>
        <erp-ifbd-stp-index>
          erp-ifbd-stp-index
        </erp-ifbd-stp-index>
        <erp-ifbd-bridge-domain>
          erp-ifbd-bridge-domain
        </erp-ifbd-bridge-domain>
      </erp-ifbd-entry>
    </erp-ifbd-entries>
  </erp-ifbds>
</erp-ifbd-information>

```

**Description** IFBD information controlled by a Ethernet Ring instance

### <erp-ifbd-information>

#### Usage

```

<erp-ifbd-information>
  <erp-ifbds>....</erp-ifbds>
</erp-ifbd-information>

```

**Description** IFBD information for one or more ethernet ring instances

### <erp-ifbds>

#### Usage

```

<erp-ifbd-information>
  <erp-ifbds>
    <erp-ifbd-protection-group-name>
      erp-ifbd-protection-group-name

```

```
</erp-ifbd-protection-group-name>
<erp-ifbd-entries>....</erp-ifbd-entries>
</erp-ifbds>
</erp-ifbd-information>
```

#### Description

### <erp-interface-entry>

#### Usage

```
<erp-interface-entry>
  <erp-interface-name>
    erp-interface-name
  </erp-interface-name>
  <control-channel-name>
    control-channel-name
  </control-channel-name>
  <forward-state>
    forward-state
  </forward-state>
  <rpl-end>
    rpl-end
  </rpl-end>
  <sf-flag>
    sf-flag
  </sf-flag>
  <interface-state>
    interface-state
  </interface-state>
</erp-interface-entry>
```

**Description** Information about Ethernet Ring port of a Ethernet Ring Protection group

### <erp-interface-entry>

#### Usage

```
<erp-interface-information>
  <ethernet-ring-pg>
    <erp-interfaces>
      <erp-interface-entry>
        <erp-interface-name>
          erp-interface-name
        </erp-interface-name>
        <control-channel-name>
          control-channel-name
        </control-channel-name>
        <forward-state>
          forward-state
        </forward-state>
        <rpl-end>
          rpl-end
        </rpl-end>
        <sf-flag>
```

```

        sf-flag
      </sf-flag>
    <interface-state>
      interface-state
    </interface-state>
  </erp-interface-entry>
</erp-interfaces>
</ethernet-ring-pg>
</erp-interface-information>

```

**Description** Information about Ethernet Ring port of a Ethernet Ring Protection group

### <erp-interface-information>

#### Usage

```

<erp-interface-information>
  <ethernet-ring-pg>....</ethernet-ring-pg>
</erp-interface-information>

```

**Description** Information about ring ports for one or more ethernet ring protection groups

### <erp-interfaces>

#### Usage

```

<erp-interface-information>
  <ethernet-ring-pg>
    <erp-interfaces>
      <erp-interface-entry>....</erp-interface-entry>
    </erp-interfaces>
  </ethernet-ring-pg>
</erp-interface-information>

```

**Description** Information about ring ports

### <erp-raps>

#### Usage

```

<erp-raps-information>
  <erp-raps>
    <erp-raps-entry>....</erp-raps-entry>
  </erp-raps>
</erp-raps-information>

```

**Description**

### <erp-raps-entry>

#### Usage

```

<erp-raps-entry>
  <protection-group-name>

```

```
    protection-group-name
  </protection-group-name>
  <aps-state>
    aps-state
  </aps-state>
  <aps-event>
    aps-event
  </aps-event>
  <rpl-owner>
    rpl-owner
  </rpl-owner>
  <wtr-timer>
    wtr-timer
  </wtr-timer>
  <guard-timer>
    guard-timer
  </guard-timer>
  <operation-state>
    operation-state
  </operation-state>
</erp-raps-entry>
```

**Description** Information about Ethernet Ring Automatic Protection Switching state machine of a protection group

### <erp-raps-entry>

#### Usage

```
<erp-raps-information>
  <erp-raps>
    <erp-raps-entry>
      <protection-group-name>
        protection-group-name
      </protection-group-name>
      <aps-state>
        aps-state
      </aps-state>
      <aps-event>
        aps-event
      </aps-event>
      <rpl-owner>
        rpl-owner
      </rpl-owner>
      <wtr-timer>
        wtr-timer
      </wtr-timer>
      <guard-timer>
        guard-timer
      </guard-timer>
      <operation-state>
        operation-state
      </operation-state>
    </erp-raps-entry>
  </erp-raps>
</erp-raps-information>
```

```
</erp-raps-information>
```

**Description** Information about Ethernet Ring Automatic Protection Switching state machine of a protection group

### <erp-raps-information>

#### Usage

```
<erp-raps-information>
  <erp-raps>....</erp-raps>
</erp-raps-information>
```

**Description** Information about RAPS state machine of one or more ethernet rings

### <erp-rpdu-entry>

#### Usage

```
<erp-rpdu-entry>
  <protection-group-name>
    protection-group-name
  </protection-group-name>
  <request-state>
    request-state
  </request-state>
  <dnf-flag>
    dnf-flag
  </dnf-flag>
  <rb-flag>
    rb-flag
  </rb-flag>
  <originator>
    originator
  </originator>
  <remote-node-id>
    remote-node-id
  </remote-node-id>
</erp-rpdu-entry>
```

**Description** Information about Ethernet Ring RAPS PDU of a Ethernet Ring Protection group

### <erp-rpdu-entry>

#### Usage

```
<erp-rpdu-information>
  <erp-rpdus>
    <erp-rpdu-entry>
      <protection-group-name>
        protection-group-name
      </protection-group-name>
      <request-state>
        request-state
```

```
</request-state>
<dnf-flag>
  dnf-flag
</dnf-flag>
<rb-flag>
  rb-flag
</rb-flag>
<originator>
  originator
</originator>
<remote-node-id>
  remote-node-id
</remote-node-id>
</erp-rpdu-entry>
</erp-rpdus>
</erp-rpdu-information>
```

**Description** Information about Ethernet Ring RAPS PDU of a Ethernet Ring Protection group

### <erp-rpdu-information>

#### Usage

```
<erp-rpdu-information>
  <erp-rpdus>....</erp-rpdus>
</erp-rpdu-information>
```

**Description** Information about one or more ethernet rings

### <erp-rpdus>

#### Usage

```
<erp-rpdu-information>
  <erp-rpdus>
    <erp-rpdu-entry>....</erp-rpdu-entry>
  </erp-rpdus>
</erp-rpdu-information>
```

#### Description

### <ethernet-ring-pg>

#### Usage

```
<erp-interface-information>
  <ethernet-ring-pg>
    <erp-protection-group-name>
      erp-protection-group-name
    </erp-protection-group-name>
    <erp-interfaces>....</erp-interfaces>
  </ethernet-ring-pg>
</erp-interface-information>
```

**Description****<ethernet-ring-statistics>****Usage**

```

          mmrp-interface-state
        </mmrp-interface-state>
      </mmrp-interface-entry>
    </mmrp-interface-entry-information>
  </mmrp-interface-mmrp-instance>
</mmrp-interface-information>

```

**Description** Information about interface and state

### <mmrp-interface-entry-information>

#### Usage

```

<mmrp-interface-information>
  <mmrp-interface-mmrp-instance>
    <mmrp-interface-entry-information>
      <mmrp-interface-entry>....</mmrp-interface-entry>
    </mmrp-interface-entry-information>
  </mmrp-interface-mmrp-instance>
</mmrp-interface-information>

```

**Description** Interface information

### <mmrp-interface-information>

#### Usage

```

<mmrp-interface-information>
  <mmrp-interface-mmrp-instance>....</mmrp-interface-mmrp-instance>
</mmrp-interface-information>

```

**Description** Information about interfaces

### <mmrp-interface-mmrp-instance>

**Usage**

```
<mmrp-interface-information>
  <mmrp-interface-mmrp-instance>
    <mmrp-interface-instance-name>
      mmrp-interface-instance-name
    </mmrp-interface-instance-name>
    <mmrp-interface-entry-information>....</mmrp-interface-entry-information>
  </mmrp-interface-mmrp-instance>
</mmrp-interface-information>
```

**Description**

### <mmrp-maclist-entry>

**Usage**

```
<mmrp-maclist-entry>
  <mmrp-maclist-mac-address>
    mmrp-maclist-mac-address
  </mmrp-maclist-mac-address>
  <mmrp-maclist-mac-type>
    mmrp-maclist-mac-type
  </mmrp-maclist-mac-type>
  <mmrp-maclist-mac-isid>
    mmrp-maclist-mac-isid
  </mmrp-maclist-mac-isid>
  <mmrp-maclist-mac-map_count>
    mmrp-maclist-mac-map_count
  </mmrp-maclist-mac-map_count>
</mmrp-maclist-entry>
```

**Description** Information about multicast MAC

### <mmrp-maclist-entry>

**Usage**

```
<mmrp-maclist-information>
  <mmrp-maclist-mmrp-instance>
    <mmrp-maclist-entry-information>
      <mmrp-maclist-entry>
        <mmrp-maclist-mac-address>
          mmrp-maclist-mac-address
        </mmrp-maclist-mac-address>
        <mmrp-maclist-mac-type>
          mmrp-maclist-mac-type
        </mmrp-maclist-mac-type>
        <mmrp-maclist-mac-isid>
          mmrp-maclist-mac-isid
        </mmrp-maclist-mac-isid>
        <mmrp-maclist-mac-map_count>
```

```

        mmrp-maclist-mac-map_count
      </mmrp-maclist-mac-map_count>
    </mmrp-maclist-entry>
  </mmrp-maclist-entry-information>
</mmrp-maclist-mmrip-instance>
</mmrp-maclist-information>

```

**Description** Information about multicast MAC

### <mmrp-maclist-entry-information>

#### Usage

```

<mmrp-maclist-information>
  <mmrp-maclist-mmrip-instance>
    <mmrp-maclist-entry-information>
      <mmrp-maclist-entry>....</mmrp-maclist-entry>
    </mmrp-maclist-entry-information>
  </mmrp-maclist-mmrip-instance>
</mmrp-maclist-information>

```

**Description** MAC list information

### <mmrp-maclist-information>

#### Usage

```

<mmrp-maclist-information>
  <mmrp-maclist-mmrip-instance>....</mmrp-maclist-mmrip-instance>
</mmrp-maclist-information>

```

**Description** Information about multicast MAC list

### <mmrp-maclist-mmrip-instance>

#### Usage

```

<mmrp-maclist-information>
  <mmrp-maclist-mmrip-instance>
    <mmrp-maclist-instance-name>
      mmrp-maclist-instance-name
    </mmrp-maclist-instance-name>
    <mmrp-maclist-entry-information>....</mmrp-maclist-entry-information>
  </mmrp-maclist-mmrip-instance>
</mmrp-maclist-information>

```

**Description**

### <mmrp-mactable-entry>

#### Usage

```

<mmrp-mactable-entry>
  <mmrp-mactable-mac-address>

```

```
    mmrp-mactable-mac-address
  </mmrp-mactable-mac-address>
  <mmrp-mactable-nexthop>
    mmrp-mactable-nexthop
  </mmrp-mactable-nexthop>
  <mmrp-mactable-token>
    mmrp-mactable-token
  </mmrp-mactable-token>
  <mmrp-mactable-interface>....</mmrp-mactable-interface>
</mmrp-mactable-entry>
```

**Description** Information about MAC table

### <mmrp-mactable-entry>

#### Usage

```
<mmrp-mactable-information>
  <mmrp-mactable-mmrip-instance>
    <mmrp-mactable-entry-information>
      <mmrp-mactable-entry>
        <mmrp-mactable-mac-address>
          mmrp-mactable-mac-address
        </mmrp-mactable-mac-address>
        <mmrp-mactable-nexthop>
          mmrp-mactable-nexthop
        </mmrp-mactable-nexthop>
        <mmrp-mactable-token>
          mmrp-mactable-token
        </mmrp-mactable-token>
        <mmrp-mactable-interface>....</mmrp-mactable-interface>
      </mmrp-mactable-entry>
    </mmrp-mactable-entry-information>
  </mmrp-mactable-mmrip-instance>
</mmrp-mactable-information>
```

**Description** Information about MAC table

### <mmrp-mactable-entry-information>

#### Usage

```
<mmrp-mactable-information>
  <mmrp-mactable-mmrip-instance>
    <mmrp-mactable-entry-information>
      <mmrp-mactable-entry>....</mmrp-mactable-entry>
    </mmrp-mactable-entry-information>
  </mmrp-mactable-mmrip-instance>
</mmrp-mactable-information>
```

**Description** MAC table information

### <mmrp-mactable-information>

#### Usage

```

<mmrp-mactable-information>
  <mmrp-mactable-mmrip-instance>....</mmrp-mactable-mmrip-instance>
</mmrp-mactable-information>

```

**Description** Information about multicast MAC table

### <mmrp-mactable-interface>

#### Usage

```

<mmrp-mactable-entry>
  <mmrp-mactable-interface>
    <mmrp-mactable-interface-name>
      mmrp-mactable-interface-name
    </mmrp-mactable-interface-name>
    <mmrp-mactable-interface-action>
      mmrp-mactable-interface-action
    </mmrp-mactable-interface-action>
  </mmrp-mactable-interface>
</mmrp-mactable-entry>

```

**Description**

### <mmrp-mactable-interface>

#### Usage

```

<mmrp-mactable-information>
  <mmrp-mactable-mmrip-instance>
    <mmrp-mactable-entry-information>
      <mmrp-mactable-entry>
        <mmrp-mactable-interface>
          <mmrp-mactable-interface-name>
            mmrp-mactable-interface-name
          </mmrp-mactable-interface-name>
          <mmrp-mactable-interface-action>
            mmrp-mactable-interface-action
          </mmrp-mactable-interface-action>
        </mmrp-mactable-interface>
      </mmrp-mactable-entry>
    </mmrp-mactable-entry-information>
  </mmrp-mactable-mmrip-instance>
</mmrp-mactable-information>

```

**Description**

### <mmrp-mactable-mmrip-instance>

#### Usage

```

<mmrp-mactable-information>
  <mmrp-mactable-mmrip-instance>

```

```
<mmrp-mactable-instance-name>
  mmrp-mactable-instance-name
</mmrp-mactable-instance-name>
<mmrp-mactable-bridge-domain-name>
  mmrp-mactable-bridge-domain-name
</mmrp-mactable-bridge-domain-name>
<mmrp-mactable-vlan-id>
  mmrp-mactable-vlan-id
</mmrp-mactable-vlan-id>
<mmrp-mactable-entry-information>....</mmrp-mactable-entry-information>
</mmrp-mactable-mmrp-instance>
</mmrp-mactable-information>
```

#### Description

### <mmrp-registration-entry>

#### Usage

```
<mmrp-registration-entry>
  <mmrp-registration-mac-address>
    mmrp-registration-mac-address
  </mmrp-registration-mac-address>
  <mmrp-registration-interface-name>
    mmrp-registration-interface-name
  </mmrp-registration-interface-name>
  <mmrp-registration-state>
    mmrp-registration-state
  </mmrp-registration-state>
  <mmrp-registration-forced-state>
    mmrp-registration-forced-state
  </mmrp-registration-forced-state>
  <mmrp-registration-manage-state>
    mmrp-registration-manage-state
  </mmrp-registration-manage-state>
  <mmrp-registration-stp-state>
    mmrp-registration-stp-state
  </mmrp-registration-stp-state>
</mmrp-registration-entry>
```

**Description** Information about registration state

### <mmrp-registration-entry>

#### Usage

```
<mmrp-registration-information>
  <mmrp-registration-mmrp-instance>
    <mmrp-registration-entry-information>
      <mmrp-registration-entry>
        <mmrp-registration-mac-address>
          mmrp-registration-mac-address
        </mmrp-registration-mac-address>
        <mmrp-registration-interface-name>
          mmrp-registration-interface-name
```

```

</mmrp-registration-interface-name>
<mmrp-registration-state>
  mmrp-registration-state
</mmrp-registration-state>

**Description** STP bridge parameters for Multiple Spanning Tree instances

### <msti-regional-root-bridge>

#### Usage

```

<msti-bridge-parameters>
  <msti-regional-root-bridge>

```

```
<bridge-priority>
  bridge-priority
</bridge-priority>
<bridge-mac>
  bridge-mac
</bridge-mac>
</msti-regional-root-bridge>
</msti-bridge-parameters>
```

**Description** MSTI regional root identifier

### <msti-regional-root-bridge>

#### Usage

```
<stp-bridge>
<msti-bridge-parameters>
  <msti-regional-root-bridge>
    <bridge-priority>
      bridge-priority
    </bridge-priority>
    <bridge-mac>
      bridge-mac
    </bridge-mac>
  </msti-regional-root-bridge>
</msti-bridge-parameters>
</stp-bridge>
```

**Description** MSTI regional root identifier

### <mstp-configuration>

#### Usage

```
<mstp-configuration>
<context-id>
  context-id
</context-id>
<mstp-name>
  mstp-name
</mstp-name>
<mstp-revision>
  mstp-revision
</mstp-revision>
<mstp-configuration-digest>
  mstp-configuration-digest
</mstp-configuration-digest>
<vlan-map>....</vlan-map>
</mstp-configuration>
```

**Description** Information about Multiple Spanning Tree protocol configuration

## <mvrp>

### Usage

```

<mvrp>
  <mvrp-information>....</mvrp-information>
  <mvrp-vlans>....</mvrp-vlans>

```

#### Description

### <regional-root-bridge>

#### Usage

```
<cist-bridge-parameters>
  <regional-root-bridge>
    <bridge-priority>
      bridge-priority
    </bridge-priority>
    <bridge-mac>
      bridge-mac
    </bridge-mac>
  </regional-root-bridge>
```

```
</cist-bridge-parameters>
```

**Description** CIST regional root bridge identifier

### <regional-root-bridge>

#### Usage

```
<stp-bridge>
<cist-bridge-parameters>
<regional-root-bridge>
<bridge-priority>
  bridge-priority
</bridge-priority>
<bridge-mac>
  bridge-mac
</bridge-mac>
</regional-root-bridge>
</cist-bridge-parameters>
</stp-bridge>
```

**Description** CIST regional root bridge identifier

### <root-bridge>

#### Usage

```
<cist-bridge-parameters>
<root-bridge>
<bridge-priority>
  bridge-priority
</bridge-priority>
<bridge-mac>
  bridge-mac
</bridge-mac>
</root-bridge>
</cist-bridge-parameters>
```

**Description** Root bridge identifier

### <root-bridge>

#### Usage

```
<vst-bridge-parameters>
<root-bridge>
<bridge-priority>
  bridge-priority
</bridge-priority>
<bridge-mac>
  bridge-mac
</bridge-mac>
</root-bridge>
```

```
</vst-bridge-parameters>
```

**Description** Root bridge identifier

### <root-bridge>

**Usage**

```
<stp-bridge>
  <cist-bridge-parameters>
    <root-bridge>
      <bridge-priority>
        bridge-priority
      </bridge-priority>

      adjacency-flag
    </adjacency-flag>
    <vccp-adjacency-log>....</vccp-adjacency-log>
  </vccp-adjacency>
</virtual-chassis-adjacency-information>

```

#### Description

#### <vccp-adjacency-log>

##### Usage

```

<vccp-adjacency>
  <vccp-adjacency-log>
    <adjacency-when>
      adjacency-when
    </adjacency-when>
    <adjacency-state>
      adjacency-state
    </adjacency-state>
    <adjacency-event>
      adjacency-event
    </adjacency-event>
    <adjacency-down-reason>
      adjacency-down-reason
    </adjacency-down-reason>
  </vccp-adjacency-log>
</vccp-adjacency>

```

**Description** Entry describing adjacency transition

#### <vccp-adjacency-log>

##### Usage

```

<virtual-chassis-adjacency-information>
  <vccp-adjacency>
    <vccp-adjacency-log>
      <adjacency-when>
        adjacency-when
      </adjacency-when>
      <adjacency-state>
        adjacency-state
      </adjacency-state>
      <adjacency-event>
        adjacency-event
      </adjacency-event>
      <adjacency-down-reason>
        adjacency-down-reason
      </adjacency-down-reason>
    </vccp-adjacency-log>
  </vccp-adjacency>
</virtual-chassis-adjacency-information>

```

**Description** Entry describing adjacency transition

### <vccp-database>

**Usage**

```
<vccp-database>
  <vccp-database-entry>....</vccp-database-entry>
  <lsp-count>
    lsp-count
  </lsp-count>
</vccp-database>
```

**Description**

# Operational Response Tag Elements Specific to J Series and SRX Series

This chapter lists the Extensible Markup Language (XML) tag elements in the Junos XML application programming interface (API) that contain operational information. The Junos XML protocol and NETCONF servers return them in response to requests from client applications.

The tags listed in this chapter are specific to devices belonging to the following platforms:

- J Series
- SRX Series

The tags are divided into the following sections and listed in alphabetical order within each section.

- [Summary of Allowed System Services and Protocols Response Tags on page 7978](#)
- [Summary of ALG Response Tags on page 7983](#)
- [Summary of AVT Response Tags on page 8004](#)
- [Summary of Data Link Switching Response Tags on page 8005](#)
- [Summary of 802.1X Process Response Tags on page 8044](#)
- [Summary of DS-Lite Response Tags on page 8069](#)
- [Summary of Dynamic VPN Response Tags on page 8071](#)
- [Summary of End-to-End Debug Response Tags on page 8074](#)
- [Summary of ESW Response Tags on page 8077](#)
- [Summary of sFlow Response Tags on page 8203](#)
- [Summary of Firewall Authentication Response Tags on page 8217](#)
- [Summary of GPRS Tunneling Protocol Response Tags on page 8223](#)
- [Summary of IDS Response Tags on page 8230](#)
- [Summary of IPSec Response Tags on page 8233](#)
- [Summary of ISDN Response Tags on page 8386](#)
- [Summary of Stateful Redundancy Response Tags on page 8396](#)
- [Summary of Logical Systems Response Tags on page 8430](#)

- [Summary of DNS Proxy Response Tags on page 8431](#)
- [Summary of NAT Response Tags on page 8434](#)
- [Summary of Junos OS Reports Response Tags on page 8456](#)
- [Summary of Resource Manager Response Tags on page 8465](#)
- [Summary of VLAN Retag Response Tags on page 8470](#)
- [Summary of Real Time Media Convergence Response Tags on page 8471](#)
- [Summary of Scheduler Response Tags on page 8473](#)
- [Summary of SCTP Response Tags on page 8474](#)
- [Summary of Security Firewall Response Tags on page 8476](#)
- [Summary of Security Policy Response Tags on page 8481](#)
- [Summary of Security Profile Response Tags on page 8571](#)
- [Summary of SMTP Response Tags on page 8595](#)
- [Summary of SPU Monitoring Response Tags on page 8596](#)
- [Summary of SPU Performance Response Tags on page 8600](#)
- [Summary of Telephony Gateway Module Response Tags on page 8602](#)
- [Summary of Unified Access Control Response Tags on page 8605](#)
- [Summary of Antispam Statistics Response Tags on page 8610](#)
- [Summary of Wireless LAN Access Points Response Tags on page 8643](#)
- [Summary of GSM Response Tags on page 8676](#)
- [Summary of WXOS Protocol Response Tags on page 8685](#)
- [Summary of Zones Response Tags on page 8686](#)

## Summary of Allowed System Services and Protocols Response Tags ---

### <allowed-host-inbound-traffic>

#### Usage

```

  </flow-error-no-sa-for-spi>
  <flow-error-no-interest-self-packet>
    flow-error-no-interest-self-packet
  </flow-error-no-interest-self-packet>
</security-error-flow-statistics>
```

**Description** Flow error statistics for the interface

## <security-input-flow-statistics>

### Usage

```
<security-input-flow-statistics>
  <flow-input-self-packets>
    flow-input-self-packets
  </flow-input-self-packets>
  <flow-input-icmp-packets>
    flow-input-icmp-packets
  </flow-input-icmp-packets>
  <flow-input-vpn-packets>
    flow-input-vpn-packets
  </flow-input-vpn-packets>
  <flow-input-multicast-packets>
    flow-input-multicast-packets
  </flow-input-multicast-packets>
  <flow-input-policy-bytes>
    flow-input-policy-bytes
```

```

</flow-input-policy-bytes>
<flow-input-connections>
  flow-input-connections
</flow-input-connections>
</security-input-flow-statistics>

```

**Description** Flow input statistics for the interface

### <security-output-flow-statistics>

#### Usage

```

<security-output-flow-statistics>
  <flow-output-multicast-packets>
    flow-output-multicast-packets
  </flow-output-multicast-packets>
  <flow-output-policy-bytes>
    flow-output-policy-bytes
  </flow-output-policy-bytes>
</security-output-flow-statistics>

```

**Description** Flow output statistics for the interface

## Summary of ALG Response Tags

#### Description

**<interface>**

#### Usage

```
<switching-interface-information>
  <interface>
    <interface-name>
      interface-name
    </interface-name>
    <interface-id>
      interface-id
    </interface-id>
```

```

<interface-port-mode>
  interface-port-mode
</interface-port-mode>
<interface-mac-count>
  interface-mac-count
</interface-mac-count>
<interface-native-vlan-name>
  interface-native-vlan-name
</interface-native-vlan-name>
<interface-mac-learning-mode>
  interface-mac-learning-mode
</interface-mac-learning-mode>
<interface-reflective-relay-mode>
  interface-reflective-relay-mode
</interface-reflective-relay-mode>
<interface-error>
  interface-error
</interface-error>
<interface-ether-type>
  interface-ether-type
</interface-ether-type>
<interface-vlan-member-list>....</interface-vlan-member-list>
<interface-state>
  interface-state
</interface-state>
</interface>
</switching-interface-information>

```

## Description

### <interface-vlan-member>

#### Usage

```

<interface>
  <interface-vlan-member-list>
    <interface-vlan-member>
      <interface-vlan-name>
        interface-vlan-name
      </interface-vlan-name>
      <interface-vlan-dot1q-tunneling>
        interface-vlan-dot1q-tunneling
      </interface-vlan-dot1q-tunneling>
      <interface-mapping-operation>
        interface-mapping-operation
      </interface-mapping-operation>
      <interface-mapping-tag>
        interface-mapping-tag
      </interface-mapping-tag>
      <interface-vlan-member-tagness>
        interface-vlan-member-tagness
      </interface-vlan-member-tagness>
      <interface-vlan-member-tagid>
        interface-vlan-member-tagid
      </interface-vlan-member-tagid>
      <interface-vlan-mac>

```

```
    interface-vlan-mac
  </interface-vlan-mac>
  <interface-msti-id>
    interface-msti-id
  </interface-msti-id>
  <blocking-status>
    blocking-status
  </blocking-status>
  <port-error-disable-time>
    port-error-disable-time
  </port-error-disable-time>
</interface-vlan-member>
</interface-vlan-member-list>
</interface>
```

## Description

### <interface-vlan-member>

#### Usage

```
<switching-interface-information>
<interface>
  <interface-vlan-member-list>
    <interface-vlan-member>
      <interface-vlan-name>
        interface-vlan-name
      </interface-vlan-name>
      <interface-vlan-dot1q-tunneling>
        interface-vlan-dot1q-tunneling
      </interface-vlan-dot1q-tunneling>
      <interface-mapping-operation>
        interface-mapping-operation
      </interface-mapping-operation>
      <interface-mapping-tag>
        interface-mapping-tag
      </interface-mapping-tag>
      <interface-vlan-member-tagness>
        interface-vlan-member-tagness
      </interface-vlan-member-tagness>
      <interface-vlan-member-tagid>
        interface-vlan-member-tagid
      </interface-vlan-member-tagid>
      <interface-vlan-mac>
        interface-vlan-mac
      </interface-vlan-mac>
      <interface-msti-id>
        interface-msti-id
      </interface-msti-id>
      <blocking-status>
        blocking-status
      </blocking-status>
      <port-error-disable-time>
        port-error-disable-time
      </port-error-disable-time>
    </interface-vlan-member>
```

```

    </interface-vlan-member-list>
  </interface>
</switching-interface-information>

```

#### Description

### <interface-vlan-member-list>

#### Usage

```

<interface>
  <interface-vlan-member-list>
    <interface-protocol-mode>
      interface-protocol-mode
    </interface-protocol-mode>
    <interface-vlan-member>....</interface-vlan-member>
  </interface-vlan-member-list>
</interface>

```

#### Description

### <interface-vlan-member-list>

#### Usage

```

<switching-interface-information>
  <interface>
    <interface-vlan-member-list>
      <interface-protocol-mode>
        interface-protocol-mode
      </interface-protocol-mode>
      <interface-vlan-member>....</interface-vlan-member>
    </interface-vlan-member-list>
  </interface>
</switching-interface-information>

```

#### Description

### <ip-source-guard>

#### Usage

```

<ip-source-guard>
  <ip-source-guard-information>....</ip-source-guard-information>
</ip-source-guard>

```

#### Description

### <ip-source-guard-information>

#### Usage

```

<ip-source-guard>
  <ip-source-guard-information>
    <ipsg-vlan>
      ipsg-vlan

```

```
</ipsg-vlan>
<ipsg-vlan-tag>
  ipsg-vlan-tag
</ipsg-vlan-tag>
<ipsg-interface>
  ipsg-interface
</ipsg-interface>
<ipsg-mac>
  ipsg-mac
</ipsg-mac>
<ipsg-ip>
  ipsg-ip
</ipsg-ip>
</ip-source-guard-information>
</ip-source-guard>
```

#### Description

### <krt-queue-all-entry>

#### Usage

```
<krt-queue-all-entry>
<krt-queue-entry>....</krt-queue-entry>
<krt-queue-entry-type>
  krt-queue-entry-type
</krt-queue-entry-type>
</krt-queue-all-entry>
```

#### Description

### <krt-queue-analyzer-information>

#### Usage

```
<krt-queue-analyzer-information>
<krt-queue-entry>....</krt-queue-entry>
<krt-queue-analyzer-name>
  krt-queue-analyzer-name
</krt-queue-analyzer-name>
</krt-queue-analyzer-information>
```

#### Description

### <krt-queue-dhcp-information>

#### Usage

```
<krt-queue-dhcp-information>
<krt-queue-entry>....</krt-queue-entry>
<krt-queue-dhcp-mac>
  krt-queue-dhcp-mac
</krt-queue-dhcp-mac>
<krt-queue-dhcp-ip>
  krt-queue-dhcp-ip
</krt-queue-dhcp-ip>
```

```

<krt-queue-dhcp-lease>
  krt-queue-dhcp-lease
</krt-queue-dhcp-lease>
<krt-queue-dhcp-type>
  krt-queue-dhcp-type
</krt-queue-dhcp-type>
<krt-queue-dhcp-vlan-name>
  krt-queue-dhcp-vlan-name
</krt-queue-dhcp-vlan-name>
<krt-queue-dhcp-interface-name>
  krt-queue-dhcp-interface-name
</krt-queue-dhcp-interface-name>
</krt-queue-dhcp-information>

```

#### Description

<krt-queue-entry>

#### Usage

```

<krt-queue-entry>
  <krt-queue-deferred>
    krt-queue-deferred
  </krt-queue-deferred>
  <krt-queue-operation>
    krt-queue-operation
  </krt-queue-operation>
  <krt-queue-last-error>
    krt-queue-last-error
  </krt-queue-last-error>
</krt-queue-entry>

```

#### Description

<krt-queue-entry>

#### Usage

```

<krt-queue-all-entry>
  <krt-queue-entry>
    <krt-queue-deferred>
      krt-queue-deferred
    </krt-queue-deferred>
    <krt-queue-operation>
      krt-queue-operation
    </krt-queue-operation>
    <krt-queue-last-error>
      krt-queue-last-error
    </krt-queue-last-error>
  </krt-queue-entry>
</krt-queue-all-entry>

```

#### Description

## <krt-queue-entry>

### Usage

```
<krt-queue-dhcp-information>
  <krt-queue-entry>
    <krt-queue-deferred>
      krt-queue-deferred
    </krt-queue-deferred>
    <krt-queue-operation>
      krt-queue-operation
    </krt-queue-operation>
    <krt-queue-last-error>
      krt-queue-last-error
    </krt-queue-last-error>
  </krt-queue-entry>
</krt-queue-dhcp-information>
```

### Description

## <krt-queue-entry>

### Usage

```
<krt-queue-vlan-information>
  <krt-queue-entry>
    <krt-queue-deferred>
      krt-queue-deferred
    </krt-queue-deferred>
    <krt-queue-operation>
      krt-queue-operation
    </krt-queue-operation>
    <krt-queue-last-error>
      krt-queue-last-error
    </krt-queue-last-error>
  </krt-queue-entry>
</krt-queue-vlan-information>
```

### Description

## <krt-queue-entry>

### Usage

```
<krt-queue-analyzer-information>
  <krt-queue-entry>
    <krt-queue-deferred>
      krt-queue-deferred
    </krt-queue-deferred>
    <krt-queue-operation>
      krt-queue-operation
    </krt-queue-operation>
    <krt-queue-last-error>
      krt-queue-last-error
    </krt-queue-last-error>
  </krt-queue-entry>
```

```
</krt-queue-analyzer-information>
```

#### Description

**<krt-queue-entry>**

#### Usage

```
<krt-queue-nh-information>
  <krt-queue-entry>
    <krt-queue-deferred>
      krt-queue-deferred
    </krt-queue-deferred>
    <krt-queue-operation>
      krt-queue-operation
    </krt-queue-operation>
    <krt-queue-last-error>
      krt-queue-last-error
    </krt-queue-last-error>
  </krt-queue-entry>
</krt-queue-nh-information>
```

#### Description

**<krt-queue-entry>**

#### Usage

```
<krt-queue-fdb-information>
  <krt-queue-entry>
    <krt-queue-deferred>
      krt-queue-deferred
    </krt-queue-deferred>
    <krt-queue-operation>
      krt-queue-operation
    </krt-queue-operation>
    <krt-queue-last-error>
      krt-queue-last-error
    </krt-queue-last-error>
  </krt-queue-entry>
</krt-queue-fdb-information>
```

#### Description

**<krt-queue-entry>**

#### Usage

```
<krt-queue-vclass-information>
  <krt-queue-entry>
    <krt-queue-deferred>
      krt-queue-deferred
    </krt-queue-deferred>
    <krt-queue-operation>
      krt-queue-operation
    </krt-queue-operation>
```

```
<krt-queue-last-error>
  krt-queue-last-error
</krt-queue-last-error>
</krt-queue-entry>
</krt-queue-vclass-information>
```

#### Description

### <krt-queue-fdb-information>

#### Usage

```
<krt-queue-fdb-information>
  <krt-queue-entry>....</krt-queue-entry>
  <krt-queue-fdb-vlan-index>
    krt-queue-fdb-vlan-index
  </krt-queue-fdb-vlan-index>
  <krt-queue-fdb-mac>
    krt-queue-fdb-mac
  </krt-queue-fdb-mac>
  <krt-queue-fdb-vlan-name>
    krt-queue-fdb-vlan-name
  </krt-queue-fdb-vlan-name>
  <krt-queue-fdb-nh-index>
    krt-queue-fdb-nh-index
  </krt-queue-fdb-nh-index>
</krt-queue-fdb-information>
```

#### Description

### <krt-queue-nh-information>

#### Usage

```
<krt-queue-nh-information>
  <krt-queue-entry>....</krt-queue-entry>
  <krt-queue-nh-index>
    krt-queue-nh-index
  </krt-queue-nh-index>
  <krt-queue-nh-type>
    krt-queue-nh-type
  </krt-queue-nh-type>

    </translated-hole>
  </gate>
</flow-gate-information>
```

**Description**

## Summary of Firewall Authentication Response Tags

### <firewall-authentication-history-details>

#### Usage

```
<firewall-authentication-history-details>
  <fwauth-history-info>....</fwauth-history-info>
  <fwauth-history-logical-system>....</fwauth-history-logical-system>
  <fwauth-history-table>....</fwauth-history-table>
</firewall-authentication-history-details>
```

**Description** History of firewall user authentication

### <firewall-authentication-history-specific>

#### Usage

```
<firewall-authentication-history-specific>
  <user-history-info>....</user-history-info>
</firewall-authentication-history-specific>
```

**Description** Historical authentication details of a specific firewall user

### <firewall-authentication-status>

#### Usage

```
<firewall-authentication-status>
  <running>
    running
  </running>
</firewall-authentication-status>
```

**Description** Status of firewall authentication service

### <firewall-authentication-table-details>

#### Usage

```
<firewall-authentication-table-details>
  <fwauth-table-info>....</fwauth-table-info>
  <fwauth-user-logical-system>....</fwauth-user-logical-system>
  <fwauth-users-table>....</fwauth-users-table>
</firewall-authentication-table-details>
```

**Description** Information about firewall users

### <firewall-authentication-users-specific>

#### Usage

```
<firewall-authentication-users-specific>
  <user-info>....</user-info>
</firewall-authentication-users-specific>
```

**Description** Authentication details of a specific firewall user

### <fwauth-entry>

#### Usage

```
<firewall-authentication-table-details>
  <fwauth-users-table>
    <fwauth-entry>
      <auth-id>
        auth-id
      </auth-id>
      <src-ip>
        src-ip
      </src-ip>
      <src-zone>
        src-zone
      </src-zone>
      <dst-zone>
        dst-zone
      </dst-zone>
      <access-profile>
```

```

        access-profile
      </access-profile>
    <age>
      age
    </age>
    <status>
      status
    </status>
    <user-name>
      user-name
    </user-name>
  </fwauth-entry>
</fwauth-users-table>
</firewall-authentication-table-details>

```

**Description** Current firewall user authentication information

### <fwauth-history>

#### Usage

```

<firewall-authentication-history-details>
  <fwauth-history-table>
    <fwauth-history>
      <auth-id>
        auth-id
      </auth-id>
      <src-ip>
        src-ip
      </src-ip>
      <start-date>
        start-date
      </start-date>
      <start-time>
        start-time
      </start-time>
      <duration>
        duration
      </duration>
      <status>
        status
      </status>
      <user-name>
        user-name
      </user-name>
    </fwauth-history>
  </fwauth-history-table>
</firewall-authentication-history-details>

```

**Description** History of firewall user authentication

### <fwauth-history-info>

**Usage**

```
<firewall-authentication-history-details>
  <fwauth-history-info>
    <fwauth-total-authentications>
      fwauth-total-authentications
    </fwauth-total-authentications>
  </fwauth-history-info>
</firewall-authentication-history-details>
```

**Description** Historical information about firewall authentication

### <fwauth-history-logical-system>

**Usage**

```
<firewall-authentication-history-details>
  <fwauth-history-logical-system>
    <history-logical-name>
      history-logical-name
    </history-logical-name>
  </fwauth-history-logical-system>
</firewall-authentication-history-details>
```

**Description** Logical system

### <fwauth-history-table>

**Usage**

```
<firewall-authentication-history-details>
  <fwauth-history-table>
    <fwauth-history>....</fwauth-history>
  </fwauth-history-table>
</firewall-authentication-history-details>
```

**Description**

### <fwauth-table-info>

**Usage**

```
<firewall-authentication-table-details>
  <fwauth-table-info>
    <fwauth-total-users>
      fwauth-total-users
    </fwauth-total-users>
  </fwauth-table-info>
</firewall-authentication-table-details>
```

**Description** Information about firewall authentication table

## <fwauth-user-logical-system>

### Usage

```

<firewall-authentication-table-details>
  <fwauth-user-logical-system>
    <user-logical-name>
      user-logical-name
    </user-logical-name>
  </fwauth-user-logical-system>
</firewall-authentication-table-details>

```

**Description** Logical system

## <fwauth-users-table>

### Usage

```

<firewall-authentication-table-details>
  <fwauth-users-table>
    <fwauth-entry>....</fwauth-entry>
  </fwauth-users-table>
</firewall-authentication-table-details>

```

**Description**

## <user-history-info>

### Usage

```

<firewall-authentication-history-specific>
  <user-history-info>
    <user-name>
      user-name
    </user-name>
    <src-ip>

```

<ca-certificate-enroll>
  <ca-subject>
    ca-subject
  </ca-subject>
  <fingerprint>.....</fingerprint>
</ca-certificate-enroll>

```

**Description** Dump the subject and fingerprint of received CA certificate

**<ca-certificate-enroll>****Usage**

```

<ca-certificate-enroll-list>
  <ca-certificate-enroll>
    <ca-subject>

```

```
    ca-subject
  </ca-subject>
  <fingerprint>....</fingerprint>
</ca-certificate-enroll>
</ca-certificate-enroll-list>
```

**Description** Dump the subject and fingerprint of received CA certificate

### <ca-certificate-enroll-list>

#### Usage

```
<ca-certificate-enroll-list>
  <ca-certificate-enroll-msg>
    ca-certificate-enroll-msg
  </ca-certificate-enroll-msg>
  <ca-certificate-enroll>....</ca-certificate-enroll>
</ca-certificate-enroll-list>
```

#### Description

### <cert-ca-load-status>

#### Usage

```
<cert-ca-load-status>
  <cert-ca-profile>
    cert-ca-profile
  </cert-ca-profile>
</cert-ca-load-status>
```

**Description** Certificate Authority certificate load status

### <cert-ca-manual-load>

#### Usage

```
<cert-ca-manual-load>
  <fingerprint>....</fingerprint>
</cert-ca-manual-load>
```

**Description** CA certificate manual-load prompt

### <cert-flag-info>

#### Usage

```
<cert-flag-info>
  <cert-flag-trust>
    cert-flag-trust
  </cert-flag-trust>
  <cert-flag-root>
    cert-flag-root
  </cert-flag-root>
```

</cert-flag-info>

**Description** Information about state of certificates present in the cache

### <cert-flag-info>

#### Usage

```
<x509-certificate-cache-info>
  <cert-flag-info>
    <cert-flag-trust>
      cert-flag-trust
    </cert-flag-trust>
    <cert-flag-root>
      cert-flag-root
    </cert-flag-root>
  </cert-flag-info>
</x509-certificate-cache-info>
```

**Description** Information about state of certificates present in the cache

### <cert-flag-info>

#### Usage

```
<x509-certificate-cache-info-list>
  <x509-certificate-cache-info>
    <cert-flag-info>
      <cert-flag-trust>
        cert-flag-trust
      </cert-flag-trust>
      <cert-flag-root>
        cert-flag-root
      </cert-flag-root>
    </cert-flag-info>
  </x509-certificate-cache-info>
</x509-certificate-cache-info-list>
```

**Description** Information about state of certificates present in the cache

### <cert-key-pair>

#### Usage

```
<cert-key-pair>
  <cert-key-pair-name>
    cert-key-pair-name
  </cert-key-pair-name>
  <cert-key-pair-size>
    cert-key-pair-size
  </cert-key-pair-size>
</cert-key-pair>
```

**Description**   Generate key pair status

### <cert-load-status>

**Usage**

```
<cert-load-status>
  <cert-certificate-id>
    cert-certificate-id
  </cert-certificate-id>
</cert-load-status>
```

**Description**   Local certificate load status

### <cert-request-dump>

**Usage**

```
<cert-request-dump>
  <cert-request-dump-msg>
    cert-request-dump-msg
  </cert-request-dump-msg>
  <cert-request-dump-file>....</cert-request-dump-file>
  <fingerprint>....</fingerprint>
</cert-request-dump>
```

**Description**   Dump the generated certificate request

### <cert-request-dump-file>

**Usage**

```
<cert-request-dump>
  <cert-request-dump-file>
    <cert-request-dump-file-content>
      cert-request-dump-file-content
    </cert-request-dump-file-content>
  </cert-request-dump-file>
</cert-request-dump>
```

**Description**   File contents

### <certificate-information>

**Usage**

```
<certificate-information>
  <certificates>....</certificates>
  <total-entries>
    total-entries
  </total-entries>
  <active-entries>
    active-entries
  </active-entries>
```

```

<locked-entries>
  locked-entries
</locked-entries>
<db-stats>....</db-stats>
</certificate-information>

```

## Description

### <certificates>

#### Usage

```

<certificates>
  <cert-subject>
    cert-subject
  </cert-subject>
  <cert-serial>
    cert-serial
  </cert-serial>
  <cert-id>
    cert-id
  </cert-id>
  <cert-references>
    cert-references
  </cert-references>
  <cert-issuer>
    cert-issuer
  </cert-issuer>
  <cert-trust>
    cert-trust
  </cert-trust>
  <cert-root>
    cert-root
  </cert-root>
  <cert-crl>
    cert-crl
  </cert-crl>
  <cert-before>
    cert-before
  </cert-before>
  <cert-after>
    cert-after
  </cert-after>
  <x509>....</x509>
</certificates>

```

**Description** Information about a single certificate

### <certificates>

#### Usage

```

<certificate-information>
  <certificates>
    <cert-subject>

```

```
    cert-subject
  </cert-subject>
  <cert-serial>
    cert-serial
  </cert-serial>

    cert-id
  </cert-id>
  <cert-references>
    cert-references
  </cert-references>
  <cert-issuer>
    cert-issuer
  </cert-issuer>
  <cert-trust>
    cert-trust
  </cert-trust>
  <cert-root>
    cert-root
  </cert-root>
  <cert-crl>
    cert-crl
  </cert-crl>
  <cert-before>
    cert-before
  </cert-before>
  <cert-after>
    cert-after
  </cert-after>
  <x509>....</x509>
</certificates>
</certificate-information>
```

**Description** Information about a single certificate

## <crl>

### Usage

```
<crl>
  <cert-issuer>
    cert-issuer
  </cert-issuer>
  <cert-id>
    cert-id
  </cert-id>
  <cert-references>
    cert-references
  </cert-references>
  <crl-list>....</crl-list>
</crl>
```

### Description

**<crl>****Usage**

```

<crl-information>
  <crl>
    <cert-issuer>
      cert-issuer
    </cert-issuer>
    <cert-id>
      cert-id
    </cert-id>
    <cert-references>
      cert-references
    </cert-references>
    <crl-list>....</crl-list>
  </crl>
</crl-information>

```

**Description****<crl-information>****Usage**

```

<crl-information>
  <crl>....</crl>
</crl-information>

```

**Description****<crl-issuer-alternate-subject-list>****Usage**

```

<crl-issuer-alternate-subject-list>
  <crl-issuer-alternate-subject>
    crl-issuer-alternate-subject
  </crl-issuer-alternate-subject>
</crl-issuer-alternate-subject-list>

```

**Description****<crl-issuer-alternate-subject-list>****Usage**

```

<x509-crl-information>
  <crl-issuer-alternate-subject-list>
    <crl-issuer-alternate-subject>
      crl-issuer-alternate-subject
    </crl-issuer-alternate-subject>
  </crl-issuer-alternate-subject-list>
</x509-crl-information>

```

**Description****<crl-issuer-alternate-subject-list>****Usage**

```
<x509-pki-crl-information-list>
  <x509-crl-information>
    <crl-issuer-alternate-subject-list>
      <crl-issuer-alternate-subject>
        crl-issuer-alternate-subject
      </crl-issuer-alternate-subject>
    </crl-issuer-alternate-subject-list>
  </x509-crl-information>
</x509-pki-crl-information-list>
```

**Description****<crl-issuer-detail>****Usage**

```
<x509-crl-information>
  <crl-issuer-detail>
    <distinguished-name>....</distinguished-name>
  </crl-issuer-detail>
</x509-crl-information>
```

**Description** Distinguished name of CRL issuer

**<crl-issuer-detail>****Usage**

```
<x509-pki-crl-information-list>
  <x509-crl-information>
    <crl-issuer-detail>
      <distinguished-name>....</distinguished-name>
    </crl-issuer-detail>
  </x509-crl-information>
</x509-pki-crl-information-list>
```

**Description** Distinguished name of CRL issuer

**<crl-list>****Usage**

```
<crl>
  <crl-list>
    <serial>
      serial
    </serial>
    <revocation-date>
      revocation-date
    </revocation-date>
```

```
</crl-list>
</crl>
```

**Description** Information about a single CRL entry

### <crl-list>

**Usage**

```
<crl-list>
  <serial>
    serial
  </serial>
  <revocation-date>
    revocation-date
  </revocation-date>
</crl-list>
```

**Description** Information about a single CRL entry

### <crl-list>

**Usage**

```
<crl-information>
  <crl>
    <crl-list>
      <serial>
        serial
      </serial>
      <revocation-date>
        revocation-date
      </revocation-date>
    </crl-list>
  </crl>
</crl-information>
```

**Description** Information about a single CRL entry

### <crl-load-status>

**Usage**

```
<crl-load-status>
  <ca-profile-name>
    ca-profile-name
  </ca-profile-name>
</crl-load-status>
```

**Description** Status of manual load of certificate revocation list

### <crl-revocation-list>

#### Usage

```
<crl-revocation-list>
  <revoked-cert-serial-number>
    revoked-cert-serial-number
  </revoked-cert-serial-number>
  <crl-revocation-date>
    crl-revocation-date
  </crl-revocation-date>
</crl-revocation-list>
```

#### Description

### <crl-revocation-list>

#### Usage

```
<x509-crl-information>
  <crl-revocation-list>
    <revoked-cert-serial-number>
      revoked-cert-serial-number
    </revoked-cert-serial-number>
    <crl-revocation-date>
      crl-revocation-date
    </crl-revocation-date>
  </crl-revocation-list>
</x509-crl-information>
```

#### Description

### <crl-revocation-list>

#### Usage

```
<x509-pki-crl-information-list>
  <x509-crl-information>

```
<cert-request-dump>
  <fingerprint>
    <fingerprint-hash-algorithm>
      fingerprint-hash-algorithm
    </fingerprint-hash-algorithm>
    <fingerprint-content>
```

```

        fingerprint-content
      </fingerprint-content>
    </fingerprint>
  </cert-request-dump>

```

**Description**    Fingerprint

### <fingerprint>

#### Usage

```

<ca-certificate-enroll>
  <fingerprint>
    <fingerprint-hash-algorithm>
      fingerprint-hash-algorithm
    </fingerprint-hash-algorithm>
    <fingerprint-content>
      fingerprint-content
    </fingerprint-content>
  </fingerprint>
</ca-certificate-enroll>

```

**Description**    Fingerprint

### <fingerprint>

#### Usage

```

<ca-certificate-enroll-list>
  <ca-certificate-enroll>
    <fingerprint>
      <fingerprint-hash-algorithm>
        fingerprint-hash-algorithm
      </fingerprint-hash-algorithm>
      <fingerprint-content>
        fingerprint-content
      </fingerprint-content>
    </fingerprint>
  </ca-certificate-enroll>
</ca-certificate-enroll-list>

```

**Description**    Fingerprint

### <fingerprint>

#### Usage

```

<x509-pki-certificate-info-list>
  <x509-certificate-info>
    <fingerprint>
      <fingerprint-hash-algorithm>
        fingerprint-hash-algorithm
      </fingerprint-hash-algorithm>
      <fingerprint-content>

```

```
        fingerprint-content
      </fingerprint-content>
    </fingerprint>
  </x509-certificate-info>
</x509-pki-certificate-info-list>
```

**Description**    Fingerprint

### <fingerprint>

#### Usage

```
<x509-certificate-cache-info>
  <fingerprint>
    <fingerprint-hash-algorithm>
      fingerprint-hash-algorithm
    </fingerprint-hash-algorithm>
    <fingerprint-content>
      fingerprint-content
    </fingerprint-content>
  </fingerprint>
</x509-certificate-cache-info>
```

**Description**    Fingerprint

### <fingerprint>

#### Usage

```
<x509-certificate-cache-info-list>
  <x509-certificate-cache-info>
    <fingerprint>
      <fingerprint-hash-algorithm>
        fingerprint-hash-algorithm
      </fingerprint-hash-algorithm>
      <fingerprint-content>
        fingerprint-content
      </fingerprint-content>
    </fingerprint>
  </x509-certificate-cache-info>
</x509-certificate-cache-info-list>
```

**Description**    Fingerprint

### <fips-pic-status>

#### Usage

```
<fips-pic-status>
  <fpc-slot>
    fpc-slot
  </fpc-slot>
  <pic-slot>
    pic-slot
  </pic-slot>
</fips-pic-status>
```

```

</pic-slot>
<serial-number>
  serial-number
</serial-number>
<authorization-status>
  authorization-status
</authorization-status>
</fips-pic-status>

```

#### Description

### <fips-pic-status>

#### Usage

```

<fips-pic-status-information>
  <fips-pic-status>
    <fpc-slot>
      fpc-slot
    </fpc-slot>
    <pic-slot>
      pic-slot
    </pic-slot>
    <serial-number>
      serial-number
    </serial-number>
    <authorization-status>
      authorization-status
    </authorization-status>
  </fips-pic-status>
</fips-pic-status-information>

```

#### Description

### <fips-pic-status-information>

#### Usage

```

<fips-pic-status-information>
  <fips-pic-status>.....</fips-pic-status>
</fips-pic-status-information>

```

#### Description

### <gvpn-kek-security-associations-information>

#### Usage

```

    <ike-xauth-username>
      ike-xauth-username
    </ike-xauth-username>
    <ike-active-peers>....</ike-active-peers>
  </ike-active-peers-block>
</ike-active-peers-information>

```

**Description** IKE active peer

**<ike-active-peers-information>****Usage**

```

<ike-active-peers-information>
  <ike-active-peers>....</ike-active-peers>
  <ike-active-peers-block>....</ike-active-peers-block>
</ike-active-peers-information>

```

**Description****<ike-sa-algorithms>****Usage**

```
<ike-sa-algorithms>
  <ike-sa-authentication-algorithm>
    ike-sa-authentication-algorithm
  </ike-sa-authentication-algorithm>
  <ike-sa-encryption-algorithm>
    ike-sa-encryption-algorithm
  </ike-sa-encryption-algorithm>
  <ike-sa-prf-algorithm>
    ike-sa-prf-algorithm
  </ike-sa-prf-algorithm>
  <ike-sa-dhgroup>
    ike-sa-dhgroup
  </ike-sa-dhgroup>
</ike-sa-algorithms>
```

**Description** Algorithms used with the SA information

**<ike-sa-algorithms>****Usage**

```
<ike-security-associations>
  <ike-sa-algorithms>
    <ike-sa-authentication-algorithm>
      ike-sa-authentication-algorithm
    </ike-sa-authentication-algorithm>
    <ike-sa-encryption-algorithm>
      ike-sa-encryption-algorithm
    </ike-sa-encryption-algorithm>
    <ike-sa-prf-algorithm>
      ike-sa-prf-algorithm
    </ike-sa-prf-algorithm>
    <ike-sa-dhgroup>
      ike-sa-dhgroup
    </ike-sa-dhgroup>
  </ike-sa-algorithms>
</ike-security-associations>
```

**Description** Algorithms used with the SA information

**<ike-sa-algorithms>****Usage**

```
<ike-security-associations-block>
  <ike-security-associations>
    <ike-sa-algorithms>
      <ike-sa-authentication-algorithm>
        ike-sa-authentication-algorithm
      </ike-sa-authentication-algorithm>
```

```

<ike-sa-encryption-algorithm>
  ike-sa-encryption-algorithm
</ike-sa-encryption-algorithm>
<ike-sa-prf-algorithm>
  ike-sa-prf-algorithm
</ike-sa-prf-algorithm>
<ike-sa-dhgroup>
  ike-sa-dhgroup
</ike-sa-dhgroup>
</ike-sa-algorithms>
</ike-security-associations>
</ike-security-associations-block>

```

**Description** Algorithms used with the SA information

### <ike-sa-algorithms>

#### Usage

```

<ike-security-associations-information>
<ike-security-associations>
  <ike-sa-algorithms>
    <ike-sa-authentication-algorithm>
      ike-sa-authentication-algorithm
    </ike-sa-authentication-algorithm>
    <ike-sa-encryption-algorithm>
      ike-sa-encryption-algorithm
    </ike-sa-encryption-algorithm>
    <ike-sa-prf-algorithm>
      ike-sa-prf-algorithm
    </ike-sa-prf-algorithm>
    <ike-sa-dhgroup>
      ike-sa-dhgroup
    </ike-sa-dhgroup>
  </ike-sa-algorithms>
</ike-security-associations>
</ike-security-associations-information>

```

**Description** Algorithms used with the SA information

### <ike-sa-algorithms>

#### Usage

```

<ike-security-associations-information>
<ike-security-associations-block>
  <ike-security-associations>
    <ike-sa-algorithms>
      <ike-sa-authentication-algorithm>
        ike-sa-authentication-algorithm
      </ike-sa-authentication-algorithm>
      <ike-sa-encryption-algorithm>
        ike-sa-encryption-algorithm
      </ike-sa-encryption-algorithm>
    </ike-sa-algorithms>
  </ike-security-associations>
</ike-security-associations-block>

```

```
<ike-sa-prf-algorithm>
  ike-sa-prf-algorithm
</ike-sa-prf-algorithm>
<ike-sa-dhgroup>
  ike-sa-dhgroup
</ike-sa-dhgroup>
</ike-sa-algorithms>
</ike-security-associations>
</ike-security-associations-block>
</ike-security-associations-information>
```

**Description** Algorithms used with the SA information

### <ike-sa-algorithms>

#### Usage

```
<gvpn-kek-security-associations-information>
<ike-security-associations>
  <ike-sa-algorithms>
    <ike-sa-authentication-algorithm>
      ike-sa-authentication-algorithm
    </ike-sa-authentication-algorithm>
    <ike-sa-encryption-algorithm>
      ike-sa-encryption-algorithm
    </ike-sa-encryption-algorithm>
    <ike-sa-prf-algorithm>
      ike-sa-prf-algorithm
    </ike-sa-prf-algorithm>
    <ike-sa-dhgroup>
      ike-sa-dhgroup
    </ike-sa-dhgroup>
  </ike-sa-algorithms>
</ike-security-associations>
</gvpn-kek-security-associations-information>
```

**Description** Algorithms used with the SA information

### <ike-sa-algorithms>

#### Usage

```
<gvpn-kek-security-associations-information>
<ike-security-associations-block>
  <ike-security-associations>
    <ike-sa-algorithms>
      <ike-sa-authentication-algorithm>
        ike-sa-authentication-algorithm
      </ike-sa-authentication-algorithm>
      <ike-sa-encryption-algorithm>
        ike-sa-encryption-algorithm
      </ike-sa-encryption-algorithm>
      <ike-sa-prf-algorithm>
        ike-sa-prf-algorithm
```

```

    </ike-sa-prf-algorithm>
    <ike-sa-dhgroup>
      ike-sa-dhgroup
    </ike-sa-dhgroup>
  </ike-sa-algorithms>
</ike-security-associations>
</ike-security-associations-block>
</gvpn-kek-security-associations-information>

```

**Description** Algorithms used with the SA information

### <ike-sa-location>

#### Usage

```

<ike-security-associations-block>
  <ike-sa-location>
    <ike-sa-fpc>
      ike-sa-fpc
    </ike-sa-fpc>
    <ike-sa-pic>
      ike-sa-pic
    </ike-sa-pic>
    <ike-sa-kmd-instance>
      ike-sa-kmd-instance
    </ike-sa-kmd-instance>
  </ike-sa-location>
</ike-security-associations-block>

```

**Description** Location where SA is processed

### <ike-sa-location>

#### Usage

```

<ike-sa-location>
  <ike-sa-fpc>
    ike-sa-fpc
  </ike-sa-fpc>
  <ike-sa-pic>
    ike-sa-pic
  </ike-sa-pic>
  <ike-sa-kmd-instance>
    ike-sa-kmd-instance
  </ike-sa-kmd-instance>
</ike-sa-location>

```

**Description** Location where SA is processed

### <ike-sa-location>

#### Usage

```

<ike-security-associations-information>

```

```
<ike-sa-location>
  <ike-sa-fpc>
    ike-sa-fpc
  </ike-sa-fpc>
  <ike-sa-pic>
    ike-sa-pic
  </ike-sa-pic>
  <ike-sa-kmd-instance>
    ike-sa-kmd-instance
  </ike-sa-kmd-instance>
</ike-sa-location>
</ike-security-associations-information>
```

**Description** Location where SA is processed

### <ike-sa-location>

#### Usage

```
<ike-security-associations-information>
  <ike-security-associations-block>
    <ike-sa-location>
      <ike-sa-fpc>
        ike-sa-fpc
      </ike-sa-fpc>

**Description** Information about ipsec pic redundancy

### <ipsec-pic-redundancy-information>

**Usage**

```
<ipsec-pic-redundancy-information>
  <ipsec-pic-redundancy>....</ipsec-pic-redundancy>
</ipsec-pic-redundancy-information>
```

**Description**

### <ipsec-registered-members>

**Usage**

```
<ipsec-registered-members>
  <member-gateway-name>
    member-gateway-name
  </member-gateway-name>
  <member-ip-addr>
    member-ip-addr
  </member-ip-addr>
  <member-last-update>
    member-last-update
  </member-last-update>
  <member-vsys>
    member-vsys
  </member-vsys>
</ipsec-registered-members>
```

**Description**

### <ipsec-registered-members>

**Usage**

```
<ipsec-registered-members-information>
  <ipsec-registered-members>
    <member-gateway-name>
      member-gateway-name
    </member-gateway-name>
    <member-ip-addr>
      member-ip-addr
    </member-ip-addr>
    <member-last-update>
      member-last-update
    </member-last-update>
    <member-vsys>
      member-vsys
    </member-vsys>
  </ipsec-registered-members>
</ipsec-registered-members-information>
```

**Description**

## <ipsec-registered-members-information>

### Usage

```

<ipsec-registered-members-information>
  <ipsec-registered-members>....</ipsec-registered-members>
  <member-group-name>
    member-group-name
  </member-group-name>
  <member-group-id>
    member-group-id
  </member-group-id>
</ipsec-registered-members-information>

```

</chassis-cluster-information>

```

## Description

## &lt;chassis-cluster-information&gt;

## Usage

```

<chassis-cluster-information>
  <chassis-cluster-redundancy-mode>....</chassis-cluster-redundancy-mode>
  <chassis-cluster-internal-statistics>....</chassis-cluster-internal-statistics>
  <chassis-cluster-led-information>....</chassis-cluster-led-information>
  <control-link-vlan-information>....</control-link-vlan-information>
  <redundancy-group-information-list>....</redundancy-group-information-list>
  <spu-monitoring-information>....</spu-monitoring-information>
  <loopback-information>....</loopback-information>

  <cold-synchronization-monitoring-information>....</cold-synchronization-monitoring-information>

  <interface-monitoring-information>....</interface-monitoring-information>
  <fabric-link-information>....</fabric-link-information>
  <control-link-information>....</control-link-information>

```

```
<hardware-monitoring-information>....</hardware-monitoring-information>
<chassis-cluster-information-issu>....</chassis-cluster-information-issu>

<chassis-cluster-information-command-history>....</chassis-cluster-information-command-history>

</chassis-cluster-information>
```

**Description** Displays complete statistics for debugging purposes

### <chassis-cluster-information-command-history>

**Usage**

```
<chassis-cluster-information-command-history>
  <chassis-cluster-information-command-history-event>
    chassis-cluster-information-command-history-event
  </chassis-cluster-information-command-history-event>
</chassis-cluster-information-command-history>
```

**Description** Displays command history information for debugging purposes

### <chassis-cluster-information-command-history>

**Usage**

```
<chassis-cluster-information>
  <chassis-cluster-information-command-history>
    <chassis-cluster-information-command-history-event>
      chassis-cluster-information-command-history-event
    </chassis-cluster-information-command-history-event>
  </chassis-cluster-information-command-history>
</chassis-cluster-information>
```

**Description** Displays command history information for debugging purposes

### <chassis-cluster-information-issu>

**Usage**

```
<chassis-cluster-information-issu>
  <chassis-cluster-information-issu-event>
    chassis-cluster-information-issu-event
  </chassis-cluster-information-issu-event>
</chassis-cluster-information-issu>
```

**Description** Displays complete ISSU information for debugging purposes

### <chassis-cluster-information-issu>

**Usage**

```
<chassis-cluster-information>
  <chassis-cluster-information-issu>
```

```

<chassis-cluster-information-issu-event>
  chassis-cluster-information-issu-event
</chassis-cluster-information-issu-event>
</chassis-cluster-information-issu>
</chassis-cluster-information>

```

**Description** Displays complete ISSU information for debugging purposes

### <chassis-cluster-information-uspipc>

#### Usage

```

<chassis-cluster-information-uspipc>
  <chassis-cluster-information-uspipc-event>
    chassis-cluster-information-uspipc-event
  </chassis-cluster-information-uspipc-event>
</chassis-cluster-information-uspipc>

```

**Description** Displays complete uspipc information for debugging purposes

### <chassis-cluster-interface-statistics>

#### Usage

```

<chassis-cluster-interface-statistics>
  <control-interface-status>
    control-interface-status
  </control-interface-status>
  <control-link-interfaces>....</control-link-interfaces>
  <dataplane-interface-status>
    dataplane-interface-status
  </dataplane-interface-status>
  <dataplane-interfaces>....</dataplane-interfaces>
  <reth>....</reth>
  <interface-monitoring>....</interface-monitoring>
</chassis-cluster-interface-statistics>

```

**Description**

### <chassis-cluster-interfaces>

#### Usage

```

<chassis-cluster-statistics>
  <chassis-cluster-interfaces>
    <chassis-cluster-control>....</chassis-cluster-control>
    <chassis-cluster-fabric>....</chassis-cluster-fabric>
  </chassis-cluster-interfaces>
</chassis-cluster-statistics>

```

**Description**

## <chassis-cluster-internal-statistics>

### Usage

```
<chassis-cluster-information>
  <chassis-cluster-internal-statistics>
    <chassis-cluster-control-statistics>....</chassis-cluster-control-statistics>
    <chassis-cluster-fabric-statistics>....</chassis-cluster-fabric-statistics>
    <chassis-cluster-swfabric-statistics>....</chassis-cluster-swfabric-statistics>
  </chassis-cluster-internal-statistics>
</chassis-cluster-information>
```

### Description

## <chassis-cluster-ip-monitoring>

### Usage

```
<chassis-cluster-ip-monitoring>
  <redundancy-group>
    redundancy-group
  </redundancy-group>
  <ip-monitoring-weight>
    ip-monitoring-weight
  </ip-monitoring-weight>
  <ip-reachability-status>
    ip-reachability-status
  </ip-reachability-status>
  <reason>
    reason
  </reason>
  <ip-address>
    ip-address
  </ip-address>
  <failure-count>
    failure-count
  </failure-count>
</chassis-cluster-ip-monitoring>
```

### Description

## <chassis-cluster-ip-monitoring-database>

### Usage

```
<chassis-cluster-ip-monitoring-information>
  <chassis-cluster-ip-monitoring-database>
    <ip-monitoring-index>
      ip-monitoring-index
    </ip-monitoring-index>

  </ip-monitoring-ip-address>
  <ip-monitoring-redundant-ethernet>
    ip-monitoring-redundant-ethernet
  </ip-monitoring-redundant-ethernet>
  <ip-monitoring-reference-count>
    ip-monitoring-reference-count
  </ip-monitoring-reference-count>
  <ip-monitoring-status>
    ip-monitoring-status
  </ip-monitoring-status>
</chassis-cluster-ip-monitoring-global-database>
</chassis-cluster-ip-monitoring-information>

```

#### Description

## <chassis-cluster-ip-monitoring-information>

### Usage

```
<chassis-cluster-ip-monitoring-information>
  <chassis-cluster-ip-monitoring-global-database>....</chassis-cluster-ip-monitoring-global-database>
  <chassis-cluster-ip-monitoring-database>....</chassis-cluster-ip-monitoring-database>
  <chassis-cluster-reth-database>....</chassis-cluster-reth-database>
</chassis-cluster-ip-monitoring-information>
```

**Description** Show IP monitoring information

## <chassis-cluster-led-information>

### Usage

```
<chassis-cluster-information>
  <chassis-cluster-led-information>
    <current-led-color>
      current-led-color
    </current-led-color>
    <last-change-reason>
      last-change-reason
    </last-change-reason>
  </chassis-cluster-led-information>
</chassis-cluster-information>
```

**Description** Chassis cluster LED related information

## <chassis-cluster-redundancy-mode>

### Usage

```
<chassis-cluster-information>
  <chassis-cluster-redundancy-mode>
    <configured>
      configured
    </configured>
    <operational>
      operational
    </operational>
  </chassis-cluster-redundancy-mode>
</chassis-cluster-information>
```

**Description**

## <chassis-cluster-reth-database>

### Usage

```
<chassis-cluster-ip-monitoring-information>
```

```

<chassis-cluster-reth-database>
  <ip-monitoring-redundant-ethernet>
    ip-monitoring-redundant-ethernet
  </ip-monitoring-redundant-ethernet>
  <reth-child-info-count>
    reth-child-info-count

##### Usage

```

<chassis-cluster-statistics>
  <chassis-cluster-interfaces>....</chassis-cluster-interfaces>
</chassis-cluster-statistics>

```

#### Description

#### <chassis-cluster-status>

##### Usage

```

<chassis-cluster-status>
  <cluster-id>
    cluster-id
  </cluster-id>
  <redundancy-group>
    redundancy-group
  </redundancy-group>
</chassis-cluster-status>

```

#### Description

#### <chassis-cluster-status>

##### Usage

```

<chassis-cluster-ethernet-switching-status>
  <chassis-cluster-status>
    <cluster-id>

```

```
    cluster-id
  </cluster-id>
  <redundancy-group>
    redundancy-group
  </redundancy-group>
</chassis-cluster-status>
</chassis-cluster-ethernet-switching-status>
```

#### Description

### <chassis-cluster-swfabric>

#### Usage

```
<chassis-cluster-swfabric>
  <swfabric-probe-state>
    swfabric-probe-state
  </swfabric-probe-state>
  <swfabric-link-heartbeat-packets-sent>
    swfabric-link-heartbeat-packets-sent
  </swfabric-link-heartbeat-packets-sent>
  <swfabric-link-heartbeat-packets-received>
    swfabric-link-heartbeat-packets-received
  </swfabric-link-heartbeat-packets-received>
  <swfabric-probe-recv-errors>
    swfabric-probe-recv-errors
  </swfabric-probe-recv-errors>
  <swfabric-probe-send-errors>
    swfabric-probe-send-errors
  </swfabric-probe-send-errors>
</chassis-cluster-swfabric>
```

#### Description

### <chassis-cluster-swfabric>

#### Usage

```
<chassis-cluster-ethernet-switching-statistics>
  <chassis-cluster-swfabric>
    <swfabric-probe-state>
      swfabric-probe-state
    </swfabric-probe-state>
    <swfabric-link-heartbeat-packets-sent>
      swfabric-link-heartbeat-packets-sent
    </swfabric-link-heartbeat-packets-sent>
    <swfabric-link-heartbeat-packets-received>
      swfabric-link-heartbeat-packets-received
    </swfabric-link-heartbeat-packets-received>
    <swfabric-probe-recv-errors>
      swfabric-probe-recv-errors
    </swfabric-probe-recv-errors>
    <swfabric-probe-send-errors>
      swfabric-probe-send-errors
    </swfabric-probe-send-errors>
  </chassis-cluster-swfabric>
```

```
</chassis-cluster-ethernet-switching-statistics>
```

#### Description

#### <chassis-cluster-swfabric-statistics>

##### Usage

```
<chassis-cluster-information>
  <chassis-cluster-internal-statistics>
    <chassis-cluster-swfabric-statistics>
      <swfabric-probe-state>
        swfabric-probe-state
      </swfabric-probe-state>
      <swfabric-link-heartbeat-packets-sent>
        swfabric-link-heartbeat-packets-sent
      </swfabric-link-heartbeat-packets-sent>
      <swfabric-link-heartbeat-packets-received>

```

#### Description

#### <clear-chassis-cluster-information>

##### Usage

```
<clear-chassis-cluster-information>
  <chassis-cluster-information-type>
    chassis-cluster-information-type
  </chassis-cluster-information-type>
</clear-chassis-cluster-information>
```

**Description** Clear chassis cluster information

### <clear-chassis-cluster-statistics>

#### Usage

```
<clear-chassis-cluster-statistics>
  <chassis-cluster-statistics-type>
    chassis-cluster-statistics-type
  </chassis-cluster-statistics-type>
</clear-chassis-cluster-statistics>
```

**Description** Clear chassis cluster statistics

### <cold-synchronization-events>

#### Usage

```
<cold-synchronization-monitoring-information>
  <cold-synchronization-events>
    <cold-synchronization-event>
      cold-synchronization-event
    </cold-synchronization-event>
  </cold-synchronization-events>
</cold-synchronization-monitoring-information>
```

**Description** List of cold synchronization events

### <cold-synchronization-events>

#### Usage

```
<chassis-cluster-information>
  <cold-synchronization-monitoring-information>
    <cold-synchronization-events>
      <cold-synchronization-event>
        cold-synchronization-event
      </cold-synchronization-event>
    </cold-synchronization-events>
  </cold-synchronization-monitoring-information>
</chassis-cluster-information>
```

**Description** List of cold synchronization events

### <cold-synchronization-monitoring-information>

#### Usage

```
<cold-synchronization-monitoring-information>

<cold-synchronization-status-information>....</cold-synchronization-status-information>

  <cold-synchronization-statistics>....</cold-synchronization-statistics>
  <cold-synchronization-events>....</cold-synchronization-events>
</cold-synchronization-monitoring-information>
```

**Description** Cold sync monitoring related information

### <cold-synchronization-monitoring-information>

#### Usage

```
<chassis-cluster-information>
  <cold-synchronization-monitoring-information>

  <cold-synchronization-status-information>....</cold-synchronization-status-information>

  <cold-synchronization-statistics>....</cold-synchronization-statistics>
  <cold-synchronization-events>....</cold-synchronization-events>
</cold-synchronization-monitoring-information>
</chassis-cluster-information>
```

**Description** Cold sync monitoring related information

### <cold-synchronization-pfe-statistics>

#### Usage

```
<cold-synchronization-monitoring-information>
  <cold-synchronization-statistics>
    <cold-synchronization-pfe-statistics>
      <pfe-name>
        pfe-name
      </pfe-name>
      <cold-synchronization-pfe-completed>
        cold-synchronization-pfe-completed
      </cold-synchronization-pfe-completed>
      <cold-synchronization-pfe-failed>
        cold-synchronization-pfe-failed
      </cold-synchronization-pfe-failed>
    </cold-synchronization-pfe-statistics>
  </cold-synchronization-statistics>
</cold-synchronization-monitoring-information>
```

**Description** Cold synchroniizaton statistics for each PFE

### <cold-synchronization-pfe-statistics>

#### Usage

```
<chassis-cluster-information>
  <cold-synchronization-monitoring-information>
    <cold-synchronization-statistics>
      <cold-synchronization-pfe-statistics>
        <pfe-name>
          pfe-name
        </pfe-name>
        <cold-synchronization-pfe-completed>
          cold-synchronization-pfe-completed
        </cold-synchronization-pfe-completed>
        <cold-synchronization-pfe-failed>
```

```
    cold-synchronization-pfe-failed
  </cold-synchronization-pfe-failed>
</cold-synchronization-pfe-statistics>
</cold-synchronization-statistics>
</cold-synchronization-monitoring-information>
</chassis-cluster-information>
```

**Description** Cold synchroniizaton statistics for each PFE

### <cold-synchronization-statistics>

#### Usage

```
<cold-synchronization-monitoring-information>
  <cold-synchronization-statistics>
    <current-cold-synchronization-completed>
      current-cold-synchronization-completed
    </current-cold-synchronization-completed>
    <current-cold-synchronization-failed>
      current-cold-synchronization-failed
    </current-cold-synchronization-failed>
    <cold-synchronization-pfe-statistics>....</cold-synchronization-pfe-statistics>
  </cold-synchronization-statistics>
</cold-synchronization-monitoring-information>
```

**Description** Cold synchronization statistics

### <cold-synchronization-statistics>

#### Usage

```
<chassis-cluster-information>
  <cold-synchronization-monitoring-information>
    <cold-synchronization-statistics>
      <current-cold-synchronization-completed>
        current-cold-synchronization-completed
      </current-cold-synchronization-completed>
      <current-cold-synchronization-failed>
        current-cold-synchronization-failed
      </current-cold-synchronization-failed>
      <cold-synchronization-pfe-statistics>....</cold-synchronization-pfe-statistics>
    </cold-synchronization-statistics>
  </cold-synchronization-monitoring-information>
</chassis-cluster-information>
```

**Description** Cold synchronization statistics

### <cold-synchronization-status-information>

#### Usage

```
<cold-synchronization-monitoring-information>
  <cold-synchronization-status-information>
```

```

<cold-synchronization-completed>
  cold-synchronization-completed
</cold-synchronization-completed>
<cold-synchronization-not-completed>
  cold-synchronization-not-completed
</cold-synchronization-not-completed>
<cold-synchronization-unknown>
  cold-synchronization-unknown
</cold-synchronization-unknown>
<cold-synchronization-weight>
  cold-synchronization-weight
</cold-synchronization-weight>
</cold-synchronization-status-information>
</cold-synchronization-monitoring-information>

```

**Description** Cold synchronization related status information

### <cold-synchronization-status-information>

#### Usage

```

<chassis-cluster-information>
  <cold-synchronization-monitoring-information>
    <cold-synchronization-status-information>
      <cold-synchronization-completed>
        cold-synchronization-completed
      </cold-synchronization-completed>
      <cold-synchronization-not-completed>
        cold-synchronization-not-completed
      </cold-synchronization-not-completed>
      <cold-synchronization-unknown>
        cold-synchronization-unknown
      </cold-synchronization-unknown>
      <cold-synchronization-weight>
        cold-synchronization-weight
      </cold-synchronization-weight>
    </cold-synchronization-status-information>
  </cold-synchronization-monitoring-information>
</chassis-cluster-information>

```

**Description** Cold synchronization related status information

### <control-information>

#### Usage

```

<chassis-cluster-interface-statistics>
  <control-link-interfaces>
    <control-information>
      <control-link-interface-index>
        control-link-interface-index
      </control-link-interface-index>
      <control-link-interface-name>
        control-link-interface-name
    </control-information>
  </control-link-interfaces>
</chassis-cluster-interface-statistics>

```

```
</control-link-interface-name>
<control-link-interface-status>
  control-link-interface-status
</control-link-interface-status>
</control-information>
</control-link-interfaces>
</chassis-cluster-interface-statistics>
```

**Description****<control-link-events>****Usage**

```
<control-link-information>
  <control-link-events>
    <control-link-event>
      control-link-event
    </control-link-event>
  </control-link-events>
</control-link-information>
```

**Description** List of control link events

**<control-link-events>****Usage**

```
<chassis-cluster-information>
  <control-link-information>
    <control-link-events>
      <control-link-event>
        control-link-event
      </control-link-event>
    </control-link-events>
  </control-link-information>
</chassis-cluster-information>
```

**Description** List of control link events

**<control-link-hb-events>****Usage**

```
<control-link-information>
  <control-link-hb-events>
    <control-link-hb-event>
      control-link-hb-event
    </control-link-hb-event>
  </control-link-hb-events>
</control-link-information>
```

**Description** List of control link monitoring heartbeat and jitter events

### <control-link-hb-events>

#### Usage

```
<chassis-cluster-information>
  <control-link-information>
    <control-link-hb-events>
      <control-link-hb-event>
        control-link-hb-event
      </control-link-hb-event>
    </control-link-hb-events>
  </control-link-information>
</chassis-cluster-information>
```

**Description** List of control link monitoring heartbeat and jitter events

### <control-link-information>

#### Usage

```
<control-link-information>
  <control-interface-status>
    control-interface-status
  </control-interface-status>
  <control-link-events>....</control-link-events>
  <control-link-hb-events>....</control-link-hb-events>
</control-link-information>
```

**Description** Displays complete control link information for debugging purposes

### <control-link-information>

#### Usage

```
<chassis-cluster-information>
  <control-link-information>
    <control-interface-status>
      control-interface-status
    </control-interface-status>
    <control-link-events>....</control-link-events>
    <control-link-hb-events>....</control-link-hb-events>
  </control-link-information>
</chassis-cluster-information>
```

**Description** Displays complete control link information for debugging purposes

### <control-link-interfaces>

#### Usage

```
<chassis-cluster-interface-statistics>
  <control-link-interfaces>
    <control-information>....</control-information>
  </control-link-interfaces>
```

</chassis-cluster-interface-statistics>

#### Description

### <control-link-vlan-information>

#### Usage

```
<chassis-cluster-information>
  <control-link-vlan-information>
    <control-link-vlan-status>
      control-link-vlan-status
    </control-link-vlan-status>
  </control-link-vlan-information>
</chassis-cluster-information>
```

**Description** Control port traffic tagging with vlan(4094) enabled or disabled

### <dataplane-interfaces>

#### Usage

```
<chassis-cluster-interface-statistics>
  <dataplane-interfaces>
    <fabric-information>....</fabric-information>
  </dataplane-interfaces>
</chassis-cluster-interface-statistics>
```

#### Description

### <fabric-information>

#### Usage

```
<chassis-cluster-interface-statistics>
  <dataplane-interfaces>
    <fabric-information>
      <fabric-interface-index>
        fabric-interface-index
      </fabric-interface-index>
      <fabric-child-interface-name>
        fabric-child-interface-name
      </fabric-child-interface-name>
      <fabric-child-interface-status>
        fabric-child-interface-status
      </fabric-child-interface-status>
    </fabric-information>
  </dataplane-interfaces>
</chassis-cluster-interface-statistics>
```

#### Description

**<fabric-information>****Usage**

```

<chassis-cluster-dataplane-interfaces>
  <fabric-information>
    <fabric-interface-index>
      fabric-interface-index
    </fabric-interface-index>
    <fabric-child-interface-name>
      fabric-child-interface-name
    </fabric-child-interface-name>
    <fabric-child-interface-status>
      fabric-child-interface-status
    </fabric-child-interface-status>
  </fabric-information>
</chassis-cluster-dataplane-interfaces>

```

**Description****<fabric-link-events>****Usage**

```

<fabric-link-information>
  <fabric-link-events>
    <fabric-link-event>
      fabric-link-event
    </fabric-link-event>
  </fabric-link-events>
</fabric-link-information>

```

**Description** List of fabric link events**<fabric-link-events>****Usage**

```

<chassis-cluster-information>
  <fabric-link-information>
    <fabric-link-events>
      <fabric-link-event>
        fabric-link-event
      </fabric-link-event>
    </fabric-link-events>
  </fabric-link-information>
</chassis-cluster-information>

```

**Description** List of fabric link events**<fabric-link-hb-events>****Usage**

```

<fabric-link-information>

```

```
<fabric-link-hb-events>
  <fabric-link-hb-event>
    fabric-link-hb-event
  </fabric-link-hb-event>
</fabric-link-hb-events>
</fabric-link-information>
```

**Description** List of fabric link heartbeat and jitter events

### <fabric-link-hb-events>

#### Usage

```
<chassis-cluster-information>
  <fabric-link-information>
    <fabric-link-hb-events>
      <fabric-link-hb-event>
        fabric-link-hb-event
      </fabric-link-hb-event>
    </fabric-link-hb-events>
  </fabric-link-information>
</chassis-cluster-information>
```

**Description** List of fabric link heartbeat and jitter events

### <fabric-link-information>

#### Usage

```
<fabric-link-information>
  <fabric-monitoring-information>....</fabric-monitoring-information>
  <fabric-link-events>....</fabric-link-events>
  <fabric-link-hb-events>....</fabric-link-hb-events>
</fabric-link-information>
```

**Description** Displays complete fabric link information for debugging purposes

### <fabric-link-information>

#### Usage

```
<chassis-cluster-information>
  <fabric-link-information>
    <fabric-monitoring-information>....</fabric-monitoring-information>
    <fabric-link-events>....</fabric-link-events>
    <fabric-link-hb-events>....</fabric-link-hb-events>
  </fabric-link-information>
</chassis-cluster-information>
```

**Description** Displays complete fabric link information for debugging purposes

### <fabric-monitoring-information>

**Usage**

```
<fabric-monitoring-information>
  <fabric-monitoring-status>....</fabric-monitoring-status>
</fabric-monitoring-information>
```

**Description** Fabric monitoring related information

### <fabric-monitoring-information>

**Usage**

```
<fabric-link-information>
  <fabric-monitoring-information>
    <fabric-monitoring-status>....</fabric-monitoring-status>
  </fabric-monitoring-information>
</fabric-link-information>
```

**Description** Fabric monitoring related information

### <fabric-monitoring-information>

**Usage**

```
<chassis-cluster-information>
  <fabric-link-information>
    <fabric-monitoring-information>
      <fabric-monitoring-status>....</fabric-monitoring-status>
    </fabric-monitoring-information>
  </fabric-link-information>
</chassis-cluster-information>
```

**Description** Fabric monitoring related information

### <fabric-monitoring-status>

**Usage**

```
<fabric-monitoring-information>
  <fabric-monitoring-status>
    <fabric-monitoring-state>
      fabric-monitoring-state
    </fabric-monitoring-state>
    <fabric-monitoring-activation-status>
      fabric-monitoring-activation-status
    </fabric-monitoring-activation-status>
  </fabric-monitoring-status>
</fabric-monitoring-information>
```

**Description** Fabric monitoring status

## <fabric-monitoring-status>

### Usage

```
<fabric-link-information>
  <fabric-monitoring-information>
    <fabric-monitoring-status>
      <fabric-monitoring-state>
        fabric-monitoring-state
      </fabric-monitoring-state>
      <fabric-monitoring-activation-status>
        fabric-monitoring-activation-status
      </fabric-monitoring-activation-status>
    </fabric-monitoring-status>
  </fabric-monitoring-information>
</fabric-link-information>
```

**Description** Fabric monitoring status

## <fabric-monitoring-status>

### Usage

```
<chassis-cluster-information>
  <fabric-link-information>
    <fabric-monitoring-information>
      <fabric-monitoring-status>
        <fabric-monitoring-state>
          fabric-monitoring-state
        </fabric-monitoring-state>
        <fabric-monitoring-activation-status>
          fabric-monitoring-activation-status
        </fabric-monitoring-activation-status>
      </fabric-monitoring-status>
    </fabric-monitoring-information>
  </fabric-link-information>
</chassis-cluster-information>
```

**Description** Fabric monitoring status

## <hardware-monitoring-events>

### Usage

```
<hardware-monitoring-information>
  <hardware-monitoring-events>
    <hardware-monitoring-event>
      hardware-monitoring-event
    </hardware-monitoring-event>
  </hardware-monitoring-events>
</hardware-monitoring-information>
```

**Description** List of hardware monitoring events

### <hardware-monitoring-events>

#### Usage

```
<chassis-cluster-information>
  <hardware-monitoring-information>
    <hardware-monitoring-events>
      <hardware-monitoring-event>
        hardware-monitoring-event
      </hardware-monitoring-event>
    </hardware-monitoring-events>
  </hardware-monitoring-information>
</chassis-cluster-information>
```

**Description** List of hardware monitoring events

### <hardware-monitoring-information>

#### Usage

```
<hardware-monitoring-information>

<hardware-monitoring-status-information>....</hardware-monitoring-status-information>

  <hardware-monitoring-events>....</hardware-monitoring-events>
</hardware-monitoring-information>
```

**Description** Displays complete hardware monitoring information for debugging purposes

### <hardware-monitoring-information>

#### Usage

```
<chassis-cluster-information>
  <hardware-monitoring-information>

    <hardware-monitoring-status-information>....</hardware-monitoring-status-information>

      <hardware-monitoring-events>....</hardware-monitoring-events>
    </hardware-monitoring-information>
  </chassis-cluster-information>
```

**Description** Displays complete hardware monitoring information for debugging purposes

### <hardware-monitoring-status-information>

#### Usage

```
<hardware-monitoring-information>
  <hardware-monitoring-status-information>
    <hardware-monitoring-activation-status>
      hardware-monitoring-activation-status
    </hardware-monitoring-activation-status>
  <hardware-monitoring-rg0-errors>
```

```
    hardware-monitoring-rg0-errors
  </hardware-monitoring-rg0-errors>
  <hardware-monitoring-rg1-errors>
    hardware-monitoring-rg1-errors
  </hardware-monitoring-rg1-errors>
  <hardware-monitoring-rg0-failover>
    hardware-monitoring-rg0-failover
  </hardware-monitoring-rg0-failover>
</hardware-monitoring-status-information>
</hardware-monitoring-information>
```

#### Description

### <hardware-monitoring-status-information>

#### Usage

```
<chassis-cluster-information>
  <hardware-monitoring-information>
    <hardware-monitoring-status-information>
      <hardware-monitoring-activation-status>
        hardware-monitoring-activation-status
      </hardware-monitoring-activation-status>
      <hardware-monitoring-rg0-errors>
        hardware-monitoring-rg0-errors
      </hardware-monitoring-rg0-errors>
      <hardware-monitoring-rg1-errors>
        hardware-monitoring-rg1-errors
      </hardware-monitoring-rg1-errors>
      <hardware-monitoring-rg0-failover>
        hardware-monitoring-rg0-failover
      </hardware-monitoring-rg0-failover>
    </hardware-monitoring-status-information>
  </hardware-monitoring-information>
</chassis-cluster-information>
```

#### Description

### <interface-monitoring>

#### Usage

```
<chassis-cluster-interface-statistics>
  <interface-monitoring>
    <weight>
      weight
    </weight>
    <status>
      status
    </status>
    <interface-name-for-monitoring>
      interface-name-for-monitoring
    </interface-name-for-monitoring>
    <redundancy-group-for-interface>
      redundancy-group-for-interface
    </redundancy-group-for-interface>
```

```

</interface-monitoring>
</chassis-cluster-interface-statistics>

```

#### Description

### <interface-monitoring-events>

#### Usage

```

<interface-monitoring-information>
  <interface-monitoring-events>
    <interface-monitoring-event>
      interface-monitoring-event
    </interface-monitoring-event>
  </interface-monitoring-events>
</interface-monitoring-information>

```

**Description** List of interface monitoring events

### <interface-monitoring-events>

#### Usage

```

<chassis-cluster-information>
  <interface-monitoring-information>
    <interface-monitoring-events>
      <interface-monitoring-event>
        interface-monitoring-event
      </interface-monitoring-event>
    </interface-monitoring-events>
  </interface-monitoring-information>
</chassis-cluster-information>

```

**Description** List of interface monitoring events

### <interface-monitoring-information>

#### Usage

```

<interface-monitoring-information>
  <interface-monitoring-statistics>....</interface-monitoring-statistics>
  <interface-monitoring-events>....</interface-monitoring-events>
</interface-monitoring-information>

```

**Description** Interface monitoring related information

### <interface-monitoring-information>

#### Usage

```

<chassis-cluster-information>
  <interface-monitoring-information>
    <interface-monitoring-statistics>....</interface-monitoring-statistics>
    <interface-monitoring-events>....</interface-monitoring-events>
  </interface-monitoring-information>

```

```
</interface-monitoring-information>
</chassis-cluster-information>
```

**Description** Interface monitoring related information

### <interface-monitoring-statistics>

#### Usage

```
<interface-monitoring-information>
  <interface-monitoring-statistics>
    <monitored-interface-failover-count>
      monitored-interface-failover-count
    </monitored-interface-failover-count>
  </interface-monitoring-statistics>
</interface-monitoring-information>
```

**Description** Interface monitoring related statistics

### <interface-monitoring-statistics>

#### Usage

```
<chassis-cluster-information>
  <interface-monitoring-information>
    <interface-monitoring-statistics>
      <monitored-interface-failover-count>
        monitored-interface-failover-count
      </monitored-interface-failover-count>
    </interface-monitoring-statistics>
  </interface-monitoring-information>
</chassis-cluster-information>
```

**Description** Interface monitoring related statistics

### <loopback-information>

#### Usage

```
<loopback-information>
  <pfe-name>
    pfe-name
  </pfe-name>
  <loopback-status>
    loopback-status
  </loopback-status>
  <nexthop-status>
    nexthop-status
  </nexthop-status>
  <mbuf-status>
    mbuf-status
  </mbuf-status>
</loopback-information>
```

**Description** Loopback information

### <loopback-information>

#### Usage

```
<chassis-cluster-information>
  <loopback-information>
    <pfe-name>
      pfe-name
    </pfe-name>
    <loopback-status>
      loopback-status
    </loopback-status>
    <nexthop-status>
      nexthop-status
    </nexthop-status>
    <mbuf-status>
      mbuf-status
    </mbuf-status>
  </loopback-information>
</chassis-cluster-information>
```

**Description** Loopback information

### <redundancy-group-information>

#### Usage

```
<redundancy-group-information-list>
  <redundancy-group-information>
    <redundancy-group-id>
      redundancy-group-id
    </redundancy-group-id>

    <redundancy-group-monitoring-information>....</redundancy-group-monitoring-information>

    <redundancy-group-state-transition-events>....</redundancy-group-state-transition-events>

  </redundancy-group-information>
</redundancy-group-information-list>
```

**Description** Redundancy group related information

### <redundancy-group-information>

#### Usage

```
<chassis-cluster-information>
  <redundancy-group-information-list>
    <redundancy-group-information>
      <redundancy-group-id>
        redundancy-group-id
      </redundancy-group-id>
```

```
<redundancy-group-monitoring-information>....</redundancy-group-monitoring-information>
```

```
<redundancy-group-state-transition-events>....</redundancy-group-state-transition-events>
```

```
    </redundancy-group-information>
  </redundancy-group-information-list>
</chassis-cluster-information>
```

**Description** Redundancy group related information

### <redundancy-group-information-list>

#### Usage

```
<redundancy-group-information-list>
  <redundancy-group-information>....</redundancy-group-information>
</redundancy-group-information-list>
```

#### Description

### <redundancy-group-information-list>

#### Usage

```
<chassis-cluster-information>
  <redundancy-group-information-list>
    <redundancy-group-information>....</redundancy-group-information>
  </redundancy-group-information-list>
</chassis-cluster-information>
```

#### Description

### <redundancy-group-monitoring-information>

#### Usage

```
<redundancy-group-information-list>
  <redundancy-group-information>
    <redundancy-group-monitoring-information>
      <monitoring-failure-string>
        monitoring-failure-string
      </monitoring-failure-string>
      <redundancy-group-threshold>
        redundancy-group-threshold
      </redundancy-group-threshold>
    </redundancy-group-monitoring-information>
  </redundancy-group-information>
</redundancy-group-information-list>
```

#### Description

**<redundancy-group-monitoring-information>****Usage**

```

<chassis-cluster-information>
  <redundancy-group-information-list>
    <redundancy-group-information>
      <redundancy-group-monitoring-information>
        <monitoring-failure-string>
          monitoring-failure-string
        </monitoring-failure-string>
        <redundancy-group-threshold>

</show-lsys-lic-status>
```

**Description**

### <show-lsys-lic-status>

#### Usage

```
<show-lsys-lic-status>
<lsys-lic-status>....</lsys-lic-status>
</show-lsys-lic-status>
```

**Description** License status for each logical system

## Summary of DNS Proxy Response Tags

---

### <dns-proxy>

#### Usage

```
<dns-proxy-information>
<dns-proxy>
  <status>
    status
  </status>
  <queries-received>
    queries-received
  </queries-received>
  <responses-sent>
    responses-sent
  </responses-sent>
  <queries-forwarded>
    queries-forwarded
  </queries-forwarded>
  <negative-responses>
    negative-responses
  </negative-responses>
  <retries>
    retries
  </retries>
  <pending-requests>
    pending-requests
  </pending-requests>
  <server-failures>
    server-failures
  </server-failures>
  <cache-entries>
    cache-entries
  </cache-entries>
  <interfaces>....</interfaces>
</dns-proxy>
</dns-proxy-information>
```

**Description** Information DNS proxy status and statistics

### <dns-proxy-cache-entry>

#### Usage

```
<dns-proxy-cache-information>
<dns-proxy-cache-entry>
  <hostname>
    hostname
  </hostname>
  <host-address>
    host-address
  </host-address>
```

```
<ttl>
  ttl
</ttl>
<entry-type>
  entry-type
</entry-type>
<class>
  class
</class>
</dns-proxy-cache-entry>
</dns-proxy-cache-information>
```

**Description** Information DNS proxy status and statistics

### <dns-proxy-cache-information>

#### Usage

```
<dns-proxy-cache-information>
  <dns-proxy-cache-entry>....</dns-proxy-cache-entry>
</dns-proxy-cache-information>
```

**Description** Information about DNS proxy cache

### <dns-proxy-information>

#### Usage

```
<dns-proxy-information>
  <dns-proxy>....</dns-proxy>
</dns-proxy-information>
```

**Description** Information about DNS proxy

### <dynamic-dns-client>

#### Usage

```
<dynamic-dns-client-information>
  <dynamic-dns-client>
    <internal-hostname>
      internal-hostname
    </internal-hostname>
    <server>
      server
    </server>
    <last-response>
      last-response
    </last-response>
    <last-update-time>
      last-update-time
    </last-update-time>
    <interface>
      interface
```

```

</interface>
<user-name>
  user-name
</user-name>
<agent>
  agent
</agent>
</dynamic-dns-client>
</dynamic-dns-client-information>

```

**Description** Information about a Dynamic DNS client status

### <dynamic-dns-client-information>

#### Usage

```

<dynamic-dns-client-information>
<dynamic-dns-client>....</dynamic-dns-client>
</dynamic-dns-client-information>

```

**Description** Information about one or more Dynamic DNS clients status

### <interfaces>

#### Usage

```

<interfaces>
<interface>
  interface
</interface>
</interfaces>

```

**Description** Interfaces configured

### <interfaces>

#### Usage

```

<dns-proxy-information>
<dns-proxy>
  <interfaces>
    <interface>
      interface
    </interface>
  </interfaces>
</dns-proxy>
</dns-proxy-information>

```

**Description** Interfaces configured

## Summary of NAT Response Tags

---

### <destination-address-range-entry>

#### Usage

```
<source-nat-rule-detail-information>
  <source-nat-rule-entry>
    <destination-address-range-entry>
      <rule-destination-address>
        rule-destination-address

  destination-nat-rule-action
</destination-nat-rule-action>
<address-pool-hits>
  address-pool-hits
</address-pool-hits>
</destination-nat-rule-entry>
</destination-nat-rule-information>
```

**Description** Information on the destination-nat rule

### <destination-nat-rule-information>

#### Usage

```
<destination-nat-rule-information>
  <total-destination-nat-rules>....</total-destination-nat-rules>

  <total-destination-nat-rule-ref-addr-num>....</total-destination-nat-rule-ref-addr-num>

  <logical-system-name>
    logical-system-name
  </logical-system-name>
  <destination-nat-rule-entry>....</destination-nat-rule-entry>
</destination-nat-rule-information>
```

**Description** Show destination-nat rule information

### <destination-nat-summary-information>

#### Usage

```
<destination-nat-summary-information>
  <destination-nat-entry>....</destination-nat-entry>
</destination-nat-summary-information>
```

**Description** Information about one or more destination NAT entries

### <destination-port-entry>

#### Usage

```
<source-nat-rule-detail-information>
  <source-nat-rule-entry>
    <destination-port-entry>
      <rule-destination-port-low>
```

```
rule-destination-port-low
</rule-destination-port-low>
<rule-destination-port-high>
rule-destination-port-high
</rule-destination-port-high>
</destination-port-entry>
</source-nat-rule-entry>
</source-nat-rule-detail-information>
```

**Description** The destination address range

### <dst-nat-protocol-entry>

#### Usage

```
<destination-nat-rule-information>
<destination-nat-rule-entry>
<dst-nat-protocol-entry>
<dst-nat-protocol>
dst-nat-protocol
</dst-nat-protocol>
</dst-nat-protocol-entry>
</destination-nat-rule-entry>
</destination-nat-rule-information>
```

**Description** IP protocol

### <incoming-table-entry>

#### Usage

```
<incoming-table-information>
<incoming-table-entry>
<destination>
destination
</destination>
<host>
host
</host>
<references>
references
</references>
<timeout>
timeout
</timeout>
<source-pool>
source-pool
</source-pool>
</incoming-table-entry>
</incoming-table-information>
```

**Description**

## <incoming-table-information>

### Usage

```
<incoming-table-information>
  <in-use>
    in-use
  </in-use>
  <maximum>
    maximum
  </maximum>
  <entry-allocation-failed>
    entry-allocation-failed
  </entry-allocation-failed>
  <incoming-table-entry>....</incoming-table-entry>
</incoming-table-information>
```

### Description

## <interface-nat-ports-entry>

### Usage

```
<interface-nat-ports-information>
  <interface-nat-ports-entry>
    <pool-index>
      pool-index
    </pool-index>
    <total-ports>
      total-ports
    </total-ports>
    <single-ports-allocated>
      single-ports-allocated
    </single-ports-allocated>
    <single-ports-available>
      single-ports-available
    </single-ports-available>
    <twin-ports-allocated>
      twin-ports-allocated
    </twin-ports-allocated>
    <twin-ports-available>
      twin-ports-available
    </twin-ports-available>
  </interface-nat-ports-entry>
</interface-nat-ports-information>
```

### Description

## <interface-nat-ports-information>

### Usage

```
<interface-nat-ports-information>
  <interface-nat-ports-entry>....</interface-nat-ports-entry>
</interface-nat-ports-information>
```

**Description****<persist-nat-external-node-entry>****Usage**

```

<persist-nat-external-node-table>
  <persist-nat-external-node-entry>
    <persist-nat-enode-internal-ip>
      persist-nat-enode-internal-ip
    </persist-nat-enode-internal-ip>
    <persist-nat-enode-internal-port>
      persist-nat-enode-internal-port
    </persist-nat-enode-internal-port>

    <source-nat-rule-hits-entry>....</source-nat-rule-hits-entry>
  </source-nat-rule-entry>
</source-nat-rule-detail-information>
```

**Description** Information on the source NAT rule

### <source-nat-rule-hits-entry>

**Usage**

```
<source-nat-rule-detail-information>
  <source-nat-rule-entry>
    <source-nat-rule-hits-entry>
      <number_of_hits>
        number_of_hits
      </number_of_hits>
    </source-nat-rule-hits-entry>
  </source-nat-rule-entry>
</source-nat-rule-detail-information>
```

**Description** Number of translation hits

### <source-nat-summary>

**Usage**

```
<source-nat-summary>
  <source-nat-entry>....</source-nat-entry>
</source-nat-summary>
```

**Description**

### <source-pool-address-range>

**Usage**

```
<source-nat-pool-detail-information>
  <source-nat-pool-info-entry>
    <source-pool-address-range>
      <address-range-low>
        address-range-low
      </address-range-low>
      <address-range-high>
        address-range-high
      </address-range-high>
      <single-port>
        single-port
      </single-port>
      <twin-port>
        twin-port
      </twin-port>
    </source-pool-address-range>
  </source-nat-pool-info-entry>
</source-nat-pool-detail-information>
```

**Description** Information on address range

### <src-nat-protocol-entry>

#### Usage

```
<source-nat-rule-detail-information>
  <source-nat-rule-entry>
    <src-nat-protocol-entry>
      <src-nat-protocol>
        src-nat-protocol
      </src-nat-protocol>
    </src-nat-protocol-entry>
  </source-nat-rule-entry>
</source-nat-rule-detail-information>
```

**Description** IP protocol

### <ssg-destination-nat-rule-entry>

#### Usage

```
<ssg-destination-nat-summary-information>
  <ssg-destination-nat-rule-entry>
    <rule-name>
      rule-name
    </rule-name>
    <rule-set-name>
      rule-set-name
    </rule-set-name>
    <rule-from-context>
      rule-from-context
    </rule-from-context>
    <ssg-destination-rule-action>
      ssg-destination-rule-action
    </ssg-destination-rule-action>
  </ssg-destination-nat-rule-entry>
</ssg-destination-nat-summary-information>
```

**Description** Information about a destination NAT rule entry

### <ssg-destination-nat-summary-information>

#### Usage

```
<ssg-destination-nat-summary-information>
  <ssg-total-destination-pool-num>.....</ssg-total-destination-pool-num>
  <logical-system-name>
    logical-system-name
  </logical-system-name>
  <ssg-destination-pool-entry>.....</ssg-destination-pool-entry>
  <ssg-total-destination-rule-num>.....</ssg-total-destination-rule-num>
  <ssg-destination-nat-rule-entry>.....</ssg-destination-nat-rule-entry>
</ssg-destination-nat-summary-information>
```

**Description** Summay Information of destination NAT

### <ssg-destination-pool-entry>

#### Usage

```
<ssg-destination-nat-summary-information>
  <ssg-destination-pool-entry>
    <pool-name>
      pool-name
    </pool-name>
    <address-range-low>
      address-range-low
    </address-range-low>
    <address-range-high>
      address-range-high
    </address-range-high>
    <routing-instance-name>
      routing-instance-name
    </routing-instance-name>
    <ssg-destination-pool-port-info>
      ssg-destination-pool-port-info
    </ssg-destination-pool-port-info>
    <ssg-destination-pool-total-address>
      ssg-destination-pool-total-address
    </ssg-destination-pool-total-address>
  </ssg-destination-pool-entry>
</ssg-destination-nat-summary-information>
```

**Description** Information about a destination NAT entry

### <ssg-source-nat-summary-information>

#### Usage

```
<ssg-source-nat-summary-information>
  <ssg-total-source-pool-num>....</ssg-total-source-pool-num>
  <logical-system-name>
    logical-system-name
  </logical-system-name>
  <ssg-source-pool-entry>....</ssg-source-pool-entry>
  <ssg-total-source-rule-num>....</ssg-total-source-rule-num>
  <ssg-source-rule-entry>....</ssg-source-rule-entry>
</ssg-source-nat-summary-information>
```

**Description** Summay Information of source NAT

### <ssg-source-pool-entry>

#### Usage

```
<ssg-source-nat-summary-information>
  <ssg-source-pool-entry>
    <ssg-source-pool-name>
      ssg-source-pool-name
```

```
</ssg-source-pool-name>

  <ssg-source-rule-context-from>
    ssg-source-rule-context-from
  </ssg-source-rule-context-from>
  <ssg-source-rule-context-to>
    ssg-source-rule-context-to
  </ssg-source-rule-context-to>
  <ssg-source-rule-action>
    ssg-source-rule-action
  </ssg-source-rule-action>
</ssg-source-rule-entry>
</ssg-source-nat-summary-information>
```

**Description** Information about a source NAT rule entry

### <ssg-total-destination-pool-num>

#### Usage

```
<ssg-destination-nat-summary-information>
<ssg-total-destination-pool-num>
  <summary-total-destination-pool>
    summary-total-destination-pool
  </summary-total-destination-pool>
</ssg-total-destination-pool-num>
```

</ssg-destination-nat-summary-information>

**Description** Total Destination NAT pool number

### <ssg-total-destination-rule-num>

**Usage**

```
<ssg-destination-nat-summary-information>
  <ssg-total-destination-rule-num>
    <summary-total-destination-rule>
      summary-total-destination-rule
    </summary-total-destination-rule>
  </ssg-total-destination-rule-num>
</ssg-destination-nat-summary-information>
```

**Description** Total Destination NAT rule number

### <ssg-total-source-pool-num>

**Usage**

```
<ssg-source-nat-summary-information>
  <ssg-total-source-pool-num>
    <total-source-summary-pools>
      total-source-summary-pools
    </total-source-summary-pools>
  </ssg-total-source-pool-num>
</ssg-source-nat-summary-information>
```

**Description** Total source NAT pool number

### <ssg-total-source-rule-num>

**Usage**

```
<ssg-source-nat-summary-information>
  <ssg-total-source-rule-num>
    <summary-total-source-rules>
      summary-total-source-rules
    </summary-total-source-rules>
  </ssg-total-source-rule-num>
</ssg-source-nat-summary-information>
```

**Description** Total source NAT rule number

### <static-nat-entry>

**Usage**

```
<static-nat-summary>
  <static-nat-entry>
    <ingress-interface>
```

```
    ingress-interface
  </ingress-interface>
  <destination-prefix>
    destination-prefix
  </destination-prefix>
  <host-prefix>
    host-prefix
  </host-prefix>
  <virtual-router>
    virtual-router
  </virtual-router>
</static-nat-entry>
</static-nat-summary>
```

## Description

### <static-nat-rule-entry>

#### Usage

```
<static-nat-rule-information>
  <static-nat-rule-entry>
    <rule-name>

</static-nat-maximum>
<static-nat-entry>....</static-nat-entry>
</static-nat-summary>
```

**Description**

### <total-destination-nat-pool-number>

#### Usage

```
<destination-nat-pool-information>
<total-destination-nat-pool-number>
<total-pools>
  total-pools
</total-pools>
</total-destination-nat-pool-number>
</destination-nat-pool-information>
```

**Description** Total number of destination-nat pools

### <total-destination-nat-rule-ref-addr-num>

#### Usage

```
<destination-nat-rule-information>
```

```
<total-destination-nat-rule-ref-addr-num>
  <total-destination-nat-rule-ref-addr-num-v4>
    total-destination-nat-rule-ref-addr-num-v4
  </total-destination-nat-rule-ref-addr-num-v4>
  <total-destination-nat-rule-ref-addr-num-v6>
    total-destination-nat-rule-ref-addr-num-v6
  </total-destination-nat-rule-ref-addr-num-v6>
</total-destination-nat-rule-ref-addr-num>
</destination-nat-rule-information>
```

**Description** Total referenced IPv4/IPv6 ip-prefixes in destination NAT rule

### <total-destination-nat-rules>

**Usage**

```
<destination-nat-rule-information>
  <total-destination-nat-rules>
    <total-rules>
      total-rules
    </total-rules>
  </total-destination-nat-rules>
</destination-nat-rule-information>
```

**Description** Total number of destination-nat rules

### <total-source-nat-pools>

**Usage**

```
<source-nat-pool-detail-information>
  <total-source-nat-pools>
    <total-source-pools>
      total-source-pools
    </total-source-pools>
  </total-source-nat-pools>
</source-nat-pool-detail-information>
```

**Description** Information of source NAT pools

### <total-source-nat-rule-ref-addr-num>

**Usage**

```
<source-nat-rule-detail-information>
  <total-source-nat-rule-ref-addr-num>
    <total-source-nat-rule-ref-addr-num-v4>
      total-source-nat-rule-ref-addr-num-v4
    </total-source-nat-rule-ref-addr-num-v4>
    <total-source-nat-rule-ref-addr-num-v6>
      total-source-nat-rule-ref-addr-num-v6
    </total-source-nat-rule-ref-addr-num-v6>
  </total-source-nat-rule-ref-addr-num>
```

</source-nat-rule-detail-information>

**Description** Total referenced IPv4/IPv6 ip-prefixes in source NAT rule

### <total-source-nat-rules>

#### Usage

```
<source-nat-rule-detail-information>
  <total-source-nat-rules>
    <total-src-rules>
      total-src-rules
    </total-src-rules>
  </total-source-nat-rules>
</source-nat-rule-detail-information>
```

**Description** Total number of source NAT rules

### <total-static-nat-rule-ref-addr-num>

#### Usage

```
<static-nat-rule-information>
  <total-static-nat-rule-ref-addr-num>
    <total-static-nat-rule-ref-addr-num-v4>

## Summary of Real Time Media Convergence Response Tags

### <cli-response>

#### Usage

```
<media-gateway>
<cli-response>
  <message>
    message
  </message>
</cli-response>
</media-gateway>
```

**Description** Cli response

### <media-gateway>

#### Usage

```
<media-gateway>
  <cli-request>
    cli-request
  </cli-request>
  <cli-response>....</cli-response>
</media-gateway>
```

**Description** Media gateway information

### <sessions>

#### Usage

```
<survivable-call-service>
  <sessions>
    <address>
      address
    </address>
    <port>
      port
    </port>
```

```
<transport>
  transport
</transport>
<state>
  state
</state>
<duration>
  duration
</duration>
<timer>
  timer
</timer>
</sessions>
</survivable-call-service>
```

**Description** Survivable call service sessions

## <statistics>

### Usage

```
<survivable-call-service>
<statistics>
  <name>
    name
  </name>
  <last-down-time>
    last-down-time
  </last-down-time>
  <total-down-time>
    total-down-time
  </total-down-time>
  <total-down-count>
    total-down-count
  </total-down-count>
  <minimum-response-time>
    minimum-response-time
  </minimum-response-time>
  <maximum-response-time>
    maximum-response-time
  </maximum-response-time>
  <average-response-time>
    average-response-time
  </average-response-time>
</statistics>
</survivable-call-service>
```

**Description** Survivable call service statistics

## <status>

### Usage

```
<survivable-call-service>
```

```
<status>
  <name>
    name
  </name>
  <address>
    address
  </address>
  <port>
    port
  </port>
  <transport>
    transport
  </transport>
  <state>
    state
  </state>
  <mode>
    mode
  </mode>
</status>
</survivable-call-service>
```

**Description** Survivable call service status

### <survivable-call-service>

#### Usage

```
<survivable-call-service>
  <status>....</status>
  <statistics>....</statistics>
  <sessions>....</sessions>
</survivable-call-service>
```

**Description** Survivable call service information

## Summary of Scheduler Response Tags

### <scheduler>

#### Usage

```
<schedulers>
  <scheduler>
    <scheduler-name>
      scheduler-name
    </scheduler-name>
    <scheduler-state>
      scheduler-state
    </scheduler-state>
    <scheduler-next-activation-date-time>
      scheduler-next-activation-date-time
    </scheduler-next-activation-date-time>
    <scheduler-next-deactivation-date-time>
```

```
    scheduler-next-deactivation-date-time
  </scheduler-next-deactivation-date-time>
</scheduler>
</schedulers>
```

**Description** Information about a scheduler

## <schedulers>

### Usage

```
<schedulers>
  <schedulers-logical-system>....</schedulers-logical-system>
  <scheduler>....</scheduler>
</schedulers>
```

**Description** Information about one or more schedulers

## <schedulers-logical-system>

### Usage

```
<schedulers>
  <schedulers-logical-system>
    <name>
      name
    </name>
  </schedulers-logical-system>
</schedulers>
```

**Description** Logical system

## Summary of SCTP Response Tags

## <clear-counters>

### Usage

```
<sctp-clear-counters>
  <clear-counters>
    <clear-counters-status>
      clear-counters-status
    </clear-counters-status>
  </clear-counters>
</sctp-clear-counters>
```

**Description**

## <sctp-clear-counters>

### Usage

```
<sctp-clear-counters>
```

```
<clear-counters>....</clear-counters>
</sctp-clear-counters>
```

#### Description

### <sctp-show-counters>

#### Usage

```
<sctp-show-counters>
  <show-counters-slot>....</show-counters-slot>
  <show-counters-recvdrop>....</show-counters-recvdrop>
  <show-counters-errdrop>....</show-counters-errdrop>
</sctp-show-counters>
```

#### Description

### <show-counters-errdrop>

#### Usage

```
<sctp-show-counters>
  <show-counters-errdrop>
    <errdrop-name>
      errdrop-name
    </errdrop-name>
    <errdrop>
      errdrop
    </errdrop>
  </show-counters-errdrop>
</sctp-show-counters>
```

#### Description

### <show-counters-recvdrop>

#### Usage

```
<sctp-show-counters>
  <show-counters-recvdrop>
    <recvdrop-name>
      recvdrop-name
    </recvdrop-name>
    <received>
      received
    </received>
    <drop>
      drop
    </drop>
  </show-counters-recvdrop>
</sctp-show-counters>
```

#### Description

### <show-counters-slot>

**Usage**

```
<sctp-show-counters>
  <show-counters-slot>
    <fpc-slot>
      fpc-slot
    </fpc-slot>
    <pic-slot>
      pic-slot
    </pic-slot>
  </show-counters-slot>
</sctp-show-counters>
```

```

**Description** Information about a term within an application

## <application-term>

### Usage

```

<security-policy-match>
  <policy-information>
    <applications>
      <application>
        <application-term>
          <protocol>
            protocol
          </protocol>
          <alg-name>
            alg-name
          </alg-name>
          <inactivity-timeout>
            inactivity-timeout
          </inactivity-timeout>
          <source-port-range>....</source-port-range>
          <destination-port-range>....</destination-port-range>
          <icmp-info>....</icmp-info>
          <rpc-information>....</rpc-information>
        </application-term>
      </application>
    </applications>
  </policy-information>
</security-policy-match>

```

**Description** Information about a term within an application

## <applications>

### Usage

```

<applications>
  <application>....</application>
</applications>

```

### Description

## <applications>

### Usage

```

<policy-information>
  <applications>
    <application>....</application>
  </applications>

```

</policy-information>

#### Description

<applications>

#### Usage

```
<security-policies>
  <security-context>
    <policies>
      <policy-information>
        <applications>
          <application>....</application>
        </applications>
      </policy-information>
    </policies>
  </security-context>
</security-policies>
```

#### Description

<applications>

#### Usage

```
<security-dynamic-policies>
  <security-context>
    <policies>
      <policy-information>
        <applications>
          <application>....</application>
        </applications>
      </policy-information>
    </policies>
  </security-context>
</security-dynamic-policies>
```

#### Description

<applications>

#### Usage

```
<security-policy-match>
  <policy-information>
    <applications>
      <application>....</application>
    </applications>
  </policy-information>
</security-policy-match>
```

#### Description

**<context-information>****Usage**

```
<context-information>
  <global-context>
    global-context
  </global-context>
  <source-zone-name>
    source-zone-name
  </source-zone-name>
  <destination-zone-name>
    destination-zone-name
  </destination-zone-name>
</context-information>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

**<context-information>****Usage**

```
<policy-information>
  <context-information>
    <global-context>
      global-context
    </global-context>
    <source-zone-name>
      source-zone-name
    </source-zone-name>
    <destination-zone-name>
      destination-zone-name
    </destination-zone-name>
  </context-information>
</policy-information>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

**<context-information>****Usage**

```
<security-policies>
  <security-context>
    <context-information>
      <global-context>
        global-context
      </global-context>
      <source-zone-name>
        source-zone-name
      </source-zone-name>
      <destination-zone-name>
        destination-zone-name
      </destination-zone-name>
    </context-information>
```

```
</security-context>
</security-policies>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <context-information>

#### Usage

```
<security-policies>
  <security-context>
    <policies>
      <policy-information>
        <context-information>
          <global-context>
            global-context
          </global-context>
          <source-zone-name>
            source-zone-name
          </source-zone-name>
          <destination-zone-name>
            destination-zone-name
          </destination-zone-name>
        </context-information>
      </policy-information>
    </policies>
  </security-context>
</security-policies>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <context-information>

#### Usage

```
<security-dynamic-policies>
  <security-context>
    <context-information>
      <global-context>
        global-context
      </global-context>
      <source-zone-name>
        source-zone-name
      </source-zone-name>
      <destination-zone-name>
        destination-zone-name
      </destination-zone-name>
    </context-information>
  </security-context>
</security-dynamic-policies>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <context-information>

#### Usage

```
<security-dynamic-policies>
<security-context>
  <policies>
    <policy-information>
      <context-information>
        <global-context>
          global-context
        </global-context>
        <source-zone-name>
          source-zone-name
        </source-zone-name>
        <destination-zone-name>
          destination-zone-name
        </destination-zone-name>
      </context-information>
    </policy-information>
  </policies>
</security-context>
</security-dynamic-policies>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <context-information>

#### Usage

```
<security-policy-match>
  <policy-information>
    <context-information>
      <global-context>
        global-context
      </global-context>
      <source-zone-name>
        source-zone-name
      </source-zone-name>
      <destination-zone-name>
        destination-zone-name
      </destination-zone-name>
    </context-information>
  </policy-information>
</security-policy-match>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <default-rule>

#### Usage

```
<policy-application-services>
  <application-firewall>
    <rule-set-info>
```

```
<rule-set>
  <rule-list>
    <default-rule>
      <action>
        action
      </action>
    </default-rule>
  </rule-list>
</rule-set>
</rule-set-info>
</application-firewall>
</policy-application-services>
```

**Description** Information of the default rule

### <default-rule>

#### Usage

```
<policy-information>
  <policy-application-services>
    <application-firewall>
      <rule-set-info>
        <rule-set>
          <rule-list>
            <default-rule>

```

**Description** Security profile information for logical system

## <security-profile-nat-cone-binding-information>

### Usage

```
<security-profile-nat-cone-binding-information>
  <security-profile-information>....</security-profile-information>
</security-profile-nat-cone-binding-information>
```

**Description** Nat cone binding resource usage versus logical system's security profile

#### <security-profile-nat-destination-pool-information>

**Usage**

```
<security-profile-nat-destination-pool-information>
  <security-profile-information>....</security-profile-information>
</security-profile-nat-destination-pool-information>
```

**Description** Nat destination pool resource usage versus logical system's security profile

#### <security-profile-nat-destination-rule-information>

**Usage**

```
<security-profile-nat-destination-rule-information>
  <security-profile-information>....</security-profile-information>
</security-profile-nat-destination-rule-information>
```

**Description** Nat destination rule resource usage versus logical system's security profile

#### <security-profile-nat-port-overloading-ip-number-information>

**Usage**

```
<security-profile-nat-port-overloading-ip-number-information>
  <security-profile-information>....</security-profile-information>
</security-profile-nat-port-overloading-ip-number-information>
```

**Description** Nat port overloading ip number resource usage versus logical system's security profile

#### <security-profile-nat-rule-referenced-prefix-information>

**Usage**

```
<security-profile-nat-rule-referenced-prefix-information>
  <security-profile-information>....</security-profile-information>
</security-profile-nat-rule-referenced-prefix-information>
```

**Description** Nat rule referenced IP-prefix usage versus logical system's security profile

#### <security-profile-nat-source-nopat-address-information>

**Usage**

```
<security-profile-nat-source-nopat-address-information>
  <security-profile-information>....</security-profile-information>
</security-profile-nat-source-nopat-address-information>
```

**Description** Nat IP address in src pool without PAT resource usage versus logical system's security profile

### <security-profile-nat-source-pat-address-information>

**Usage**

```
<security-profile-nat-source-pat-address-information>  
<security-profile-information>....</security-profile-information>  
</security-profile-nat-source-pat-address-information>
```

**Description** Nat IP address in src pool with PAT resource usage versus logical system's security profile

### <security-profile-nat-source-pool-information>

**Usage**

```
<security-profile-nat-source-pool-information>  
<security-profile-information>....</security-profile-information>  
</security-profile-nat-source-pool-information>
```

**Description** Nat source pool resource usage versus logical system's security profile

### <security-profile-nat-source-rule-information>

**Usage**

```
<security-profile-nat-source-rule-information>  
<security-profile-information>....</security-profile-information>  
</security-profile-nat-source-rule-information>
```

**Description** Nat source rule resource usage versus logical system's security profile

### <security-profile-nat-static-rule-information>

**Usage**

```
<security-profile-nat-static-rule-information>  
<security-profile-information>....</security-profile-information>  
</security-profile-nat-static-rule-information>
```

**Description** Nat static rule resource usage versus logical system's security profile

### <security-profile-policy-information>

**Usage**

```
<security-profile-policy-information>  
<security-profile-information>....</security-profile-information>  
</security-profile-policy-information>
```

**Description** Policy resource usage versus logical system's security profile

### <security-profile-policy-with-count-information>

**Usage**

```
<security-profile-policy-with-count-information>
  <security-profile-information>....</security-profile-information>
</security-profile-policy-with-count-information>
```

**Description** Policy with count resource usage versus logical system's security profile

### <security-profile-scheduler-information>

**Usage**

```
<security-profile-scheduler-information>
  <security-profile-information>....</security-profile-information>
</security-profile-scheduler-information>
```

**Description** Scheduler resource usage versus logical system's security profile

### <security-profile-zone-information>

**Usage**

```
<security-profile-zone-information>
  <security-profile-information>....</security-profile-information>
</security-profile-zone-information>
```

**Description** Zone resource usage versus logical system's security profile

### <show-lcu-control>

**Usage**

```
<show-lcu-control>
  <cpu-control>
    cpu-control
  </cpu-control>
  <cpu-control-target>
    cpu-control-target
  </cpu-control-target>
</show-lcu-control>
```

**Description** Logical system cpu utilization settings

### <show-lcu-status>

## Summary of Wireless LAN Access Points Response Tags

---

**<access-point-client-associations>****Usage**

```

<access-point-client-associations>
  <access-point-name>
    access-point-name
  </access-point-name>
  <radio-id>
    radio-id
  </radio-id>
  <vap-id>
    vap-id
  </vap-id>
  <status-information>....</status-information>
</access-point-client-associations>

```

**Description** Information about client associations for a specified access point

**<access-point-client-associations>****Usage**

```

<wlan-access-point-client-associations-list>
  <access-point-client-associations>
    <access-point-name>
      access-point-name
    </access-point-name>
    <radio-id>
      radio-id
    </radio-id>
    <vap-id>
      vap-id
    </vap-id>
    <status-information>....</status-information>
  </access-point-client-associations>
</wlan-access-point-client-associations-list>

```

**Description** Information about client associations for a specified access point

### <access-point-client-associations>

**Usage**

```
<wlan-access-point-client-associations-detail-list>
  <access-point-client-associations>
    <access-point-name>
      access-point-name
    </access-point-name>
    <radio-id>
      radio-id
    </radio-id>
    <vap-id>
      vap-id
    </vap-id>
    <status-information>....</status-information>
  </access-point-client-associations>
</wlan-access-point-client-associations-detail-list>
```

**Description** Information about client associations for a specified access point

### <access-point-client-display>

**Usage**

```
<access-point-client-display>
  <access-point-name>
    access-point-name
  </access-point-name>
</access-point-client-display>
```

**Description**

### <access-point-client-display>

**Usage**

```
<wlan-access-point-client-associations-list>
  <access-point-client-display>
    <access-point-name>
      access-point-name
    </access-point-name>
  </access-point-client-display>
</wlan-access-point-client-associations-list>
```

**Description**

### <access-point-client-display-detail>

**Usage**

```
<access-point-client-display-detail>
  <ap-empty>
    ap-empty
  </ap-empty>
</access-point-client-display-detail>
```

```
</ap-empty>
</access-point-client-display-detail>
```

**Description****<access-point-client-display-detail>****Usage**

```
<wlan-access-point-client-associations-detail-list>
  <access-point-client-display-detail>
    <ap-empty>
      ap-empty
    </ap-empty>
  </access-point-client-display-detail>
</wlan-access-point-client-associations-detail-list>
```

**Description****<access-point-neighbors>****Usage**

```
<access-point-neighbors>
  <mac-address>
    mac-address
  </mac-address>
  <ssid>
    ssid
  </ssid>
  <security>
    security
  </security>
  <wpa>
    wpa
  </wpa>
  <band>
    band
  </band>
  <channel>
    channel
  </channel>
  <last-beacon>
    last-beacon
  </last-beacon>
  <signal>
    signal
  </signal>
</access-point-neighbors>
```

**Description** Information about neighboring access points

## <access-point-neighbors>

### Usage

```
<wlan-access-point-neighbors-list>
  <access-point-neighbors>
    <mac-address>
      mac-address
    </mac-address>
    <ssid>

    <capture-file-size>
      capture-file-size
    </capture-file-size>
  </capture-local>
</wlan-access-point-packet-capture-start>
```

**Description** Local packet capture operation

### <capture-local>

#### Usage

```
<wlan-access-point-packet-capture-stop>
  <capture-local>
```

```
<capture-interface>
  capture-interface
</capture-interface>
<capture-file>
  capture-file
</capture-file>
<capture-duration>
  capture-duration
</capture-duration>
<capture-file-size>
  capture-file-size
</capture-file-size>
</capture-local>
</wlan-access-point-packet-capture-stop>
```

**Description** Local packet capture operation

## <cluster>

### Usage

```
<cluster>
  <cluster-id>
    cluster-id
  </cluster-id>
  <access-point-name>
    access-point-name
  </access-point-name>
</cluster>
```

**Description** Cluster information

## <cluster>

### Usage

```
<wlan-clusters-list>
  <cluster>
    <cluster-id>
      cluster-id
    </cluster-id>
    <access-point-name>
      access-point-name
    </access-point-name>
  </cluster>
</wlan-clusters-list>
```

**Description** Cluster information

## <diagnostics-info>

### Usage

```
<diagnostics-info>
```

```

<access-point-name>
  access-point-name
</access-point-name>
<pcap-status>
  pcap-status
</pcap-status>
<capture-interface>
  capture-interface
</capture-interface>
<syslog-status>
  syslog-status
</syslog-status>
</diagnostics-info>

```

**Description** Diagnostics information about an access point

### <diagnostics-info>

#### Usage

```

<wlan-diagnostics-list>
  <diagnostics-info>
    <access-point-name>
      access-point-name
    </access-point-name>
    <pcap-status>
      pcap-status
    </pcap-status>
    <capture-interface>
      capture-interface
    </capture-interface>
    <syslog-status>
      syslog-status
    </syslog-status>
  </diagnostics-info>
</wlan-diagnostics-list>

```

**Description** Diagnostics information about an access point

### <dotlx>

#### Usage

```

<dotlx>
  <global-radius-setting>
    global-radius-setting
  </global-radius-setting>
  <radius-ip-address>

    <access-ipv4-address>
      access-ipv4-address
    </access-ipv4-address>
  </ethernet-port-information>
</access-points>
```

**Description** Information about ethernet port

### <ethernet-port-information>

#### Usage

```
<wlan-access-points-list>
  <access-points>
    <ethernet-port-information>
      <mac-address>
        mac-address
      </mac-address>
      <access-ipv4-address>
        access-ipv4-address
      </access-ipv4-address>
    </ethernet-port-information>
  </access-points>
</wlan-access-points-list>
```

**Description** Information about ethernet port

### <radio-information>

#### Usage

```
<radio-information>
  <radio-id>
    radio-id
  </radio-id>
  <radio-mode>
    radio-mode
  </radio-mode>
  <channel>
    channel
  </channel>
</radio-information>
```

**Description** Information about radio

### <radio-information>

#### Usage

```
<access-points>
  <radio-information>
    <radio-id>
```

```
    radio-id
  </radio-id>
  <radio-mode>
    radio-mode
  </radio-mode>
  <channel>
    channel
  </channel>
</radio-information>
</access-points>
```

**Description** Information about radio

### <radio-information>

#### Usage

```
<wlan-access-points-list>
  <access-points>
    <radio-information>
      <radio-id>
        radio-id
      </radio-id>
      <radio-mode>
        radio-mode
      </radio-mode>
      <channel>
        channel
      </channel>
    </radio-information>
  </access-points>
</wlan-access-points-list>
```

**Description** Information about radio

### <radio-list>

#### Usage

```
<radio-list>
  <radio-id>
    radio-id
  </radio-id>
  <virtual-access-points>....</virtual-access-points>
  <virtual-access-points_detail>....</virtual-access-points_detail>
</radio-list>
```

**Description** Information about radio options

### <radio-list>

#### Usage

```
<wlan-virtual-access-points-list>
```

```

<radio-list>
  <radio-id>
    radio-id
  </radio-id>
  <virtual-access-points>....</virtual-access-points>
  <virtual-access-points_detail>....</virtual-access-points_detail>
</radio-list>
</wlan-virtual-access-points-list>

```

**Description** Information about radio options

### <radio-status-information>

#### Usage

```

<radio-status-information>
  <radio-id>
    radio-id
  </radio-id>
  <status>
    status
  </status>
  <mac-address>
    mac-address
  </mac-address>
  <radio-mode>
    radio-mode
  </radio-mode>
  <channel>
    channel
  </channel>
</radio-status-information>

```

**Description** Status information about radio

### <radio-status-information>

#### Usage

```

<access-points>
  <radio-status-information>
    <radio-id>
      radio-id
    </radio-id>

# DTD for Accounting Response Tags

## Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-accounting.dtd`, which lists the Junos XML tags that contain information about Junos OS accounting. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

# DTD for Adaptive Services Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-adaptive-services.dtd`, which lists the Junos XML tags that contain information about Junos OS adaptive services. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

## CHAPTER 21

# DTD for APPIDD Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-appidd.dtd`, which lists the Junos XML tags that contain information about APPIDD. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

## CHAPTER 27

# DTD for Chassis Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-chassis.dtd`, which lists the Junos XML tags that contain information about chassis. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

## CHAPTER 28

# DTD for Clock Synchronization Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-clksyncd.dtd`, which lists the Junos XML tags that contain information about clock synchronization. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

## CHAPTER 29

# DTD for Class-of-Service Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-cos.dtd`, which lists the Junos XML tags that contain information about CoS. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

## CHAPTER 30

# DTD for CLI Administration Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos.dtd`, which lists the Junos XML tags that contain information about Junos CLI administration. To review reference pages for the tags, see .

## CHAPTER 35

# DTD for DHCP Server Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-dhcp-server.dtd`, which lists the Junos XML tags that contain information about DHCP server. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

## CHAPTER 48

# DTD for IPsec Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-ipsec.dtd`, which lists the Junos XML tags that contain information about IPsec. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

## CHAPTER 52

# DTD for JNX Example Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-jnx-example.dtd`, which lists the Junos XML tags that contain information about JNX example. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

# DTD for L2CP Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-l2cp.dtd`, which lists the Junos XML tags that contain information about L2CP. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).

# DTD for X.509 Certificate Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-x509-certificate.dtd`, which lists the Junos XML tags that contain information about X.509 certificates. To review reference pages for the tags, see [“Summary of Operational Response Tag Elements” on page 1515](#).
