

Chapter 25

Tag Elements Beginning with Y

This chapter lists the configuration tag elements that have names beginning with the letter *y*. The tag names are in alphabetical order. For information about the notation used in this chapter, see Table 2 on page xi.

For information about the tag elements that client applications use to request, change, and commit configuration information, see the *JUNOScript API Guide* and *NETCONF API Guide*.

NOTE: Every tag element in this chapter optionally accepts the `<apply-groups>` or `<apply-groups-except>` tag element and the `<apply-macro>` tag element as children. For brevity, the reference entries do not list these tag elements as children. For information about these tag elements, see `<apply-groups>` on page 3, `<apply-groups-except>` on page 3, and `<apply-macro>` on page 4.
