

## Chapter 26

# Tag Elements Beginning with Z

This chapter lists the configuration tag elements that have names beginning with the letter z. The tag names are in alphabetical order. For information about the notation used in this chapter, see Table 2 on page xi.

For information about the tag elements that client applications use to request, change, and commit configuration information, see the *JUNOScript API Guide* and *NETCONF API Guide*.

**NOTE:** Every tag element in this chapter optionally accepts the `<apply-groups>` or `<apply-groups-except>` tag element and the `<apply-macro>` tag element as children. For brevity, the reference entries do not list these tag elements as children. For information about these tag elements, see `<apply-groups>` on page 3, `<apply-groups-except>` on page 3, and `<apply-macro>` on page 4.
