

Chapter 24

DTD for Firewall Filter Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-filter.dtd`, which lists the JUNOS XML tags that contain firewall filter information. The associated XML namespace is `http://xml.juniper.net/junos/9.3R1/junos-filter`. To review reference pages for the tags, see “Summary of Firewall Filter Response Tags” on page 672.
