

Part 2

JUNOS XML Document Type Definitions

The chapters in this section contain the document type definitions (DTDs) for the JUNOS Extensible Markup Language (XML) tag elements that contain information about various routing platform functions:

- DTD for Accounting Response Tags on page 1603
- DTD for Adaptive Services Response Tags on page 1611
- DTD for Alarm Response Tags on page 1647
- DTD for APS Response Tags on page 1649
- DTD for ARP Response Tags on page 1651
- DTD for Authentication Response Tags on page 1653
- DTD for Autoinstallation Response Tags on page 1657
- DTD for BFD Response Tags on page 1659
- DTD for Connectivity Fault Management Response Tags on page 1663
- DTD for Chassis Response Tags on page 1671
- DTD for Class-of-Service Response Tags on page 1687
- “DTD for Database Replication Response Tags” on page 1701
- DTD for Data Link Switching Response Tags on page 1703
- DTD for DHCP Response Tags on page 1709
- DTD for DHCP Server Response Tags on page 1717
- DTD for DHCP Relay Response Tags on page 1713
- DTD for Dialer Response Tags on page 1721
- “DTD for Diameter Response Tags” on page 1725
- DTD for Dynamic Configuration Response Tags on page 1729

- DTD for Dynamic Flow Capture Response Tags on page 1733
- DTD for Firewall Filter Response Tags on page 1739
- DTD for Graceful Switchover Response Tags on page 1741
- DTD for Interface Metadata Reponse Tags on page 1801
- DTD for Interface Response Tags on page 1743
- DTD for IPSec Response Tags on page 1803
- DTD for IPv6 Neighbor Discovery Response Tags on page 1813
- DTD for ISDN Response Tags on page 1815
- DTD for J20 GGSN Response Tags on page 1819
- DTD for LACP Response Tags on page 1837
- DTD for Layer 2 Address Learning Response Tags on page 1839
- DTD for Layer 2 Control Protocol Response Tags on page 1847
- DTD for License Response Tags on page 1863
- DTD for Licensed Feature Metadata Response Tags on page 1867
- DTD for Link-Fault Management Response Tags on page 1857
- DTD for MIP Response Tags on page 1873
- DTD for MPLS OAM Response Tags on page 1869
- DTD for Passive Monitoring Interfaces Response Tags on page 1881
- DTD for PGM Response Tags on page 1885
- DTD for Periodic Packet Management Response Tag Elements on page 1889
- DTD for PPP Response Tag Elements on page 1893
- DTD for PPP over Ethernet Response Tags on page 1897
- DTD for Product Metadata Response Tag Elements on page 1907
- DTD for Redundant Interfaces Response Tags on page 1909
- “DTD for Resource Cleanup Response Tags” on page 1911
- DTD for Routing and Forwarding Table Response Tags on page 2019
- DTD for Routing Protocols Response Tags on page 1913
- DTD for RPM Response Tags on page 2023

- DTD for SDX Response Tags on page 2029
- DTD for Services Accounting Response Tags on page 2031
- DTD for Services Flow Collector Response Tags on page 2037
- DTD for Shutdown Response Tags on page 2041
- DTD for SNMP Response Tags on page 2043
- “DTD for Subscribers Response Tags” on page 2053
- DTD for System Process Response Tags on page 2055
- DTD for Telephony Gateway Module Response Tags on page 2063
- DTD for UDP Forwarding Helper Response Tags on page 2065
- DTD for Virtual Router Redundancy Protocol Response Tags on page 2067
- DTD for X.509 Certificate Response Tags on page 2073
