

aaa dhcpv6-delegated-prefix delegated-ipv6-prefix

Syntax [no] aaa dhcpv6-delegated-prefix delegated-ipv6-prefix

Release Information Command introduced in JUNOS Release 10.1.0.

Description Sets the Delegated-IPv6-Prefix RADIUS attribute to be used for DHCPv6 Prefix Delegation. The **no** version restores the default behavior, which causes the Framed-IPv6-Prefix RADIUS attribute to be used for Prefix Delegation.

NOTE: If you configured the Framed-IPv6-Prefix attribute to be used for IPv6 Neighbor Discovery router advertisements by using the **aaa ipv6-nd-ra-prefix framed-ipv6-prefix** command, you must also issue the **aaa dhcpv6-delegated-prefix delegated-ipv6-prefix** command after you issue the **aaa ipv6-nd-ra-prefix framed-ipv6-prefix** command to enable the use of the Delegated-IPv6-Prefix attribute for DHCPv6 Prefix Delegation. Otherwise, the Framed-IPv6-Prefix attribute will be used for both IPv6 Neighbor Discovery router advertisements and DHCPv6 Prefix Delegation.
