

## conformed-length

---

**Syntax** conformed-length *minimumConformedLength* [ *maximumConformedLength* ]  
no conformed-length

**Release Information** Command introduced before JUNOS Release 7.1.0.

**Description** Sets minimum and maximum constraints for the queue's conformed lengths. The **no** version removes constraints on the queue's conformed length.

- Options**
- *minimumConformedLength*—Number in the range 0–1073741824
  - *maximumConformedLength*—Number in the range 0–1073741824

**Mode** Queue Profile Configuration
