

ip vrrp virtual-address

Syntax ip vrrp *vrid* virtual-address { auto | ipAddress *ipAddress* [ipAddress *ipAddress*]* }
no ip vrrp *vrid* virtual-address [ipAddress *ipAddress*]*

Release Information Command introduced before JUNOS Release 7.1.0.

Description Associates an IP address with a VRID. The **no** version removes a list of IP addresses associated with a VRID. The **no** version clears the auto flag, if auto addresses are being used. There is no default.

- Options**
- *vrid*—VRID identifier; a number in the range 1–255
 - *ipAddress*—IP address
 - *—Indicates that one or more parameters can be repeated multiple times in a list in the command line
