

## ospf bandwidth

---

**Syntax** [ no ] ospf bandwidth

**Release Information** Command introduced in JUNOS Release 10.3.0.

**Description** Directs the router to use the bandwidth configured on an OSPF interface for OSPF interface cost calculation. If you configure the bandwidth and then issue the **no ospf bandwidth** command, the router ignores the cost that is calculated using the configured bandwidth. The **no** version disables the use of the bandwidth for OSPF interface cost calculation.

**Mode** Router Configuration
