

radius override calling-station-id remote-circuit-id

Syntax radius override calling-station-id remote-circuit-id
no radius override calling-station-id

Release Information Command introduced before JUNOS Release 7.1.0.

Description Configures RADIUS to override the standard use of the Calling-Station-Id [31] RADIUS attribute and instead use the PPPoE remote circuit ID transmitted from a DSLAM device. The **no** version restores the default Calling-Station-Id value, which is the telephone number from which the call originated.

Mode Global Configuration
