

## service-management service-session-profile

---

**Syntax** [ no ] service-management service-session-profile *profileName*

**Release Information** Command introduced in JUNOS Release 7.2.0.

**Description** Creates a new Service Manager service session profile or specifies the name of an existing service session profile, then enters Service Session Profile Configuration mode. The **no** version removes the service session profile.

**Options** ■ *profileName*—Name of the service session profile

**Mode** Global Configuration
