

## set ip service-profile

---

**Syntax**    set ip service-profile *profileName*  
              no set ip service-profile

**Release Information**    Command introduced before JUNOS Release 7.1.0.

**Description**    Specifies the name of a subscriber's service profile that is used in the route map. The **no** version removes the service profile from the route map.

**Options**    ■    *profileName*—Name of service profile

**Mode**    Route Map Configuration
