

show dhcp vendor-option

Syntax show dhcp vendor-option [default | vendor-option-relay-server *ServerAddress*]

Release Information Command introduced in JUNOS Release 8.2.0.

Description Displays configuration and action information for the DHCP vendor-option feature.

- Options**
- default—Displays where DHCP client packets that do not match a configured vendor-string are sent by default
 - vendor-option-relay-server—Displays DHCP string matches that are sent to the specified vendor-option server
 - *ServerAddress*—IP address of the DHCP vendor-option server

Mode Privileged Exec
