

sscc option

Syntax ssc option user-ip-mask-override
 no ssc option

Release Information Command introduced in JUNOS Release 10.2.0.

Description Enables user IP address mask to be sent to Policy Decision Point (PDP) in place of the interface IP address mask for a virtual router. If user IP address mask is not available, then the interface IP address mask is sent. The **no** version disables user IP address mask override.

Options ■ user-ip-mask-override—Enables user IP address mask to be sent to PDP.
