

ip vrrp icr-partition group

Syntax ip vrrp *vrid* icr-partition group *partitionGroupingType*

Release Information Command introduced in JUNOS Release 10.3.0.

Description Configures the ICR partition to use either S-VLAN-based grouping or VLAN-based grouping for subscribers. If you specify VLAN as the grouping type or partition type, the ICR partition consists of single-tagged VLAN-based subinterfaces. By default, the ICR partition uses S-VLAN-based grouping. There is no **no** version.

- Options**
- *vrid*—VRID identifier; a number in the range 1–255
 - *partitionGroupingType*—One of the following partition types:
 - *svlan*—Configures the ICR partition to use double-tagged S-VLAN based subinterfaces.
 - *vlan*—Configures the ICR partition to use single-tagged VLAN based subinterfaces.

Mode Interface Configuration, Subinterface Configuration
