

## radius dsl-port-type

---

**Syntax** radius dsl-port-type { sdsl | adsl-cap | adsl-dmt | idsl | xdsl | virtual }  
no radius dsl-port-type

**Release Information** Command introduced before JUNOS Release 7.1.0.

**Description** Sets RADIUS attribute 61, NAS-Port-Type, in RADIUS access request packets and accounting start and stop packets for ATM interfaces. The **no** version restores the default setting, xdsl.

- Options**
- sdsl—Symmetric DSL
  - adsl-cap—Asymmetric DSL, carrierless amplitude phase modulation
  - adsl-dmt—Asymmetric DSL, discrete multitone
  - idsl—ISDN DSL
  - xdsl—DSL of unspecified type (default)
  - virtual—Virtual

**Mode** Global Configuration
