

router-name

Syntax router-name *vrName*
 no router-name [*vrName*]

Release Information Command introduced before JUNOS Release 7.1.0.

Description Maps a virtual router to a user domain name. The **no** version deletes the router name parameter, and the router defaults to the default virtual router.

NOTE: This command is deprecated and might be removed completely in a future release. The functionality provided by this command has been replaced by the **auth-router-name** and **ip-router-name** commands.

Options ■ *vrName*—Name of the virtual router to map to the user domain name

Mode Domain Map Configuration, Tunnel Group Tunnel Configuration
