

atm policy

Syntax atm policy { input | output } *policyName*
[statistics { enabled [preserve | merge] | disabled [merge] } | merge]

no atm policy { input | output } [*policyName*]

Release Information Command introduced in JUNOS Release 7.1.0.
merge keyword added in JUNOS Release 7.2.0.

Description Assigns a policy list to the ingress or egress of an ATM interface. If you enter this command when the policy list does not exist, the router creates a policy list with a filter rule as the default. You must specify the **input** or **output** keyword to assign the policy list to the ingress or egress of the interface. The **no** version removes the association between a policy list and an interface.

- Options**
- input—Applies policy to data arriving at this interface
 - output—Applies policy to data leaving this interface
 - *policyName*—Name of the policy; a maximum of 40 characters
 - statistics—Enables or disables collection of policy routing statistics
 - enabled—Enables collection of policy routing statistics
 - preserve—Preserves existing statistics for any classifier-list that is the same for both the new and old policy attachments when you attach a new policy to an interface
 - disabled—Disables collection of policy routing statistics
 - merge—Enables merging of multiple policies to form a single policy
