

## radius override calling-station-id remote-circuit-id

---

**Syntax** radius override calling-station-id remote-circuit-id  
no radius override calling-station-id

**Release Information** Command introduced before JUNOS Release 7.1.0.

**Description** Configures RADIUS to override the standard use of the Calling-Station-Id [31] RADIUS attribute and instead use the PPPoE remote circuit ID transmitted from a DSLAM device. The **no** version restores the default Calling-Station-Id value, which is the telephone number from which the call originated.

**Mode** Global Configuration
