

test aaa

Syntax test aaa { ppp | mlppp } *userName* [*password*] [virtual-router *vrContext*]
[aaa-profile *profileName*] [zero-stats] [*filter*]

Release Information Command introduced before JUNOS Release 7.1.0.

Description Verifies RADIUS authentication and accounting and IP (or IPv6) address assignment setup. The test uses a username and password and attempts to authenticate a user, get an address assignment, and issue a start accounting request. The test immediately terminates the session by issuing a stop accounting request and an address release. Optionally, a virtual router context may be specified. There is no **no** version.

- Options**
- ppp—Indicates a PPP user
 - mlppp—Simulates Multilink PPP
 - *userName*—Username to test
 - *password*—Password to associate with username; the password is optional—when omitted, the RADIUS access request has no User-Password attribute
 - *vrContext*—Virtual router context in which to authenticate the user
 - *profileName*—Name of AAA profile for the user
 - zero-stats—Specifies that accounting statistics should be set to zero for this test
 - *filter*—See Filtering show Commands

Mode Privileged Exec
