

## radius override nas-ip-addr tunnel-client-endpoint

---

**Syntax** radius override nas-ip-addr tunnel-client-endpoint  
no radius override nas-ip-addr

**Release Information** Command introduced before JUNOS Release 7.1.0.

**Description** Configures the RADIUS client (LNS) to override the standard use of the NAS-IP-Address [4] RADIUS attribute and instead use the tunnel-client-endpoint (LAC) IP address. The **no** version restores the default address.

**Mode** Global Configuration
