

## service-management owner-session

---

**Syntax** [ no ] service-management owner-session *ownerName* *ownerId*  
service-session *serviceName* [ service-session-profile *profileName* ]

**Release Information** Command introduced in JUNOS Release 8.0.0.

**Description** Activates subscriber service sessions based on the specified owner and owner-generated ID. The **no** version gracefully removes the specified service session for the specified owner session.

Privileged Exec mode creates a dynamic subscriber service session that is deleted after a router reboot. Global Configuration mode creates a persistent service session.

- Options**
- *ownerName*—Name of the owner for the owner session; AAA for RADIUS-based subscribers
  - *ownerId*—Unique ID that is generated by the owner; Acct-Session-ID for AAA subscriber sessions
  - *serviceName*—Name of the service session to use
  - *profileName*—Name of the service session profile to use for the service session

**Mode** Global Configuration, Privileged Exec
