

set dhcp relay assign-giaddr-source-ip

Syntax [no] set dhcp relay assign-giaddr-source-ip

Release Information Command introduced in JUNOS Release 7.1.0.

Description Configures DHCP relay and DHCP relay proxy to assign the gateway IP address (giaddr) to the source IP address of traffic they send to DHCP servers. The **no** version restores the default, in which the DHCP relay and DHCP relay proxy do not assign the giaddr to the source IP address.

Mode Global Configuration
