

set dhcp relay override

Syntax [no] set dhcp relay override { agent-option | giaddr }

Release Information Command introduced before JUNOS Release 7.1.0.

Description Configures DHCP relay to override the relay agent option 82 or giaddr values in packets destined for a DHCP server. The **no** version returns to the default, in which the option 82 or giaddr value is not overridden.

- Options**
- agent-option—Overrides the option 82 information
 - giaddr—Overrides giaddr
