Introduction

Paragon Active Assurance is a programmable test and service assurance solution using software-based and traffic-generating Test Agents, easily used and delivered from the cloud as a SaaS solution or deployed on-premise in NFV environments.

These release notes accompany Release 3.0.2 of the Paragon Active Assurance Test Agent. This release is a bug fix release and therefore does not contain any new features. A list of bug fixes is provided as well as descriptions of limitations and known problems.

These release notes are available on the Paragon Active Assurance Documentation Web page at https://www.juniper.net/documentation/product/en_US/paragon-active-assurance.

New and Changed Features

None

Deprecated Features

None

Known Issues

None

Resolved Issues

- ND-5229 DNS lookups in HTTP tool were inefficient, limiting scalability when running many concurrent tasks; P1 (Critical)
