# Introduction

## IN THIS SECTION

- General Notes | 1

Paragon Active Assurance is a programmable test and service assurance solution using software-based and traffic-generating Test Agents, easily used and delivered from the cloud as a SaaS solution or deployed on-premise in NFV environments.

These release notes accompany Release 3.2.1 of Paragon Active Assurance Control Center. This release is a bug fix release and therefore does not contain any new features.

Test Agent build numbers:

- Test Agent Appliance: 3.2.1.15
- Test Agent Application: 3.2.1.2
- Plugins: 3.2.1-66

A list of bug fixes is provided as well as descriptions of limitations and known problems.

These release notes are available on the Paragon Active Assurance Documentation Web page at [https://www.juniper.net/documentation/product/en\\_US/paragon-active-assurance](https://www.juniper.net/documentation/product/en_US/paragon-active-assurance).

## General Notes

Please note that not all features of Paragon Active Assurance are available to every customer; rather, availability is dependent on what product or service has been purchased.

## New and Changed Features

None

# Deprecated Features

None

## Known Issues

- Metrics data from SIP tests and monitors will neither be sent out via the Streaming API nor be stored in TimescaleDB.
- After you create a new account, it may happen that some Test Agent Application plugins are not detected as enabled when you try to use them, although they are shown as enabled in the plugin service. The corresponding measurement tasks will then fail on the Test Agent Application. (The Test Agent Appliance is not affected by this issue.)

The workaround to get the plugins working again is to run:

```
systemctl restart netrounds-plugin.service
```

## Resolved Issues

### IN THIS SECTION

- [Control Center | 3](#)
- [Metrics-related | 3](#)
- [Test Agent | 3](#)

This section lists limitations that are resolved with this release. The priority of each issue is also indicated.

## Control Center

- CCC-258 Problems sending some SNMP alarms. (P2 – High)
- CCC-282 Junos TWAMP not allowed by default license after upgrade to 3.2.0. (P2 – High)
- CCC-257 Templates under "My Templates" could not be shared (no share link present). (P3 – Medium)

## Metrics-related

None

## Test Agent

None
