# Introduction

Paragon Active Assurance is a programmable test and service assurance solution using software-based and traffic-generating Test Agents, easily used and delivered from the cloud as a SaaS solution or deployed on-premise in NFV environments.

These release notes accompany Release 3.2.2 of the Paragon Active Assurance Test Agent. This release is a bug fix release and therefore does not contain any new features. A list of bug fixes is provided as well as descriptions of limitations and known problems.

The scope of this release is limited to Test Agent Appliance.

Build number: Test Agent Appliance 3.2.2.19

These release notes are available on the Paragon Active Assurance Documentation Web page at [https://www.juniper.net/documentation/product/en\\_US/paragon-active-assurance](https://www.juniper.net/documentation/product/en_US/paragon-active-assurance).
