## YEAR 2000 NOTICE

Juniper Networks hardware and software products are Year 2000 compliant. Junos OS has no known time-related limitations through the year 2038. However, the NTP application is known to have some difficulty in the year 2036.

## END USER LICENSE AGREEMENT

The Juniper Networks product that is the subject of this technical documentation consists of (or is intended for use with) Juniper Networks software. Use of such software is subject to the terms and conditions of the End User License Agreement ("EULA") posted at <https://support.juniper.net/support/eula/>. By downloading, installing or using such software, you agree to the terms and conditions of that EULA.

# Juniper Paragon Automation 2.3.0 Supported Hardware

## IN THIS SECTION

- Supported Juniper Networks Devices | 2
- Supported Cisco Systems Devices | 5

This topic lists the devices that can be managed by using Juniper Paragon Automation.

### Supported Juniper Networks Devices

This section lists the Juniper Networks routers and switches that can be managed by using Juniper Paragon Automation.

### Supported Juniper Network Routers

Use the links in [Table 1 on page 2](#) for more information about supported Juniper Networks routers.

**Table 1: Supported Juniper Network Routers**

| Routers   | Datasheet                                            | Quick Start Guide                                                      | Hardware Guide                                            |

## Supported Cisco Systems Devices

The following Cisco Systems devices can be managed by using Juniper Paragon Automation:

- Cisco Network Convergence System 57C3 (Cisco NCS 57C3)
- Cisco Network Convergence System 5504 (Cisco NCS 5504)

- Cisco 8202 Router
- Cisco IOS XRv Router
- Cisco Aggregation Services Routers 9902 (Cisco ASR9902)
