

Preparing the SRX 210 Services Gateway for Wall-Mount Installation

You can mount an SRX 210 services gateway on a wall. The four rubber feet attached to the chassis provide stability.

Before mounting an SRX 210 services gateway on a wall:

- Verify that the site meets the requirements described in Site Preparation Checklist for the SRX 210 Services Gateway.
- Remove the services gateway chassis from the shipping carton. For unpacking instructions, see Unpacking the SRX 210 Services Gateway.
- Verify that you have the following parts available in your wall-mounting kit for the SRX 210 services gateway:
 - Wall-mounting brackets
 - Screws

NOTE: The wall-mounting kit is not shipped with the device.
