

JCS 1200 Cabinet Size and Clearance Requirements

The minimum size cabinet that can accommodate the JCS 1200 platform is 600 mm wide and 800 mm deep. A cabinet larger than the minimum requirement provides better airflow and reduces the chance of overheating. To accommodate a single JCS 1200 platform, the cabinet must be at least 12 U (21 in. (53.34 cm)) high.

The minimum front and rear clearance requirements depend on the mounting configuration you choose. The minimum total clearance inside the cabinet is 30.70 in. between the inside of the front door and the inside of the rear door.

NOTE: If you mount the JCS 1200 platform in a cabinet, be sure that sufficient room is provided for cable management and cables.
