

Listing the SRX 210 Services Gateway and Component Details with the CLI

Before contacting Juniper Networks to request an RMA, you must find the serial number on the SRX 210 services gateway or component.

To list all of the SRX 210 services gateway components and their serial numbers, enter the following command-line interface (CLI) command:

```
user@host> show chassis hardware
Hardware inventory:
Item Version Part number Serial number Description
Chassis 015810200500 J6350
Midplane REV 00 710-012339
System IO REV 00 710-012315 JX350 System IO
Routing Engine REV 00 710-012151 RE-J6350-3400
HW crypto Crypto accelerator
FPC 0 FPC
PIC 0 4x GE Base
PIC
```

NOTE: In the `show chassis hardware` command, the Mini-Physical Interface Module (Mini-PIM) slot number is reported as an FPC number, and the Mini-PIM number (always 0) is reported as the PIC number.

Most components also have a serial number ID label attached to the component body.
