

## EX 3200 Switch—Rear-Panel Description

The rear panel of the EX 3200 switch consists of the following components:

- Protective earthing terminal
- Temperature shutdown LED
- Management Ethernet port
- Console port
- USB port
- ESD point
- Fan tray
- External redundant power supply connector
- Power supply

Figure 1 on page 1 shows the rear panel of an EX 3200 switch with a 320 W power supply. All switches in the EX 3200 series have the same rear panel. The 320 W power supply is flush with the chassis. The 600 W power supply and 930 W power supply extend out of the chassis by 2.25 inches. The power cord retainer clips extend out of the power supply by 3 inches.
