

EX 3200 Switch—Front-Panel Description

The front panel of the EX 3200 switch consists of the following components:

- 10/100/1000 Gigabit Ethernet ports, some or all of which are enabled for Power over Ethernet (PoE)
- Uplink module ports—SFP or XFP ports
- LCD panel and the LCD navigation buttons
- Front-panel LEDs

Figure 1 on page 1 shows the front panel of an EX 3200 switch with 48 Gigabit Ethernet ports. Figure 2 on page 1 shows the front panel of an EX 3200 with 24 Gigabit Ethernet ports. Models are available that have either all ports equipped for Power over Ethernet (PoE) or only 8 ports equipped for PoE. All ports have 10/100/1000 Base-T Gigabit Ethernet connectors.
