

Examples: Deactivating and Reactivating Statements and Identifiers in a JUNOS Configuration

Deactivate an interface in the configuration:

```
[edit interfaces]
user@host# show
at-5/2/0 {
  traceoptions {
    traceflag all;
  }
  atm-options {
    vpi 0 maximum-vcs 256;
  }
  unit 0 {
    ...
  }
}
[edit interfaces]
user@host# deactivate at-5/2/0
[edit interfaces]
user@host# show
inactive: at-5/2/0 {
  traceoptions {
    traceflag all;
  }
  ...
}
}
```

Reactivate the interface:

```
[edit interfaces]
user@host# activate at-5/2/0
[edit interfaces]
user@host# show
at-5/2/0 {
  traceoptions {
    traceflag all;
  }
  ...
}
```
