

Example: Exporting Direct Routes Into IS-IS

Export direct routes into IS-IS for all interfaces, even if IS-IS is not configured on an interface.

```
[edit]
protocols {
  isis {
    export direct-routes;
  }
}
policy-options {
  policy-statement direct-routes {
    from protocol direct;
    then accept;
  }
}
```
