

dls w

Syntax dls w {
 destination *mac-address* priority-cost *priority*;
 peer *ip-address* priority-cost *priority*;
}

Hierarchy Level [edit interfaces *interface-name* unit *logical-unit-number* family llc2 redundancy-group *group-number* track],
[edit logical-systems *logical-system-name* interfaces *interface-name* unit *logical-unit-number* family llc2 redundancy-group *group-number* track]

Release Information Statement introduced in JUNOS Release 7.5.

Description For J Series Services Routers only. For Ethernet interfaces configured for DLSw, enable tracking options for a remote peer or destination MAC address.

The statements are explained separately.

Usage Guidelines See Configuring DLSw Ethernet Redundancy Using LLC2 Properties.

Required Privilege Level interface—To view this statement in the configuration.
interface-control—To add this statement to the configuration.
