

## ieee-802.1 (Dynamic Classifiers)

---

<b>Syntax</b>	ieee-802.1 ( <i>classifier-name</i>   default) vlan-tag (inner   outer);
<b>Hierarchy Level</b>	[edit dynamic-profiles <i>profile-name</i> class-of-service interfaces <i>interface-name</i> unit <i>logical-unit-number</i> classifiers]
<b>Release Information</b>	Statement introduced in JUNOS Release 10.1.
<b>Description</b>	Apply an IEEE-802.1 classifier to a subscriber interface in a dynamic profile.
<b>Options</b>	<p><i>classifier-name</i>—Name of a classifier mapping configured at the [edit class-of-service classifier ieee-802.1] hierarchy level.</p> <p>default—The default mapping.</p> <p>The remaining statement is explained separately.</p>
<b>Required Privilege Level</b>	<p>interface—To view this statement in the configuration.</p> <p>interface-control—To add this statement to the configuration.</p>
