

no-local-switching

Syntax no-local-switching;

Hierarchy Level [edit bridge-domains *bridge-domain-name*]

Release Information Statement introduced in JUNOS Release 8.5.

Description Prevents CE devices from communicating directly with each other. If the `no-local-switching` statement is configured, frames arriving on a CE interface are sent to a VPLS edge (VE) device or core-facing interfaces only.

Required Privilege Level routing—To view this statement in the configuration.
routing-control—To add this statement to the configuration.
