

ppm

Syntax ppm {
 centralized;
}

Hierarchy Level [edit protocols lacp]

Release Information Statement introduced in JUNOS Release 10.2 for EX Series switches.

Description Configure periodic process packet management (PPM) processing options for Link Aggregation Control Protocol (LACP) packets.

This statement configures PPM processing options for only LACP packets. You can disable distributed PPM processing for all packets that use PPM and run all PPM processing on the Routing Engine by configuring the **no-delegate-processing** statement in the [edit routing-options ppm] hierarchy.

The remaining statement is explained separately.

Default Distributed PPM processing is enabled for all packets that use PPM.

Required Privilege Level routing—To view this statement in the configuration.
routing-control—To add this statement to the configuration.
