

source (Op Scripts)

Syntax `source url;`

Hierarchy Level [edit system scripts op file *filename*]

Release Information Statement introduced in JUNOS Release 7.6.

Description For JUNOS Software op scripts, specify the location of the source file for an enabled script located in the `/var/db/scripts/op` directory. When you include the **refresh** statement at the same hierarchy level, the local copy is overwritten by the version stored at the specified URL.

Options *url*—Master source file for an op script specified as an HTTP URL, FTP URL, or scp-style remote file specification.

Required Privilege Level maintenance—To view this statement in the configuration.
maintenance-control—To add this statement to the configuration.
