

Configuration Management Notifications

JUNOS Software generates the following traps when a configuration or a rescue configuration event occurs:

- `jnxCmCfgChange`, whose object identifier is `{jnxCmNotificationsPrefix 1}`, contains `jnxCmCfgChgEventTime`, `jnxCmCfgChgEventDate`, `jnxCmCfgChgEventSource`, `jnxCmCfgChgEventUser`, and `jnxCmCfgChgEventLog`.

NOTE: Because configuration rollback is handled by the master management process that uses the root user ID, the `jnxCmCfgChgEventUser` object in the `jnxCmCfgChange` trap always returns `root` as the user name for configuration rollback events.

- `jnxCmRescueChange`, whose object identifier is `{jnxCmNotificationsPrefix 2}`, contains `jnxCmRescueChgTime`, `jnxCmRescueChgDate`, `jnxCmRescueChgSource`, `jnxCmRescueChgUser`, and `jnxCmRescueChgState`.
