

## Remote System Access Operational Mode Commands

---

Table 1 summarizes the command-line interface (CLI) commands you can use to access remote systems. Commands are listed in alphabetical order.

**Table 1: Remote System Access Operational Mode Commands**

| Task                                       | Command |
|--|---------|
| Open an SSH connection to a remote system. | ssh     |
| Open a telnet session to a remote system.  | telnet  |

**NOTE:** To configure SSH and Telnet parameters, see the *JUNOS System Basics Configuration Guide*.
