

Applying the Firewall Filter to Customer Interfaces

You apply an MF classifier firewall filter for IPv6 to customer interfaces. To apply an MF classifier firewall filter on customer-facing links, apply the classifier as an input filter at the [edit interfaces] hierarchy level.

```
[edit interfaces]
so-0/0/1 {
  unit 0 {
    family inet {
      address 192.168.54.1/24;
    }
    family inet6 {
      filter {
        input mf-classifier;
      }
      address 0:0:FFFF:192.168.54.1/120;
    }
  }
}
```
