

Configuring Layer 2 Circuit and Layer 2 VPN Pseudowires

ATM Layer 2 circuit and Layer 2 VPN pseudowires are configured using the same syntax described for ATM2 PICs:

```
protocols {
  # MPLS and routing configuration omitted for brevity.
  l2circuit {
    neighbor 10.255.245.1 { # loopback address on remote router
      interface at-0/0/0.0 { # Circuit Emulation PIC ATM interface configured for CCC
        virtual-circuit-id 100;
      }
    }
  }
}
```
