

Rename a File on a Router

Action To rename a file on the local router, use the following CLI operational mode command:

```
user@host> file rename source destination
```

Sample Output user@host> **file list /var/tmp**
dcd.core
rpd.core
snmpd.core

```
user@host> file rename /var/tmp/dcd.core /var/tmp/dcd.core.990413  
user@host> file list /var/tmp  
dcd.core.990413  
rpd.core  
snmpd.core
```

Meaning The sample output shows that the dcd.core file was renamed to dcd.core.990413. The original name of the file is the *source* and the new name for the file is the *destination*.
