Revision History

Introduction

Security Director Insights facilitates automated security operations. It enables you to take effective automated actions on security events from Juniper Networks security products. The events that affect a host or events that are impacted by a particular threat source are presented by Security Director Insights from different security modules. These events provide instantaneous information about the extent and stage of an attack. Security Director Insights also detects the hosts and servers under attack by analyzing events that are not severe enough to block. The application contains an option to verify the incidents using your trusted threat intelligence providers. After you have verified the incidents, you can take preventive and remedial actions using the rich capabilities of our security products.

New Features and Enhancements

New Features in Security Director Insights 26.1R1

There are no new features or enhancements to existing features in Security Director Insights Release 26.1R1.

Product Compatibility

This section describes the supported hardware and software versions for Security Director Insights. For Security Director requirements, see [Security Director 26.1 Release Notes](#).

Supported Software Versions

Security Director Insights is supported only on specific software versions mentioned in [Table 1 on page 3](#).

Table 1: Supported Software Versions

Security Director Insights Version	Compatible with Junos Space Network Management Version	Compatible with Junos Space Security Director Version
Security Director Insights 26.1R1	Junos Space Network Management Platform 26.1	Security Director 26.1

NOTE: You must set the same time zones for Security Director and Security Director Insights and synchronize the time.

VM Specification

Security Director Insights recommend VMware ESXi Server version 7.0 or later to support a VM with the following initial configuration:

- 12 CPUs
- 24-GB RAM
- 1.2-TB disk space

For minimum and supported configurations for smaller deployments, refer to [Security Director Insights Log Collector](#).

Supported Browser Versions

Security Director and Juniper Security Director Insights are best viewed in the following browsers.

- Mozilla Firefox
- Google Chrome

Installation and Upgrade Instructions

For more information about installing Security Director Insights, see [Deploy and Configure Security Director Insights](#).

For more information about installing Security Director Insights with KVM, see [Install Security Director Insights with KVM](#).

For information about upgrading Security Director Insights, see [Upgrade Security Director Insights](#).

Known Issues in Security Director Insights Release 26.1R1

The following is the known issue in Security Director Insights Release 26.1R1.

To prevent service disruption during upgrade, the log collector must be enabled at least once prior to starting the upgrade process. If you do not intend to use the log collector after the upgrade, you may disable it again once the upgrade is complete.

Resolved Issues

This section lists the issues fixed in Junos Space Security Director Release 26.1R1:

For the most complete and latest information about resolved issues, use the Juniper Networks online [Junos Problem Report Search](#) application.

After completing a successful Security Director Insights Policy Enforcer enrolment, the associated feed source does not download as expected. [PR1956490](#)
