

# ACTIVATE YOUR STRM SERIES DEVICE

This document briefly describes how to use your Juniper Networks Authorization Code to generate a license activation key for your Juniper Networks STRM Series Security Threat Response Managers.

## Four Easy Steps to Activate Your Juniper Networks Products

1. Gather your Authorization Code and Device Serial Number.
 

**Authorization Code:** The 16-digit alphanumeric Authorization Code is sent in response to your order and is required to generate the license activation key for your STRM Series appliance. The Authorization Code is required to generate your license key—it is not the actual license key.

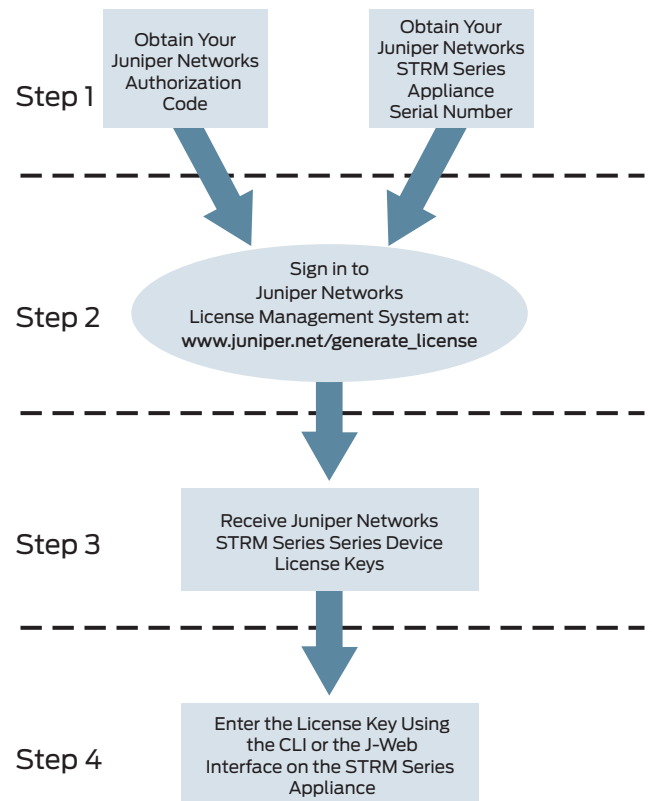

**Device Serial Number:** The device serial number is a unique 16-digit character code used to identify your STRM Series appliance when generating license keys. You can find the STRM Series appliance serial number on the back of the device or by executing the “dmidecode,” command at the command-line interface (CLI).
2. Sign in to the Juniper Networks License Management System at [www.juniper.net/generate\\_license](http://www.juniper.net/generate_license), select the Security Threat Response Manager (STRM Series) link, and follow the instructions in the system user interface.
3. The Juniper License Management System provides you with your license key in one of two ways:
  - Download your license key to your computer from the Juniper Networks License Management System.
  - You receive an email that contains the license key.
4. **On the STRM Series Appliance:**

**CLI:** request system license add terminal > Press Enter > When prompted, type the license key separating multiple license keys with a blank line > Ctrl-D.

**J-Web Interface:** Click **Maintain > Licenses** and enter the license key in one of the following ways:

  - Under System Management look for License column and click on 'Valid' link.
  - In 'Current License Details' look for 'New License Key File' and 'Browse' for the license key file.
  - Click **SAVE**.

### Obtaining and Activating License Keys

For detailed information about license key types, generating a new license key, and upgrading existing license keys, see the [Security Threat Response Manager Administration Guide](#).

For additional assistance, you may contact Juniper Networks Customer Care at +1-888-314-5822 (United States) or +1-408-936-1572 (outside the United States). Alternately, you may also open a case online via the Juniper Customer Support Center (CSC) Case Manager.
