

ACTIVATE YOUR ISM200 INTEGRATED SERVICES MODULE FOR THE J SERIES

This document briefly describes how to use your Juniper Networks Authorization Code to generate a license key for the Juniper Networks ISM200 Integrated Services Module for your Juniper Networks J Series Services Router.

Four Easy Steps to Activate Your Juniper Networks License Key

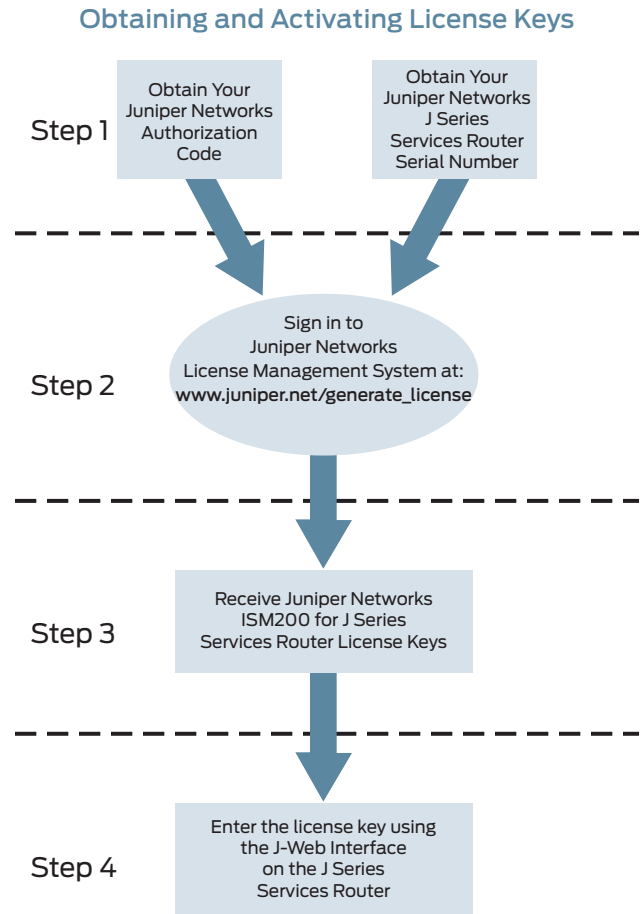

1. Gather your Authorization Code and Device Serial Number.

Authorization Code: The 16-digit alphanumeric Authorization Code is sent via email in response to your order and is required to generate the license key for the ISM200 for your J Series Services Router. The Authorization Code is required to generate your license key – it is not the actual license key.

Device Serial Number: The device serial number you will use for the ISM200 is the J Series serial number. This serial number is a unique 10-character code used to identify your J Series Services Router when generating license keys. You can find the J Series device serial number on the back of the device or by executing the “show chassis hardware” command at the Juniper Networks Junos® software command-line interface (CLI).
2. Sign in to the Juniper Networks License Management System at www.juniper.net/generate_license, select the J Series and Integrated Services Module link, and follow the instructions in the system user interface.
3. The Juniper License Management System provides you with your license key in one of two ways:
 - Download your license key to your computer from the Juniper Networks License Management System.
 - You receive an email that contains the license key.
4. On the J Series Services Router:

J-Web Interface: Click **Configuration > Quick Configuration > WAN Acceleration > Manage** and then click License Key:

 - Copy the license key text, and paste it into the License Key Text box.
 - Click **Submit**.

For detailed information about license key types, generating a new license key, and upgrading existing license keys, see the [ISM200 Integrated Services Module for J Series Administration Guide](#).

For additional assistance, you may contact Juniper Networks Customer Care at +1-888-314-5822 (United States) or +1-408-936-1572 (outside the United States). Alternately, you may also open a case online via the Juniper Customer Support Center (CSC) Case Manager.
